The Concerns-Based Adoption Model (CBAM), a representation of the process by which an educational institution adopts an innovation, views adoption as a developmental process involving complex interaction between an adopting institution, a user system, and a resource system. The resource system is usually a formal organization whose expert knowledge of the innovation is available to the user system. This interaction, called collaborative linkage, is ideally characterized by open communication, which allows the resource system to assess the individual user's needs and concerns, and to select personalized intervention strategies based on this assessment. It is hypothesized that there are different, identifiable stages of concern about, and levels of use of an innovation. The user system's advancement to higher levels of use and concern is a developmental process. The intervention strategies of the resource system are aimed at answering the user's concerns, arousing higher concerns, and thereby advancing the level of use of the innovation. (Author)

**A Report on the Status of Teacher Evaluation Programs in Connecticut 1974-1975.**

Connecticut State Dept. of Education, Hartford.; Connecticut Univ., Storrs. Educational Resources and Development Center.

Pub Date Mar 75

Note—128p.

EDRS Price MF-\$0.76 HC-\$6.97 Plus Postage

Descriptors—\*Educational Legislation, Educational Programs, Evaluation Methods, \*State Departments of Education, \*Teacher Evaluation

Identifiers—\*Connecticut

This progress report on the first year of the Teacher Evaluation Act in Connecticut contains four sections, the first of which provides a broad perspective of the process for implementation of the Act and describes how that process was developed. The second section discusses the forms sent to and completed by the school districts and teacher organizations. These forms concerned how teacher evaluation procedures were

being utilized, how the guidelines for the Act were being met, and what the plans for implementation of the guidelines were. The next section lists a number of general observations regarding the implementation of guidelines for the Act which are drawn from an analysis of the data provided by the forms. The final section lists recommendations based on a review of the findings and observations. Several appendixes are attached which contain the Teacher Evaluation Act and guidelines, progress report forms, and criteria for evaluation of plans. (RC)

**Descriptors—**\*Behavior Patterns, \*Educational Coordination, \*Group Behavior, Group Dynamics, Group Experience, Inservice Teacher Education, \*Interaction, Interaction Process Analysis, \*Interinstitutional Cooperation, Leadership

**Identifiers—**\*Collaboration

The Collaboration Model Project Council, at the University of Florida, represents an attempt to establish interinstitutional collaboration among (1) a university and two community colleges, (2) three county public school systems, (3) the teachers' associations of three counties, (4) community parents and citizens of three counties, and (5) college students involved in teacher preparation. The purpose of the council is to provide input into decisions made concerning inservice teacher education and staff development. A systematic observational study of the council was undertaken to analyze its operations. Findings revealed that the tempo of the meetings was controlled by the project director, and that patterns of interaction developed among members of the council. These patterns represented regularized exchanges of verbal behavior, sequencing of activity, and the use of space. Leadership of the council was also found in the project director. Next in line were three or four council members who tended to take prominent roles in discussion and decision making. In conjunction with its more general interaction patterns, informal groups made up of those members who interacted regularly apart from the formal setting, formed within the council. It is through these structures and behavior patterns that individual members taught themselves how to fit into the operation of the council. (RC)

**Educational Media Competencies for Future Secondary School Teachers: A Comparative Study of Views Held by Secondary School Principals and Academicians.**

Nova Univ., Fort Lauderdale, Fla.

Pub Date 12 Jul 74

Note—39p.; A practicum presented to Nova University in partial fulfillment of the requirements for the Degree of Doctor of Education (Nova University, July 12, 1974)

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors—**\*Education Courses, Instructional Innovation, \*Instructional Media, Practicums, \*Questionnaires, Secondary Education, \*Secondary School Teachers, Surveys, \*Teacher Education, Teaching Skills

The purpose of this study was to obtain evidence that a formal course in educational media should be required of all secondary education students at Trenton State College. In order to obtain this evidence, a questionnaire was sent to 324 public secondary school principals in New Jersey and 220 academicians at Trenton State College. Sixty-eight percent of the principals and thirty-five percent of the academicians surveyed returned the questionnaire. The questionnaire asked the subjects to rate seven educational media competencies according to their importance for secondary school teachers on a scale of 1 to 5. From eight academic approaches listed on the questionnaire, the subjects were also asked to indicate the approach they viewed as best for the development of the seven educational media

competencies in secondary school teachers. It was concluded from the findings of this study that secondary school principals and academicians place "great importance" on the seven educational media competencies, and that they view a three-credit introductory course in educational media as the best academic approach for the development of educational media competencies in secondary school teachers. **Identifiers—**\*Student National Education Association

This booklet is the result of a partnership project between the Student National Education Association (NEA) and the NEA Division of Instruction and Professional Development. It attempts to provide Student NEA members with background information about accreditation and certification in teacher education so that they can take action to make changes in teacher education programs. It provides an understanding of (1) the purpose of accreditation and the organizations involved in accreditation; (2) how these state, regional, and national associations are organized and operate; and (3) how they are interrelated. It also deals with the role of the teaching profession in accreditation, the problems and issues involved in accreditation of teacher education programs, and criticisms of the accreditation process. Finally, it explains how to become involved in organizations concerned with accreditation in order to make changes in teacher preparation programs. (BD)

The purpose of this proposed study is to define and describe what school is, to examine the events that occur within schools and the meaning these events have for those in the school and its community. It will be composed of the following substudies: (1) curriculum, (2) global education, (3) art, (4) affective, (5) social system of the school staff, (6) social system of the classroom, and (7) school-community relations. The general purpose of the curriculum substudy is to determine what "curriculum" is from a variety of perspectives within the sample of schools. The global education substudy will be conducted to see what is being done in the nation's schools to develop a global perspective. The art substudy will attempt to identify existing methods and content of instruction in the arts, and to compare and contrast these with exemplary programs. The affective substudy was created to gather and analyze data which could provide insights into what is actually happening to children affectively in schools. The purpose of the social system of the school staff substudy is to look at the school as a place where adults interact with one another to produce the school setting, while the substudy on the social system of the classroom will investigate the relationship of teacher leadership to pupil productivity, morale, and compliance. Finally, the school-

community relations substudy will attempt to characterize the nature of the relationship that exists between the school and its community. (RC)

**Indicators of Competence for Secondary Student Teachers at the University of Houston (Main Campus).**

Pub Date 75

Note—25p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors—**\*Behavioral Objectives, Higher Education, \*Performance Based Teacher Education, \*Performance Criteria, Performance Factors, Student Behavior, Student Teachers, \*Student Teaching, \*Teacher Behavior

**Identifiers—**\*University of Houston

This report defines 16 designated program competencies of the University of Houston's competency based teacher preparation program and then lists the indicators of each competency. The indicators are separated into three categories, which include (1) behavior of student teachers before or after class, (2) behavior of student teachers during class, and (3) behavior of students during class. The identification of indicators was deemed necessary to ensure that the teacher preparation program was competency based. (MK)

**Relationships Between Components of Speed, Accuracy, and Fencing Success.**

Pub Date 75

Note—10p.; Paper presented at the Annual Meeting of the American Alliance for Health, Physical Education, and Recreation (1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors—**Athletics, Higher Education, Physical Activities, \*Physical Education, \*Psychomotor Skills, \*Skill Analysis

**Identifiers—**\*Fencing

The purpose of this study was to investigate the relationships between three tests which measured specific components of fencing skill and foil fencing success as determined by criterion measures derived from a round-robin tournament. The subjects were 59 women enrolled in four beginning fencing classes taught by the same instructor at the University of Iowa. The data collected included performance on a test of combined reaction-movement time, similar to the parry; a wall target test of accuracy of the thrust with the foil; and a test of speed of the advance-retreat movement. Measures of the fencing success of each subject were obtained from class round-robin tournament results, and two criterion measures were computed. The first measure was based on the touches the fencer made against opponents; the second, on both the touches made against opponents and touches scored on the fencer. Results indicated (1) that speed of the combined reaction-movement time variable had significant negative relationships with the two criterion measures of fencing success, (2) that the two criterion measures were significantly related to each other, and (3) that the wall target accuracy variable had a significant relationship with criterion 1. **A Handbook Related to Office Counseling Techniques for the College Level Sex Educator.**

Pub Date Jun 75

Note—65p.

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

**Descriptors—**\*Counseling, Counseling Effectiveness, \*Counseling Services, Counselors, Guides, \*Higher Education, Psychological Services, \*Sex Education, \*Therapy

This handbook is designed for use by the college level sex educator who attempts preventative counseling related to sexual dysfunction in an office setting. It contains a brief review of current literature related to coitus among single youth which reveals the sociopsychological context of behavior. This discussion includes incidence of coitus among single adolescents and youth, the physiological revolution, cohabitation of college students, norms and sexual behavior, theories explaining normal intercourse among single young people, anxiety associated with sexual behavior, and contraceptive behavior among sexually active

youth. The guide then examines the program of Psychological Services at the State University of New York and office counseling techniques of physicians when dealing with such specific sexual problems as orgasmic dysfunction, vaginal constriction, dyspareunia, promiscuity, impotence, and premature ejaculation. It also discusses communication and education related to sex and sexuality as means of improving sexual functioning, as well as presenting models of sex therapy which provide a background for the sex educator in counseling. A reality therapy model of counseling is developed for the educator in treating immediate causes of sexual dysfunction. A bibliography of 64 books is also included. (Author/BD)

Essential Criteria for Teacher Preparation Programs.

National Student Education Association, Washington, D. C.  
Pub Date Feb 75  
Note—15p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
Descriptors—Cooperating Teachers, \*Criteria, Educational Resources, Field Experience Programs, Methods Courses, Parent Teacher Cooperation, Student Participation, \*Teacher Education, \*Teacher Education Curriculum, Teacher Evaluation, Teacher Seminars, Teacher Workshops  
Identifiers—Student National Education Association

The Student National Education Association (Student NEA) has developed criteria for teacher preparation programs which it feels reinforce current standards, emphasize particular elements within the standards, or generate goals that require the attention or consideration of conditions viewed to be essential to students but not present in all existing programs. The association hopes that these criteria can be first disseminated for use as the established guidelines for state and local chapters of the Student NEA, next as a document for use by administrative/faculty/student units for teacher education on college campuses, and finally as accepted criteria to measure the student dimension by National Council for Accreditation of Teacher Education (NCATE) evaluation teams. This publication presents guidelines and questions for standards in the areas of (1) knowledge/theory/practice, (2) human relations, (3) field experience, (4) parent-teacher relationship, (5) student input, (6) assessment, (7) resources, (8) professionalism, and (9) professional teacher input. This volume consists of abridged reports of the 10 panels that participated in a five-day conference in Washington during the summer of 1974. The primary objective of the conference was to provide an agenda for further research and development to guide the National Institute of Education in its planning and funding over the next several years. Both by the involvement of some 100 practitioners, administrators, and researchers as panelists, and by the public debate and criticism of the panel reports, the institute aims to create a major role for the practitioner and research communities in determining the direction of government funding. The conference panels were organized around the following major points in the career of a teacher: (1) the teacher's recruitment, selection, and retention (Panel 1); (2) training and performance, as approached from various perspectives (Panels 2-6); and (3) instructional personnel utilization (Panel 7). In addition, several special problem areas for planning and research were covered by another three panels. These were the role of the teacher in new instructional systems (Panel 8), research methodology (Panel 9), and theory development

(Panel 10). Within its specific problem area, each panel refined its goal statement, outlined several approaches or overall strategies, identified potential programs within each approach, and outlined illustrative projects so far as this was appropriate and feasible. (Author/BD)

Descriptors—\*Educational Research, Effective Teaching, Job Market, Teacher Education, \*Teacher Placement, \*Teacher Qualifications, \*Teacher Recruitment, \*Teacher Selection, Teacher Supervision, Teaching, Teaching Skills  
The goal of this panel was to recommend research that would identify factors affecting recruitment, selection, and retention of teachers and means of improving these processes. The panel also attempted to plan exemplary research and development activities for devising, validating, and installing methods for improving individuals' and institutions' decisions at critical points in a teacher's career. The panel attempted to relate recruitment, selection, and retention processes to one another and to discuss their interdependency. Much of the discussion centered on the role of research in determining values and priorities which school systems place on possible educational outcomes and how school systems differ in their educational goals. The panel also discussed the effect of the job market on recruitment and selection. The panel formulated six approaches for research and development within the general area of recruitment, selection, and retention which were proposed and considered on the basis of the sequence of activities or decision points in a teaching career. These approaches were concerned with analyzing and improving methods for recruiting teachers and teacher trainees, methods for selecting teacher trainees and teachers, methods for teacher placement and orientation, and the supervision and inservice education of teachers. They also dealt with investigating the relationship of teacher preparation objectives and curriculum to teacher competency and effectiveness, and the decision-making processes underlying position changes in teaching. Descriptors—\*Classroom Communication, \*Educational Research, Effective Teaching, \*Human Relations, Interaction, \*Interaction Process Analysis, Intergroup Relations, Research Utilization, Student Teacher Relationship, Teacher Education, Teaching, \*Teaching Skills

The goal of this panel was to develop the means to improve the reliability, validity, and utility of analyses of human interaction in learning settings. Research on interaction itself, as well as its association with the variables of student learning, student characteristics, setting characteristics, and teacher education were all concerns of this panel. The panel organized its work around needs in teaching as human interaction, and proposed three research approaches based on these needs. The panel's discussion focused on these approaches as well as the organization of specific programs and projects under them. The first approach concerned research on human interaction within education settings, the goal of which was the creation of knowledge and understanding of the process of teacher-pupil and pupil-pupil interactions during teaching and learning. Research on teacher education, which builds on the knowledge developed in research on teaching as human interaction, was the second approach. The third approach dealt with issues of methodology, instrumentation, and professional communications, and focused on the special dif-

ficulties of research on teaching as human interaction. Finally, the panel emphasized the need for taking into account the ways in which teachers will adapt research-based knowledge and teaching skills to their own classrooms, students, and styles. Such adaptations will determine the validity and utility of the knowledge to be derived from research on teaching as human interaction. (BD)

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**  
Descriptors—Accountability, \*Behavioral Objectives, \*Behavioral Science Research, \*Effective Teaching, \*Preservice Education, School Community Programs, \*Teacher Education, Teacher Improvement

The goal of this panel was to improve teacher training and teaching effectiveness through applied behavior research in instructional settings. Eight approaches for achieving this goal and for organizing suggested research programs were adopted and discussed. The first of these focused on an increase in the utilization of applied behavior analysis in the preservice education of teachers. The second discussed the development of procedures for installing and maintaining effective teaching and teacher education techniques and systems in new settings. The third approach presented procedures for the development of more effective teacher performance through teacher training, and the development and improvement of existing teacher support systems. The fourth approach concerned the development, through empirical research, of systematic procedures that could be used to define the goals and objectives of educational programs. The development of a community education training program for parents was discussed in the fifth approach. The sixth focused on the development and evaluation of measures of teaching processes and outcomes. The seventh concerned developing and testing methods by which teachers and teacher-training institutions can make themselves more accountable for their performance. The last approach dealt with developing criteria for the funding of educational research which aim to ensure outcomes of direct relevance to teachers in attaining their instructional objectives. (BD)

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**  
Descriptors—Affective Behavior, \*Instructional Improvement, Research Projects, \*Skill Analysis, \*Skill Development, Teacher Behavior, \*Teaching Skills

This panel's goal was to develop the means to improve teachers' ability to perform general and specific skills of teaching within curriculum areas and student development levels. The panel focused on research to improve teacher performance of instructional skills and identified two basic approaches to this research. The first approach dealt with the identification of important teaching skills by (1) utilizing statements drawn from psychological, developmental, and pedagogical theories, as well as theories of subject matter; (2) analyzing observed teacher practice into skill components and showing the relation of these components to educational outcomes; and (3) utilizing reports of teachers and other persons concerning what they believed to be important teaching skills. The second approach dealt with the identification of training and validation procedures which demonstrate how teaching skills are related to educational outcomes. This approach looked at (1) the transferability of skills, (2) the school conditions needed to optimize maintenance of important skills, (3) the development of measures to define the effectiveness of teaching skills, and (4) the relationship of

skills possessed by individual teachers to educational outcomes. The panel identified specific programs of research and development related to each approach. Each program included descriptions of the criteria for judging the relevance of research projects within the program. (BD)

**Descriptors—**\*Applied Linguistics, \*Classroom Communication, \*Classroom Environment, \*Communication Problems, \*Communication Skills, Educational Research, Receptive Language, Second Language Learning, Student Teacher Relationship, Teaching

The goal of this panel was to develop the means to improve teachers' work on the basis of improved understanding of linguistic phenomena in school settings. The panel organized its research approaches and programs around ways in which effective communication in the classroom is different from everyday talk to which all children are enculturated, communication problems encountered when the participants come from different cultural backgrounds, and ways in which teachers' work can be improved on the basis of understandings achieved in the above research. From this, the panel formulated the following six approaches in order to meet their goal: (1) determine the rules governing classroom discourse and the relationship between classroom discourse and frame factors in the school; (2) study the acquisition by students of rules for school discourse; (3) determine ways in which differences in dialect, language style, and interactional norms affect learning in the classroom; (4) describe and analyze patterns of student-teacher communication in order to determine the effect of the social identity of the participants on ways in which teachers overtly and covertly present information; (5) specify the critical components of characteristics of natural communication situations that are necessary for the acquisition of a second language, and that will encourage native language maintenance; and (6) develop and field test materials and procedures to improve teaching, and thereby learning, on the basis of knowledge of linguistic process in classrooms. (BD)

**Descriptors—**Educational Research, Instructional Improvement, \*Role Perception, \*Teacher Attitudes, \*Teacher Behavior, \*Teacher Characteristics, Teacher Influence, \*Teacher Motivation, Teacher Role, Teaching

This panel's goal was to develop an understanding of the mental life of teachers, a research-based conception of the cognitive processes that characterize that mental life, their antecedents, and their consequences for teaching and student performance. Such cognitive processes include perception, expectancies, diagnostic judgment, prescription, and decision-making. Such an understanding can be applied in further research on teacher selection, teacher education, and the development of technological or staffing innovations congruent with ways teachers think and feel. The panel was most concerned with improving understanding of ways in which teachers cope with the demands of classroom life as a basis for the improvement of teaching. The discussion included a conceptual model for clinical information processing in teaching, an examination of the problems of teaching, and an explanation of the rationale for the seven approaches which the panel selected in order to achieve their goal. These seven approaches dealt with (1) the clinical act of

teaching; (2) perceptions, attributions, and expectations; (3) cognitive processes in selecting among instructional and organizational alternatives; (4) teacher perceptions of self, role, and teaching; (5) organizational and structural determinants of cognitive functioning in teachers; (6) development of research models; and (7) theory development. (BD)

**Descriptors—**Administrative Organization, Community Influence, \*Community Support, \*Educational Objectives, Environmental Influences, \*Instructional Staff, \*School Support, Social Influences, Teachers

The goal of this panel was to generate scientific knowledge on how the organizational, administrative, physical, personal, and social aspects of the classroom, school, district, and community support instructional personnel in reaching educational goals. A matrix was developed using locational variables (within school and outside school) and operational variables (organizational/administrative, physical, and personal/social), to contain and display five "approaches" developed by the panel. The first approach dealt with the ways in which organizational and administrative aspects of the classroom and school can support instructional personnel in attaining educational goals. The second approach was concerned with the ways in which the organizational and administrative aspects of the school district and the community affect educational personnel in reaching educational goals. The third approach was concerned with the effects on staff functioning of the physical environment of the classroom and school. The fourth approach dealt with the ways in which personal and social aspects of the classroom and school aid staff in reaching educational goals. The fifth approach was concerned with similar informal social-personal influences outside the school or classroom context. Within these five approaches, 21 programs were formulated and rated as to their priority. (BD)

**NIE Conference on Studies in Teaching; Panel 8, Personnel Roles in New Instructional Systems.**

National Inst. of Education (DHEW), Washington, D.C.

Pub Date Jul 75

Note—48p.; For related documents, see SP 009 494-504

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors—**\*Educational Research, \*Instructional Innovation, Instructional Staff, \*Instructional Systems, Professional Training, \*Staff Role, Teaching

The goal of this panel was to explore the functions and roles of all personnel involved in new instructional systems which bring to bear advances in learning research and instructional technology. Five "approaches" for achieving this goal arose out of a discussion of the many problems involved in the design and implementation of new instructional systems. The first approach involved investigating the characteristics and effects of personnel roles in the new educational systems. The second approach dealt with the training of personnel for research, development, and evaluation technologies. The third approach was concerned with personnel roles in the school system that would receive the new system and the structure and strategies by which the new systems could eventually stabilize themselves. The fourth approach is concerned with delineating the roles necessary for the operation of a newly installed system. The fifth and last approach provides for a series of programs aimed at training persons to assume roles in the emerging instructional systems. (BD)

**Descriptors—**\*Educational Research, Measurement Techniques, \*Research Design, \*Research Methodology, \*Research Problems, Teaching

This panel's goal was to improve the validity and utility of measurement, design, and analysis in research on teaching through the stimulation of new methodological knowledge and through the identification and translation of useful existing knowledge from other descriptions. This panel tried to identify as many methodological problems as possible which limit the productivity of research on teaching, and then adopted four "approaches" which it believed to be solutions that encompass all the methodological problems of research on teaching. These four approaches were (1) to develop and test new analysis and design strategies appropriate for research on teaching; (2) to increase understanding of existing measurement strategies for research on teaching and, where appropriate, develop new measurement strategies; (3) to identify, demonstrate, and disseminate methodologies from other research disciplines which appear to have merit for research on teaching; and (4) to consider the utility of standards for improving methodological practice in research on teaching. **NIE Conference on Studies in Teaching; Panel 10, Theory Development.**

National Inst. of Education (DHEW), Washington, D.C.

Pub Date May 75

Note—48p.; For related documents, see SP 009 494-503

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors—**\*Educational Research, \*Educational Theories, \*Learning Theories, \*Research Methodology, \*Teaching Identifiers—\*Theory Development

The goal of this panel was to advance the development of theory that improves understanding, prediction, and control of phenomena in the teaching process and their antecedents and consequences. The panel concentrated on the ways and means of advancing theory development in general rather than on the substantive problems of theory development in any particular area of research on teaching. Attention was, therefore, focused on four independent mechanisms that seemed to be most potent in attacking the difficulties involved in theory development. These mechanisms became "approaches" under which programs were organized. The first approach called for the establishment of one or more permanent working groups for the comparative analysis, evaluation, and integration of theoretical developments. The second approach dealt with individual programmatic theory development. Within this approach the panel identified four programs that might be supported through five-year renewable grants. In the third approach, the panel was concerned with instruction in theory development. As a final approach, the panel identified a group of individual studies aimed at five specific, delimited needs, both for promoting progress across other approach categories and for dealing with other isolated but critical issues. **Disease Control and Health Education and Promotion, 1975. Hearings Before the Subcommittee on Health of the Committee on Labor and Public Welfare United States Senate Ninety-Fourth Congress.**

Congress of the U.S., Washington, D.C. Senate Committee on Labor and Public Welfare.

Pub Date May 75

Note—1,306p.

Available from—Publications, Committee on Labor and Public Welfare, Room 4230 Dirksen Senate Office Building, Washington, D.C. 20510 (no price quoted)

**Document Not Available from EDRS**

**Descriptors—**Administration, Communicable Diseases, \*Disease Control, Diseases, Federal Legislation, \*Health, \*Health Education, Institutions, Preventive Medicine, \*Public Health, \*Public Health Legislation

The hearings cover four bills, three of which deal with revision or amendment of the Public

Health Service Act. The fourth concerns (1) the establishment of a National Health Center for Health Education; (2) health education to reduce illness and death, and to moderate self-imposed risks; and (3) consumer health education and preventive medicine. The text of each of the four bills is presented in this report. In addition to the presentation of testimony and supportive documents such as articles, publications, and communications, the document also contains appendices on disease control, and on health education and promotion. Survey by NCAA Special Committee on Length of Season.

National Collegiate Athletic Association, Shawnee Mission, Kans.

Pub Date Aug 75

Note—49p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—\*Athletic Programs, \*Athletics, Baseball, Comparative Analysis, Golf, \*Intercollegiate Programs, \*Statistical Surveys, Swimming, Tennis

Identifiers—\*National Collegiate Athletic Association

The National Collegiate Athletic Association (NCAA) Special Committee on Length of Season was established to collect data through the use of survey questionnaires from the NCAA membership so that the relationship between the data and the growing concern regarding economy in intercollegiate athletics could be assessed. This report contains the data obtained from the members who responded. The results were tabulated according to team and individual sports, and geographic divisions of NCAA membership. Included in team sports are baseball, basketball, football, ice hockey, lacrosse, soccer, volleyball, and water polo. Included in individual sports are cross country, fencing, golf, gymnastics, skiing, swimming, tennis, indoor track, outdoor track, and wrestling. The data for team sports include items on length of season, preseason practice, in season practice, out-of-season practice, size of squad, and number of coaches. The data for individual sports covers length of season, practice during the year, days away from campus, size of squad, and number of coaches. In addition, general responses for all sports are given concerning length of academic year, and the five sports in the program that demand the most time from the student. (MK)

Descriptors—Behavioral Objectives, \*Educational Accountability, Effective Teaching, \*Management by Objectives, \*Management Systems, Performance Criteria, \*Public Schools, Teacher Improvement, \*Teacher Responsibility

State and federal educational policy is increasingly directed toward the use of business management techniques to introduce more accountability into the operation of public schools and, in the process, often to hold teachers responsible for objectives over which they have little or no control. This paper examines the concept of Management by Objectives (MBO), its mixed results in the business world, recent trends in management science, and some problems associated with setting objectives for human systems. Such concerns are related to basic differences between the educational and the industrial sectors of society, and it is concluded that business management techniques such as MBO are usually inappropriate at the instructional level with teachers and students. When MBO becomes immersed in the instructional process as a rigid mixture of behaviorism and business management, it becomes increasingly difficult for teachers to discover and nurture creativity. MBO stresses conformity and lock-step learning and discourages deviation from established objectives. Although there is little supporting evidence, MBO may be used to improve the administration of a

total educational enterprise provided the unique differences between a school and a business are anticipated. (The paper includes suggested positions and strategy for local teacher associations.) (Author)

Descriptors—\*Educational Development, \*Educational Legislation, \*Educational Policy, \*Educational Research, Federal Government, \*Federal Legislation, Financial Policy

In 1867, a bill was passed by Congress establishing a department of education. The appropriations for the department were reduced almost immediately, and the status of the agency was undercut by reassigning it as an office in the Department of Interior. From 1867 to 1954, the United States Office of Education (USOE) and the federal government were bystanders in the field of educational research. The first breakthrough in federal policy toward educational research and development (R and D) came with the passage of the Cooperative Research Act in 1954. This Act authorized the commissioner of education to enter into "contracts or jointly financed cooperative arrangements with universities and colleges and state educational agencies for the conduct of research, surveys, and demonstrations in the field of education." In 1965, a second major breakthrough in educational R and D occurred with the passage of the Elementary and Secondary Education Act. The new programs brought about by the Act typified the expansionist mood of the 1960's. It was within this mood that the National Institute of Education (NIE) was established to coordinate the government's investment in R and D. Today the policy of the federal government is more comprehensive, vigorous, and supportive than any previous policy or combination of policies have been. However, there is considerable doubt about and dissatisfaction with the federal dollar investment in educational R and D in both the executive and legislative branches of the government. (Lecture questions and answers are included.) (RC)

Teacher Militancy. A Comparative Study of Ontario, Quebec and New York Teachers, 1975.

Canadian Teachers' Federation, Ottawa (Ontario).

Report No—C-75304

Pub Date Jul 75

Note—86p.

Available from—Canadian Teachers' Federation, 110 Argyle Avenue, Ottawa, Ontario K2P1B4 (no price quoted)

**EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage**

Descriptors—Collective Bargaining, \*Professional Recognition, Surveys, \*Teacher Administrator Relationship, \*Teacher Associations, Teacher Attitudes, Teacher Behavior, \*Teacher Militancy, \*Teacher Strikes

This research report on teacher militancy, published by the Canadian Teachers' Federation, seeks to ascertain the extent to which various groups of teachers are prepared to adopt militant bargaining strategies, and to identify factors which may contribute to the development of militant attitudes. The report first broadly defines militancy among teachers as "aggressive behavior and conflict-oriented strategies in (teachers') collective contacts with the centers of power and authority in education." It then goes on to discuss the problem of analyzing and describing teacher militancy in relation to several traditionally important characteristics of a professional organization, including autonomy, public commitment, personal responsibility, and suitable recognition of members' achievements. The report also discusses and considers professionalism among teachers. The major part of the report explains and discusses the structure and method of the study. The section which deals with the results of the study contains a discussion of the original

hypotheses and a general analysis of the results. The concluding observations presented and discussed stated that (1) the great majority of teachers prefer nonmilitant methods; (2) the perceived needs of the teachers focus on their professional autonomy and the recognition they receive as persons; and (3) self-fulfillment is the key to the new professionalism that is emerging. Appendixes are attached which contain comments from responding teachers, the questionnaire, and the mechanics of the survey. (BD)

Descriptors—Colleges, \*Credentials, \*Directories, \*Guides, \*Teacher Certification, Teacher Education, \*Teaching Programs, Universities

Identifiers—\*California

This directory is intended to provide general information on California requirements for teaching credentials. It serves as a source of information on institutions for individuals planning a program leading to a teaching credential and for out-of-state teachers who wish to apply for a California credential. The introduction to the directory contains an explanation of the Ryan Act (The Teacher Preparation and Licensing Law of 1970), of authorized teaching credentials, of teacher preparation and credentials not included within the Ryan Act, and a list of addresses and phone numbers for California preparation institutions. The body of the directory contains two sections dealing with approved institutional programs. The first section includes credentials programs approved under the Ryan Act. This section contains charts arranged alphabetically by institution showing both approved professional preparation programs and approved subject matter programs. In the second section, all of the programs approved under the Fisher Act are listed alphabetically by institution. Approved programs (standard elementary, standard secondary, standard early childhood teaching, etc.) and the subject majors and minors offered in each program are listed under each institution. The information contained in this directory is accurate as of July 1, 1975 and will be revised and updated annually. (BD)

Protocol Materials: A New Answer to an Old Problem?

Pub Date [74]

Note—13p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—Audiovisual Instruction, \*Behavioral Objectives, Effective Teaching, \*Protocol Materials, \*Teacher Behavior, \*Teacher Education, \*Teaching Skills, Video Tape Recordings

Protocol materials are defined as records of human behavior in either (1) unaffected or (2) selected or simulated situations. In the first definition, instruction is centered on the results of an analysis of the situation. In the second, theoretical elements provide the basis for selecting or simulating the situation. In either case, the protocol material is the major source of information for thought. The use of protocol materials is based on at least five assumptions centered around the skills which protocol materials are designed to produce in teachers. These skills are observation, diagnosis, analysis, interpretation, and theory construction. Assumption 1 is that when decisions are based on these skills teaching will be more effective. Assumption 2 is that if decisions are not based on these skills, teaching will be less effective. Assumption 3 is that hierarchical sequences of these skills can be developed and presented during instruction which will cause the learner to move from knowledge to theory-based application. Assumption 4 is that protocol materials will give the teacher a better understanding of theory. Assumption 5 is that teaching is an activity which can be subjected to careful analysis. (For each of these assumptions, one or two tasks essential to testing are mentioned.) (MK)

**Drugs and Your Safety.**

Pub Date 73

Note—32p.

Available from—Scott Foresman and Company, 1900 E. Lake Avenue, Glenview, Illinois 60025 (No price quoted)

**Document Not Available from EDRS**

**Descriptors—**\*Children, \*Drug Abuse, \*Drug Education, \*Health Education, \*Primary Education, Safety, Self Care Skills

This booklet concerning drugs and personal safety was written for children 6 to 8 years old. It raises issues in the use of drugs by first posing questions and then discussing the answers. Numerous photographs are used to illustrate each of the ideas discussed. The booklet defines drugs and explains how they can be both harmful and helpful. It also discusses taking drugs offered by other people, taking drugs without the help of an adult, sniffling glue, and taking drugs on a dare. The booklet contains questions at the end to test the child's knowledge of the material presented. It also includes a list of important ideas discussed and reading suggestions for teachers and parents. (MK)

**A Performance Based Model for Training**

**Paraprofessionals in a Teacher-Aide's Role.**

Portland State Univ., Oreg. School of Education.

Pub Date Jul 75

Note—57p.

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

**Descriptors—**\*Behavioral Objectives, Educational Programs, \*Paraprofessional School Personnel, \*Performance Based Education, \*Performance Criteria, \*Teacher Aides, Teaching Skills

This guide is a performance-based model for preparing paraprofessionals in a teacher-aide's role. It focuses on the knowledge, skills, and attitudes necessary for a teacher-aide to support a teacher's program and facilitate pupil learning. The approach presented here suggests that the effective teacher-aide has competence in the broad areas of (1) human relations, (2) instructional activities, (3) noninstructional activities, and (4) basic skills. Each of these components contains subcomponents, functions, and competencies. The basic skills component includes the subcomponents reading and mathematics. Suggested

evaluation activities and sample evaluation criteria are identified for each competency. (Author)

**A Multivariate Analysis of Selected Psychosocial Variables on the Development of Subsequent Youth Smoking Behavior.**

Spons Agency—Public Health Service (DHEW), Washington, D.C.

Pub Date 10 Oct 75

Note—24p.; Paper presented before the Research Council at the Annual Meeting of the American School Health Association (49th, Denver, Colorado, October 10, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors—**Grade 7, \*Health, \*Health Education, \*Smoking, \*Social Behavior, \*Students, Surveys, Tobacco

The purpose of this study was to identify and analyze interaction effects of selected psychosocial variables on the development of subsequent smoking behavior among youth who had originally identified themselves on a survey as never having smoked. The subjects were seventh grade students who had participated in a total of three surveys over a two year period. At the end of the two year study period, the subjects identified themselves according to their present smoking behavior as either a smoker, ex-smoker, or never smoked. The psychosocial independent variables analyzed were (1) future educational plans, (2) organized school athletic team participation, (3) time spent per week in extracurricular school group activities, (4) parental smoking behavior, (5) peer smoking behavior, (6) whether or not any relatives or friends had died of lung cancer, (7) knowledge of the Surgeon General's Report on Smoking, (8) students' own perceived future smoking behavior, and (9) parental attitude toward smoking as perceived by students. The data were analyzed by sex. Findings suggested that the interaction effects of several psychosocial variables are indicative of subsequent smoking behavior among youth. (Author/RC)

**Physical Education in New England Schools and Academies from 1789 to 1860: Concepts and Practices.**

Note—6p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors—**\*Athletic Programs, Calisthenics, Educational Development, \*Educational History, Exercise (Physiology), Military Training, \*Physical Education, \*Physical Fitness, \*Physical Recreation Programs, Private Schools, Public Schools

**Identifiers—**New England

This study traces the major programs and factors which contributed to the development of physical education in New England schools and academies between 1789 and 1860. First, the major types of physical exercise programs and the schools in which these programs operated are presented. Types of exercise programs identified include military training and exercise, gymnastics, manual training, domestic economy, calisthenics, and sports and games. Second, the major factors identified as influencing the development of physical education in New England between 1789 and 1860 are listed. They include the following: (1) concern for the health of students, (2) major contributions toward the implementation of physical education by such educators as Horace Mann, (3) influence exerted by school leaders to bring about school reforms including reforms in physical education, and (4) the inclusion, in public schools, of physical exercise programs that had been previously used in academies and private schools. In conclusion, the author states that the time period between 1789 and 1860 was one of testing various physical exercise programs as a means of providing for the healthful physical development of students, and that many of the present day physical education concepts and activities can be traced to those begun in New England during this time. Statistical Analysis, \*Transformations (Mathe-  
matics)

Identifiers—\*Commonality, Reverse Commonality

The results of an algorithm which is designed to take a set of commonality coefficients, either real or manipulated, and, if possible, produce one or more sets of regressor correlations that are consistent with them are examined. A number of different ways of resolving the higher order commonality values into their lower orders were tried and the number and nature of solutions generated from them were examined for their meaningfulness and variability. In general it was found that this could be a meaningful exercise because it allows an analyst to test his assumptions about the nature of the confounding to see if a solution can be obtained. If one cannot be obtained then his assumptions must be revised. But if one can be obtained, then he can examine them to see which kinds of variables have the greatest sensitivity to the assumptions. The resulting output also allows one to gauge the variability of regression coefficients that will satisfy the same set of commonality values and the effectiveness of the regression system. This technique called "Reverse Commonality" is best suited for an interactive computing arrangement so that an analyst can use it rapidly in a sequential manner. Since, for a large number of variables the sheer volume of commonality values become unmanageable and, since a number of different ways are available for resolving the confounding, an algorithm is needed which uniquely resolves the higher order values according to one's assumptions. Regression Analysis, Prediction, Predictor Variables,  
Statistical Analysis

Identifiers—\*Commonality

Commonality analysis is an attempt to understand the relative predictive power of the regressor variables, both individually and in combination. The squared multiple correlation is broken up into elements assigned to each individual regressor and to each possible combination of regressors. The elements have the property that the appropriate sums not only add to squared multiple correlations with all regressors, but also to the squared multiple correlation of any subset of variables, including the simple correlations. Commonality analysis may be used as a procedure to guide a stepwise regression. Commonality analysis does not tell us anything that cannot be deduced from a table of squared multiple correlations. However, commonality analysis does help us make comparisons in an organized manner. The purpose of this paper is to explore commonality procedures, to develop its properties, and to present a multivariate generalization for the explorations of commonality in a situation where there is more than one regressor. A new computer-oriented algorithm is also presented. (Author/BJG)

The Marshalltown project was created to facilitate individualized prescriptive teaching of preschool handicapped and educationally deprived children at home based upon results of the Marshalltown Behavioral Development Profile. This staff development manual aids in the identification of the skills and knowledge necessary for the home staff to function effectively with the training staff, parents, and children in the home setting. Three training stages, or sequences are emphasized. Stage I consists of familiarizing staff with program goals, philosophy, and techniques. Opportunity is provided for intensive practice in use of curriculum. Stage II consists of on job training. Stage III is an inservice stage concerning transition from a totally structured school experience to home visits accompanied by senior staff members. The manual contains a day by day training format procedure. (DEP)

The purpose of the tenth grade limited pilot  
project of the 1975-76 Michigan Educational As-  
sessment Program is to perfect instruments, test-  
ing, and reporting procedures for a future state-  
wide assessment at the tenth grade level. The  
development of assessment materials for the  
grade ten assessment program began with the  
selection of performance objectives to be mea-  
sured; the 25 reading performance objectives  
from the Communication Skills booklet were  
selected for use in item writing, and the Mathe-  
matics objectives were drawn up by representa-  
tives of the Michigan Council of Teachers of  
Mathematics. Four districts provided teachers

and specialists to write test items. A pretest was  
given from the tryout items and the final form of  
the test will depend on the pretest results. It will  
then be administered to tenth graders in volun-  
teer schools. A list of performance objective test  
items is attached. (Author/DEP)

veys, Teacher Attitudes, Teaching Skills

Identifiers—\*Dade County Public Schools

A sample of the general population of Dade  
County residents were surveyed, by interviews, by  
an independent research firm during December,  
1973 regarding educational goals, major problems  
confronting the schools and their opinions regard-  
ing certain school system programs. It was de-  
cided to refine and augment those results by sur-  
veying specific involved and informed groups re-  
garding four topics: (1) priorities of problems  
facing the school system, (2) priorities of broad  
program areas, (3) emphasis on solutions to  
problems, and (4) priorities of capital construc-  
tion needs. This survey, conducted during March,  
1975, involved 9,695 individual respondents; ap-  
proximately one-third of which indicated that  
they were parents of students presently enrolled  
in Dade County Public Schools. The respondent  
groups were: community advisory committees and  
other community or school-related groups, coun-  
ty/area administrators, elementary and secondary  
school principals and assistants, and elementary  
and secondary teachers. The degree of agreement  
between respondent groups was consistently high.  
The survey instrument, asking respondents to  
rank fifteen possible problems facing the school  
system, is included as well as the detailed survey  
results. (Author/RC)

men, Correlation, \*Grade Point Average,  
Higher Education, Multiple Regression Analy-  
sis, \*Nursing, \*Predictor Variables, Student  
Testing, Validity

This study identified variables which would  
predict first semester grade point average of  
nursing students. A variety of academic,  
psychological, and sociological data were ob-  
tained for 630 students attending three schools of  
nursing within the state of Indiana over a three-  
year period. High school grade point average,  
Nelson-Denny vocabulary scores, and student  
identification of lowest acceptable grades in  
specific courses were consistently positively cor-  
related with first semester grade point average  
across campuses and across years. Creativity  
scores and other biographical data were generally  
inconsistent predictors of first semester grade  
point average. (Author/RC)

**Identifiers**—\*Metropolitan Achievement Tests

A sizable representative subsample of the standardization group for the Metropolitan Achievement Tests participated in both the Fall and Spring standardization programs. Fall and Spring test records were matched for all such pupils and Fall-Spring "growth expectancies" were derived. Additionally, the sample was split into three subgroups based on pretest national stanine and "growth expectancies" developed separately for below-average, average, and above-average achievers. Comparison of the "growth rates" of these three groups and of the total Fall-Spring sample with the national norms were made. The resulting data seem most appropriate for test users assessing the short-term growth of non-average groups. (Author)

**Identifiers**—\*Michigan Accountability System

A response is made to a special report "An Assessment of the Michigan Accountability Program" prepared by a committee composed of Drs. Ernest House, Wendell Rivers, and Daniel Stufflebeam under contract with the Michigan Education Association (MEA) and the National

Education Association (NEA). The three-men panel was to evaluate the educational soundness and utility for Michigan of the Michigan Accountability Model with a particular focus on the assessment component. Data for this investigation were gathered by reviewing publications of the Michigan Department of Education (MDE) and interviewing various educators, citizens, MDE staff members, and representatives of various organizations. To some extent, the study produced observations and judgments without inaccuracies or emotional exhortations. However, the report contained some inaccuracies, it was not totally unbiased, and it appeared to be based on somewhat unrigorous and hurriedly-gathered information. Problem areas included observations on goals and objectives, state level leadership, testing, teacher evaluation, and the compensatory education program. (Author/DEP)

**Descriptors**—Elementary Education, \*Grade 3, \*Locus of Control, \*Student Responsibility, \*Tests

**Identifiers**—\*Intellectual Achievement Responsibility Scale

This test was adapted from the Intellectual Achievement Responsibility Scale by V.C. Crandall, Walter Katkovsky, and Vaughan C. Crandall. It is a scale for assessing children's beliefs that they, rather than external forces, are responsible for their intellectual academic successes and failures. Previous data indicates that self responsibility is established by grade three and that older girls give more self-responsible answers than older boys. This scale is designed for use with third grade children. Each of the 34 items describes a positive or negative achievement experience followed by two response alternatives: one stating that the child caused the event to happen; and one that the event occurred because of an external behavioral action of someone else in the child's environment. A score is obtained by adding all positive events for which he takes credit and all negative events for which he takes blame. The total of these two subscores gives the child's I score (intellectual achievement responsibility). (DEP)

**Identifiers**—\*Michigan Educational Assessment Program

The major concern of this report was to identify some of the problems which arise when educational accountability models are introduced into a state and to begin placing those problems within a communication context. It was suggested that there are problems created by the definition of the term "accountability", the term "assessment," the term "testing," and the equation frequently made between them. While large segments of the public can frequently agree on the desirability of "accountability," that agreement disappears when the specific operational definition of accountability is finally introduced. The experience of Michigan in its Michigan Educational Assessment Program was used as an extended example, although other states report problems similar to those of Michigan. Many of these problems were in the area of communication. (RC)

**Descriptors**—Cognitive Processes, \*Communication (Thought Transfer), Credibility, Diffusion, \*Educational Accountability, \*Information Dissemination, Learning Theories, \*Models, \*State Programs

An assumptive, theoretical, and empirical foundation for the development of a formal dissemination model to apply to the introduction of information about educational accountability programs is set forth. If a dissemination model is to be effective, the fundamental assumptions underlying it must be spelled out explicitly. Existing communication problems can often be traced to mistaken assumptions about the nature, and purpose of the communication process. The success or failure of a formal dissemination model also hinges upon identification of relevant sociological, psychological, and communication theories. A useful theory allows transcendence, at least to some extent, of the exigencies of a particular communication situation and allows prediction of the probable outcomes of a specific communicative strategy in other similar situations. Although not an inventory of research findings, certain studies are described and certain results are cited when they are perceived as bearing upon problems associated with present attempts to disseminate information about educational accountability and/or dimensions of the formal dissemination model being developed. Descriptors—Changing Attitudes, \*Communication (Thought Transfer), \*Educational Accountability, \*Information Dissemination, \*Models, News Media, Objectives, Public Opinion, Social Action, State Departments of Education, \*State Programs

Some systematic procedures are suggested that can be utilized by states as they move toward the development of educational accountability programs. Each of the steps outlined: (1) identification of the appropriate message sources, (2) specification of communication objectives, (3) analysis of relevant publics, (4) determination of particular dissemination techniques, and (5) evaluation of communication outcomes is an essential ingredient of a recipe calculated to produce maximum communication effectiveness. While each procedure is discussed serially and in detail, it must be remembered that communication within large, complex organizations is not a linear process; it is an interactive process. Careful analysis and research may help insure the eventual success of an information dissemination program about state accountability models. Some of the major questions that must be asked if a successful dissemination model is to be developed are specified. For a state department of education to be able to answer some of these questions, however, will demand the systematic collection of data that does not seem to be currently available. (RC)

Identifiers—Kriewall's Criterion Referenced Test Model, Mastery Learning Test Model (Emrick and Adams), \*Mastery Tests

The assumptions of the Criterion-Referenced Test (CRT) model proposed by Kriewall are compared to those of Emrick and Adam's Mastery-Learning (ML) model. Testing, in the context of instructional management, serves three general purposes: performance evaluation (achievement of objectives), placement (classification of students for instruction), and diagnosis of learning deficiencies. Both of the test models discussed here assess the achievement of objectives; they differ in the types of objectives for which they are best suited. Both test models have potential usefulness for making placement decisions, but only the ML model is likely to be useful in diagnosing learning deficiencies. The applicability of each model for instructional management decisions is discussed. (Author/DEP)

Identifiers—Learning Hierarchies, \*Mastery Learning Test Model (Emrick and Adams), Mastery Tests

The Mastery-Learning test model is extended. Methods for estimating prior probabilities are described. The use of an adjustment matrix to transform a probability of mastery measure and empirical methods for estimating adjustment matrix parameters are derived. Adjustment matrices are interpreted as indicators of instructional effectiveness and as evidence of the existence of learning hierarchies. Two decision variables are considered: probability of mastery for an individual and proportion in mastery for an instructional group. Discussion of the reliability, complexity, and interpretability of these decision variables and comparison with decision variables for other test models is also included. (Author/DEP)

An Identification of the Process Response to Taxonomy-Type Test Items.

Pub Date [Apr 72]

Note—8p.; Paper presented at the Annual Meeting of the American Educational Research Association (Chicago, Illinois, April, 1972)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—Cognitive Processes, Educational Objectives, High School Students, \*Item Analysis, Problem Solving, \*Response Style (Tests), \*Taxonomy, \*Test Construction, \*Testing Problems

Although methods for estimating item difficulty are abundant, little attention has been given to the psychological processes involved when a student responds to a single test item. Mastery of educational objectives is not proven when a student supplies the correct answer to items intended to test these objectives. The student's problem solving method may differ from that intended by the test writer; there is a difference between the student employing the desired process and producing the desired product. The usefulness of the Taxonomy of Educational Objectives as a guide for item writing is questioned. (BJG)

Identifiers—\*Markov Prediction Model, Mastery Learning Test Model (Emrick and Adams), Mastery Tests

A Markov model for predicting performance on criterion-referenced tests is presented. The model is expressed mathematically as a function of transition matrix, a current state vector, and a future state vector. The matrix is defined in terms of conditional probabilities, i.e., the probability of making a transition to a specific future performance state given data pertaining to the student's current performance state. Performance is expressed in terms of mastery, a theoretical construct that is defined in the paper. State vectors indicate either the probability of mastery or the degree of mastery. The current state vector can be computed from available observed criterion test scores. Three examples are included which indicate how transition matrices may be computed. An example is also provided which shows how the model can be used to predict future performance. Finally, a research application and a management application of the Markov model are mentioned. The Kentucky state plan for the collection of data concerning the cognitive, affective and psychomotor needs of school children is discussed. The plan entails: (1) identification of the needs of learners to be served, (2) determination of the criticality of the learner needs that are identified by applying judgmental values, (3) establishment of performance goals for the alleviation of critical needs and development of programs to meet these critical needs, and (4) application of measures of accountability based upon performance goals, to the progress of such programs. In this context, the Needs Assessment Study is but the first step toward comprehensive planning. This report synthesizes and displays the findings of a year spent in setting the stage, creating an awareness of the need for the effort, establishing an appropriate organizational framework, and implementing a state-wide study of learner needs. The Kentucky Educational Assessment Program is an ongoing effort to gather information regarding progress toward attainment of the educational goals for Kentucky citizens. Major emphasis is on the determination of the actual level of pupil performance in relation to desired performance. In the fourth grade, relevant information was gathered in three goal areas: (1) General Education, (2) Human Relationships, and (3) Physical and Mental Well Being. Recognizing that information attained through a statewide assessment program should be utilized for decision-making to improve educational programs, objectives, and goals, this assessment procedure was developed to be valid at three levels: local district, Educational Development District (EDD), and statewide. Regional and statewide assessment data are reported. (BJG)

The models of Thorndike, Cole, and Linn are judged to contain

operational contradictions because of their use of the wrong conditional probability within the context of the probabilistic structure. These models, deriving from a concept of group parity, are also shown to have highly objectionable practical implications. It is suggested that the use of any of these models is contraindicated and that, indeed, the very concept of culture-fair selection is unworkable. It is then suggested that the necessary level of compensatory treatment for disadvantaged persons can be guaranteed only through the formal use of an appropriate model based on the Von Neumann-Morgenstern theory of maximizing expected utility. The models of Cleary, Einhorn and Bass, Gross and Su are based on what we judge to be the correct conditional probability and are special cases of the Expected Utility Model, but each has limited applicability. Six Factors of Behavioral Cognition: Understanding Other People.

University of Southern California, Los Angeles. Dept. of Psychology.

Spons Agency—Office of Education (DHEW), Washington, D.C.

Note—46p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Aural Stimuli, \*Cognitive Processes, Factor Analysis, \*Factor Structure, High School Students, \*Intelligence Factors, \*Interpersonal Competence, Measurement Techniques, Social Relations, Test Construction, \*Tests, Test Validity, Visual Measures

Identifiers—Guilford's Structure of Intellect Model, \*Social Intelligence

It has been suggested that an educational curriculum should include training in working with people as well as with ideas. Measuring and conceptualizing "social intelligence has been difficult, however. Although the idea of social intelligence has a long history, most tests which have been proposed to measure such ability correlate highly with tests of verbal aptitude. The present study describes six factors of "behavioral cognition" or social intelligence suggested by Guilford's Structure of Intellect model. These social intelligence factors are defined by 23 tests using photographs, cartoons and other drawn materials, and tape-recorded sounds. The six behavioral-cognition factors are shown to be distinct from factors defined by 24 tests of verbal aptitude, spatial ability, and creative thinking. The 18 reference and experimental factors hypothesized and demonstrated are described and discussed. To date no similar factors, reflecting the abilities involved in understanding the feelings and intentions of others, have been reported. Supplementary materials including sample items, scoring formulas, number of parts per test, working time allowed, the correlation matrix, rotated and unrotated factor matrices and target matrix are appended. Clarification of Open Education: An Analysis of the Walberg and Thomas Scales.

Note—7p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Definitions, Educational Innovation, Item Analysis, \*Open Education, \*Rating Scales, \*Test Reviews

Identifiers—\*Walberg Thomas Scales

Walberg and Thomas (1972) have made an attempt to operationalize and validate the concept of open education. However, their conception fails to differentiate between open education and other nontraditional approaches to education, thereby lumping together a variety of different types of classrooms. In addition, their method of item selection does not include less easily observable, but nonetheless essential aspects of open education. Because of flaws in their study, caution should be taken before adopting their scales for purposes of further research. (Author)

Descriptors—\*Ability, College Students, Comparative Analysis, \*Computer Oriented Programs, Feedback, Individual Differences, Item Banks, Measurement Techniques, Memory, \*Response Style (Tests), \*Simulation, Test Construction, \*Testing, Test Reliability

Identifiers—\*Flexilevel Test

A 40-item flexilevel test and a 40-item conventional test were compared using data obtained through (1) computer-administration of the two tests to three groups of college students, and (2) monte carlo simulation of test response patterns. Results indicated the flexilevel score distribution better reflected the underlying normal distribution of ability, and that the flexilevel test had a higher paralleled-forms reliability and a higher relationship to underlying ability level than did the conventional test. The overall test-retest stability of the two tests was equivalent, but there was evidence indicating that memory effects inflated the stability of the flexilevel test scores less than that of conventional test scores. The flexilevel provided more accurate measurement at almost all ability levels, although its information function was similar in shape to that of the conventional test. However, the interpretation of differences in the level of information provided were confounded by differences in the average discriminating power of the items in the two tests. The flexilevel test also appeared to reduce random guessing behavior in comparison to the conventional test. (Author)

An Empirical Investigation of the Stability and Accuracy of Flexilevel Tests.

Pub Date [Apr 74]

Note—9p.; Paper presented at the Annual Meeting of the National Council on Measurement in Education (Chicago, Illinois, April 1974)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Ability, Comparative Analysis, \*Computer Oriented Programs, Feedback, Individual Differences, \*Response Style (Tests), Scoring, Simulation, Student Testing, \*Testing, \*Test Reliability, Test Validity

Identifiers—\*Flexilevel Test

The purpose of the present study was to empirically investigate the stability and accuracy of one suggested method for matching test difficulty to examinee ability level. Students' answers to traditional classroom tests were rescored by computer as if the examinations had been flexilevel tests. The scores thus obtained were found to correlate highly with the traditional test scores (0.8994 to 0.9478), thereby indicating that flexilevel test scores are sufficiently stable and accurate to allow their use for classroom evaluation purposes. Descriptors—\*Educational Assessment, Elementary Education, Factor Analysis, \*Grade 4, Program Development, Reading Skills, \*Reading Tests, Scoring, \*State Programs, Statistical Analysis, Test Construction, \*Testing

Identifiers—\*Oregon Statewide Assessment Program

Under contract with the Oregon State Department of Education, Educational Testing Service (ETS) assisted in the preparation of a fourth grade reading assessment test based on, or modified from, Instructional Objectives Exchange materials. ETS produced test books, answer sheets, and all required ancillary materials necessary for test distribution and administration to a sample of 104 schools, previously selected on the basis of geographic region, district wealth, and district size. Rights, Wrongs, and "Don't Know"

pupil scores were reported to schools and districts for 25 specific reading objectives and 4 grouped objectives (word attack, vocabulary, comprehension, and application). Summary statistics for schools were also prepared and distributed. A special vocabulary self-report section/score was included in both reports. At the state level, a number of item analyses were performed, and a series of weight frequency distributions prepared. A total of 4,127 pupils at 102 schools actually took the test with 299 pupils reported as absent. (Author)

Induced Response Bias on the State-Trait Anxiety Inventory.

Note—11p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Anxiety, College Students, \*Psychological Patterns, \*Response Style (Tests), Role Playing, Sex Differences, Statistical Analysis, \*Test Bias, Testing, Testing Problems, Test Reliability, \*Tests

Identifiers—Faking (Tests), \*State Trait Anxiety Inventory

Responses on both the state and trait scales of the State-Trait Anxiety (STAI) Inventory were examined under two conditions. The first condition presented a simulated real-life situation containing competitive and evaluative cues without directly suggesting faking and asked subjects to complete the STAI. After an intervening task, the STAI was readministered under standard instructions. The hypothesis that subjects would respond consistently on the A-trait scale, while demonstrating increased levels of A-state was confirmed. Results were interpreted as consistent with the distinction between trait anxiety as a relatively permanent attribute of the individual and state anxiety as a transitory characteristic which fluctuates with the environment. However, the results conflict with traditional notions of social desirability response bias, which imply that "faking good" should lead to consistent changes on both scales. There is little doubt that "faking good" can lead to distortions of scores on affective measures. However, subjects do not necessarily actually "fake good" in situations where they have no definite instructions to fake. (Author/RC)

Lipe, Gary

Interactive Test Analysis: Development, Implementation, and Evaluation.

Pub Date [Jun 75]

Note—25p.; Paper presented at the Annual Meeting of the College and University Eleven Thirty Users Group (8th, Berea, Kentucky, June 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Computer Programs, Cost Effectiveness, Data Analysis, Item Analysis, Norm Referenced Tests, Program Development, \*Scoring, Statistical Analysis, \*Testing

An interactive test analysis system was developed which interfaces a 3M DATRONICS system with a XEROX Sigma 9 computer. The computer programs were written in A Programming Language (APL). The current implementation of the program is characterized by its capability to: read responses from a DATRONIC answer sheet; allow the faculty member the option of omitting items from the analysis; check for omitted items; allow the faculty member the option of selecting specific reports; and collect descriptive statistics concerning the system performance and characteristics of the test analyzed. The complete set of reports generated by the test analysis program provide information normally included in an analysis of a norm-referenced test. The fixed costs for the test analysis system are the 3M Datronic System and the Anderson Jacobson terminal. If you assume a lease option for each component of the system then the approximate cost will be \$240 per month. This fixed cost can be allocated on the assumption of full utilization of the system with an average cost of \$1.50 per hour for a 40 hour week. When the costing formula was applied to the data base of 88 sets of tests, the average and median cost were determined to be \$8.37 and \$7.83 respectively. (Author/RC)

Note—43p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Adjustment (to Environment),  
Adolescents, \*Attitude Tests, \*Cognitive Tests,  
Correlation, Delinquent Rehabilitation,  
\*Delinquents, Males, \*Occupational Tests,  
\*Predictive Validity, Predictor Variables,  
Questionnaires, Reading Tests, Test Validity

This report explores the validity of measures for eventual use in assessing attitudinal and cognitive skills of delinquent adolescents. Ten measures of a battery along with a reading test were administered to adolescent males, 14 to 18 years of age, held in pretrial detention. The 11 tests were validated against 37 criterion variables encompassing post-detention performance outcomes in areas of social, community, and job adjustments. Criterion information was obtainable from about one-quarter of the sample who could be followed up about 6 to 11 months after release. Some descriptive characteristics were: they read at a "functionally illiterate" level; 67 percent had obtained full-time employment mostly in low paying, poor quality jobs; they adjusted fairly in terms of family and community relations, and expressed a desire to stay out of trouble. In terms of validation content, eight measures produced patterns of significant validities to support their potential for further development as guidance tools applicable to adolescent offenders. (RC)

Scaling Preference Data for Program Assignments.  
Pub Date [May 75]

Note—47p.; Paper presented at the Annual Meeting of the New England Educational Research Association (Provincetown, Massachusetts, April 30-May 4, 1975)

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Algorithms, Computer Programs,  
Curriculum Development, Flexible Scheduling,  
Grade 9, Participant Satisfaction, Rating  
Scales, \*Scheduling, School Schedules, Secondary  
Education, Statistical Analysis, Student  
Attitudes, \*Student Interests, \*Student Placement,  
Testing, \*Vocational Education

The present study devised a computerized assignment-by-preference algorithm for a ninth-grade exploratory curriculum. The problem addressed was one of maximally mapping all students into 8 of 12 vocational programs in terms of their preferences for studying each of the programs and the assignment restrictions established by the school. To minimize the errors of misplacement and produce a successful algorithm for the problem faced, it was found that a procedure had to be devised which both individually-referenced and group-referenced students' program preferences into one meaningful statistic. In general terms, this problem was one of combining bipolar data so that every plus-minus combination produced a unique scale point. The values of this latter scale made it possible to determine which students should be assigned to what programs under the criteria specified. Once all students were assigned to programs, this same scaling procedure was used to develop a sequence statistic which allowed programs to be maximally ordered for those students most likely to be affected by this variable. Twelve percent of the student body (N=440) expressed dissatisfaction with the program assignments they received. Interviews, however, revealed that most of these students misunderstood the restrictions governing assignments. (Author)

Ramaswamy, T.

Some Methodological Considerations in the Testing of Rasch Model Claims.

Note—28p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Ability, Cloze Procedure, Correlation, Hypothesis Testing, Individual Differences, \*Item Analysis, Literature Reviews, Measurement Techniques, \*Models, Prediction, Predictor Variables, Probability, Response Style (Tests), Statistical Analysis, \*Testing

Identifiers—\*Rasch Model

The Rasch item analysis model is supposed to yield norm-free estimates of ability and easiness values, but there are several possible interpretations of the nature and extent of such norm-freeness. One such interpretation was that to involve the scores of one single experimental group of testees which were embedded in four differently skewed distributions of other scores, the testees had been administered easy and hard sets of items for the verifications of person-free and item-free ability estimations. Similarly for the verifications of person-and item-free easiness estimation by the Rasch model, the study involved the formation of four differently skewed sets of items in terms of their proportion right easiness values among which the same single set of experimental items had been embedded. These four sets of items were administered to bright and dumb groups of examinees. The no-guessing and constant discrimination power assumptions of the Rasch model were respectively made to be satisfied by using the cloze test blanks as items and by removing those blanks outside a narrow range of discrimination indices. Because of the possibility that the estimation errors may critically depend on the number of ties at each raw score level making the Rasch estimates of ability and easiness statistically different from one group of examinees or set of items at each of these score levels, a linear prediction model was used with the raw pupil scores or item easiness as predictors. (Author)

Item Analysis, Measurement Techniques, \*Military Personnel, Probability, \*Questioning Techniques, \*Questionnaires, Response Mode,  
\*Response Style (Tests), Social Problems,  
\*Surveys

Identifiers—\*Forced Alternative Random Response Technique, Mail Surveys

This study tested a variation of the random response surveying strategy designed for lengthy questionnaires to be used in group administrations or mail surveys. A questionnaire was mailed to a random sample of 3,000 company grade officers divided into three groups. One group received a conventional questionnaire. The second group received a random response questionnaire (FARR-50 technique) using a 50 percent likelihood of having to respond honestly. The last group received a random response questionnaire (FARR-83 technique) using a 83.3 percent likelihood of having to respond honestly. It was found that subjects respond more honestly, i.e., with greater estimated incidence of true positive response, to sensitive questions when given a low level of protection provided by the FARR-83 technique. Rates of response and estimate levels of prevalence were higher when subjects were given some protection than when they were forced to answer the questions honestly more frequently—even though the latter afforded greater protection. (Author)

Descriptors—Child Development, Classroom Environment, \*Classroom Observation Techniques, \*Early Childhood Education, Elementary School Students, Language Develop-

ment, Models, \*Open Education, Preschool Education, Program Development, \*Program Effectiveness, \*Program Evaluation, Situational Tests, Social Relations, Student Behavior

Identifiers—Childrens Language Assessment Situational Tasks, Classroom Attitude Observation Schedule, TEEM, \*Tucson Early Education Model

The material reported here was developed as part of a systematic effort to develop techniques to evaluate the effectiveness of a nationally implemented early childhood program. The Classroom Attitude Observation Schedule technique has been implemented in a number of school districts as a means of assessing program implementation of the Tucson Early Education Model (TEEM). Teachers have found this a useful way to learn more about the effects of the program on the social functioning of children. The Children's Language Assessment-Situational Tasks represents a new direction in the assessment of children's language development at the preschool and early elementary level. The developmental program has led to the conclusion that this technique samples aspects of children's development in a valid context, and provides information for teachers which is applicable to improving the instruction of young children. Situational tasks have proven valuable in the elusive task of evaluating an innovative open classroom program. Future efforts will be directed toward other areas of the TEEM program, such as the development of cognitive skills through the cooking experience. (Author/RC)

\*Evaluation Criteria, Grading, Higher Education, \*Student Attitudes, \*Student Testing, \*Test Construction, \*Testing Problems, Test Interpretation, Test Reliability, Test Selection, Test Validity

This study surveyed 53 master's level students in two tests and measurement classes to determine if and in what fashion they had been victimized by testing and evaluation. The purpose of this activity was to acquire personal data which could be used to both dramatize and formulate criteria for the construction of classroom tests. A majority of students felt they had been victimized, and their experiences were at all educational levels—elementary and high school; undergraduate and graduate school; in the military and in higher education. These experiences illustrated procedural infringements related to validity, reliability, interpretation, and administration of tests. (Author)

Development of a Self-Report Inventory for Assessing Reactions to Program Content of a Rehabilitation Counseling Program.

Pub Date [Apr 75]

Note—11p.; Paper presented at the Annual Meeting of the New England Educational Research Association (Provincetown, Massachusetts, April 30-May 4, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Counselor Role, \*Curriculum Development, Higher Education, \*Professional Personnel, \*Questionnaires, \*Rehabilitation Counseling, Relevance (Education), Statistical Analysis, \*Task Analysis, Test Construction, Vocational Counseling

In order to assist the newly formed rehabilitation counseling program at Northeastern University in curriculum and instructional planning, a job task analysis was conducted. The sample consisted of 55 employed rehabilitation counselors in the New England region from both state agencies and rehabilitation facilities. The results of the study were in agreement with previous research on Rehabilitation Counselor Education (RCE) program content, indicating an emphasis on vocational counseling skills, community resources, and methods of client evaluation. However, contrary to previous research, the areas of job placement

and followup received relatively moderate to low ratings, suggesting that the practitioners may feel that it might be more efficient and practical to relinquish these duties to support personnel and paraprofessionals. Although the small sample size prevents any wide spread generalizations, the job task outline could be a useful tool in the curriculum and instructional planning of other newly formed RCE programs. **The Construction of Matching Tests: An Empirical Statement.**

Pub Date [Apr 75]

Note—12p.; Paper presented at the Annual Meeting of the National Council on Measurement in Education (Washington, D.C., March 31-April 2, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Academic Achievement, Cognitive Measurement, College Students, \*Comparative Analysis, \*Multiple Choice Tests, \*Response Style (Tests), \*Test Construction, \*Testing Identifiers—\*Matching Tests

Matching test (MT) construction techniques were compared. These included: (a) MT instruction that limit the number of times responses can be selected to once, rather than more than once; (2) MTs that are organized in groups of five premises, or stems, rather than in groups of ten premises; and (3) MTs designed to measure knowledge, rather than a higher-order achievement level such as comprehension or synthesis. The subjects were 196 undergraduate students enrolled in an introductory educational psychology course offered at the University of Pittsburgh. Significantly higher scores were observed for MTs organized in groups of five premises and for MTs designed to measure higher-order achievement levels. A recommendation is made to organize MTs in groups of five premises. The absence of significant interactions suggests that this recommendation may apply for MTs designed to measure either knowledge or some higher order achievement. Also, a special advantage of MTs in the assessment of partial knowledge is discussed. (Author/RC)

Descriptors—\*Cloze Procedure, Elementary Secondary Education, Guides, Item Banks, \*Multiple Choice Tests, \*Reading Comprehension, \*Reading Tests, Test Bias, \*Test Construction

Identifiers—Test Development Notebook

One of the most critical elements in the adaptation of productivity analysis to education is the adequacy of the instruments for measuring program output or achievement. Various aspects of standardized test construction make them less than desirable measures of productivity. The Test Development Notebook which the New York State Department of Education is currently developing may offer a needed alternative to standardized testing. The overall purpose of the notebook is to provide sufficient numbers of test items at various levels of difficulty so that reading development at a given level may be monitored periodically with the administration of a series of comparable test forms. The starting point for the notebook has been literal comprehension, and the work in process has two emphases: one is applying the cloze technique in testing literal comprehension; the other is systematizing the writing of multiple-choice items for literal comprehension by specifying the type of questions to be asked and establishing rules for writing them. Both approaches use readability formulas to identify the difficulty of the material. Both stress objectivity and the elimination of writer bias. (Author/RC)

Identifiers—College of the Mainland, Wolpe (Joseph)

This study is an examination of an attempt within the Adult Basic Education Department at College of the Mainland to reduce the anticipatory test fear in normal adult students preparing for the General Educational Development (GED) Test. The experiment covered a time span of 16 weeks and made application of systematic desensitization, a therapeutic technique proper to the writings and practice of Dr. Joseph Wolpe. There is no indication, from the pre-post testing of the control group, that participation in a GED preparation class or the application of the systematic desensitization technique as applied in this experiment increases or decreases either basal trait anxiety or specific academic performance anxiety. Descriptors—\*Attitude Tests, Grade 7, High School Students, Questionnaires, School Districts, \*Self Concept Tests, \*State Programs, Student Attitudes, Surveys, \*Testing Programs, \*Test Results

Identifiers—\*South Carolina, Student Survey and Attitude Inventory

The Fall 1974 South Carolina Statewide Testing Program included an achievement test; the Comprehensive Tests of Basic Skills; the Short Form Test of Academic Aptitude; and the Student Survey and Attitude Inventory (SSAI), which is the subject of this report. The SSAI was administered in November 1974 to 48,107 students. Most of South Carolina's seventh grade students and a sample of ninth and eleventh grade students participated in this phase of the program. The SSAI is an instrument which measures how students feel about themselves, other people, and the world; it is seen as having potential for examining the attitudes of students and obtaining an indication of change in their self-concept. This document contains the SSAI Form A, questionnaire results and discussion, a detailed model of the SSAI, and a computer printout report of the statewide, seventh grade student survey section of the SSAI. **Document Not Available from EDRS**

Descriptors—\*Attitude Tests, Junior High Schools, \*Questionnaires, \*Self Concept Tests, Senior High Schools

Identifiers—\*Student Survey and Attitude Inventory

This form of the Student Survey and Attitude Inventory (SSAI) used for the fall administration of the South Carolina Statewide Testing Program has two parts. The first contains a 25 question study survey which requires a total of 80 responses by the student. The questions elicit information about the students, their background, and attitudes. The second section contains 89 statements for which each respondent is asked to indicate his or her degree of agreement on a four-point scale. The inventory includes statements relating to nine different aspects of personality. These provide subscores in the areas of self-reliance, work-orientation, identity, communication skills, enlightened trust, knowledge of major roles, social commitment, openness to sociopolitical change, and tolerance of individual and cul-

tural differences. Self-concept is measured by the items in the self-reliance, work-orientation, and identity subscales, which when looked at together form the Individual Adequacy Scale. Since a mature response on some items requires a response of A, agree strongly, and on other items requires a response of D, disagree strongly, some item responses must be reversed in scoring to make it possible to score responses consistently. Descriptors—\*American Indians, Correlation, Cultural Disadvantage, Elementary Education, \*Intelligence Tests, \*Item Analysis, \*Mexican Americans, Multiple Regression Analysis, Norms, Retarded Children, Test Bias, Testing Problems, Test Reliability, Test Validity, Verbal Ability, \*Vocabulary

Identifiers—Stanford Binet LM, Wechsler Intelligence Scale for Children

Chicano and Amerindian vocabulary scale responses from the Stanford-Binet (LM) and Wechsler Intelligence Scale for Children were item-analyzed for 1,009 subjects. The response patterns differed both by ethnic group and test, as well as by age. The most common, and recurring, pattern found was "level-of-difficulty" gradient inconsistencies. The item-analysis method employed in this report was that of the covariance matrix where the sum of the matrix is the total-test's variance; vocabulary scale totals here, for both the SB-LM and the WISC. Tribes sampled were Navajo, Apache, and a group of subjects with mixed-tribal backgrounds designated "called Indian." Most of the protocols that could be analyzed on the vocabulary scales were pulled from the testing-course files at Arizona State University; other protocols were obtained from the reservations mentioned above. In the epilogue, based on the findings, it is suggested that bilingual programs similar to those being used in Texas' NIE funded program for the coming academic year be adopted for other large minority groups whose primary language is not either English or Spanish. **The Children's Interaction Matrix: Intermediate Form, Primary Form. Preliminary Manual. Research Edition 1975.**

Spons Agency—Maine Univ., Orono.

Pub Date 75

Note—63p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—Elementary Education, \*Elementary School Students, Factor Analysis, \*Group Behavior, \*Interaction, Manuals, \*Matrices, Norms, Scoring, Statistical Analysis, Test Reliability, \*Tests, Test Validity

Identifiers—\*Childrens Interaction Matrix

The Children's Interaction Matrix, Intermediate and Primary Forms, are designed to identify the preferred work and content styles of children in group situations. These factors aid the researcher, teacher, and counselor in understanding the individual's preferred mode of behavior in groups as well as indicating the students' reaction to group situations. Primarily research instruments, the tests are based on the conceptual framework of the Hill Interaction Matrix (HIM) (1965). This is a two dimensional matrix which describes a person's preferred content and work-style modes of group behavior. The tests are based on the 16 cells of the HIM. Four items were included for each cell for a total of 64 items. The original item pool of the HIM as well as the cell labels were used as criteria for development and selection of the items. Items were simplified for children in respective grade levels and were rated by judges as to their appropriateness for each cell. The response format was simplified to a two position—"Yes", "No" format for the primary form and to a three position—"Usually", "Sometimes", "Not Often" format for the intermediate form.

Besides the tests, data are provided on: reliability, validity, factor analysis, norms, scoring, and correlations. (Author/RC)

Identifiers—\*Basic Skill Centers, Elementary Secondary Education Act Title I, ESEA Title I, Gates MacGinitie Reading Test, Minnesota (Minneapolis), Stanford Achievement Test

Two Basic Skill Centers were set up in 1969 to help inner city students improve their reading skills. The centers were supported mainly by the Minneapolis Public Schools although ESEA Title I funds provided teacher aides. This report covers the fifth year's operation of the project. Substantial changes made in the centers' operations are described. The goals of the program included remediation of subskill weaknesses, achievement of functional reading levels, and raising the rate of reading growth of children in Target Area schools who were one or more years below grade level in reading. Individualized instruction was provided for 604 students from grades 4-9 from 23 schools. A multimedia approach was used which included programs used in a variety of teaching machines as well as individual instruction in related classrooms. The students, who came from Title I Target Area schools, made grade equivalent gains well above what would have been expected for average children working at the reading levels of the Gates-MacGinitie and Stanford Primary Achievement tests which were the measuring instruments. About 70 percent of the students made grade equivalent gains on the Gates Comprehension test over those expected for the pre-posttest span of six months. Two thirds of the pupils made such gains on the Stanford Word Study skills tests. (Author/RC)

Descriptors—Communication (Thought Transfer), \*Comparative Education, \*Cross Cultural Studies, Cultural Differences, Curriculum, \*Test Construction, \*Testing Problems

Identifiers—International Evaluation Educational Achievement

In developing tests for the International Association for the Evaluation of Educational Achievement (IEA) survey, methodological problems arose in three areas: curriculum, communication, and culture. Efforts to identify the core of common objectives and the penumbra of distinctive, sometimes partly shared but sometimes unique, goals operated through a system of national and international committees. Each country was given the responsibility of assembling a national committee, each having the task of preparing a national blueprint of content and process objectives that would be appropriate at the specified age or grade levels in that country. Through interaction with national and international committees, items were selected, edited, and assembled into preliminary forms for try-out. Communication was a problem in maintaining the flow of information, materials, and actions out to

the participating countries and back to the central coordinating office. In a more specific sense, communication was a problem in the domain of language and translation. Problems involved in the area of culture were semantic and in picking a set of quantitative alternatives giving good differentiation between countries. (Author/RC)

Identifiers—\*Elementary Secondary Education Act Title I, ESEA Title I, Minnesota (Minneapolis)

Self-teaching machines housed in trailer-classrooms were used for the third year to help 331 students in two Minneapolis Title I secondary schools improve their reading skills. A gain of one month or more in grade equivalents (using Gates-MacGinitie tests) for each month of attendance at the centers by at least 50 percent of the students was the specific objective of the project. In 1972-73 the program again more than achieved its goal. Test results showed that 85 percent of the 218 students with gain scores made grade equivalent gains in comprehension greater than gains expected for length of enrolment in the program. The median grade equivalent gain was +1.6 although the students had been on roll for less than half the school year. The project featured the use of TV-like teaching machines and educational materials developed by Dorsett Educational Systems. Machines were housed in two large trailers which were located at Bryant and North secondary schools. Although students operated the machines and tested their own progress at the end of each lesson, assistance was available from the certified reading teacher and paraprofessional who staffed each trailer. Financial support for this project came from Title I, ESEA. Several recommendations, including continuation of the project, were made. (Author)

Descriptors—\*Intelligence Factors, Military Personnel, Models, \*Personnel Selection, \*Task Analysis, \*Taxonomy, \*Test Selection, Test Validity

Identifiers—Guilford Structure of Intellect Model

A procedure for using Guilford's structure of the intellect as the theoretical basis for a task analysis model is presented. It is reasoned that such a model would furnish a bridge between task analysis and test selection, and also a bridge between test selection and test validation. Such a mechanism might answer some of the EEOC criticisms of psychological testing because of the inherent content validity of the technique. In addition, the technique could be used to produce task analyses of both a job and training for that job. A comparison of the structural task analyses of the job and job training would expose discrepancies where abilities not required on the job are required for training. It might be then possible to modify training to bring the abilities required for training more in line with those required for the job, thus ultimately providing a bridge between task analysis through selection to training. **Selection of a Mathematics Test for a Citywide Testing Program.**

Minneapolis Public Schools, Minn. Dept. of Research and Evaluation.

Report No.—C-72-36

Pub Date Jan 74

Note—27p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—\*Achievement Tests, \*City Wide Programs, Comparative Analysis, Elementary Education, \*Mathematics, Teacher Attitudes, \*Testing Programs, \*Test Selection

Identifiers—\*Minneapolis Public Schools

Teacher dissatisfaction with the existing math testing program in the Minneapolis Public Schools (MPS) led to the establishment of the Committee on Citywide Mathematics Testing. The committee was formed to identify tests to be used, grade levels to be tested, and testing schedules. The committee recommended that tests be given in the spring instead of the fall, as before, that tests be given in grades 3, 6, and 8, and that a pilot study be conducted by the Research and Evaluation Department to select one test for each grade from among those tests which had passed the initial screening. Five tests were under consideration at the third grade level (the SRA, the CAT, the Stanford, and the Metropolitan Form F and Primary II), four at the sixth grade level (the SRA, the CAT, the Stanford, and the Metropolitan Form F), and three tests at the eighth grade level (the SRA, the CAT, and the Stanford). The Stanford series was eliminated because testing materials could not be obtained in time for the pilot test. Each of the tests was given in three classrooms. Each teacher administering one of the tests responded to a questionnaire on the test used. Similar ratings were obtained on all the tests for: face validity, reading difficulty, cultural bias, pupil motivation, administration instructions, and interpretation instructions. Based on the limited evidence from this pilot tests, it was recommended that the SRA be selected. (Author/RC)

Identifiers—Bryant YES Center, \*Bryant Youth Educational Support Center, Elementary Secondary Education Act Title I, ESEA Title I, Minnesota (Minneapolis)

The Bryant Youth Educational Support Center (YES) was established in the fall of 1968 to meet the needs of Bryant Junior High students who were socially maladjusted and/or academically underachieving. The primary objectives of the center are to improve basic skills achievement and to modify inappropriate behavior. Approximately 50 students attend the center at one time. Most are 8th and 9th graders although several are 7th graders. The center's students made excellent progress in the basic skills area of reading and math as measured by standardized reading and math achievement tests. Similar results were made during the 1971-72 school year. The YES Center has clearly demonstrated during the past two years that low-achieving students who exhibit antisocial behavior have made good progress in basic skill subjects of reading and math. The center's typical student made vocabulary gains of 1.5 months on the Gates-MacGinitie Test and 2.0 months gain on the Stanford Word Meaning Test for each month they were in the program. On the Gates-MacGinitie Comprehension Test the students made 1.8 months gain for each month in the program. They made 2.2 months on the Stan-

ford Paragraph Meaning Tests for each month in the program. The grade equivalent gain for Arithmetic Computation was 1.8 months gain for each month in the program; for Arithmetic Concepts, 1.8; and for Arithmetic Application, 2.3 months gain for each month in the program. (Author/RC)

This report examines the plans and aspirations of high school students for their educational and vocational future and the influences having a role in shaping those decisions. This is accomplished by use of a large national sample of males and females, along with analyses that incorporate both descriptive and causal approaches. Specific priorities of student choice and the potential influences stemming from family, peers, school, and skill-achievements that shape educational and vocational decisions are described. In addition, assessment is made of the relative contributions of each of those personal-demographic characteristics and causal modes by which they are likely to exercise their impact. Not only should such information provide clues for shaping high school curricula, or individualizing courses and programs, it should also aid in guiding students along more effective educational paths through an understanding of the consequences of their decisions. Thus, a major focus of the analysis is on identifying, where feasible, the comparative differences between plans and aspirations of students enrolled in differing curricula and unique influences that impinge on such decisions for members of each group. Good Multi-Racial and Multi-Ethnic Inservice Programs for Urban Schools.

Pub Date 22 Feb 75

Note—14p.; Paper presented at the Annual Meeting of the American Association of School Administrators (107th, Dallas, Texas, February 21-24, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Administrative Principles, Administrative Problems, Decentralization, Decision Making, Educational Needs, Educational Policy, Educational Problems, \*Inservice Teacher Education, \*Intergroup Education, Race Relations, School Administration, \*School Integration, \*Urban Schools, Urban Teaching

This paper examines urban schools serving minorities, and begins by arguing that inservice development is the greatest need of the American school system, one that needs many things. The time that a teacher spends in effective inservice activity is more important for the future of pupils than the same amount of time spent with those pupils. Though the impact of formal instruction is as ineffective in an inservice program as it is in most other settings, a program of formal instruction is an integral part of inservice development. It is held that such a program should be designed to supply instruction in specific skills, attitudes, and knowledge that will complement and rein-

force the problem-solving in which staff members are engaged in their daily lives. In discussing the informal inservice climate within the school building and of the school district, the paper emphasizes the role of the principal. It is asserted that no other function gives the superintendent so much power to effect improvements in school districts as the power to appoint and assign school principals. Finally, the paper focuses on the importance of responsible problem-solving at the school building level. Four issues seen as vitally affecting instruction in multiracial and multiethnic school districts are briefly dealt with—integration, isolation, time, and collective bargaining. (Author/JM)

Identifiers—\*California

This document considers the education of Oriental Americans a dilemma, since the Oriental-American minority is reported to represent proportionately the highest educated group in the U.S., bears a pluralistic and bicultural background, and a long history of having been subjected to restrictions and exploitation in the American West. The main emphasis and the major theme of writing in the document is on education and the community, specifically Oriental American. Three minority groups, Japanese, Filipino, and Chinese (Koreans as a group for study are included only in the summary and conclusion section) living in California are examined in terms of various areas such as historicism, acculturation, contact, competition, accommodation, assimilation, the culture and the family, housing, employment, religion, and education and the dropout. A chronology of dates which lends emphasis to sequence of events is applied in some sections. The summary and conclusion section relies heavily on Arnold G. Holden's "A Typology of Individual Migration Patterns," whose typology was employed to classify the sub-groups into its eight cells. (Author/AM)

Descriptors—Books, Creative Writing, \*Disadvantaged Youth, \*Ethnic Studies, Instructional Materials, Language Arts, Media Research, \*Minority Group Children, Novels, Reading Difficulty, \*Reading Materials, Writing Exercises, \*Writing Skills

This speech, a product of the workshop on "Media: Minorities and Sex Stereotyping", is said to be intended to provide a vivid picture of how to write about minorities for minority youth from a "white" point of view. The author attributes his success in writing to the conviction that race is no factor in the dimensions of human joys and despairs, and emphasizes his responsibility toward the reader and the ethnic group written about, regardless of whether he himself is of the same ethnic group or an outsider writing about it. Various specifications said to apply to any good novel for young readers are made: length of 125 to 180 pages, a high excitement level, the use of humor

wherever possible, and utilization of mostly inner city characters, background, and setting. The characters and backgrounds used are said to be most important in the creation of minority books used to "turn-on" reluctant readers of various colors and races. (AM)

Descriptors—Black Community, \*Females, \*Ghettos, Group Structure, Income, Metropolitan Areas, \*Negroes, Networks, Social Integration, Social Organizations, Social Relations, \*Social Structure, Social Systems, \*Surveys, Urban Areas, Urban Environment, Voluntary Agencies

Identifiers—Massachusetts (Boston)

This report on ghetto social structure, surveying a sample of 120 black women from Boston, is an examination of the extent to which black urbanites maintain personal ties within the ghetto area. Nine chapters listed as follows constitute the document: social organization in the black ghetto; Boston—the city and the sample, primary social ties, voluntary associations, tertiary participation, the relationship between social integration indices, income, status, and social participation, and a summary with conclusions. The sample interviewed was said not to fit into the stereotype of the isolated ghetto dweller who has no concern for, or contact with his or her fellow residents. It pointed to the importance of both the kinship system and that of other primary ties such as friends and neighbors. Two logical and important extensions to this urban network research are said to include a study of the social networks moving out beyond the individual black respondent and her immediate circle of friends and relatives, and a controlled longitudinal mobility research study of black families in alternate housing—with an interview before the move and followed by a series of repeated interviews subsequent to the move. Descriptors—Bilingual Education, \*Compensatory Education, \*Compensatory Education Programs, Culturally Disadvantaged, Disadvantaged Youth, Economically Disadvantaged, \*Educationally Disadvantaged, Elementary Grades, Federal Aid, Federal Programs, Language Handicapped, Secondary Grades, State Aid, \*State Programs

Identifiers—\*Elementary Secondary Education Act Title I, ESEA Title I

Nineteen states are covered in this report on state compensatory education programs, examining the status of state financed compensatory education programs established during the last decade through the passage of Title I of the Elementary and Secondary Education Act. Programs discussed are stated to be limited to those designed for elementary and secondary level children with educational disadvantages caused by economic, cultural, and/or linguistic problems; programs for mentally, physically, or emotionally handicapped children are not included. The discussion is stated not to follow a standard format, due to the differences in state guidelines requirements as to the type of data to be submitted. Among the states included in the ongoing programs section are California, Connecticut, Massachusetts, Michigan, Pennsylvania, and New York. Two other chapters examine expired programs and anticipated programs, with a final chapter providing a directory of persons responsible for each of the programs discussed in this report. (Author/AM)

**Do Americans Really Like Children? Draft -- Position Paper.**

Pub Date 23 Mar 75

Note--36p.; Paper presented at the annual meeting of the American Ortho-psychiatric Association Meeting (Washington, D.C. March 23, 1975)

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**--\*American Culture, American Studies, Child Advocacy, Child Rearing, \*Children, \*Child Welfare, Civil Rights, \*Economic Change, \*Economic Climate, Economic Disadvantage, Equal Education, Family Environment, Family Involvement, Family Structure, Handicapped, Minority Group Children, Race Influences, Socioeconomic Influences

This position paper explores American underdevelopment in the area of policy formation concerning children and families. Three pressing problems believed to be faced by American children and their parents are presented and discussed. These are: (1) the depopulation of the family, said to be largely attributable to the changes, assumptions, and newly generated demands for consumption, and not to the faults of individual parents; (2) the intellectualization of the child, said to originate in the nature of the American economic system and its influence on the school systems -- quantifying, measuring, and using these measurements to perpetuate the relative positions of existing groups in the society; and, (3) the problem of perpetuation of exclusion, said to affect children characterized by the four factors of race, poverty, handicap, and parents overwhelmed by life. This last problem is discussed and explained in terms of the economic system. A final section on individual uplift and social change concludes by underlining the posited contrast between individual blame and uplift, and the need for social and economic change. (Author/AM)

**Descriptors**--\*Academic Achievement, Age, \*Dropout Characteristics, Dropout Programs, Dropout Rate, Dropout Research, \*Dropouts, Fathers, Individual Characteristics, Occupations, Regional Schools, Rural Schools, Rural Urban Differences, \*Surveys, Urban Schools, Youth Problems

**Identifiers**--\*Australia

This study presents survey data for 1971-72 on young Australian people aged 15-24 who leave school. Members of the armed forces, diplomatic personnel, the institutionalized, and those reported as permanently unable to work are not included. Data are collated on slightly less than 110,000 dropouts, and do not represent the detail sought by many concerning this population. Nine chapters, as follows, constitute the study: the enquiry and the data, age at leaving, grade at leaving, time of leaving, estimated ability and destination, and a concluding statement in which differences between sexes, between regions, between types of schools, and in father's occupation are examined. Tables appended present summaries of detailed tabulations. Among other findings, the report is said to confirm the apparent disproportion between percentages of children from professional and semi-professional homes and from semi-skilled and unskilled homes entering occupations or destinations of differing social status, or requiring different levels of education for entry and leading to different levels of living. **Educational Outcomes Associated With Ethnic Changes in School Populations.**

Milwaukee Public Schools, Wis. Dept. of Educational Research and Program Assessment.

Pub Date 1 Apr 75

Note--27p.; Paper presented at the Annual Meeting of the American Education Research Association (Washington, D.C., April 1, 1975)

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**--\*Academic Achievement, Demography, \*Ethnic Distribution, Indians, Mathematics, Migration, \*Minority Group Children, Negroes, Open Enrollment, Reading Achievement, School Integration, Spanish Americans, \*Student Distribution

**Identifiers**--Wisconsin (Milwaukee)

This document examines the data on changes in the ethnic composition of the schools in Milwaukee, and relates them to student achievement. A consideration of the relationship of ethnicity and academic achievement is said to entail six questions as follows: how ethnic proportions of pupils have changed over a ten-year period; their patterns of achievement in reading and math during an eight-year period; the relationship between percent of minority in school and reading/math achievement; whether the strength of the relationship changes with an increase in proportion of minority pupils; whether the rate of change in ethnicity affects the proportion of the relationship; and the extent to which open enrollment serves as voluntary desegregation or resegregation. Minority subgroups included American Indian, black, Asian, and Spanish-surnamed children. Findings of the study noted an increase in the number of minority pupils with a decrease of non-minority pupils in the ten-year period. Open enrollment is said to have had a slight effect in increasing segregation. Although achievement in reading and math are said to have decreased, a reduced rate of decrease had been found. A double proportion of minority students in the eight-year period had not been found to increase the strength of the relationship between proportion of minority students and achievement, and rate of change in ethnicity not found to show a stable relationship with the variable of student achievement. **Identifiers**--Crisis Situation, Indiana (Indianapolis), Project Emergency Services Research Demonstration

This final report describes a project developed to service inner-city neighborhood families in crisis by establishing a central referral services where families could go for help. A second goal is the provision of 24 hours a day, seven days a week care for children in a neighborhood based facility --which also provides other emergency forms of assistance, as required. Four sections focus on the geographical area, population of area, methodology, and a services summary describing areas such as shelter, clothing, medical, and fuel -- how they were used, and their advantages and disadvantages. Two additional summaries, providing statistical and financial data and fourteen tables, are also included. Through the coordination efforts of neighborhood agencies, organizations, and individuals, the project is said to have established and maintained neighborhood services and care for families and children effectively -- in addition to extensive record keeping for families served, and follow-up services and supplementary services such as employment, referrals, and baby-sitting. **The Language of Participation and the Language of Resistance.**

Wisconsin Univ., Madison. Inst. for Research on Poverty.

Report No--IRP-DP-265-75

Pub Date Mar 75

Note--31p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**--Authoritarianism, \*Citizen Participation, \*Conflict Resolution, Decision Making, \*Economically Disadvantaged, Institutionalized (Persons), Language Planning, \*Language Styles, Lower Class, Participant Involvement, \*Policy Formation, Socialization, Social Problems, Sociolinguistics

This paper holds that the outcomes of formal procedures between low-status groups and those in authority over them are largely symbolic or marginal in character. Language and gestures are said to define the involvement of these groups with authorities either as joint participation in policy making or as conflict. Whether a political action is perceived as either a form of participation or as a form of conflict is said to depend on linguistic and gestural categorization. This dichotomy is stated to hold far-reaching consequences for public support or opposition to regimes, and compliance with or resistance to rules. The poor are seen to lack informal sanctions that confer influence, but can threaten elites by causing disorder--a political weapon which the poor renounce on becoming politicized. Among the topics discussed are private versus public issues, politicization as co-optation, influences versus ritual, the use of disorder, the structuring of perception through politicization, intense politicization, clarification and blurring of adversary relations, and antipolitics. gitudinal Studies, \*Minority Group Children, Negroes, Public Schools, \*Socialization, Urban Environment, \*Urban Schools  
 Identifiers—Missouri (Saint Louis)

Both participant and non-participant observation were used to analyze longitudinally a single group of black ghetto children in their school, homes, and with their friends. A basic goal of the study is said to consist in accounting for the educational experience of children over time. Two beginning chapters describe public schools and American society, and the methodology of the study. A third chapter on the St. Louis public schools provides a backdrop from which is analyzed the activities of an individual classroom within the system. An introduction to the Attucks School follows, along with a description of its social and cultural milieu. Four subsequent chapters which follow are said to demonstrate the impact of teachers' expectations, initially based on a series of subjectively interpreted social criteria for both the anticipated academic potential and subsequent differential treatment accorded to students perceived as having dissimilar social status. A final chapter on black children in a public school provides a summary, conclusions, considerations for innovation (policy and programs), and the perceptions of low-income children. Appendixes and a bibliography are included. (Author/AM)

Identifiers—South Carolina (Rock Hill), \*Youth Service Agency

This final report contains an overall assessment of progress toward goals, a listing of positive and negative results, estimates of total project costs, man-years, and future, and an evaluation of the six project components for a comprehensive youth determined program in South Carolina, the Youth Service Agency. This program is said to have been established to involve youth in government and social decision-making processes in order to reduce the incidence of youth crime and delinquency and to provide employment and other self-improvements. The broad goals of the agency are said to consist of advocacy, coordination of services, and institution of new programs. Among the significant results listed are a decreased incidence of drug abuse, a raised level of youth employment, and an increased input of young persons to organizations having effect on youth. An unsuccessful resolution of the conflict between the agency's commitment to advocacy and the city's lack of desire to be associated with what were stated to be "politically sensitive" issues is listed as a negative finding or shortfall. A list of tables, exhibits, and graphs (including among others, a flow chart analysis of problems and problem causes, a summary of program approaches, and a project description) are included. Identifiers—Emergency School Assistance Program, Have A Student Help Program, Illinois (Kankakee), Mobile Learning Unit Program

This paper presents a technical progress report of two programs conducted with funds provided under the Emergency School Assistance Program. One, the Mobile Learning Unit, said to have been designed to measure changes in fourth and fifth grade students' self-concept in a reorganized desegregated school environment, focuses on whether a positive self-concept comes (1) from a decrease of academic deficiencies through remediation procedures or from a program designed to increase success identities; (2) from neither of these; or (3) from both of these treatments. Results did not support either treatment, yet the self-concept changes were stated to be encouraging. The other program consists of a telephone hotline said to have been designed to allow students who have problems to telephone a central location and receive advice and direction with some degree of anonymity. The assumption that pre-adolescents are more apt to talk to an unknown peer was proven invalid. Hotline helpers were found to be unable to relax enough to calmly discuss the caller's problems in depth. The program as operating under its present structure was not recommended for continuation. Identifiers—England

This booklet contains information about what is happening in the field of in-service training in a multi-racial society in England at the present time, as gathered by means of discussions with teachers and with those concerned with the provision of courses. A rationale for in-service training in the context of the under-achievement of children from minority ethnic groups is provided. There is also a discussion of four basic ideas agreed upon by the discussants to represent the range of present provisions: those of diversity, school oriented courses, training trainers, and resources. The booklet is also said to provide some evaluation of the differing purposes and influences of the various courses which have taken place through a presentation of five case studies. A need for diversity of provision within in-service training, and clarification of purpose and implication of each type of course are among the needs identified by the conclusions. Seven recommendations, among which is the need for interaction between school management and total staff, are made. Appendixes include those on resources, the extent of the inquiry, statistical distribution of immigrants, and course programs. (Author/AM)

Identifiers—Elementary Secondary Education Act Title I, ESEA Title I, Learning to Read Through the Arts Program, New York (New York)

This evaluation focuses on a comprehensive arts and reading enrichment program for socially and economically deprived inner city adolescents who are performing two years below grade level in reading and/or mathematics. One hundred children participated in this six month program considered to be strongly oriented toward reading improvement. A program description is followed by a listing of program objectives, which focus on the improvement of reading and reading skills through motivation and interest in the arts, and on correction of reading weaknesses by workshops devoted to reading. Methods and procedures used in conducting the evaluation follow. The program is considered to exceed the requirements of its stated objectives, particularly in terms of reading improvement scores. Several conclusions are drawn from the evaluation. Among them are that it is possible to effectively teach reading in a program focusing on the arts, and possible to enhance attitudes toward academic subjects, along with aspirations and self-concepts, through this program of instruction. A series of recommendations made include continuation and extension of program to a year-round five-day basis and the initiation of additional programs patterned on the present program. (Author/AM)

Davis, Flora Powell

A Study of the Relationship Between the Level of Nutritional Consumption and the Education, Income, and Family Size of Selected Poor Families in Atlanta, Georgia.

Pub Date Jul 75

Note—125p.; Ph.D. Dissertation, Walden University

EDRS Price MF-\$0.76 HC-\$5.70 Plus Postage

Descriptors—Consumer Education, \*Doctoral Theses, Eating Habits, Economic Disadvantage, \*Educational Background, \*Family Income, Family Life, Family Life Education, Family Resources, Food, Food Standards, Health Education, \*Nutrition, Nutrition Instruction, Socioeconomic Status

Identifiers—\*Family Size, Georgia (Atlanta)

The stated objectives of this study were to determine: (1) the differences in knowledge of

nutrition, of income, and of family size in the upper and lower strata families; (2) the shopping practices of families; (3) average weekly food expenditures; (4) mean educational level; and (5) differences in the mean weekly food expenditures -- a comparison of the national norm mean and the standard set for this study. Findings reveal that 33 percent of the families with adequate money expenditure on food had inadequate diets, while 77 percent of the families require larger expenditures to provide adequate diets. Families with the lowest per capita incomes were found to have the most inadequate diets. Most diets were below recommended allowances of fruits, vegetables, milk, bread, and cereals. Inadequate nutrition was stated to be related more to lack of use of knowledge than to lack of knowledge itself, and to family size rather than to amount of money income. Recommendations included that further research be conducted with these families regarding dietary behavior and the application of nutrition education. (Author/AM)

**Identifiers—**Elementary Secondary Education Act Title I, ESEA Title I

This report presents an analysis of and conclusions (based on audits of projects) on the progress being made by state educational agencies (SEA's) in assuring that local educational agencies (LEA's) are designing and implementing projects to meet the needs of educationally deprived children. Two considerations are said to have been employed in reviewing the effectiveness of SEA practices: the extent to which Title I funds are used for high priority educational needs and the extent of improvements due to the use of funds. Although variations among the 14 states reviewed are found, a pattern of change for the better is stated to exist, perhaps due to clearer guidelines from the USOE, more effective Federal and SEA monitoring processes, and better familiarity and acceptance of the requirements of the program by many SEA's. Further improvement is considered to be necessary as 12 percent of Title I funds are still not being used for high priority needs. Recommendations include (1) closer monitoring of procedures used by SEA's in reviewing and approving projects, along with on-site monitoring; and (2) requiring SEA's to provide LEA's with information and training on the requirements for educating deprived children. **Identifiers—**\*Elementary Secondary Education Act Title III, ESEA Title III, Maryland

This document reviews the impact of ESEA Title III programs on education in Maryland. Priority areas of concern established by the State Board of Education are identified as human rela-

tions, early childhood education, reading, improved teacher preparation and teacher certification, and career education. Nine programs are described under state plan projects said to meet these critical educational needs. A section on currently operating projects focuses on areas of the State Board of Education priorities and federally mandated areas. It categorizes 24 projects among human relations, early childhood education, and reading. While complete evaluation data is not available for new projects, a sense of direction is said to be indicated for those in operation for two years. One additional program in early childhood education, said to have been funded for representing an area of national concern, is also described. The biggest impact of Title III on Maryland is held to consist in the advancement of early childhood education and education for the handicapped. Projects are summarized in chart form and appear in the appendix. The appendix also includes information on state educational needs considered critical and on project funding in priority areas. (AM)

**Descriptors—**\*Evaluation Methods, Evaluation Needs, \*Federal Programs, Interviews, Measurement Techniques, Program Effectiveness, \*Program Evaluation, Public Schools, \*Racial Integration, School Integration

**Identifiers—**\*Emergency School Assistance Program, ESAP

This progress report describes study objectives, research design, field survey activities, and analysis plans for the evaluation of the Emergency School Assistance Program (ESAP), a federal program to aid local educational agencies in bringing about racial desegregation of their public school systems. A need for evaluation is explained in terms of gathering information and guidelines for policy decisions about ESAP, of providing inputs to the legislative process, and of meeting the requirements established by ESAP for an independent evaluation. After a descriptive introductory section, subsequent chapters present the development of the study effort through December 1970. Among the topics covered are a discussion of the Phase I evaluation and data collection plans, an analysis plan for Phase I survey data, the Phase II effort, current (1970) status, and evaluation plans. Tabulations that are part of Phase I analysis plan and a draft of a questionnaire to be mailed to the Bi-Racial ESAP Advisory Committee are contained in the appendixes. (AM)

**Descriptors—**\*Academic Achievement, Community Control, \*Community Involvement, Community Support, \*Decentralization, \*Decision Making, Democratic Values, Parent Participation, Politics, School Community Relationship, School District Autonomy, School Involvement, Student Participation, Student School Relationship, \*Urban Areas

**Identifiers—**Institutional Responsiveness

This document reviews the consequences of urban community involvement in school decision making. Areas concerning educational decisions, shared as goals by lay communities and school people, are considered to be: institutional respon-

siveness, affective and material community support to schools, educational achievement, and the democratic principle (said to express the norm in this society that people affected by public institutions should participate in their governance). Four paths through which involvement may affect educational achievement (believed to be the most important shared goal) are cited: existing evidence to support the paths of parent self-efficacy; institutional/child congruence; community support; and, student self-efficacy. Speculations about needed additional research are also made. (Author/AM)

This report describes and evaluates a five year program to improve the educational opportunities for underprivileged children using instructional efforts that included school community interaction, teacher aides, small group instruction, a variety of instructional aids, and educational consultants. The project is said to place top priority on language arts, especially reading. Information and data used in evaluation utilized both quantitative and qualitative measures such as standardized achievement tests, questionnaires, and interviews. The instructional improvement efforts are said to have resulted in significantly higher achievement of children enrolled in the target schools. Those children enrolled in preschool experiences sponsored by the project also had a higher degree of achievement in elementary school than did comparable children not provided such preschool experiences. Positive influences on teacher attitudes and performance are reported. The overall evaluation is stated to be positive but more systematic efforts to evaluate the impact of the project desirable. **Descriptors—**\*Conference Reports, \*Demonstration Projects, Inservice Programs, \*Inservice Teacher Education, \*Institutes (Training Programs), Mental Health, Models, \*Preservice Education, Staff Improvement, Staff Utilization

**Identifiers—**Multicultural Education, Multiethnic Education

These conference proceedings are divided into two parts: (1) teacher training institutions and the need for multicultural education, and (2) models that have been developed to facilitate staff training and development. Papers presented in the first section are said to indicate that preservice education in the area of multicultural education at teacher training institutions has not been ideal. Among articles included are a legal perspective on multiracial education, exemplary programs, cultural awareness in teacher training, and the need for multicultural education in teacher training institutions. The second section is said to be based on the experiences of practitioners in various disciplines and at various levels of the educational hierarchy. Among the topics discussed here are an inservice model built on mental health concepts, a systematic approach to

staff development, a systems approach to professional growth and development, and as inservice model for professional growth. (Author/AM)

Descriptors—\*Civil Rights, Court Litigation, \*Discipline Policy, Discipline Problems, Due Process, Equal Education, \*Equal Protection, School Attendance Legislation, School Law, \*Student Behavior, Student Publications, Student Records, \*Student Rights, Student School Relationship

These conference proceedings explore three major themes on student rights and responsibilities in public secondary schools, with the stated intent of facilitating progress toward an integrated school environment in which each student is (1) encouraged by a multiracial staff to participate fully, and (2) made to feel welcome as an equal member of the school. The first section examines the fair administration of disciplines and includes such topics as psychological perspectives, a principal's viewpoint, and the politics of administering a student discipline code. Under the general rubric of the present scope of school authority and student rights, the second portion considers various substantive and procedural issues such as changes in special education, student records, fact finding techniques, attendance policies, alternative placement, due process, police-school contacts, juvenile courts, and public schools. Three models focusing on curriculum, school policies, and inservice training are introduced and described in detail in the final portion of this report. The latter portion encompasses the area of educating the school community about school authority and student rights. A comprehensive appendix, that incorporates various legal and federal reference sources on matters of student rights and responsibilities for school, students, and staff, is provided. (Author/AM)

Descriptors—\*Annotated Bibliographies, Biculturalism, Bilingual Education, \*Cross Cultural Studies, \*Cultural Differences, \*Cultural Education, \*Educational Anthropology, \*Educational Problems, Intercultural Programs, Linguistics, Nonverbal Communication, Verbal Communication, Visual Perception

One hundred and twenty-five items are compiled in this bibliography which lists profitable books and where they can be located, and which gives descriptions of document content. The quality of the material referenced is judged by the use of one, two, or no asterisks denoting material judged to be very best, better than good, and good respectively. A method of citing references is used in which the title of the specific material about which the annotation is written and the title of the larger volume containing that material are differentiated through capitalization and underscoring. An arbitrary signal system using capital letters arranged to the left of each annotation enables the user with specialized interests to locate items. The bibliography lists documents that deal with problems in human interaction due to differences in cultural background and specifically those that relate cross-cultural differences to the educational process in a school setting. Among the topics dealt with are language and linguistics, bilingual education, pre- and inservice education, nonverbal education, visual perception, cultural patterns, testing non-mainstream children, and international exchange programs. Identifiers—Competitive Partnership Program, \*District of Columbia, Elementary Secondary Education Act Title I, ESEA Title I, Special Education Learning Centers

This evaluation determines program effectiveness based on the program's stated objectives in order to make recommendations to strengthen ESEA Title I programs, and to provide a data base that could be useful in decision-making and management. Data collected include both field data and previous evaluation data. Major findings and recommendations in the areas of test results, public elementary schools, public secondary schools, nonpublic schools, cost effectiveness of the Competitive Partnership Programs and the Special Education Learning Center, staff development, parental involvement, and special projects are given in detail. ESEA Title I programs of the public and nonpublic schools of D.C. are stated to meet or exceed their objectives in raising achievement levels of students. The concept of staff development designated as the total team approach is considered to be excellent but not practiced widely. The parental involvement component of the program is found to be moving in the direction of increased involvement of both parents and other community people. Appendixes include questionnaires and interview schedules used in the evaluation. (AM)

Identifiers—Connecticut (Hartford), Elementary Secondary Education Act Title I, ESEA Title I

This evaluation provides a project description, principal objectives, a listing of activities and services, and aspects of communication of eight nonpublic school centers providing supplemental instruction in corrective reading, language, and mathematics to students deficient in these areas because of economic, linguistic, or environmental isolation. Standardized test results show an increase in academic achievement. Other successful outcomes include improvements in communication, program expansion to meet diagnosed individual needs, improvements in pupil self-image and attitudes, and supplementary assistance to students through paraprofessional support. Among the problems listed are student frustration resulting from failure to achieve in a group situation what is successfully gained in an individualized center; problems in scheduling, especially for grades 7 and 8; and below average mean grades

despite general growth. Recommendations include staff orientations to clarify programs and to improve scheduling, a reevaluation of services offered in grades 7 and 8, and selection of new test measures in language arts specifically for grade 1 students, for foreign background students, and for the high school center. Identifiers—Elementary Secondary Education Act Title I, ESEA Title I, \*Nebraska (Omaha)

This report evaluates various programs considered to have been designed to supplement instructional programs for educationally disadvantaged children through curriculum development, especially in reading. Programs involving media centers, mathematics, reading, reading aids, high intensity learning centers, psychological services, primary high intensity learning centers, supportive counseling, community aids, and supportive reading and mathematics for institutions are described in terms of their objectives and how the latter are met. Each activity is said to have been planned to complement other activities and the total school program, in an effort to serve children and youth whose achievement levels are not up to par with their abilities. This study addresses questions such as (1) the extent to which formal training determines occupational mobility, (2) evidence of racial differences in the returns to formal training in terms of occupational advancement, (3) importance of structural factors representing labor market segmentation in determining occupational mobility, (4) the impact of employer shifts on occupational advancement, (5) existence by race of differential returns to mobility between firms. Results indicate a strong relationship between occupational advancement and formal vocational training for both racial groups. Structural factors represented by initial industry and region of residence are found to have little or no effect on advancement. A more important factor is considered to be the white-black difference in endowment of education. No evidence for a racial differential in the impacts of industry and geographical shifts on occupational mobility is found. No evidence to support the hypothesis that black turnover fails to result in upgrading because of their confinement to secondary sector jobs is indicated. (Author/AM)

**Descriptors**—Age Differences, Career Ladders, Caucasians, Census Figures, \*Employment Opportunities, \*Labor Market, \*Labor Problems, Labor Turnover, Males, Negroes, \*Occupational Mobility, \*Racial Differences, Racial Discrimination

In this study, the occupational advancement of black and white workers of comparable ages is compared through longitudinal census data. Two specific hypotheses are tested which propose (1) large and systematic racial differentials exist in the effect of mobility on occupational advancement between firms; and (2) differentials in intrafirm occupational advancement exist for workers of equivalent endowments within firms. A model of occupational advancement along with empirical variables from two sources of longitudinal data are discussed. Results indicate that neither the young nor the old men in the sample provide evidence of a systematic racial differential in the effect of mobility between firms on occupational advancement. The evidence on advancement within firms is said to be less unequivocal. Given the racial differential in initial occupational levels, however, small black-white differences in advancement are shown to appear within internal labor markets. (AM)

**Identifiers**—Education Opportunity Program, EOP, HEOP, Higher Education Opportunity Program, New York, Search for Education Elevation Knowledge Program, SEEK

This report is considered to constitute the first attempt to present a comparative analysis on university level programs of educational opportunities. The following topics are included in the analysis: enrollment and retention, demographic characteristics, academic background, major subject area, supportive services, academic progress, student costs and financial aid, and expenditures. Cited among the findings are the following: that academic dismissal is the most important reason for leaving opportunity programs, followed by personal reasons; that given educational and economic disadvantages, educational opportunity program students remain in college at high rates as compared to the average retention rate for all students in the nation; and that opportunity programs serve as a major vehicle for minority group enrollment. Certain practices concerning degree requirements, financial aid, and definitions for defining economic disadvantage are said to lack consistency across the programs. Stated in the recommendations are the need for comprehensive supportive services and the need for timely and accurate accounting of program activities and expenditures as the law provides. Pub Date Dec 74  
Note—19p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

**Descriptors**—Child Care Workers, Child Development, Day Care Services, \*Delinquency Prevention, \*Disadvantaged Youth, Employment Opportunities, Health Needs, Helping Relationship, Inner City, Inservice Education, Males, Motivation, Nutrition Instruction, \*Preschool Children, \*Program Evaluation, \*Role Models, Social Reinforcement, Vocational Counseling, Youth Problems, Youth Programs

The Real Experiences for Alternatives in Living Program (REAL) employs three components in an attempt to alter positively the lives of inner-city male youths and to provide indigenous role models within a day care setting to school-age children enrolled therein. These components are informal and formal on-the-job inservice training in child development, provision of services such as consumer and legal education, physical exams, nutrition information, and formalized training in child development. Two hypotheses are tested as part of the program evaluation: that the work training experience is beneficial to the trainees, and that the day care children will identify with the youth and benefit from the cross age relationships. Results obtained from interviews with trainees, agency staff, and children are considered to indicate that the program is beneficial to both youth and children, that the children relate positively to the youth, and that the program expands the life chances of all the participants. Criticisms of the program center around the quality of service provided to the youth. Both staff and youth agreed on the need for increased counseling and the need for followup at the end of the program. (Author/AM)

**Identifiers**—\*District of Columbia

This is a revised and expanded version of a previous report on urban indicators which introduces new indicators for 4 of the 14 quality of life categories covered in the previous report. It updates indicators for 9 of the 14 categories and employs the indicators to develop charts and tables which use the Washington, D.C. area as a illustrative example. Central cities and suburbs of the 18 metropolitan areas are examined with respect to five of the quality of life categories. There is a tabulation and summary of these five indicators as they reflect conditions for the central cities and suburbs, ratios between city and suburban areas, and rates of change in these factors. Summary charts presenting city and suburban conditions in Washington, D.C. are used as examples. The paper provides sources and limitations of all indicators used, tabulations of all data presented in the initial report, and rationales for the revision, addition, or deletion of the various indicators. Identification, Instructional Materials, Parent School Relationship, Preschool Programs, Primary Grades, Program Administration, Program Coordination, Program Development, \*Program Effectiveness, \*Program Evaluation, School Community Relationship  
**Identifiers**—Chicago Child Parent Centers, \*Illinois (Chicago)

This program operates on the assumption that exposure of 3- and 4-year-old children to a structured basic skills oriented program with continuity will substantially increase the contributions of school-related factors to educational achievement and adjustments, and to a large extent erase the gap between less advantaged children and their more advantaged counterparts. Program objectives, administration, facilities, instruction, supportive services, and parental involvement are described. The preschool, kindergarten, and primary programs, along with curriculum materials used are described. Data from a comprehensive longitudinal evaluation design indicates that growth in readiness and achievement tends to be uniform across classrooms, grades, and centers. The data are considered to show that this program operates in a manner that uniformly raises the readiness and achievement levels of all children. Several components of program success—among them early intervention and the need for consistency—are identified. A brief discussion on ripple effect resulting from the program's impact on the community, and a followup of program graduates, is included. (Author/AM)

The development of strong guidance programs that assure a fuller development of the talents of gifted disadvantaged children and youth is held to be one of the best investments America can make at this point in time. Several strategies for instituting solid programs of guidance and counseling services reflecting goals such as remediation, prevention, and counselor - centered promotion are described. The importance for teachers, counselors, and students to set attitudinal and aspirational goals that take into account the affective life of the child is stressed. Parental participation in the education of their children, be they disadvantaged or advantaged, is considered to be an essential element in any school program from both an empirical and theoretical framework. Various existing enrichment programs for gifted and talented disadvantaged students, along with resources such as a list of materials providing financial assistance information, are presented. (AM)

## **SPECIAL ANNOUNCEMENTS**

### **NIE PRICES FOR MICROFICHE (MF) AND PAPER COPY (HC)**

Please consult next page of this Index, **HOW TO ORDER ERIC DOCUMENTS**, for the latest prices and ordering information from the:

ERIC Document Reproduction Service  
P.O. Box 190, Arlington, Virginia 22210

Prices are subject to change. Please refer to the most recent issue of RIE for current ordering information.

---

### **How to Submit Documents to ERIC**

If you have documents or reports which you would like to have considered for announcement in **Resources in Education (RIE)**, you should send clear, legible copies (in duplicate, if possible) to the following location:

Educational Resources Information Center (ERIC), National Institute of Education, Washington, D.C. 20208.

Should the documents be copyrighted, it would be helpful if you could include a letter giving ERIC permission to reproduce in Hard Copy or Microfiche, or Microfiche only. If the latter is selected, and there is a source of obtaining the original publication, please provide ordering and price information.

## Introduction

**Resources in Education** is prepared monthly by the Educational Resources Information Center (ERIC) to make possible the early identification and acquisition of reports of interest to the educational community. ERIC is a national information network for acquiring, selecting, abstracting, indexing, storing, retrieving, and disseminating the significant and timely education-related reports. It consists of a coordinating staff in Washington, D.C. and clearinghouses located at universities or with professional organizations across the country. These clearinghouses, responsible for a particular educational area, are an integral part of the ERIC system. The clearinghouses are listed on the inside back cover.

All the documents cited in the Document Résumé Section of the journal, except as noted, are available from ERIC Document Reproduction Service. Availability and prices of document collections are to be found on the To Order ERIC Document Reproductions page.

Women's opportunities for employment will be directly related to their level of skill and experience but also to the labor market demands through the remainder of the decade. The number of workers needed for all major occupational categories is expected to increase by about one-fifth between 1970 and 1980, but the growth rate will vary by occupational group. Professional and technical workers are expected to have the highest predicted rate (39 percent), followed by service workers (35 percent), clerical workers (26 percent), sales workers (24 percent), craftsmen and foremen (20 percent), managers and administrators (15 percent), and operatives (11 percent). This publication contains a brief discussion and employment information concerning occupations for professional and technical workers, managers and administrators, skilled trades, sales workers, clerical workers, and service workers. In order for women to take advantage of increased labor market demands, employer attitudes toward working women need to change and women must: (1) receive better career planning and counseling, (2) change their career aspirations, and (3) fully utilize the sources of legal protection and assistance which are available to them. Report No—DLMA-82-11-71-22-3; PB-232-204

Pub Date May 72

Note—245p.

Available from—National Technical Information Service, Springfield, Virginia 22161 (Order No. PB-232-204; HC-\$6.00; MF-\$1.45)

**Document Not Available from EDRS**

Descriptors—Aerospace Industry, \*Educational Programs, \*Job Placement, Manpower Utilization, \*Professional Personnel, \*Transfer of Training, \*Unemployed, Vocational Adjustment

Identifiers—Defense Workers

Careers of 185 unemployed aerospace professionals from aerospace and defense industries are documented following completion of a month-long orientation to Urban Affairs. Seventy percent of the persons completing the program were professionally employed eight months later; 60 percent of those at work are in the public service. Preparedness of hiring agency to accommodate innovative management techniques was found to be the best prediction of successful skills adaptation. Few significant relations were found between background attributes (e.g. age, education, industrial experience) of the professionals and either their rate of placement or their successful performance once placed. The orientation offered both cognitive and attitudinal changes to the participants, but particularly educational technique was found to be universally favored. Evaluations of project outcomes are tentatively asserted owing to the abbreviated period available for monitoring and for the even shorter period of actual on-the-job experience of successfully placed program participants. Sprague High School's program to train career education resource teachers was designed to recruit and prepare approximately 15 individuals from business, industry, and the professions who would provide exploratory career experiences and information to students. A four-page outline covers the program's objectives, procedures, a third party evaluation, costs, and future plans. The document concludes with an 11-page evaluation report of the program's seven standards: (1) adequacy of trainee's performance, as evaluated by the project director, supervisors, and trainees; (2) specificity of training program in teaching competencies to trainees, as evaluated by the project director; (3) appropriateness of trainee behavior, as evaluated by trainees; (4) operational coherence of the training program, as evaluated by the project director; (5) operational quality of the training program, as evaluated by the project director and trainees; (6) adequacy of facilities, as evaluated by the project director; and (7) responsiveness and rationality of the administrative structure of the program, as evaluated by the project director. A rating by the third party evaluator is included in some cases. (BP)

**Document Not Available from EDRS**

Descriptors—\*Driver Education, \*Educational Programs, \*Program Effectiveness, \*Program Evaluation, \*Teaching Methods, Traffic Safety

The last phase of the NHTSA-U.S. Coast Guard Driver Improvement Training and Evaluation Project is described. Begun in July 1970, the project had two basic objectives. The first was to determine whether or not driver training pro-

grams do, in fact, significantly reduce driver errors and accidents and improve overall driver efficiency. The second was to identify which training method—classroom and driving range training (Program 1), classroom-only training (Program 2), or range-only training (Program 3)—is most effective. The population studied was 3,226 young male adults between 17 and 25 years of age. The specific sample studied was United States Coast Guard recruits at the Coast Guard Training Center in Cape May, New Jersey. While pretest data revealed no significant differences between the experimental and control groups, analysis of the posttest data indicated that the experimental groups performed significantly better on the driver knowledge test and on the driving range test than the control groups. A followup analysis of posttraining driving records was also conducted. (NTIS)

Descriptors—\*Advisory Committees, \*Educational Programs, Group Dynamics, Group Relations, \*Health Services, \*Policy Formation, State Programs, Statewide Planning  
Identifiers—Michigan

The report describes a Federally supported education and development program conducted during the 1973-74 fiscal year for members of the Michigan State Health Planning Advisory Council. The program sought to increase: (1) the council members' awareness of and insight into the comprehensive health planning process, (2) their knowledge of the health care system, and (3) the ability and competency of the council as a planning group, thereby to increase their effectiveness in producing a State health policy. The evaluation of the program was aimed at discovering what happened to and for the Advisory Council and its members as a consequence of the educational effort. Lengthy discussion of findings from questionnaires, observations, and interviews indicates that the educational processes were generally successful, particularly in relation to relationships and dynamics within the group. Implications, based on council member testimony, are outlined. About 100 pages of appended materials include the evaluation instruments and sample project materials. (BP)

Pub Date Jun 74

Note—41p.; Not available in hard copy due to marginal legibility of original document

EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.

Descriptors—\*Career Awareness, \*Elementary Education, \*Guidance, \*Inservice Teacher Education, Program Evaluation, Summative Evaluation

Identifiers—Oregon (Eugene)

The purpose of the Elementary Career Awareness Project's inservice program was to identify components of the career awareness process that were guidance oriented and to increase staff awareness of the guidance components that can be incorporated into the classroom. Briefly outlined are the goals, objectives, and activities of the three phases of the program. The summative evaluation of the program used the Semantic Differential Technique to measure change in attitude on seven concepts relating to classroom environment. No differences were found between the experimental and comparison group that could be directly attributed to the inservice program. More

than two-thirds of the document consists of appended project-related materials, including a project personnel list, a bibliography, interim reports of various kinds, the forms used in the summative evaluation, and the report from the third party evaluator. (BP)

Descriptors—Activity Units, \*Career Education, \*Changing Attitudes, \*City Wide Programs, Counselor Training, Curriculum Development, Educational Assessment, \*Evaluation Criteria, Evaluation Methods, \*Guidance Programs, Junior High Schools, Program Descriptions, Program Evaluation, School Visitation, Self Evaluation, Vocational Counseling  
Identifiers—Oregon (Junction City)

The report describes a career education demonstration project conducted in Junction City, Oregon, a city of 2,535 people with a high concentration of low-income families. Major limitations encountered were resistance to change and lack of funds. Procedures included four inservice sessions for instructional and guidance staff and four visitations to six schools to evaluate the program's progress. The document includes two of the resultant components: a junior high school guidance activity program booklet (19 pages) and a career education assessment instrument (14 pages). The guidance activity booklet consists of: a section for counselors (philosophy, objectives, functions, and techniques involved in incorporating career education into the curriculum); student checklists (self-evaluation, self-awareness, and vocational interests); and outlined guidelines for a six-week junior high school career guidance program (topics, time needed, suggested methods, and materials). The career education assessment instrument includes criteria for evaluating the following program elements: long-range plans, personnel, advisory committee, curriculum, individualized instruction, work experience, guidance, inservice programs, financing, facilities, school and community relations, evaluation, and administration. The annual report concluding the document includes financial and demographic data and summarizes the program as being particularly successful in changing staff and community attitudes toward career education. Development and Evaluation of Curriculum and Media to Train Part-Time Fire Service Instructors in Rural Areas.

Western Wisconsin Vocational, Technical, and Adult Education District, La Crosse.

Spons Agency—Wisconsin State Board of Vocational, Technical, and Adult Education, Madison.

Pub Date [73]

Note—65p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—Course Content, \*Course Organization, \*Fire Fighters, Fire Protection, Fire Science Education, \*Instructional Materials, Job Training, Lesson Plans, Program Descriptions, \*Rural Areas, Volunteers, \*Volunteer Training

Identifiers—Wisconsin

The report briefly describes a project whose purpose was to provide guidance and training for rural volunteer fire chiefs and firefighters in Wisconsin to increase the knowledge and skills they use to protect lives and property. The training was provided by part-time instructors who taught and demonstrated the courses and curriculum to suit the particular departmental and community needs; the problem of efficient fire protection in small rural communities is aggravated by the growth of small industrial plants, unplanned residential expansion, institutional rest and nursing homes, and compounded by regulations sometimes foreign to the situation. The program was administered by the State's vocational, technical, and adult education districts. During

the program's initial year, 858 students were enrolled in a total of 25 courses. Enrollment data, forms, and letters are appended to the report; the bulk of the document, however, is comprised of selected materials provided to course instructors, including examination papers; recommended instructor course contents; a memo on course format and lesson planning; five detailed lesson plans; learning materials on portable fire extinguishers, silage gas, fires and silos, suspicious fires, and masks; the table of contents of an outline for institutional disaster planning and emergency procedure; and an instruction evaluation form. Descriptors—\*Career Education, County Programs, \*Educational Programs, \*Elementary Secondary Education, Integrated Curriculum, Program Administration, Program Attitudes, \*Program Descriptions, Program Design, Program Development, \*Program Evaluation, Vocational Development, Vocational Education  
Identifiers—Florida (Pinellas County)

The Comprehensive Vocational Education Program for Career Development (K-14) in Pinellas County was implemented in nine pilot schools in which the project's goals were designed to bring together already operating components of career education in the county. A concerted effort was made to identify and integrate effective elements of other programs and projects (academic and vocational) to build a composite, articulated program of career education. The document discusses in detail such varied aspects of the programs as: the project summary; background information; a definition of the problem; an overview of the Pinellas County Comprehensive Career Education Project (goals and objectives, procedures, operational goals, expected outcomes, and component reports); a summary of inservice data; placement and followup procedures; the degree of community, committee, and university involvement; a calendar of critical incidents; a synopsis of site visits by key personnel; project costs; attitudes toward new roles of counselor and occupational specialist; a process diary; parent and staff attitudes toward career education; an external evaluator's reports of visitations; a product evaluation of the eight career education elements; an explanation of the Pontiac, Michigan research design; and a summary of the project's findings, conclusions, and recommendations. Identifiers—Career Guidance

The collection of papers contains models of career education programs in work experience, guidance, placement, and curriculum. The first paper, Focusing on the School to Work Transition: Problems and Elements to Be Considered in

Developing a Work Experience Program (David H. Hampson), introduces a historical/philosophical perspective of work experiences as well as practical considerations for developing work experience programs. The second paper, *A Model of Career Guidance* (JoAnn Harris-Bowlsbey), focuses on career guidance and presents a model, currently under development, of a computer-based guidance system, DISCOVER. The third paper, *Work Experience and Placement Programs* (Grant Venn), presents a model for work experience programs, outlines areas of focus at elementary through postsecondary educational levels, and suggests models for placement programs—one school-based and one community-based. The final paper, *Five Easy Pieces of Free Advice on Curriculum Strategies for Career Education from a Relatively Disinterested Curriculist* (Decker F. Walker), presents five pieces of advice for curriculum strategy makers involved in developing career education programs. (Author/JR)

Identifiers—Florida, Georgia (Atlanta), Ohio

The collection of six papers offers perspectives on planning and implementing career education programs. The first paper, the Introduction (David Goodwin), deals with program implementation. The second paper, *Priorities in Career Education* (Alonzo A. Crim), describes the historical origins of career education in the Atlanta school system with a strong emphasis on the incremental nature of significant educational change. The third paper, *Priorities in Career Education R & D: A Federal Perspective* (Lois-ellin Datta and Corinne Rieder), discusses the role of research and development and the obligations of researchers to make their results useful for practitioners. The fourth and fifth papers, *Organizing for Planning and Implementing Career Education in Ohio* (Linda Pfister Keilholtz), and *The Development, Implementation and Administration of Career Education in Florida* (Margaret E. Ferqueron), highlight such themes as the role of State leadership, establishing State linkages between State departments and local school districts, and using State funds as a means of building organizational commitment at the local level. The final paper, *Educational Linkage—Suggested Rules and Techniques or the Synaptic Aspects of a Partnership Plus Other Common Trivia* (Robert A. Sampieri), discusses ways to build working relationships between educators, businessmen, labor unions, and politicians. (Author/JR)

The report provides an assessment of the six Experimental Manpower Laboratories set up by the Manpower Administration to engage in long-term research concerned with developing improved manpower service-delivery systems. An advisory committee under the auspices of the National Research Council was established to conduct the assessment. The six laboratories studied were: (1) Colorado State University Experimental Manpower Laboratory, Denver, Colorado (disadvantaged individuals); (2) Experimental Manpower Laboratory for Corrections, Draper Correctional Center, Elmore, Alabama (correctional rehabilitation); (3) University of Michigan Experimental Manpower Laboratory, Ann Arbor, Michigan (disadvantaged individuals); (4) Mobilization for Youth Experimental Manpower Laboratory, New York, New York (hard-to-employ youths); (5) North Carolina Manpower Development Corporation, Chapel Hill, North Carolina (improving State capabilities for planning/delivery manpower services); and (6) Training and Technology, Oak Ridge, Tennessee (upgrading skills in an industrial setting). The advisory committee found the concept of manpower laboratories valid and useful and has presented recommendations to assist in the planning and organizing of more effective laboratories in the future. Findings and recommendations are categorized according to: (1) planning for laboratory effectiveness, (2) requirements for effective management, and (3) utilization. The document's three main sections focus on descriptive background, program assessment, and laboratory operations. (EA)

Identifiers—4 H Clubs

State progress reports on the 4-H/Community Development program, a 1973 nationwide Federally sponsored program facilitating youth in community decision-making processes, indicate that the program appears to be evolving into a viable and integral part of the total 4-H program. Although the report describes unique program features of various States, statistical information is provided only on the 12 States which included their total number of youth participants in the State progress reports—Alabama, Arkansas, California, Georgia, Iowa, Kentucky, Michigan, New Mexico, North Carolina, North Dakota, Virginia, and West Virginia. The main approaches to launching programs were through regular 4-H programs and interorganizational involvement. They focus on specific problems or geographic areas. Ten suggested definitions of program areas include: leadership development; public affairs; taxation and local government; housing; manpower and career development; recreation and tourism; environment and ecology; business, industrial, and economic development; cooperatives and credit unions; and community facilities and institutions. About half of the report consists of various State program examples of: workshops, community planning, citizenship programs, a model city council, job and career programs, county clean-ups, Main Street beautifications, a blood donation campaign, hunter safety program, and a cultural heritage presentation. Available from—Director of Information, OECD, 2 rue Andre-Pascal, 75775 Paris Cedex 16, France (\$2.00)

EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.

Descriptors—Advisory Committees, \*Change Strategies, Communication Problems, \*Developed Nations, Educational Accountability, \*Educational Policy, Employment Problems, Equal Education, Equal Opportunities (Jobs), \*Human Development, Individual Development, International Organizations, Labor Market, Manpower Development, National Surveys, Policy Formation, Program Coordination, Reports, School Industry Relationship, \*Vocational Development

Identifiers—OECD, Organisation for Economic Cooperation Development

The report, requested of six experts appointed by the Organisation for Economic Cooperation and Development (OECD), (1) surveys the relations between the educational system and working life in the light of social objectives in the 24 OECD countries in the 1970's, and (2) advises those countries, proposing subjects and methods of cooperation between the relevant public authorities and between them and the employers, trade unions, and other social groups. The report contains 25 specific recommendations grouped under three broad headings: (1) a positive policy for working life, (2) an integrative policy for education, and (3) more options for the individual within a free-choice society. The experts found the quality of working life not keeping pace with individuals' capacities and aspirations, and recommended a policy that involves better jobs, more flexible working arrangements, more chance for participation, and more equity in advancement; found too many disadvantaged persons in the labor market, and recommended measures to create greater opportunities for these persons; found unwise separations between education and work, and recommended recurrent education; found too many rigidities imposed on individuals' lives and recommended more options; found inequities in educational opportunities, and recommended comprehensive schools; and found little communication among educational and labor market authorities, and recommended mechanisms for joint consultation. *Interdisciplinary Approach to Career Development through a Program of Occupational Education.*

Russellville City School System, Ala.

Pub Date 30 Jun 73

Note—286p.

EDRS Price MF-\$0.76 HC-\$14.59 Plus Postage

Descriptors—\*Career Education, Class Activities, \*Curriculum Guides, Daily Living Skills, Demonstration Programs, Elementary Education, \*Integrated Curriculum, Interdisciplinary Approach, Intermediate Grades, Junior High Schools, Learning Activities, Resource Guides, Secondary Education, Senior High Schools, Teacher Developed Materials, Teaching Guides, Unit Plan, \*Units of Study (Subject Fields), \*Vocational Education

The document consists of teaching outlines which one school district's teachers developed and used in the early stages of an exemplary program to provide students with occupational information and to guide and instruct them in career development. The first 50 pages contain general materials: an activity calendar, a guide to exemplary programs, and a resource guide. Most of the document is comprised of instructional unit outlines: several for grade levels 4-6 (each planned to span six weeks); 36 lessons for grades 7 and 8; 36 lessons for ninth grade vocational education courses (each planned to span one week); additional ninth grade materials for integrating occupational information into academic subjects; and two interdisciplinary units for grades 10-12, one of six weeks' duration (Personal and Family Relationships), and one of three weeks' duration (Legal Aspects of Daily Life). Compensatory units, without grade level, in mathematics and communications are offered for vocational education students. Units include a topic outline, teaching/learning activities, and learning resources. The final section of the document concerns program evaluation; a progress report and the review team's evaluation instrument with findings are included. (AJ)

**Identifiers**—US Dependent Schools European Area, USDESEA

The handbook is intended to assist the Cooperative Work Experience (CWE) coordinator in the initiation and operation of a CWE program in U.S. Dependent Schools in the European Area (USDESEA), and allows for the many diverse and unique situations found in the USDESEA schools. Also applicable to other secondary level work experience programs, it includes basic information regarding philosophy, educational requirements, job site selection, activities, evaluation criteria, roles of program personnel, and other important factors in supervising the CWE program. A 47-page section provides copies of essential forms, current regulations, and other sample documents essential to the CWE program. The information packet discusses overall objectives and depicts students participating in various job-related CWE program activities. (MW)

The handbook contains curriculum objectives, suggests directed activities for the United States Dependent Schools in the European Area (USDESEA) Cooperative Work Experience Program, and provides information and guidance for instructor/coordinators and supporting staff. Designed chiefly for small group instruction, the activities can also be modified for use in outside assignments, individual projects, and work experience classes. The handbook is organized according to the following goals: relevance, self-actualization, self-evaluation, interpersonal relations, and job application. Units are outlined within each of these topical divisions and include estimated time of completion, notes to the teacher, suggested activities, reproducible forms and worksheets, and instructional materials. **Descriptors**—Behavioral Objectives, \*Career Education, \*Cosmetology, Course Descriptions, \*Curriculum Guides, Dental Assistants, Health Occupations Education, \*Health Services, Individualized Curriculum, Instructional Materials, Job Training, Laboratory Procedures, Learning Activities, Secondary Education, Vocational Education

The curriculum guide is designed to provide students with realistic training in theory and practice within the secondary educational framework and prepare them for entry into an occupation or continuing postsecondary education. The learning modules are grouped into branches pertaining to the broad categories of health services and cosmetology. Each unit plan consists of a description of the area under consideration, estimated hours of instruction, behavioral objectives, a module outline, a list of useful curriculum materials and resources, laboratory activities, and laboratory materials. The health occupations curriculum covers the following topics: personal awareness, fundamental health care and first aid, sciences, understanding human behavior, body mechanics, diagnostic data collection, pharmacology, therapeutic procedures, patient care, advanced nursing skills, advanced clinical skills, medical/dental office skills, dental anatomy and physiology, sterilization and disinfections, dental materials, laboratory procedures, chairside procedures, and dental radiology. The cosmetology curriculum covers: hand and foot care; hair pieces; hair, scalp, and facial treatment; facial makeup; distributive education skills; electricity and light therapy; hair coloring; hair shaping; hair waving and relaxing; hair styling; and shop operation. Since the curriculum calls for individualized learning, the program can range from one semester to two years of training. (MW)

The curriculum guide is designed to provide students with realistic training in graphic communications theory and practice within the secondary educational framework and to prepare them for entry into an occupation or continuing postsecondary education. The program modules outlined in the guide have been grouped into four areas: printing, photography, design and detailing, and office reproduction. A schematic laboratory layout shows key relationships of various activity zones in the lab and, to aid in the separation of these into discrete units, a functional zone schematic has also been included. Each unit plan includes a description of the topic, time required, behavioral objectives, module outline, curriculum materials list, laboratory activities, and materials needed. The following topics are presented: artwork; image assembly; photo-conversion; image carrier preparation; image transfer (offset); lithographic platemaking; color separation; finishing procedures; line, halftone, and still photography; cinematography; beginning, intermediate, and advanced drafting; fluid duplicating; duplicator operation; master imaging; office artwork preparation; stencil typing and imaging; mimeograph operation 1 and 2; decision making; and image transfer (letterpress). Appendixes include: activity groups and rotation schedule, student contracts, and laboratory supply lists. (MW)

The document provides statistics related to 1970-80 United States occupational manpower and training needs, with emphasis on the 17-20 year old population. It consists of three tables on: (1) U. S. employment by occupation—1970 and projected 1980 requirements; (2) increase in employment to 1980 and opportunities for 17 and 20 year olds, by percent (rank order) and number of jobs; and (3) training requirements for typical job classifications and related annual course completions for job opportunities available to 17-20 year olds. Also provided is an analysis of the manpower data as related to: job market projections, occupational projections ranked by percentage increase, opportunities related to seven occupational areas, opportunities not covered by the seven occupational areas, and entry requirements and manpower supply. Identifiers—\*Reentry Students, University of California (Davis)

A six-week course titled "You Too Can Return to College" at the University of California at Davis is designed to assist adult women reentering college. Returning women were found to be lacking in confidence, had low self-expectations, and needed specialized counseling. The reassessment course is offered through the Extension Division of the university, with the campus Learning Assistance Center participating in a supportive role. Course activities include: group sharing, interest/aptitude testing, writing a life diary, role perception, study skills, test interpretation, career opportunities, interviewing and resume information, discussion of opportunities for academic experience, and a concluding personal interview. Several aspects of the program in which the Learning Assistance Center can be especially helpful to the reentering woman involve time management geared to the student/wife/mother role, tips on note taking and improving verbal skills, and the availability of informally structured support groups. Learning assistance centers can be a valuable component in programs for reentry women by assisting in recovering skills for effective learning. (EA)

**Future Shock--Education 1984: The Economists' Viewpoint.**

Pub Date 1 Dec 73

Note—8p.; Paper presented to the Industrial Arts Division of the American Vocational Association (December 1, 1973)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—Economic Change, \*Education, Educational Accountability, Educational Change, \*Educational Economics, Educational Strategies, \*Futures (of Society), \*Resource Allocations, \*Role Perception

Education, like other institutions of our society, is susceptible to "future shock", the inadequate preparation for a radically different future. Our nation is on the threshold of an age of scarcity, and the impact on education will be the accelerated demands for educators to justify their use of resources based on impersonal objective criteria. Education's favored past status in the resource allocation process will continue to deteriorate as shrinking funds are allocated to education. However, educators can objectively justify the use of scarce resources by applying economic theory and method. Some standard economic models adaptable to education are: (1) production function (the relationship between input and output), (2) production possibilities model (relationships between alternative products), (3) economies to scale (relationships between cost and the size of the producing unit), (4) labor to capital ratio (amount of labor relative to capital used in the production process), and (5) multiproduct production (simultaneous production of products by the producing unit). Progress in resource allocation problems is evident in needs assessment programs, accountability studies, criterion-referenced instruction, performance objectives, the Coleman Report, and similar studies. Continued and expanded efforts are necessary to immunize education from "future shock". (EA)

Identifiers—\*Brazil

The Brazilian Literacy Movement (MOBRAL—El Movimento Brasilen de Alfabetizacion de Adultos) is discussed in terms of its legal and conceptual bases, organization, participants, technical aspects, and effectiveness. Established

by law December 15, 1967 to lower the illiteracy rate in Brazil by improving educational opportunities for the population, it has established four main programs: (1) functional literacy teaching, providing six months of primary education; (2) integrated education, a year-long supplement to primary education; (3) community development, two months of community oriented education; (4) cultural MOBRL, reaching Brazilians through mobile libraries, radio, correspondence courses, and cultural posts. Background is given on the educational and economic problems of Brazil and their interrelationship. Literacy teachers, by the end of 1972, had involved one out of every six Brazilians aged 15 or over in MOBRL activities. Initial success has been attributed to: government interest on the local, State, and national level; technical and financial independence; and the availability of educational materials and teachers. Tables give illiteracy rates in terms of region, age group, and sex. Five appendices provide texts of the law establishing MOBRL, regional and municipal agreements, a list of teaching materials used, and a bibliography. (LH)

**Identifiers**—\*Project ADAPT

The report of Project ADAPT (Aerospace and Defense Adaptation to Public Technology), describes the design, execution, and forthcoming evaluation of the program. The program's objective was to demonstrate the feasibility of redeploying surplus technical manpower into public service at State and local levels of government. The development of the program is outlined and the program's participants are described in terms of their socioeconomic, educational, and professional characteristics, and some potentially significant subgroups are identified. A detailed day-by-day account is provided of the four week-long orientation periods, focusing on: urban growth and development, environment and technology, design and delivery of social services, and agency management and change. A detailed analysis is given of the program's design, logistics, and components, each component being discussed in terms of intent, description, and critique, which includes participant comments. The program evaluation is discussed from two points of view: concurrent monitoring and evaluation and post-orientation monitoring and evaluations. Conclusions and recommendations are made for the development of specific guidelines for future programs, the program's structure, and personal and job development. The 121-page appendix includes study aids, rosters of faculty, staff, and enrollees, program schedules, and bibliographies. (BP)

**Identifiers**—\*Group Participation Training

Participation Training for Adult Education serves as a manual, guide, and resource for leaders and participants interested in establishing a program of adult learning called group-participation training. Goals emphasize participants learning about themselves as learners, how they relate to and can help others, and exploring the dynamics of a learning situation and how it can be made more effective. Based on successful experience, the information is arranged in chapters, covering the following topics: (1) Participation Training: Preliminary Questions and Organization, discussing types of meetings, resources involved, and purpose of program; (2) Roles of Participants, describing the functions of discussion leaders, co-leader and/or recorder, group participant, observer, resource person, and trainer; (3) Elements of Structure: Topic, Goals and Outline, dealing with the dynamics of discussion; (4) Conducting the Training Sessions, providing a detailed guide for the trainer in establishing effective conditions for participation; and (5) Some Common Problems in Training Sessions, suggesting problem solving techniques for trainer and participants. A schedule of events for a weekend training program with detailed descriptions of each session, a checklist for conducting critiques, and a glossary of terms are appended. (LH)

**Involvement of Vocational Agriculture Students in Vocational Education Student Organizations.**

Pub Date Jun 75

Note—79p.; Appendix B, data collection instruments, does not reproduce well

**EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage**

**Descriptors**—Data Analysis, Faculty Advisors, Group Membership, High School Students, Questionnaires, Role Perception, \*Student Organizations, \*Student Participation, Tables (Data), \*Vocational Agriculture

**Identifiers**—California, \*Future Farmers of America

The major purpose of the study was to determine the basic reasons for nonparticipation of California vocational agriculture students in the Future Farmers of America (FFA) organization and to develop strategies for increasing membership percentages. After calculating a 1973-74 FFA membership percentage for each California school, schools were assigned to a high/medium/low membership group. Students enrolled in vocational agriculture classes in 19 randomly selected California high schools were the target population; FFA advisors at each school randomly selected two vocational agriculture classes

for participation. Data were collected by classroom administered questionnaires from 504 students and by local FFA advisor questionnaires. Five vocational agriculture teachers reviewed the data analysis, providing interpretation, discussion, and subsequent recommendations. Data showed significant differences in FFA member and non-member responses on some topics as well as similar responses to a number of topics. No single statement appeared indicative of reasons for low membership percentages. Chapters 3, 4, and 5 provide in-depth coverage of findings, discussion, and recommendations. More than half of the document is appendix, consisting of data collection instruments (student and advisor questionnaires) and 58 statistical tables for the student questionnaire. (EA)

**Descriptors**—Administrative Organization, Educational Policy, Foreign Countries, \*Health Occupations Education, \*Health Services, \*Medical Education, \*National Programs, Nurses, Physicians, \*Program Administration, Public Health Identifiers—\*Sweden

The organization and functioning of Sweden's government controlled public health and health personnel educational systems are detailed in the report. The functions of the organizations involved in health care delivery are described. The delivery of health care is carried out at the county level. Regional hospitals provide more specialized services. Figures on in-patient and out-patient capacity, costs, and number of health care workers are presented. The organization of Skaraborg county is given as illustrative of welfare and medical services provided. Information collected by the National Center for Statistics and feedback from health personnel and hospitals form the basis for health planning accomplished at the national and regional levels. The educational system is discussed with reference to: (1) requirements for admission to State-run institutions of higher learning, (2) medical education and research at the universities, (3) education of physicians and nurses (detailed in various phases with the use of flow charts), and (4) education of other health personnel and new branches of education. Coordination between agencies involved in educational planning and long-term health planning is pointed out. Finally, the relationship between research and policy planning at various levels is briefly shown. (MS)

**Identifiers**—England, The National Health Service

Begun in 1948, The National Health Service was organized in a "functional" pattern of three main groups: hospital service, primary health care, and community health services and personal social services. Dissatisfaction led to a reorganization in 1974 along geographical divisions for region, area, and district levels, necessitating a managing staff. New organizational problems presented themselves: (1) the need for training

management personnel and community physicians and (2) decision-making based on consensus rather than authoritative hierarchical status. The Department of Health entered into agreement with eight educational centers in various parts of England to sponsor four types of training: multiprofessional integration courses for all types of senior staff, courses for voluntary members of the new health authorities, programs for clinicians to prepare them for management roles, and courses for Medical Officers of Health and their medically qualified staffs in preparation for their role as community physicians. The costs of the residential courses were to be borne by the Department of Health. (The program at the University of Manchester is described in detail.) An evaluation of the program arrived at a positive assessment. (Outcomes of the program are viewed from three perspectives: the National Health Service, the universities, and the government.) (AG)

Descriptors—\*Behavioral Science Research, Career Opportunities, \*Employee Attitudes, Employer Employee Relationship, Employment, Expectation, Failure Factors, Individual Characteristics, Job Development, \*Job Satisfaction, Labor Turnover, Motivation, Organizational Climate, Performance Factors, Persistence, Success Factors, \*Vocational Adjustment, \*Work Attitudes, Work Environment

What factors affect the attachment of employees to their work and work organization? What are the consequences of attachment or lack of it? The report summarizes the broad findings of a long-term research project designed to examine attitudinal and behavioral aspects of individual-organization linkages, conceived in two broad categories—the acts of joining and remaining employed by the organization, and the person's degree of attachment while employed. Employee turnover received particular research attention in the first category; indexes of employee motivation, organizational commitment, and job satisfaction received particular attention in the second category. Dependent variables considered were job attitudes, turnover and absenteeism, and job performance. The major findings of the specific studies which comprised the project are presented in the context of these categories, in terms of the variables' relationships. The implications for organizations are: focus on pre-entry expectations of new members, monitor their early organizational experiences, determine where commitment to the organization is most crucial and concentrate attention there, develop suborganization attachment, create jobs with greater scope, discover job dimensionality, and individualize incentives. The titles of the project's technical reports and publications are appended. (Author/AJ)

Descriptors—Adult Education, Career Education, \*Curriculum Development, \*Federal Programs, Manpower Development, \*Program Descriptions, Vocational Education

The report surveys curriculum development projects ongoing in 1972 in seven Federal agencies relating to vocational/technical, manpower, adult, and career education. It describes a variety of ways (ranging from personal visitation to utilization of existing publications) in which data

can be obtained without undue requests for assistance from the cooperating Federal agency personnel. The bulk of the report consists of descriptions of 90 projects obtained from the following Federal agencies (with the number of projects reported in parentheses): National Institutes of Health, Bureau of Allied Health Manpower Education (47); Social Rehabilitation Service (17); Department of Labor, Manpower Administration (3); Environmental Protection Agency (6); National Oceanic and Atmospheric Administration, Office of Sea Grants (5); United States Coast Guard (2); and Civil Service Commission (10). The descriptions appear as one-page resumes containing: accession number, date, instructional classification, title (with beginning and terminal dates), director, agency contact, source of funding, media, orientation, subject content, and comment (audience, major emphasis, evaluation, distribution). The report concludes with recommendations for conducting further surveys into curriculum development programs in Federal agencies. Attachments include instructional classification code titles, a media terminology control list, and sample project resume forms. (JR)

Descriptors—Blue Collar Occupations, Caucasians, \*Collective Bargaining, Comparative Analysis, Educational Background, \*Employment Experience, Employment Statistics, Labor Market, Labor Unions, \*Longitudinal Studies, \*Males, Negroes, Participant Characteristics, \*Racial Differences, Tables (Data), Unemployment, Union Members, Wages, Young Adults, Youth Employment

This study deals with the impact of collective bargaining coverage on the 1969-70 labor market experience of young men in blue collar jobs. Specifically examined is the impact of collective bargaining on five dimensions of the labor market experience: (1) hourly rate of pay, (2) hours worked per week, (3) susceptibility to unemployment, (4) duration of unemployment, and (5) growth in hourly earnings. Additionally, the relationship between collective bargaining coverage and racial differentials in these dimensions is explored. Sections deal with: gross union-nonunion differences in labor market experience; union-nonunion differences in personal (including educational background) and situational characteristics; net effects of collective bargaining on earnings and labor market experience; and comparison of racial differences in the union and nonunion sectors. Data on the five dimensions are presented according to major occupation group and race. Two major conclusions are: (1) collective bargaining coverage has considerable net impact on earnings of all workers studied, and (2) unionized blacks experience less unemployment than nonunionized blacks. Appended are: tables showing regression results; a 33-item bibliography; a glossary; an account of sample attrition; a description of sampling, interviewing, and estimating procedures; and the 22-page Census Bureau survey instrument used for interviews in 1970. Descriptors—Attitude Tests, \*Childhood Attitudes, Childrens Books, \*Elementary School Students, Occupational Aspiration, \*Occupational Information, Reading Materials, Sex Stereotypes, Tests, \*Textbook Evaluation, \*Vocational Development

Identifiers—Maine, Occupational Knowledge Testing, \*Old Town Maine School System

To provide guidelines for educators who plan career development in school programs, this research studied the influences on career development of young children. Evidence was sought to determine how the world of work is presented to children in the elementary reading texts and materials. Samples of reading materials used in the elementary classrooms of the Old Town, Maine school system were analyzed and each student in grades 2, 4, and 6 was administered an occupational knowledge test to measure attitudes and knowledge of occupations and perceptions of sex-identified occupations. Data revealed that reading materials had little effect on the child's views of various occupations as measured by correlation between knowledge and preference. Older elementary students showed less prejudice about sex stereotyped occupations than did the younger students. Included in the appendix is Roe's Scheme for Classification of Occupations and a 10-page Career Inventory for the elementary grades. (Author/MU)

Identifiers—\*Maine

The project was designed to provide counseling services for children in poverty areas by preparing community educators to function as counselors. Participants were counselors, teachers, administrators, and employees of helping agencies (Boy Scouts, YMCA, YWCA, etc.) from two school administrative districts evidencing poverty-related problems. The methods and materials employed combined those of the Carkhuff approach and those developed by the University of Maine. Specific participant goals were: (1) improvement of communication skills, (2) acquisition of basic theoretical knowledge of counseling, and (3) attainment of pragmatic skills necessary for counseling youth. Four performance objectives giving direction to program activities are described in detail. The program consisted of 15 weekly sessions, each centering on a basic topic (listed in the report) emphasizing interaction between participants and staff. Participants showed gains in making helping responses and using counseling skills as measured by a pre-post test, Sanford's anecdotal Counseling Questionnaire. Responses to an open-ended questionnaire administered at the end of the project are tabulated item by item with appropriate discussion, indicating that participants felt the project was generally successful. Implications for counseling in rural areas are considered briefly along with eight specific recommendations for future programs. (MS)

**Identifiers—\*Maine**

In order to provide for comprehensive career education needs with appropriate models, it is first necessary to assess the present situation. The purpose of the study was an assessment of the status of career education on the University of Maine's campuses at Augusta, Farmington, Fort Kent, Machias, Orono, Portland-Gorham, and Presque Isle. The methodology (tape-recorded interviews employing a questionnaire format) and interview analysis (campus vignettes and system-wide analysis) are briefly discussed. A survey of related literature deals with the period from 1968 to the present, with emphasis on the post-1970 years. Vignettes for each of the seven campuses provide: a brief description of the institution, administrative responsibility for career education, past perspective, rationale, current programs, academic relationships, and future perspective. The final section, analysis and recommendations, presents eight operational principles relating to career development education which were selected as quasi-criteria in evaluating the Maine system and from which the conclusions and recommendations are drawn. The document concludes with a four-page bibliography and a list of the interviewees. (BP)

Descriptors—\*Administrator Attitudes, Administrator Characteristics, Comparative Analysis, \*Educational Sociology, Equal Opportunities (Jobs), Occupational Aspiration, Post Secondary Education, Professional Recognition, Promotion (Occupational), Proprietary Schools, Role Conflict, \*Role Perception, Self Concept, Statistical Studies, Tables (Data), Teacher Attitudes, Teacher Characteristics, Vocational Development, \*Vocational Education Teachers, \*Women Teachers

The findings reported and discussed in the document are part of a larger study concerning female vocational faculty members in several types of educational institutions. The third of four substudies, the research report deals with female faculty in randomly selected postsecondary proprietary schools. The study identifies the perceptions of female vocational faculty members in the three broad areas of dual-role conflict, career aspirations, and career expectations, and compares their perceptions with those of proprietary school directors in order to identify differences and similarities. Several important discrepancies were found and documented and important status components in vocational education were identified. Analysis of the findings suggests that neither administrators nor female faculty view female faculty as being equal to male faculty; among the many findings are these: over half the administrators and just under half of the female faculty surveyed agreed that, in their institutions, women are not as likely to achieve positions of leadership as men. More than half the administrators feel, however, that women successfully compete with men at their institution, while more than half the female faculty disagreed. (Author/AJ)

The document is the fourth of four substudies concerning female faculty members in different types of educational institutions. The present study focuses on public comprehensive secondary schools and the identification of the perceptions of female vocational faculty members in the three broad areas of dual-role conflict, career aspirations, and career expectations. These are compared with the perceptions of comprehensive high school administrators to identify differences and similarities. Several important discrepancies were found and documented; several important status components of female vocational faculty members were identified. The discussion of the study is in two parts; the first centers on the biographical characteristics of the respondents, the second, on the respondents' perceptions. Among the many findings related to perceptions are these: concerning dual-role conflict, a greater percentage of directors than female faculty agreed that a woman's first responsibility is to be a feminine companion of men and a mother; concerning advancement possibilities, a greater percentage of directors than female faculty agreed that women successfully compete with men at their institution; and concerning professional aspirations, a greater percentage of female faculty than directors believe that a woman's career should be subservient to her husband's. Descriptors—\*Accountants, Business, \*College Graduates, Demand Occupations, \*Employment Projections, Females, \*Managerial Occupations, Manpower Needs, Negro Employment, \*Southern States, Tables (Data)

The report, in assessing regional prospects for business and management and accounting graduates at all degree levels through the rest of the 1970's, arrives at several estimates. The estimated 52,000 degrees to be awarded in 1980 in the Southern region represents a 16 percent increase over the number awarded in 1972. Adjusting the figure to allow for those not entering the labor market immediately and those already in the labor market, new entrants are estimated at 41,000 in 1980. Demand was estimated on the basis of projected employment in the 24 occupations deemed most relevant to a business and management educational background. "Managers and administrators" was the area with the largest employment. Total estimated openings are more than double the estimated number of graduates, constituting a favorable employment market in the Southern region. The outlook favors opportunities for minority (black) and women graduates. The number of blacks in business and management curricula has increased, while the number of women remains low. The projected figures from several surveys for accounting degrees and positions are in conflict, perhaps because of differences in definitions of accounting degrees. However, the overall outlook for accounting graduates appears to be favorable. (Author/AG)

Identifiers—\*Maine

The manual was developed through the combined efforts of the Maine University College of Education staff after carefully assessing the sug-

gestions of Maine teachers who participated in a series of workshops conducted in the spring of 1974. It provides guidelines for planning a series of inservice training sessions for infusing career education concepts into the K-12 curriculum. The inservice program contains nine modules covering: (1) career education: historical antecedents (four lessons); (2) career development in the school (four lessons); (3) working with self-concept (one lesson); (4) career education in the elementary school (one lesson); (5) career education in the secondary school (one lesson); (6) strategies and practices for implementing career education (one lesson); (7) community involvement in career education (four lessons); (8) career education and economic education (one lesson); and (9) evaluation strategies in career education (three lessons). For each module a brief discussion of the main topic, goals, and lessons are provided. Each lesson outlines the goals, content, workshop leader activities, lesson resources, and recommended time. Charts, diagrams, learning activities, and evaluation procedures are interspersed throughout the document. A six-page career education bibliography concludes the document. (BP)

The primary intent of the field tested unit is to develop self-awareness, career awareness, and economic awareness for students in the third grade. Lesson topics are: interdependency between the child, the family, and the community for needs that are economic; interdependency between occupations within a community; ways in which members of a group may affect each other's behavior; and services that social organizations provide for the members of a community. An introduction for the instructor planning to teach the unit includes a unit content/strategy profile and a unit resource profile. The 12 lessons take a total of 19 hours and call for large and small group work. Each lesson is presented under the headings of: concept, performance objective, lesson time, new vocabulary introduced, resources required, instructor preparation tasks, instructional procedures, a summary of the unit, supplemental activities, assessment procedures and tools, and various related worksheets. An instructional strategy guide (covering discussion, questioning, role-playing, self-directed activities, and storytelling) and a seven-item bibliography are appended. (BP)

The field tested instructional unit was designed to help fifth graders understand principles related to economics. Lesson topics are: supply and demand, items that maintain a high value, seasonal tourist attractions, seasonal and fluctuating products, principles of budgeting, saving money, and investment possibilities. An introduction for the instructor planning to teach the unit includes a unit content/strategy profile and a unit resource profile. The unit takes approximately seven hours and includes a large and small group and individual activities. The seven lessons are presented under the headings of concept, performance objectives, estimated time, new vocabulary introduced, resources required, instructor preparation tasks, instructional procedures (introduction, tasks, summary), assessment procedures and tools, and worksheets. The field tested unit for the sixth grade was designed to generate interest on the part of students in exploring a secretarial career. The unit includes a discussion of the duties of a secretary, learning the six main parts of the business letter of request, and the actual writing of a letter to a businessman for information and/or inviting him or his secretary to speak to the class. The unit takes two hours and forty-five minutes, includes large and small group and individual activities, and is related to the language arts subject area. It presents performance objectives, related learning activities, and evaluation suggestions for each objective listed. The document concludes with a list of enrichment activities, instructional materials (books, films, filmstrips, and kits), and teacher preparation and evaluation suggestions. (Author/BP)

The field tested unit is designed to acquaint sixth graders with the 15 USOE job clusters, the jobs therein, and the general requirements for these jobs. The unit requires 19 hours of teaching time and includes whole class activities and large and small group activities. A list of materials required is followed by a goal statement, related subject areas (language arts and social studies), and two performance objectives with accompanying activities and evaluation methods for each. Half of the document consists of transparency masters and work sheets showing jobs within occupational clusters, tests with answer keys, a sample job application master, and a list of resources. The field tested sixth grade instructional unit was designed to explore learning in its broadest sense, involving the learners in activities dealing with what learning is, where they learn, and how they learn. The seven lessons deal with defining learning and knowing, exploring learning experiences both in and out of school, learning as it is dependent on the learner's interests and abilities, and learning through the budgeting of time. An introduction for the instructor planning to teach the unit includes a unit content/strategy profile and a resource profile. The seven lessons will take a total of 10 to 11 hours of instruction, involving large and small group and individual activities. One lesson can be adapted for self-directed learners. Each lesson is presented in terms of concept, performance objective, estimated time, new vocabulary introduced, resources required, instructor preparation tasks, instructional procedures (introduction, tasks, and summary), assessment procedures and tools, and worksheets. An instructional strategy guide covering demonstrations, discussions, questioning, role-playing, and creative writing, and an eight-item bibliography are appended. (BP)

The sixth grade learn-to-earn field tested unit was designed to develop career awareness and employability skills. The purpose is to help the learner understand the tasks performed in the home setting as related to the interest, aptitude, and training of the individuals performing these tasks. The lesson topics are: ways to earn money; personal characteristics valued by most employers; considerations other than personal characteristics; introduction to advertising one's services and advertising by telephone, personal contact, and ads; and job selection and preparation. An introduction for the instructor planning to teach the unit includes a unit content/strategy profile and a resource profile. The unit takes 12

hours and includes large and small group and individual activities. The five lessons are presented under the headings of: concept, performance objective, estimated time, new vocabulary introduced, resources required, instructor preparation tasks, instructional procedures (introduction, tasks, summary), assessment procedures and tools, and worksheets. An instructional strategy guide covering discussions, guest speakers, role-playing, and storytelling; a list of supplementary resources; and a six-item bibliography are appended. (BP)

The field tested construction industry-related mathematics unit is intended to familiarize seventh grade students with various facets of the construction industry, including the various occupations available and the mathematical abilities and other skills and training necessary to pursue an occupation in the industry. The final set of activities of the unit gives students an opportunity to plan a house and to compute the approximate cost of their "dream house." Opportunity is also provided for the students to work with various construction industry-related mathematics problems. The unit takes 15 hours of teaching time and includes whole class, small group, and individual activities. Four performance objectives are presented, with suggestions for accompanying learning activities, student evaluation, and enrichment activities. Half of the document consists of various student worksheets and a media and resource list. (Author/BP)

The instructional unit, field-tested in Arizona, is intended to become an integral part of a total K-12 career education curriculum. Six lessons are designed to assist learners in understanding how present experiences relate to past and future ones by comparing the cultures of Europeans in New England, and of Spanish soldiers and Indians in the Southwest, in the 1600's, with contemporary American culture. Dependency on products and interdependency among workers are emphasized. The lessons are broken down into several parts; before the main body of the lesson is described, key items are presented: the concepts, estimated lesson-time, the vocabulary, required resources, and instructor-preparation tasks. Instructor procedures are presented in three sections: the introduction, which provides continuity within the unit; the tasks, which provides a detailed description of the content and activities used to deliver the specified outcomes; and the summary, which provides closure and a culminating activity. Many instructional resources, designed to require minimal operation time, are included in the lessons. The unit contains several types of instructional strategies: demonstration, discussion, and questioning. Instructor guides for these strategies are appended, with specific references given in the lessons. Supplemental reading material is also appended. (Author/AJ)

The primary purpose of the field tested unit is to assist the instructor in giving specific training in the area of self-awareness to the special education student. The rationale for a career education-special education program is discussed, followed by a project overview. Each of the six units (physical self, emotional self, familial self, social self, occupational self, and a culmination activity unit) are presented in terms of specific behavioral objectives. Introducing each unit is a general description of the unit goals, objectives, purpose, approximate teaching time, suggested groupings, and evaluation suggestions. Each lesson within a unit is geared to one of the unit's objectives. The goals, performance objectives, resources required, instructor preparation tasks, instructional procedures, lesson introductions, developmental activities, and lesson summaries are provided for each lesson. The study examines data collected in a survey of 650 (of a potential 759) severely disabled Iowans, taken by 26 counselor-interviewers to gain information for planning future State rehabilitation programs. Clients responded to questions involving their self-perceptions on the following topics: employment status, employability, services most needed to help in job readiness, and employment. Data are shown in tabular form, and the survey is discussed under these chapter headings: The Nature of the Study, defining purpose and procedure; Socio-Demographic Data, providing information regarding client location, personal characteristics, education and training, employment status, and rehabilitation services received; Client Perceptions of Problems and Needs, covering the employed, unemployed, and underemployed and their attitudes regarding training; Counselor-Interviewer Perceptions, comparing interviewers' impressions of clientele problems and needs to those of the client; Rehabilitation Evaluation and Service, discussing further training opportunities for interviewees desirous of it. Six conclusions cover: (1) general physical condition, (2) need for acquisition of manual skills, (3) need for additional training, (4) need for vocational evaluations, (5) the presence of a positive attitude, and (6) potential for employment. Letters to survey clientele, a sample survey questionnaire, and numbers of interviews by county are appended. (LH)

Designed to assist teachers and school administrators in effective utilization of community resources within vocational-technical education programs, the manual outlines strategies in the identification, development, utilization, and evaluation of community resources available to local school districts. Section 1 provides a general introduction to the definition, identification, and value assessment of community resources. Section 2 focuses on the step-by-step procedures involved in the organization and utilization of citizens' advisory councils. Section 3 contains activities and procedures to assist councils and school personnel in the development and utilization of speakers, field trips, cooperative occupational education programs, and contractual agreements. The concluding section deals with the evaluation of citizens' advisory councils, guest speakers, field trips, and cooperative work experience programs. More than half of the document consists of four appendixes that correspond to the four preceding sections. Material in the appendixes includes samples of information and survey forms, letters, questionnaires, a citizens' advisory committee charter, recommended policies and guidelines, various contractual agreements, and evaluation/appraisal sheets. **Identifiers**—\*Career Guidance, Career Planning Support System, CPSS

The general report has summarized the development of an operational program planning and evaluation component called Operation Guidance, which is part of the Career Planning Support System (CPSS). (The CPSS, a systematic approach to improving high school career planning programs, has addressed itself to the critical career guidance deficiencies of career development of minority youth, career development of women, program planning and evaluation,

and the transition from school to work.) Operation Guidance will provide a package of manuals, procedural guides, audiovisual aids, and inservice materials that are designed to serve as a tool with which individual high schools can design, implement, and evaluate their own career planning programs. Key leaders designated for the program are the school principal and the project coordinator, who will be supported by others within the school and the community. Other aspects covered include procedures for organizing faculty, students, and community members to accomplish program development tasks. Short- and long-range outcomes and the school's cost are also discussed. A national field test of the product is scheduled from September 1974 to June 1976, with the entire CPSS materials scheduled for availability in late 1976. (EA)

**Identifiers**—\*Florida

The report provides the framework for developing comprehensive competency-based

teacher education (CBTE) for Florida's industrial education teachers based on their expression of specific needs. A research base of projects done by competent educational institutions was utilized. An advisory committee was formed and its composition and activities are described. Workshops evaluated and validated the existing list of competencies and criteria. A summary of these evaluations is presented according to seven competency areas (human relations, instructional planning, teaching methods, shop/classroom management, evaluation, professional development, and student organizations). A summary of the evaluations of instructional materials from CBTE programs is included. Four major accomplishments of the project are listed. A detailed list of the preservice industrial education teacher competencies and criteria is presented along with a summary of workshop findings dealing with them. Six barriers to implementation and nine change agents working to promote CBTE are described. The last section deals with five recommendations for the next program phase. Appended materials (88 pages) include an overview of CBTE information from 10 State departments and universities, CBTE advisory committee list, sort procedure, materials specific to CBTE workshop, workshop instruments, recommended changes to preservice competencies and criteria, and CBTE Advisory Committee Meeting Agendas. **Descriptors**—Administrator Responsibility, \*Adult Education, Adult Education Programs, \*Criteria, \*Noncredit Courses, \*Program Administration, Records (Forms)

**Identifiers**—CEU, \*Continuing Education Unit, Michigan State University

The official criteria and procedures for the implementation of Michigan State University—Continuing Education Unit (CEU) Programs are delineated in this report. The CEU is defined as 10 contact hours of participation in an organized continuing education experience under responsible sponsorship, capable direction, and qualified instruction. The National Task Force on the CEU created and defined this uniform unit of measure because of the need for using noncredit learning in appraising the personal and occupational growth of individuals. Three purposes of the CEU as defined by the National Task Force are given. Criteria for and limitations on CEU approval are described. The administration of CEU procedures (including procedures for requesting CEU approval) and program administrator responsibilities (applying for CEU approval, program announcement procedures, program preregistration and registration procedures, and certification procedures) are outlined in detail. Two types of computerized student records are briefly outlined. Appended materials include: (1) membership list of the National Task Force on the CEU, (2) CEU request/approval form, (3) preregistration form, (4) registration form, (5) program attendance record, (6) program summary form, and (7) sample official CEU transcript. **Descriptors**—\*Abstracts, Audiovisual Aids, Elementary Secondary Education, \*Industrial Education, \*Instructional Materials, Learning Activities, \*Material Development, Problem Solving

The report summarizes project activities of 1973-75 in which instructional materials were developed to aid in the implementation of the Wisconsin Guide to Local Curriculum Improvement in Industrial Education, K-12. A summary of activities (1973-74 project year) outlines project organization information and lists the titles of 14 learning activity packages developed and goals for the following year. The summary of activities and final report (1974-75 project year) outlines personnel and procedure reorganization, new learning and problem solving activity package titles and audiovisual material prepared, and enumerates eight objectives related to the development and distribution of materials and the degree to which they were met. Abstracts are provided which describe 26 field-tested instructional packages and 13 untested packages, including learning activity packages, a unit proposal, problem solving activities, and audiovisual programs. Subject areas covered by the packages include industrial education, career education, communication, management and personnel, problem solving activities, and cooperative education. Also appended are a field testing letter of inquiry and questionnaire, and questionnaires regarding teacher evaluation of programs and problem solving activities used. (LH)

**Descriptors**—Comparative Analysis, Data Analysis, Demand Occupations, Educational Programs, \*Educational Supply, Employment Patterns, Employment Statistics, Labor Supply, \*Manpower Needs, Occupational Clusters, \*Occupational Information, Occupational Surveys, State Programs, \*State Surveys, Statewide Planning, \*Tables (Data), Vocational Education

**Identifiers**—Occupational Training Information System, \*Oklahoma, OTIS

The Occupational Training Information System (OTIS) report enumerates current data on manpower supply and demand conditions (from July 1, 1974 to June 30, 1975) in selected occupations and training programs in Oklahoma. Data sources, which included Federal and State agencies, and the procedures used to collect and analyze the data are presented in the introductory chapter. Chapter 2 (42 pages) provides manpower supply and demand tables presenting statewide totals arranged according to: clusters of occupations, demand, vo-tech supply (secondary, postsecondary, and adult), other sources (Federal, private schools, and descriptive registration), and clusters of programs. Chapter 3 (39 pages) presents additional tables providing a descending rank order of program clusters by demand minus vocational-technical supply. The program cluster with greatest net manpower demand is ranked one and is followed in order by the program clusters with lesser demand. The rank ordering provides a simple analysis of the tables and is useful to quickly identify program clusters by vocational and technical divisions in which training is needed on a statewide and/or regional basis. Appended are a sample student status form, OTIS procedural flow chart, and an index of statewide totals and descending order of program clusters. (Author/BP)

**A Study to Determine the Perceptions of Vocational Educators Regarding a Professional Association.**

Pub Date Aug 75

Note—156p.; Ed.D. Thesis, Pennsylvania State University. Not available in hard copy due to poor reproducibility of original document

**EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.**

**Descriptors**—Bureaucracy, \*Educational Research, Educational Sociology, Leadership Responsibility, Objectives, Perception, \*Professional Associations, \*Professional Recognition, Program Attitudes, Role Perception, Statistical Analysis, Statistical Studies, Status, Status Need, \*Teacher Attitudes, Teacher Morale, Teacher Welfare, Vocational Education, \*Vocational Education Teachers

**Identifiers**—American Vocational Association, AVA

The study examined selected perceptions and attitudes of randomly identified members of the American Vocational Association (AVA) regarding some of the goals and objectives of this organization. The sample was assessed to determine the relationships among isolated variables (collective bargaining, State legislation, Federal legislation, communication with members, interdisciplinary affiliations, accreditation, certification, and current policy components) and certain demographic data (type of bureaucratic structure, level of academic education, number of professional organizations an individual belongs to, membership in union-type educational organizations, amount of work experience before entering education, annual salary, attendance at a national convention since 1970, and the number of State educational activities attended). Congruencies and discrepancies, determined through statistical analysis, are reported. The author suggests that the findings provide both a rationale for the AVA to move in a positive direction regarding goal priorities and the motivation to develop a plan for coping with members' attitudes toward the AVA's direction. The forms employed in the research are appended. (Author/AJ)

**Approaches to Volunteer Leadership.**

Pub Date 22 May 74

Note—9p.; Paper presented at EFNEP Workshop, National 4-H Center (Washington, D.C., May 22, 1974)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*Extension Agents, Group Dynamics, \*Leadership Training, \*Low Income Groups, Manpower Development, \*Volunteers

It is important for leaders of volunteers to examine their attitudes toward their group, particularly their way of defining their group, and to bring a diversity of experience to their work. Three steps that should be taken to develop extension volunteers who are from low income groups and who will work with low income groups are: get them involved in your program, give them the support they need to succeed, and let them know they are appreciated. The first step involves interesting the prospective volunteer, identifying the job to be done, and recruiting the individual. The supportive step requires a lot of flexibility and variety to be successful. One of the most successful methods is to present limited amounts of information close to the time the information is to be used. The final step, appreciation, can be accomplished in a variety of ways: use symbols of group identity; present roles which will enhance the volunteer's self-image, but present them in a nonthreatening way; and extend verbal expressions of appreciation. **Descriptors**—Activity Units, \*Construction (Process), \*Educational Objectives, \*Elementary Education, Hand Tools, Industrial Arts, \*Industrial Education, \*Learning Activities, Student Projects

Prepared as an aid to teachers, the document contains two parts intended to help correlate instruction of industrial arts at the elementary level with the recommended curriculum content in the Wisconsin Guide to Local Curriculum Improvement in Industrial Education, K-12. Pertaining to field objectives 1-4 in the guide, Industry for the Elementary Grades outlines basic objectives and suggests activities for working in the areas of communications, construction, energy, transportation, materials, processes, and services. It is emphasized that the second section, Example Elementary Unit, is intended to provide teachers with ideas, suggestions for activities, content organization, and format which could be used in the implementation of any part of the guide. The sample unit deals with home construction and includes detailed instructions for building a model house and a game intended to familiarize students with hand tools. Each of the four field objectives is supplemented by one or more terminal objectives, enabling objectives, methods which can be used, media and materials suggested and required, and methods the teacher can use to evaluate student progress. **Descriptors**—\*Career Choice, \*Career Planning, \*Industrial Education, Instructional Materials, \*Learning Activities, Occupational Clusters, Occupational Guidance, Secondary Education, Trade and Industrial Education, Vocational Development

**Identifiers**—Capstone Programs

The intent of this two-part instructional package is to assist senior high school students in making rational decisions regarding career choice and further training and education. Part 1, Introduction to a Capstone Program, defines behavioral objectives and includes a basic information section on job clusters and the capstone program. Five classroom activities concentrate on student explanation of the capstone program and job cluster concept through examination of six trade and industrial career areas. A self-test and media guide are included. Defining employment-related terms, Part 2, Career Planning, outlines four learning activities for students: (1) listing career choice, (2) evaluating the career and its requirements, (3) assessing personal aptitudes, and (4) comparing the information. A sample resume and list of supportive materials are included. (LH)

**EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage**

**Descriptors**—Class Activities, \*Elementary Education, Individual Activities, Industrial Education, \*Learning Activities, \*Teaching Guides

The teacher directed problem solving activities package contains 17 units: Future Community Design, Let's Build an Elevator, Let's Construct a Catapult, Let's Design a Recreational Game, Let's Make a Hand Fishing Reel, Let's Make a Wall Hanging, Let's Make a Yo-Yo, Marooned in the Past, Metrication, Mousetrap Vehicles, The Multi System Encapsulator, Safety Card, Paper Airplane Contest, The Electro-Magnetic Crane, Egg Craft, Designing a Mobile, and Compressed Air Propulsion. Suggestions to the teacher regarding the statement of the problem to be presented, the point of view to be taken, procedures and needed materials, possible solutions to the problem, length of the project, safety notes, information for the student, and model drawings are provided where applicable. All activities pertain to field objective number 1 of the Wisconsin Guide to Local Curriculum Improvement in Industrial Education, K-12. (LH)

Descriptors—Auto Mechanics, Business Education, Class Activities, Cooperative Education, Drafting, Equipment Maintenance, \*Instructional Materials, Junior High Schools, \*Learning Activities, Secondary Education, Student Projects, \*Trade and Industrial Education, Transparencies

This student directed document contains five activity packages, a proposed curriculum, and a set of transparency masters; all pertain to field objectives 1, 4, or 5 of the Wisconsin Guide to Local Curriculum Improvement in Industrial Education, K-12. Geared to the junior and senior high school level, the packages are entitled: Co-op Program (defining school, business, and parent efforts to supply vocational training for students); Cleaning and Lubrication of Electric Motors (outlining the procedure and equipment necessary for the job); Geometric and Positional Dimensioning (supplying the experienced student with information, definitions, examples, references, and activities to help him gain competency in draftsmanship); Lab Maintenance Plan Development (outlining procedures for the upkeep and repair of equipment); The Enterprise (defining elements of business through media and information sections, activities, and student self-tests, and supplemented by an audiovisual presentation); and The Enterprise—An Alternative Delivery System (outlining activities geared to smaller groups, including procedures for setting up student businesses). Automotive Suspension, Steering and Braking, a proposed curriculum, outlines four sections of instruction giving length of time and areas spent for each; Elements of Industry, 50 transparency masters, are also included. (LH)

Descriptors—Business Education, Class Activities, Energy, \*Industrial Education, \*Instructional Materials, Junior High Schools, \*Learning Activities, Lumber Industry, Metal Industry, Secondary Education

The document contains eight student directed and two teacher directed activity packages, and a proposed curriculum guide; all pertain to field objectives 1, 2, or 3 of the Wisconsin Guide to Local Curriculum Improvement in Industrial Education, K-12. Geared to the junior high level, the student packages are entitled: Repair of a Lamp Cord and Socket (outlining the procedure and equipment necessary to do the job); Power and

Energy (defining power and how it is used to produce goods and services); Early Lumbering (exploring the development of the industry); What Is Property? (examining its influence on industry); How Does Management Affect Industry and Society? (discussing how industry functions in society); Human Resources (defining the manpower element of industry); and Mass Production Activities (diagraming and listing materials and procedures for building five puzzles). The teacher packages are: The Development of Communications, which outlines a class approach for the teacher emphasizing historical growth and which is supplemented by an audiovisual presentation, and Let's Make a Kite, which suggests problem solving, mass production, and individualized activities for the classroom teacher. A proposed curriculum, Metals Industries, outlines scope and sequence for each of four proposed units, including laboratory work, field trips, and a class enterprise. (LH)

The curriculum guide for welding instruction contains 16 units presented in six sections. Each unit is divided into the following areas, each of which is color coded: terminal objectives, specific objectives, suggested activities, and instructional materials; information sheet; transparency masters; assignment sheet; test; and test answers. The first three sections, which provide an introduction to welding, are: Introduction (safety, orientation to welding, and metals); Related Information (Vocational Industrial Clubs of America, parliamentary procedure and public speaking, becoming a good leader, applying for a job, and measuring); and Blueprints (basic blueprint reading). The remaining three sections, which provide practical welding experience and which comprise approximately two-thirds of the document, are: Oxyacetylene Welding (oxyacetylene cutting, oxyacetylene fusion welding, and oxyacetylene braze welding); Arc Welding (sheet metal arc welding and sheet metal arc welding position welding); and Gas Arc Welding (gas tungsten arc welding and gas metal arc welding). The units in the last three sections also include job sheets with directions for specific welding projects. (JR)

Teaching the Disadvantaged: A Curriculum Guide for Classes of Disadvantaged Students in Agricultural Education Programs.

Virginia Polytechnic Inst. and State Univ., Blacksburg. Div. of Vocational-Technical Education.

Spons Agency—Virginia State Dept. of Education, Richmond. Agricultural Education Service.

Pub Date Mar 75

Note—39p.

#### EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Agricultural Education, \*Curriculum Guides, \*Disadvantaged Youth, Learning Activities, Secondary Education

The guide begins with some observations on teaching disadvantaged students, a list of successful types of learning activities, and recommendations for planning and conducting an effective classroom situation. Also included are 13 general objectives of a program for the disadvantaged. The guide, intended as a source of ideas and directions in selecting instructional units, is organized according to enterprises (topics) which are divided into problem areas (subtopics) followed by an application section which suggests some specific activities for students. Instructional topics include: masonry, electricity, plumbing, woodworking, metal work, welding, painting, agricultural equipment maintenance/repair, farm structures, animal care, crops, soil and water management, forestry, conservation, recreational occupations, horticulture, and agribusiness. Some of the instructional areas are designed to be taught flexibly, using those problem areas which will meet student needs. Other areas include a unit division for which all the problem areas should be taught. Final sections deal briefly with occupations for the disadvantaged and with relating occupations to the curriculum guide. (MS)

Instructional Materials Development in Agricultural Education at Virginia Polytechnic Institute and State University.

Virginia Polytechnic Inst. and State Univ., Blacksburg. Div. of Vocational-Technical Education.

Pub Date 75

Note—30p.

#### EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Agricultural Education, Curriculum Development, \*Material Development, Resource Guides

Instructional materials development in agricultural education is part of the role of the faculty in the Agricultural Education Program Area at Virginia Polytechnic Institute and State University. The bases for instructional materials development must relate to the curriculum. Curriculum development is a moving circular process involving horizontal and vertical articulation-diffusion of materials between educational programs. Beginning in the 1920's and continuing until the present date, the materials produced have been widely used. An eight-step procedure is used in materials development: (1) determination of material needed, (2) preliminary planning, (3) information acquisition and analysis, (4) preparation of first draft, (5) refinement and field testing, (6) printing, (7) distribution-diffusion, and (8) appraisal and updating. Materials development is an integral activity and responsibility of the faculty involving three major interrelated functions: service, research, and instruction. The faculty has access to numerous supportive services in instructional materials development and participates in supportive associations. Appended are: staffing list of the Agricultural Education Faculty, a seven-page list of recent instructional materials development activities (titles and brief annotations of 79 items), and a two-page bibliography. Descriptors—\*Animal Caretakers, \*Career Opportunities, \*Curriculum Guides, \*Occupational Information, Resource Guides, Secondary Education, Vocational Agriculture  
Identifiers—\*Household Pets

The publication is designed for teachers of agriculture as a guide in developing teaching plans for a unit on the care and feeding of household pets and on occupations in this area. A local situation appropriate to the unit, teacher objectives, an introduction, and group objectives are briefly developed for the unit. For the topics of feeding and caring for dogs, feeding and caring for cats, sources of information on other household pets, and identifying occupational opportunities in pet care, the guide includes sections on problems and concerns of students, a list of references for teacher and student use, suggested visual aids and other equipment, ideas for special events and activities, and a few possible activities for application and evaluation. A detailed content summary for each section, intended for teacher use, condenses material from the references and relates to the problems and concerns presented. A section on identifying sources of information on other household pets lists specific references, including source and content, for each item. The subject of understanding pet care is briefly described. (MS)

Descriptors—Building Trades, \*Course Content, \*Instructional Materials, \*Painting, Secondary Education, \*Teaching Guides, Trade and Industrial Education

The publication contains an outline for use by agriculture teachers in developing a teaching plan for a unit on paints and preservatives. The topics included are (1) recognizing, solving, and preventing paint problems and (2) operating and using power spray painting equipment. Items presented for each topic are: the situation, (intended to inform the teacher of the type and level of the material), teacher objectives, examples of teaching procedures, problems and concerns of students, student objectives, references for teacher and student use, sample student activities, and suggested means for evaluation. A detailed technical information section for each of the two topics provides some of the information needed to teach the unit. For the subject area of paint problems, the causes, prevention, remedies, and an illustration of 34 problems are given. Spray painting material (correlated with eight transparency masters) includes descriptions of basic equipment, spraying procedure, Occupational Safety and Health Administration approved spray painting room, the construction of spray booths, and 12 problems associated with spray painting and their causes and solutions. The guide contains an 11-page glossary of common painting terms and a list (with addresses) of 17 major paint and painting equipment companies. (MS)

Note—116p.; Portions of the illustrative material may not reproduce well on microfiche

EDRS Price MF-\$0.76 HC-\$5.70 Plus Postage

Descriptors—Cooking Instruction, \*Equipment, \*Food, Food Processing Occupations, \*Food Service Industry, Foods Instruction, \*Manuals, Nutrition Instruction, \*Preservation, School Community Relationship, Secondary Education  
Identifiers—\*Canning

The manual was intended primarily for use by lay instructors and assistants involved in the daily operation of school-community canneries under the supervision of a high school agricultural education instructor. The first half deals in detail with the fundamentals of food preparation and canning operation. Food preservation by canning, sanitation in the canning structure, canning equipment, and general canning procedures are discussed and illustrated. Detailed procedures for canning specific food products (in glass jars or cans) are presented for 34 food products in the general categories of fruit; vegetables; and meat, meat products, and poultry. Information on the yields of food products and the use of sugar in canning fruit is included. Three sample lesson plans for planning instruction in various areas of nutrition and food preservation are also in the manual. These plans offer teacher objectives, an introduction, group objectives, problems and concerns of students, references, suggested visual aids, special activities, and ideas for application and evaluation. A content summary provides basic information needed for each lesson. Appended is a list of sources of instructional materials on food preservation. A 28-item bibliography contains sources of additional information on food preservation. (MS)

Descriptors—Agriculture, \*Agricultural Education, \*Agricultural Occupations, Career Choice, \*Career Education, Career Planning, Farm Occupations, \*Instructional Materials, \*Occupational Information, Off Farm Agricultural Occupations, Reading Materials, Secondary Education, Vocational Agriculture

The booklet is designed primarily for use in teaching students about careers and the importance of work; it provides introductory information about agricultural occupations presented at the reading level of students normally enrolled in high school agricultural classes. Among the fundamental principles which should be taken into consideration when early decisions about agricultural careers are made, are these: Many occupations in agribusiness tend to be similar to those of other businesses from the standpoint of benefits to the worker, yet, in certain agricultural occupations there is a great deal of difference; the hours of work, fringe benefits, and methods of pay for farm work, for instance, often vary from routine industrial work. Further information is presented on the organization of work, the trend in working conditions, the role of labor unions, labor legislation, and discussion of labor market trends and the possibilities for small businesses. Two pages of questions for discussion and activities to perform conclude the booklet. (Author/AJ)

Descriptors—Behavioral Objectives, Course Content, \*Curriculum Guides, Educational Objectives, \*Health Occupations Education, Learning Activities, \*Lesson Plans, \*Nurses Aides, Reading Assignments, Resource Guides, Secondary Education

The curriculum guide, developed to serve as a statewide model for nursing assistant programs, offers teaching suggestions for nursing assistant courses in the public schools. It is designed for 270 hours of theory and 200 hours of clinical instruction. There are 11 units of instruction: orientation; human behavior; medical communication skills; asepsis; nutrition; safety; body systems and disorders; basic skills; admission, transfer, and discharge; death; and maternal and infant care. For each unit, vertical columns present expected behavioral outcomes, content, suggested activities, and evaluation/assignment suggestions. The units constitute the first half of the document. The remaining half of the guide presents sample lesson plans in 16 areas: admission, asepsis, back care, bathing the newborn, care of the dying, communicable diseases, medical terminology, mental health, muscular system, nutrition, customs and rites, respiratory system, taking temperatures, and urinary system. The final three pages list sources for filmstrips, films, transparencies, kits, posters, pamphlets, and other material. (AG)

**Descriptors—**\*Career Choice, Comparative Analysis, Degrees (Titles), Employment Opportunities, Equal Opportunities (Jobs), \*Females, \*Higher Education, Occupational Choice, Regional Schools, \*School Surveys, Sex Role, Sex Stereotypes, Statistical Data, Student Characteristics, Tables (Data), \*Womens Education Identifiers—Ohio (Cleveland)

The study examines the kinds of education and training that women have been receiving from institutions of higher education in the Cleveland area and particularly in Cuyahoga County. Records of degrees conferred in 1973-74 by program study were secured from nine colleges and universities in Cuyahoga County (Baldwin-Wallace, Case Western Reserve University, Cleveland State University, Cuyahoga Community College, Dyke, John Carroll University, Notre Dame, St. John College, and Ursuline College) with total enrollments of 52,855. The percentage distribution of degrees granted by field of study in Cuyahoga County and the number of degrees granted per 100,000 population are compared with national average figures (1970-71) from the Department of Health, Education, and Welfare. The survey data showed that most women receiving degrees in Cuyahoga County have been trained in traditionally "female" fields of specialization; few women have received degrees in traditionally "male" fields; and the absence of women in education and training programs leading to male occupations is true of all types of postsecondary education and training. The report further discusses possible factors accounting for the small number of women in traditionally "male" programs of study. The study concludes with a list of priority areas for further investigation. (BP)

The report describes an institute whose purpose was to produce specific recommendations to facilitate student transition from one school to another within and between the secondary and postsecondary levels in the four vocational education subject areas of agriculture, auto body repair and painting, carpentry, and distributive education. For each of the four subject areas, the report describes goals and objectives; analyzes both horizontal and vertical articulation with respect to recommendations, implementation procedures, cost factors, and implications/benefits; and provides course equivalencies among the various participating secondary and postsecondary institutions. Three-fourths of the document consists of appendices. The first appendix is a third party evaluation of the institute which considers background of respondents, goals/purposes of the institute, institute methods and materials, institute organization, and summary and recommendations. Four other appendices provide various information for the four subject areas such as task force budgets, student flow charts, courses, requirements, and course descriptions at the various high schools and community colleges, and employment opportunities. The final appendix lists institute participants. (JR)

The followup study on program articulation in Hawaii public secondary and postsecondary educational institutions examines articulation in the subject areas of auto mechanics, business education, drafting, and food service. It contains seven general recommendations regarding articulation for the State Board of Vocational Education, the Board of Regents, community college provosts, and the State Department of Education. In addition, it contains specific recommendations relative to implementation of program articulation in the four subject areas for the community colleges and State Department of Education. It also contains the report of an administrators' meeting on articulation with the various general and specific recommendations and articulation guidelines and responsibilities delineated by provosts. Appendices comprising one-half of the document list the program offerings in the four subject areas and analyze them with respect to: extent of implementation of articulation, description of implementation, responsible agent, expected outcomes, cost factors, and other implications of both the postsecondary and secondary levels. The guide provides suggestions for vocational educators who desire to write proposals for research, demonstration, or development. The guide's first chapter, Organizing Your Ideas, outlines procedures for communicating one's intentions and for preparing a prospectus or abstract,

and offers models of abstracts. The second chapter, Writing the Proposal, covers the following areas: statement of the problem, review of the related research and literature, objectives, procedures or methodology, preparing a project time line, project evaluation, dissemination procedures, staffing, budget requirements, and appendixes. The final chapter, Submitting a Proposal, covers planning for the details and evaluating the proposal. The guide also includes an index. (JR)

**Descriptors—**Data Analysis, Data Collection, \*Questionnaires, \*Research Methodology, \*Research Skills, \*Research Tools, Statistical Analysis, \*Surveys, Test Bias

The manual provides vocational educators with information and guidelines regarding the design and use of questionnaires and interviews for gathering data and the construction, tabulation, and analysis of both open ended and forced response survey instruments. The first of nine chapters deals with surveys as a data collection technique, discusses the use of printed instruments, other information collecting techniques, and additional guidelines to determine the selection of survey type. Chapter 2, writing questions, covers plans for question building and response modes. Chapter 3, forced response questions, deals with establishing appropriate scales and includes self-practice items. Chapter 4, coding survey items, discusses forced response and open response codes. Chapter 5, preventing biased results, deals with wording the questions, sampling considerations, and selecting the appropriate response type. Chapter 6, conducting the survey, discusses knowing the target population, protecting the participants, using inclusionary language, and communicating with the target population. Chapter 7, tabulation of data, discusses methods of tabulation, especially electronic tabulation. Chapter 8, statistical analysis of data, discusses descriptive techniques and the use of statistical tests. The last chapter, the research report, covers planning and constructing the report. An appendix includes three model questionnaire formats. The document is indexed. (JR)

**Inservice Education Manual for Long-Term Care Facilities in South Carolina.**

South Carolina State Board for Technical and Comprehensive Education, Columbia.

Spons Agency—Health Services and Mental Health Administration (DHEW), Bethesda, Md.

Pub Date Mar 74

Note—163p.

**EDRS Price MF-\$0.76 HC-\$8.24 Plus Postage**  
**Descriptors—**Adult Education, \*Inservice Courses, \*Inservice Education, Instructional Aids, Lesson Plans, Manuals, \*Nursing Homes, Program Evaluation, \*Resource Materials, \*Teaching Guides, Teaching Methods, Teaching Skills, Unit Plan Identifiers—South Carolina

The manual contains comprehensive multidisciplinary training units for supervisors intending to conduct inservice education courses among health personnel in South Carolina nursing homes. The first five units provide a general orientation to inservice education: introduction, the supervisor and inservice education, what inservice can and can't do, why plan inservice education, and orientation and continuing education (the new employee, developing the team). The next nine units contain specific suggestions regarding inservice education courses: setting priorities, choosing a topic, writing objectives for the training session, constructing the training plan, designing the lesson plan, using personnel within the nursing home for training and followup, delivering training, and evaluating. The final unit comprises half of the document and contains resource material which includes descriptions of: the trainer's role, needs indicators and needs assessment, training aids, training details, sample lesson

plans, evaluation methods, \*records, personnel evaluation, and regulations for Medicare and Medicaid. (JR)

Identifiers—\*War Colleges

The document's purpose was to generally assess the role of military education in the professional development of American military leadership and to derive supporting educational theory and construct. Professional military education resides in difficult circumstances. While external challenges from the Congress and the administration appear to constitute the most serious problems, the gravest concerns emanate from within the military establishment. Military education tends to vocationalize and specialize professional development rather than convey broad understanding. The political environment faced by the military generalist is not adequately confronted in the educational system nor in the indeterminacy of future strategic design. The document concludes that military educators should combine to assist in the development of a general military professionalism of high technical and ethical quality. To achieve this the war and staff colleges must: (1) become institutions where individual disciplines and specialties are subjected to the active criticism of contending disciplines, (2) become teaching institutions to impart professional understanding, rather than simply disseminate information, and (3) achieve a systematic coherence among themselves as a regular part of career development in which the successful military generalist would participate in three war and staff college levels. Elementary School Handbook: World of Work.

Dependents Schools (DOD), Washington, D.C. Pacific Area.

Pub Date Aug 72

Note—263p.; For secondary school handbook, see CE 004 768

EDRS Price MF-\$0.76 HC-\$13.32 Plus Postage

Descriptors—Behavioral Objectives, \*Career Education, Curriculum Development, \*Elementary Education, Field Trips, \*Instructional Materials, \*Learning Activities, Occupational Clusters, \*Resource Guides, Student Characteristics, Teacher Developed Materials

The handbook's purpose is to unify elementary career education materials for administrators, teachers, counselors, and career education specialists in the Department of Defense Schools (Pacific Area). The first section of the document outlines and defines the program's concepts and objectives, occupational clusters, the roles of various school personnel, and community assistance in planning a program. The document provides learning activities for field trips; the general characteristics of five, seven, eight, ten, and eleven year olds with related behavioral objectives; and job cluster activities. Selected activities are presented for: (1) language arts; (2) social studies; (3) mathematics; (4) health; (5) environment; and (6) making puppets, role-playing, simulation, occupational mobiles, and general activities. The document concludes with a section entitled "Resources" describing the resource people and the media center, and providing 88 pages of lists of resource materials (books; materials and kits; occupational films, filmstrips, recordings, and songs; lists of additional audiovisual materials, addresses of producers and distributors, miscellaneous occupational aids, and sources for free materials). Descriptors—\*Career Education, Classroom Materials, Curriculum Guides, \*Instructional Materials, Integrated Curriculum, \*Learning Activities, Occupational Clusters, Resource Guides, \*Secondary Education, Teacher Developed Materials, \*Units of Study (Subject Fields)

The purpose of the handbook is to provide a resource to teachers for integrating career education into secondary level subject areas in order to reveal to students the broad range of career possibilities and the relevance of subject matter to the world of work. The first 19 pages of the document discuss the broad objectives of the program, the articulation of career education goals, and an overview of the program's elements. The remaining 530 pages of the document consist of career education resource packets of learning activities for the following subjects: art (20 pages), business education (30 pages), foreign language (6 pages), home economics (170 pages), industrial arts (3 pages), language arts (123 pages), music (6 pages), physical education—health and leisure (19 pages), science (63 pages), social studies (67 pages), and transactional analysis (38 pages). Many of the packets include teaching suggestions and objectives and many offer forms, illustrations, testing, instruments, and resource guides. (BP)

Career English.

Dependents Schools (DOD), Washington, D.C. Pacific Area.

Pub Date Nov 74

CE 004 768

Note—158p.

EDRS Price MF-\$0.76 HC-\$8.24 Plus Postage

Descriptors—Career Choice, \*Career Education, \*Course Content, \*English Instruction, Grammar, Objective Tests, Questionnaires, Relevance (Education), \*Secondary Education, Student Projects, Writing Skills

Identifiers—\*Career English

Career English is a course planned to teach the fundamental communicative skills to students in a meaningful, motivational, practical way through the medium of career choice. The handbook is meant to be a supplementary tool for high school teachers. Phase I focuses on the fundamentals of basic grammar and basic writing; it is divided into seven lessons: nouns and pronouns, subjects and verbs, complete and incomplete sentences, the paragraph, punctuation and capitalization, usage, and suggestions for review. Each of the lessons contains definitions, classifications, examples, spelling, vocabulary, and tests. Every effort must be made to correlate Phase I with Phase 2, where the student is asked to research and complete a written project on his future career. The project has 14 main sections: title page, introduction, application section, resume, written correspondence section, student cumulative record sheet, job description sheet, career English questionnaire, statement of final decision, student evaluation of the project, related newspaper and magazine articles, correction sheets, list of resource materials, and oral talk. Instructions to the student are included for each section. (Questionnaires and pre- and posttests are included.) (AG)

Human Aging and Retirement: Questions Unresolved and Resolved. Some Reflections on Contemporary Gerontology and its Relevance to Retirement Policy.

International Social Security Association, Geneva (Switzerland).

Pub Date 74

Note—302p.

EDRS Price MF-\$0.76 HC-\$15.86 Plus Postage

Descriptors—\*Age, Demography, Geriatrics, Health, \*Older Adults, \*Retirement, Senior Citizens, Social Services, Work Experience

Identifiers—\*Gerontology, Inflation, Social Security

The report is a general multidisciplinary survey of current areas of interest in the field of gerontology, especially those having to do with retirement and the provision of social security. Chapter 1 discusses social security as an issue in gerontology and the concern of social security with retirement and aging. Chapter 2 discusses the "Third Age," and deals with problems which older people encounter. Chapter 3 discusses the differences between the life spans of men and women and the causes behind them. Chapter 4 discusses the statistical data on demography which is available and that which is needed. Chapter 5 deals with the significance, characteristics, and history of retirement, role changes, social security benefits, and the retired and defense of their interests. Chapter 6 discusses the particular effects of inflation on the older generation. Chapter 7 discusses the interaction of the elderly with their younger fellow citizens and the "disengagement" controversy. Chapter 8 discusses man's relation to his work and occupation. Chapter 9 discusses the meaning of functional age and whether or not it can replace the concept of chronological age. Chapter 10 discusses improvements in somatic health, problems of stress, and their relation to the "disengagement" controversy. An index to the document is included. (Author/JR)

Document Not Available from EDRS

Descriptors—Career Choice, Females, \*Males, Medical Education, \*Nurses, Nursing, Questionnaires, \*Recruitment, \*Student Attitudes, Surveys, \*Work Attitudes

Little is known about the relationship between the choice of a sex discrepant occupation and the selection of a nursing career, attitudes toward training, and professional socialization. The research design included a cross-sectional attitude survey of both beginning and advanced nursing school students. Data were obtained from a group-administered questionnaire on 335 men and 508 women in 32 degree-granting institutions which differed in size, location, and source of support. The findings suggest that recruiting would be most productive in lower socioeconomic strata, in small towns and rural areas, and by male recruiters visiting high schools. Mass media communications should stress nursing aspects most likely to appeal to men: professionalism, leadership, administration, science, and technology. Attracting the discharged veteran requires intense efforts. Men present a problem for nursing faculties in that while they view themselves superior to women, they place less value on hard work and were poorer students in high school. Men in their twenties may require a stipend and will do best in the permissive atmosphere of a college. (NTIS)

Descriptors—\*Adult Education, \*Adult Educators, Educational Methods, Foreign Countries, \*Teacher Education, Training Objectives, Tutoring, \*Tutors, \*Typology, Unit Plan

The two-part report surveys tutor training in several European countries, particularly England and France, and presents a typology of adult educators. The first part deals with introductory considerations concerning tutor training in three sections: present state of tutor training in Europe, which discusses types of tutor training and general trends and the main features of tutor training; aims and methods of tutor training, which discusses the main goals and the elements of a methodology of tutor training; and an example of the organization of material into training units, which presents a 16-unit adult education tutor training scheme organized around the training situation. The second part of the document analyzes the constituents of a system for the continuing education of adults. Part 2 covers in turn: trends and perspectives in continuing education for adults, the education and teaching function, and animation and intervention function, the information function, the research and tutor training function, the administration function, the organization function, and the management function. Home Management and Human Service Competencies.

Regional Learning Service of Central New York, Syracuse.

Pub Date Jun 75

Note—163p.; Report of a project for Cooperative Assessment of Experiential Learning (CAEL)

EDRS Price MF-\$0.76 HC-\$8.24 Plus Postage

Descriptors—\*Activity Learning, Community Resources, \*Comparative Analysis, Decision Making Skills, Family Health, Goal Orientation, Homemaking Skills, \*Home Management, Human Development, Interpersonal Competence, \*Job Analysis, Money Management, Role Perception, Self Evaluation, \*Skills, Surveys

Faculty representatives from five postsecondary institutions having human service/human ecology programs and two members of the Regional Learning Service staff comprised a task force whose objectives were to identify competencies acquired through home management which relate to undergraduate course objectives, to recommend ways to assess these, and to recommend criteria for granting undergraduate credit for experiential learning. The task force produced a list of 54 competencies in 10 broad domains. With the checklist of competencies as a common stimulus, 20 homemakers, 25 human service agency administrators, and educators from 19

postsecondary institutions responded to different sets of questions relating to their own work roles. Responses for each group are presented with detailed analysis. Important findings were that home management competencies and domains: (1) are valued by homemakers, (2) are creditable and part of the curricula in postsecondary institutions, (3) are perceived by agency administrators as desirable for agency personnel, and (4) are valued differently by educators than by homemakers and employers. Appended materials include: report of task force activities, the questionnaire used and tabulation of responses for the three groups, statistical analysis of the data, and the first draft of the home management competency list. Identifiers—North Dakota

A followup survey of 1,128 1971 graduates from trade, industrial, and health education programs at five secondary schools in North Dakota used a 27-item questionnaire and obtained responses from 852 graduates. Questions covered: (1) employment experiences, (2) evaluation of the vocational programs, and (3) recommendations for improving the programs. A 140-page section presents responses to the questions, tabulated for all the colleges combined and also for the individual colleges according to training program. A final eight-page section presents the author's summary and conclusions in the form of statements with accompanying references to the appropriate tables. Comments and recommendations cover the following topics: employment status and experience, opinions of colleges and training programs, recommendations for improvement of programs, and continuing education experiences. The letters and questionnaire used in the survey are appended. (MS)

Identifiers—Fargo Area Schools Work Experience Program, FASWEP, Mission Possible, North Dakota (Cass County)

The report describes the Mission Possible program, an alternative career exploration program for secondary school students in Cass County, North Dakota. The program is a voluntary, flexible one in which students learn about careers at "career sites" in business and industrial establishments according to the following alternatives: observation, internship, released time, holiday and vacation period employment, or part-time employment. The report includes a review (with commentary) of the program's five objectives: identifying creative work experience approaches with business, industry, community, and civic organizations; improving student and employer satisfaction; identifying alternative work ex-

perience programs; developing procedures to utilize employment information; and providing inservice activities and services. The report includes a timetable for the implementation of the program from June 15, 1975 to May 1, 1976. It also includes six recommendations for expanding the program and reassessing its objectives in light of potential expansion. The report closes with a brief summary and conclusions. Almost three-fourths of the document is comprised of the following appendixes: map of Cass County, promotional material, letters and forms, appointment reminder card, legislative documents, questionnaire results, school participation chart, status report, letters received from community participants and school administrators, and lawyer's opinion of school liability. Deriving and Using a Table of GED Scores Expected from Specific ITED Scores and Some Ancillary Forms for ABCE Students.

Pub Date 18 Apr 75

Note—34p.; Paper presented at the Adult Education Research Conference (St. Louis, Missouri, April 16-18, 1975)

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Adult Basic Education, Educational Testing, \*Equivalency Tests, \*Predictive Ability (Testing), Predictor Variables, \*Prognostic Tests, Standardized Tests, Student Testing, Tables (Data)

Identifiers—Iowa Tests Of Educational Development, ITED

The paper states and proves three propositions regarding the usefulness of the ITED (Iowa Tests of Educational Development) in preparing adult basic education students to take the GED tests. The first proposition, that the ITED can be a useful practice test for GED candidates, is supported by the fact that the ITED tests are designed to measure the same skills as the GED and that the philosophy, objectives, subtest titles, and formats are similar in the two tests. Proposition 2, that performance on the ITED correlates positively with performance on the GED, and therefore can be used to predict scores on the GED, is supported by a series of investigations which demonstrated that the ITED Reading Comprehension test scores can be used to predict (with 75 percent confidence and within five points) an individual's average score on the GED in science, social studies, and literature. Proposition 3, that various criteria levels of GED performance are identifiable for various student goals, is demonstrated by the construction of two grids, one an item analysis and the other an individual profile sheet, which together can help students and instructors graphically analyze individual students' needs to attain skill levels meeting their chosen criteria levels. A Computer Based System for the Development and Analysis of Vocabulary Controlled Dictation Materials.

Pub Date 2 Apr 75

Note—15p.; Paper presented at the Annual Meeting of the American Educational Research Association (Washington, D.C., March 30-April 3, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Business Education, \*Business Skills, Classroom Materials, \*Computer Assisted Instruction, Computers, \*Instructional Materials, Instructional Systems, \*Material Development, Secondary Education, \*Stenography, Systems Approach

The paper describes a project designed to develop and implement a computer based system to be utilized in the design and analysis of vocabulary-controlled dictation material. The system is based on the use of the 1,500 most frequently used words in business communications (as established by Mellinger), and words are coordinated with the theory lessons in beginning Gregg shorthand textbooks. As such, the dictation material generated under these conditions provides a fundamentally structured approach to speed building. The use of vocabulary-controlled dictation material tends to alleviate many of the dysfunctions associated with the use of non-vocabulary controlled dictation materials. (Author)

Kingsley, Ronald F. Kokaska, Charles  
Economic Competency: Implications for Programs for the Educable Mentally Retarded.

Pub Date 75

Note—9p.

Journal Cit—Middle School Journal; v6 n1 p17-20 Spring 1975

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Budgeting, \*Consumer Education, Curriculum Design, \*Educable Mentally Handicapped, \*Educational Programs, \*Money Management, Program Content, \*Work Study Programs

One of the major objectives of programming for the educable mentally retarded is the development of the individual's economic competency or efficiency. In order to reinforce this objective it is necessary that classroom activities employ real money and that some type of work experience be provided so that students learn to manage a given amount of economic resources within the community marketplace. With most jobs open to the retarded being low-paying service occupations, it is paramount that educational programs provide the best possible training and the survival skills necessary to make every dollar stretch as far as possible. The educational program conceptualized to meet this need contains two interacting phases: classroom instruction which focuses on problem solving, and work-study which provides economic rewards for completing specific repetitive duties characterized as work tasks. Once work-study programs are operational, it is possible to introduce into the curriculum the concepts of consumer education, suggested topics for which are: banking and savings, bills, borrowing money, budgeting, buying on credit, home ownership, insurance, medical-dental, renting, shopping techniques, taxes, and transportation. Thus students' experience of earning a salary is complemented with that of their own planned utilization of financial resources within the community marketplace. (Author/JR)

Descriptors—Advisory Committees, \*Construction Industry, \*Curriculum Development, \*Material Development, Secondary Education, Trade and Industrial Education

The development phase of the project, designed to produce occupational and job cluster curricula for the field of construction in grades 9-12, took place from July 1971 through December 1972. Two exploration-level documents and two sets of preparation-level documents were to be developed. The project staff, assisted by an advisory committee, selected a 10-step plan for production of the instructional materials incorporating national and international research and consultation with the educational and industrial fields. A specifically designed field test was conducted for one and one-half school years by a national advisory committee in three school districts which met the selection criteria. Evaluations and recommendations throughout the project came from: the advisory committee members; field test visitations; interviews with students, teachers, counselors, and administrators; and status reports from instructors, counselors, and administrators. Eight basic recommendations which were incorporated into the final products dealt with: need for illustrations in student manuals (including women and minorities), reduced size and bulk of the documents, use of simple language in student manuals, and expansion of exploration segments in instructor's guide. Appended are advisory committee and consultant lists, names of field testing schools, and visitation agendas. (Author/MS)

Document Not Available from EDRS

Descriptors—Career Choice, \*Career Exploration, \*Construction Industry, Course Content, \*Curriculum Guides, Learning Activities, \*Occupational Information, Secondary Education, Study Guides, Trade and Industrial Education, Unit Plan

The guide for instructors of construction occupations provides instructional suggestions and informational sources for structuring an exploratory program. The program is divided into the following blocks, representing different experiences in construction: (1) wood; (2) finishing; (3) engineering, support, and management services; (4) metal; (5) electricity; (6) masonry; and (7) heavy equipment. Within each block are several units for which overall objectives, sources of information, academic related theory and information, subobjectives (in behavioral terms), and suggested activities are outlined. A four-step method for using the guide is suggested which consists of preparing the students by introducing the topic, presenting the lesson, student application, and followup (including career opportunities). Appended materials are a suggested tool and equipment list and a sample lesson plan. The accompanying student manual is designed to serve as a supplement to guidance services and is an introduction to construction careers. It contains general information about each career field and specific information about the occupational families within that field. Detailed information on working conditions, training requirements, wages, advancement, future outlook, and sources of additional information are included. (Author/MS)

Descriptors—Building Trades, Carpenters, Construction (Process), \*Construction Industry, Course Content, \*Curriculum Guides, Flooring, Learning Activities, Roofing, Secondary Education, Study Guides, \*Supplementary Textbooks, Trade and Industrial Education, Unit Plan, \*Woodworking

The guide is an outline of training experiences designed to lead a student to at least entry-level job proficiency in the carpentry trades within the construction industry. Teaching units cover forming, framing, trimming and siding, flooring, and roofing. Each unit has several overall objectives which are divided into subobjectives, stated in behavioral terms. Specific suggested activities are listed for each subobjective. Lists of texts and academic related theory information are provided for each overall objective. A four-step lesson plan procedure is described consisting of preparation of the lesson, presentation, application of student performance, and performance test. A sample plan using these steps is appended. The accompanying student resource manual is intended to serve as a supplemental text. Topics included correspond with those in the teaching units, providing detailed background information necessary for performing the suggested activities. Discussion of materials used, processes, safety considerations, first jobs, and continued training is included. A five-page section identifies and describes tools and equipment according to use. Also included is a 12-page glossary and an appended textbook and source list. (Author/MS)

**Descriptors**—Advisory Committees, \*Articulation (Program), Cooperative Planning, Counselor Role, \*Curriculum Development, \*Curriculum Problems, Integrated Curriculum, Post Secondary Education, School Industry Relationship, Secondary Education, \*Trade and Industrial Education

Greater articulation efforts can increase the effectiveness and efficiency of the educational system. Horizontal articulation is communication among teachers, departments, and schools of similar levels. Within secondary-level schools the greatest horizontal articulation problem area is curriculum development. Use of program specialists, departmentalization, and commercial textbooks have all contributed to a noncomprehensive basis for curriculum. A cooperative effort among representatives of high school departments, business, industry, and postsecondary institutions to formulate a checklist of "must know" skills for students would be an effective way to integrate curriculum. Also, occupational and vocational vocabulary could be incorporated into academic subjects. Vertical articulation relates to communication between educational levels. Its practice would insure continuity in construction training programs from high school to postsecondary institutions, perhaps through the use of a modularized curriculum. The guidance counselor should provide a valuable articulation service within the school and community. Articulation is needed related to the changing role of women in construction. An advisory committee of representatives from the various trades, management, professional, and technical groups could keep instructors and counselors informed of conditions in the industry and also assist with placement. **A Policy Analysis of Nonformal Education: The Case of Bolivia.**

Midwest Universities Consortium for International Activities, Inc., East Lansing, Mich.

Spons Agency—Agency for International Development (Dept. of State), Washington, D.C.

Pub Date [75]

Note—42p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**—\*Developing Nations, Educational Policy, Foreign Countries, \*Nonformal Education, \*Policy Formation, \*Political Influences, Social Factors, \*Socioeconomic Influences  
**Identifiers**—\*Bolivia

This document discusses policy analysis of nonformal education by defining terms and then applying them to the specific case of Bolivia. A definition of policy is proposed and policy analysis is discussed in terms of political analysis and institutional analysis. The necessity for nonformal education is explored through historical background and current need, 13 characteristics

of nonformal education are listed, and a graphic presentation showing the relationship between nonformal education and general socioeconomic development is included. Policy sectors and policy arenas are defined, and nonformal education is discussed in terms of a policy arena. Policy analysis of Bolivian nonformal education is discussed in terms of the present political configuration, current distribution of educational goods, and the aspirations of the Bolivian elite. Evaluation of the success of nonformal education in Bolivia is made through examining Bolivian national policies, institutions and their capacities, media, grassroots organizations, and governmental support systems. It is suggested that the document may be useful to those interested in comparative and international education through its definition of policy and its relationship to public concern and the distribution of power within a society. Two tables supplement the analysis, and notes and references are appended. (LH)

**Training Manual for Inspection for Decent, Safe, and Sanitary Housing.**

Federal Highway Administration (DOT), Washington, D.C. Office of Right-of-Way and Environment.

Pub Date Apr 75

Note—127p.

**EDRS Price MF-\$0.76 HC-\$6.97 Plus Postage**

Descriptors—Climate Control, Construction (Process), Electrical Systems, Health Conditions, Heating, \*Housing, \*Inspection, \*Instructional Materials, Manuals, Plumbing, Public Health Legislation, Sanitation

Identifiers—Housing Codes

The manual presents material designed to acquaint housing inspectors and their supervisors with the origin of public concern about housing problems; the past, present, and new approaches to housing code administration; the expanded role of the inspection function in the neighborhood improvement effort; and the general nature of their role and responsibilities. The first chapter, Trends in Housing, deals with all aspects except for role and responsibilities. That aspect is developed through the succeeding six chapters as individual elements of housing inspection are considered in detail: the housing code, health and sanitary elements, building aspects, plumbing elements, heating and environmental control, and electrical aspects. The manual contains numerous illustrations depicting materials, equipment, and assembly. Terms and procedures are defined and explained. (AG)

Identifiers—Virginia

The document presents the full texts of conference papers that examine views and programs in career development for disadvantaged youth, including minority and low income groups, and the handicapped. Four papers under the heading of Major Addresses discuss: (1) career development strategies for disadvantaged rural youth, (2) career development for youth in depressed urban areas, (3) the impact of Federal legislation on career-counseling and vocational education, and

(4) realistic alternatives in career planning. Under the heading of Special Interest Groups, seven papers describe: (1) involvement of parents, (2) evaluation of programs, (3) strategies for counseling, (4) standardized testing, (5) curriculum development and teaching, (6) programs resulting from the Virginia Standards of Quality, and (7) job placement services. Career Development Programs in Virginia are discussed in eight papers dealing with: (1) career development in community colleges, (2) manpower counseling, (3) special programs, (4) prevocational schools, (5) office services, (6) special programs for ages 14 and 15, (7) cluster approach to career orientation, and (8) alternative routes to school projects. Approximately 300 administrators, university personnel, counselors, teachers, and graduate students from four states participated in the conference. The program and list of participants is appended. **Simulator Motion as a Factor in Flight Simulator Training Effectiveness.**

Illinois Univ., Urbana. Savoy Aviation Research Lab.

Note—15p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Aircraft Pilots, \*Cost Effectiveness, Educational Experiments, Equipment Evaluation, \*Flight Training, Research Projects, Research Reviews (Publications), Simulation, \*Simulators, \*Transfer of Training

The document reviews the literature concerning the training effectiveness of flight simulators and describes an experiment in progress at the University of Illinois' Institute of Aviation which is an initial attempt to develop systematically the relationship between motion cue fidelity and resultant training effectiveness. The literature review discloses a dilemma: while the simulator does constitute a viable basic training aid, differences among pilots trained by various methods become statistically unreliable after pilots have gained a small amount of air experience; faulty control results when a pilot, trained in a simulator supplying highly correlated and accurate motion cues, comes to rely on the cues and attempts to fly an aircraft under instrument-referenced conditions which often produce misleading vestibular indications. The current experiment will produce quantitative data on which a simulator designer or user may base a rational choice of how much fidelity to include in his or her device, rather than allowing the budget to fix the level of realism. The research evidence to date suggests that the highest training effectiveness of a simulator may occur well below the cost levels of very high fidelity motion systems. (Author/AJ)

**Impact of Increasing Preference Options in the Marine Corps. Final Report. No. 75-12.**

Navy Personnel Research and Development Center, San Diego, Calif.

Report No—NPRDC-TR-75-12

Pub Date Nov 74

Note—90p.

**EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage**

Descriptors—\*Job Satisfaction, Longitudinal Studies, \*Military Service, \*Occupational Choice, \*Occupational Surveys, Questionnaires, Recruitment, Tables (Data), \*Vocational Interests

Identifiers—Marine Assignment Preference Schedule, \*Marine Corps

The impact of increasing preference options in the Marine Corps was studied by administering the Marine Assignment Preference Schedule (MAPS) to all new recruits between October 1972 and April 1973, to whom no special training commitment had been made. Enlistees indicated their occupational preference on MAPS administered at entry to, at completion of, and six months after completing recruit training. Selections were made from 28 Marine Corps ground occupational fields. The third administration of MAPS included self-evaluations on job satisfaction and service plans. Concurrently with the third MAPS administration, supervisory evaluations were obtained on job satisfaction and service plans and supervisory evaluations were obtained on job performance. Occupational preferences were found to be inconsistent from one administration of MAPS to another. Statistically significant differences were observed on supervisory and/or self-evaluations between individuals in an occupational field/area they preferred versus those in the same field/area who had chosen some other field/area. The differences between groups based on preferences expressed at entry into basic training are statistically significant. However, they are so small that the association between granting preference options and job satisfaction/job performance has not been clearly demonstrated. Assessment instruments are appended. Bureau of Land Management (Dept. of Interior), Washington, D.C.; Forest Service (DOA), Washington, D.C.

Report No—TT-90-(5100)

Pub Date May 75

Note—257p.; Photographs will not reproduce well in microfiche

Available from—Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 (No price given)

**EDRS Price MF-\$0.76 HC-\$13.32 Plus Postage**

Descriptors—Class Activities, Course Content, \*Fire Fighters, \*Fire Science Education, Job Training, \*Lesson Plans, Post Secondary Education, Resource Materials, Secondary Education, \*Teaching Guides, Training Objectives, Training Techniques, Visual Aids

Prepared by a team of fire control officers, the training guide is designed to help fire crewmen learn the fundamentals of water use. The entire package can be used for a complete course or individual lessons and can be adapted to specific training needs. Throughout the guide, emphasis is placed on one primary training objective, performance in real fire situations. The main sections of the guide include: (1) Supply: drafting water from a source below the pump and from a pressurized source, trouble shooting through gauge readings, and use of ejectors; (2) Delivery: delivery equipment, hose lay systems, planning water delivery systems for mop-up, water use hand signals, care of hose and fittings, connecting hose and fittings, broken hoses, and locating equipment; and (3) Application: principles of water application, initial attack with water, mop-up, and selecting or outfitting a tanker. Lesson plans provide objectives, instructor and student references, and step-by-step lesson presentations. Many lessons contain exercises appropriate for indoor fire training. Most lessons direct the instructor to specific visual aids (vu-graphs/transparency masters, slide/tape programs, and films). More than half of the document consists of instructional photos and the cross-referenced appended vu-graphs/transparency masters. (EA)

**Labor Market Substitution Between Schooling and On-the-Job Training: Final Report.**

Spons Agency—National Inst. of Education (DHEW), Washington, D.C. Office of Research.

Bureau No—BR-2-0633  
Pub Date 31 Dec 73  
Grant—OEG-0-72-1412  
Note—37p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Comparative Analysis, \*Dropout Research, Dropouts, Educational Alternatives, \*High School Graduates, Occupational Surveys, \*On the Job Training, \*Relevance (Education), Salary Differentials, Statistical Analysis, Success Factors, Tables (Data), Wages

The report describes a study designed to examine substitution between formal schooling and dropouts' post-school training or experience in the labor market. The basic hypothesis is that if formal schooling and post-school training are substitutes, then experience-earnings profiles measured in the logarithm of earnings should tend to converge. To test the hypothesis, a sample of approximately 11,000 males over 14 years, who had nonfarm earnings in 1966, and who were not in school or in the military, was selected from the Survey of Economic Opportunity conducted in 1967 by the Census Bureau. The sample was divided occupationally into eight subsamples (professional/technical; manager, official, proprietor; clerical; sales; skilled crafts; operatives; service workers; and laborers) on which linear regressions were run to determine the extent to which the post-school training of dropouts successfully substituted for the additional formal education received by high school graduates. The linear regressions revealed a very strong tendency for almost complete substitution to occur in all but two of the occupational groups (manager, official, proprietor; and skilled crafts). These tentative results lead to the conclusion that dropping out may be rational from the point of view of both the individual and society. (Author/JR)

ED 112 052 CE 004 813  
Industrial Mechanics Assessment and Planning Manual.

Oregon State Dept. of Education, Salem.

Pub Date 75

Note—50p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Auto Mechanics, Educational Assessment, \*Evaluation Methods, \*Industrial Education, Manuals, \*Program Development, \*Program Evaluation, Vocational Education  
Identifiers—\*Industrial Mechanics, Needs Assessment

The revised manual is designed to assist industrial mechanics teachers in assessing the strengths and weaknesses of their industrial mechanics program and planning for future development. With industrial mechanics being one of the major occupational clusters in Oregon, schools are being encouraged to implement industrial mechanics programs to meet present and future manpower needs. The manual recommends a planned approach for program development that is based on a Portland high school model program. Assessment charts are used to examine the status of various program elements: curriculum, planning, interdisciplinary instruction, advisory committee, work experience, facilities and equipment, student organization, inservice, individualized instruction, articulation, evaluation, instructor selection and responsibility, finance, safety, and guidance/counseling/placement/followup. Assessment steps 1, 2, 3, and 4 include reviewing the manual standards, assessing the present implementation of each element, assigning an implementation level rating to each question and element, and completing a profile chart. Steps 5, 6, and 7 cover identifying problems, selecting problems for highest priority for solution, and sorting remaining problems into additional priority levels. Other charts are included for problem solving and detail planning. (EA)

Descriptors—\*Followup Studies, \*Program Evaluation, Rating Scales, \*State Legislation, State Standards, \*State Surveys, Tables (Data), \*Vocational Education

Identifiers—\*Coordinating Councils, Florida

The study investigated the extent to which coordinating councils for vocational education are fulfilling the requirements of the Florida State Board of Education Regulation 6A-6.67, which mandates that "a coordinating council for vocational education, adult general education, and community instructional services shall be established in each community college district." A coordinating council practices checklist was sent to all district superintendents and district directors of vocational education of the Florida school districts and all community college presidents and community college deans/directors. Of 179 checklists, 109 usable checklists were returned and followed up with personal interviews. Minutes of the past three years from each of 20 coordinating councils were analyzed on an effectiveness scale to determine how well individual councils performed the State requirements. Responses on the checklist were correlated with the ranking of councils on an effectiveness scale. Distribution on the effectiveness scale indicated that 19 of 20 coordinating councils had complied only minimally with the State regulations. Others appeared not to be functioning at all since only 20 of the possible 28 councils responded with minutes of meetings. More than half of the document consists of statistical tables, a copy of the checklist, and supplementary information in the appendixes. (EA)

Descriptors—\*Adult Education, \*Data Collection, Data Processing, Glossaries, \*Manuals, National Surveys, Questionnaires, \*Statistical Data

Identifiers—\*International Standard Classification of Education, ISCED

The first 15 pages of the manual provide: (1) background information on the importance of adult education, the need for adult education statistics, the International Standard Classification of Education (ISCED), and the scope of the term adult education; (2) the application of ISCED to adult education and the ISCED classifications (levels, fields, and programs); and (3) the need for national statistical services for adult education with suggested organizational forms and data collection, processing, analysis, and publication techniques. The remainder of the document consists of three appendixes. Appendix A (13 pages) suggests the type of questionnaire and instructions that national statistical offices might wish to send to the parent agencies which organize programs of formal adult education. Appendix B (12 pages) suggests the type of questionnaire and instructions that national statistical offices might wish to send to parent agencies which organize programs of nonformal adult education. Appendix C (21 pages) defines with respect to scope and meaning the various terms used in ISCED. (Author/JR)

ED 112 055 CE 004 816  
Career Development via Counselor/Teacher Teams; Guide for Implementation.

Royal Oak City School District, Mich.

Pub Date 75

Note—134p.

EDRS Price MF-\$0.76 HC-\$6.97 Plus Postage

Descriptors—Career Awareness, \*Career Education, \*Counselor Role, \*Curriculum Guides, Decision Making, \*Junior High School Students, Self Concept, Self Evaluation, \*Teacher Role, Team Teaching, Vocational Development  
Identifiers—Michigan

The career development modules of the implementation guide, designed by counselor/teacher teams in Royal Oak, Michigan for junior high students, are intended to be used as a working copy for counselor/teacher teams. Career education

concepts of self-awareness, assessment, and decision-making are correlated with the broad questions of: Who am I? How do I relate with others? Where am I going? The guidance components are: (1) "Me" (interests, achievements, and aptitudes); (2) "Recognize Me" (Lifelong process of self-development); (3) "It's O.K. to Be Me" (identification of emotional, intellectual, and physical strengths); (4) "What Makes Me Tick?" (understanding of needs, emotions, values, and self-esteem); (5) "Myself, My Time, My Friends" (creative activities involving interpersonal relationships); (6) "What Career for Me?" (identification of high interest area and occupational exploration experiences); (7) "Decisions, Decisions" (understanding and applying the decision-making process); and (8) "Investigating Careers" (increasing career awareness through language arts objectives). Various learner objectives for each component are outlined with four accompanying columns that describe teacher preparation, counselor preparation, learner activities, and evaluation plan. Supplementary activity and information sheets and checklists for various components are provided throughout the guide. (EA)

Descriptors—Animal Science, Career Opportunities, Careers, Course Content, Course Descriptions, \*Curriculum Design, \*Curriculum Guides, Educational Equipment, Educational Facilities, Meat Packing Industry, Post Secondary Education, Program Costs, \*Program Descriptions, \*State Programs, \*Veterinary Assistants

Identifiers—Meat Inspection, Paraprofessional Personnel, \*Veterinary Science Technology

Designed to aid States in planning and developing two-year post-high school programs in veterinary science technology, the curriculum guide presents a suggested curriculum for a training program in veterinary science technology, with an option in meat inspection and regulatory technology effective in the fourth semester of the training period. Part 1, Veterinary Science Technology Program, provides general information on the emergence and development of this career, occupational opportunities, type of education needed, and activities performed by technicians, as well as various aspects of the training program. Part 2, Curriculum, outlines the four-semester curriculum and provides brief course descriptions. Adaptations for a cooperative education plan and continuing study are described. Approximately half of the document consists of Part 3, Course Outlines, which offers content, procedures, and resources for the technical specialty courses, auxiliary and supporting technical courses, mathematics and science courses, and general courses. The concluding section covers general planning, land requirements, laboratory facilities and equipment, acquisition of equipment and estimated costs, and a cost summary. A bibliography and a selected list of scientific, trade, and technical societies concerned with veterinary science technology are also included. (EA)

**Descriptors**—Career Education, \*Placement, \*State Standards, \*State Surveys, Tables (Data), \*Vocational Counseling, \*Vocational Development, Vocational Education  
**Identifiers**—\*Career Guidance, Washington

The Washington State University study focused on the validation of a set of 50 career guidance, counseling, and placement program standards by expert professionals (vocational and nonvocational administrators, counselors, counselor educators, vocational and nonvocational teachers, teacher educators, and members of the Washington State Advisory Council on Vocational Education). Data analysis was based on 307 completed surveys, approximately 68 percent of the original number sampled. Median values were reported as well as qualitative data indicating essential, very desirable, desirable, and nonessential categories. It was recommended that the set of criteria be implemented as a statewide model for quality career guidance, counseling, and placement programs. The accompanying booklet stresses the need for expanded services and includes a checklist of standards pertaining to the elements of program planning and development, organization and administration, staffing, program operations, and evaluation. **Descriptors**—Adult Basic Education, Adult Students, Adult Vocational Education, Auto Mechanics (Occupation), \*Basic Skills, \*Criterion Referenced Tests, Job Skills, Machinists, \*Office Occupations Education, \*Test Construction, Test Validity, \*Trade and Industrial Education

The document reports the development of three pre-entry criterion-referenced tests (Skill Checks) designed to assess an applicant's verbal and numerical competencies and to assist in the implementation of remedial education where needed, in the vocational training areas of office occupations, automotive mechanics, and machine shop. A general matrix of competencies for the three training areas was established through analysis of course content in terms of reading level of material used, numerical skills needed, and student and instructor perceptions of skills necessary to complete a course successfully. These were developed into Skill Checks which underwent field testing, item analysis, measurement of validity, and evaluation in order to determine their usefulness as predictors of student success and need for remediation. A flow chart visually outlines test development procedure. Continuation of the project is planned with six new areas for test development and the co-operation of other institutions anticipated. It is felt that immediate identification of skill deficiencies and their remediation, through Skill Checks, will help students to complete their vocational programs successfully. A bibliography, a third party evaluation of the project, and the office occupations, automotive mechanics, and machine shop tests are appended. (LH)

**Descriptors**—\*Comparative Analysis, Educational Programs, \*Instructional Materials, \*Instructional Programs, Job Training, Program Evaluation, Teacher Attitudes, Teaching Methods, \*Technical Education, \*Vocational Education

Important lessons can be learned from the educational programs of the military services that can be applied to civilian education. The U.S. Air Force vocational-technical training program is geared to "learning outcomes" which makes it possible to measure job entry capabilities. The Utah Department of Vocational Education studied the potential for using this type of instruction in their schools. Air Force material is developed for specific groups to attain specific performances in a prescribed condition. The criterion for successful instruction is the attainment of certain objectives. This is different from civilian instruction which lacks measurable objectives and centers more on instructional procedures rather than instructional outcomes. The selection of criterion-referenced Air Force material used, with certain additions and modifications, must be based on their success in achieving their objectives. The attitudes of teachers toward their courses and their relation to their students must change with the use of criterion-referenced curriculum. (EC)

**Identifiers**—Manpower Programs

The monograph capsulizes the activities of the Manpower Administration 1963-1973 in providing adult basic education (ABE) to manpower program clients in research and demonstration projects. Spanning the initial efforts under the Manpower Development and Training Act of 1962 to the present efforts to related to the Comprehensive Employment and Training Act of 1973, the report summarizes findings, progress made, unresolved problems, and the need for further research. The monograph does not focus entirely on correctional programs, but offers a variety of efforts aimed at developing job and manpower capacities for disadvantaged groups. One section includes findings on individualized and programed instruction, testing, motivation, behavioral objectives, learning environment, teacher training, tutors, counseling and supportive services, need for standardized data, English as a second language, and projects of special significance. Other sections report on additional support for ABE, Office of Education ABE research, and research needs and issues. Also included are bibliographic references and five appendices pertaining to Research and Development Projects and Studies Involving ABE, the Learning Resource Center, Staff Training Package for Individualized Manpower Training System, Excerpts from "Summary of Basic Education in Manpower Training Programs," and the Job Corps Programed Learning System. **Identifiers**—IMPACT, \*Instructional Management Program Adv Curric Train

The report describes IMPACT (Instructional Management Program to Advance Curriculum Training), a program designed to provide gradu-

ate students in vocational and career education with curriculum development and revision skills. The first of seven chapters of the report describes the project with respect to the need for curriculum specialists, some beliefs about the training of curriculum development specialists, competencies needed by curriculum specialists, and teaching-learning strategies for achieving curriculum competencies. Chapter 2, program of activity, lists program courses; provides a class meeting schedule and unit plans for administration and supervision of occupational education, evaluating and designing occupational and career education materials and programs, and inservice education and curriculum change; and includes a bibliography. Chapter 3 lists and describes the project participants. Chapter 4, resource persons, deals with guest lecturers, third party evaluators, and intern supervisors. Chapter 5, program materials, provides assignment sheets and other program forms; forms often encountered in curriculum development; suggestions for curriculum development in the affective, cognitive, and psychomotor domains; and guidelines for the equal treatment of the sexes. Chapter 6, evaluation data, covers evaluation of speakers, off-campus visitations, class projects, and interns. The final chapter contains recommendations for future programs to prepare curriculum specialists. (JR)

**Identifiers**—Elementary Secondary Education Act Title III, ESEA Title III

The report describes a K-6 career awareness project designed to: describe the major goals of an elementary career education program; assimilate the career education concepts into the curriculum; provide inservice training for administrators, teachers, and staff; and identify community resources of use in career education programs. A 40-page introduction discusses: (1) the procedures for the program's development, including project activities and evaluation procedures; (2) the career awareness teachers' workshop, organized around the U.S. Office of Education's 15 occupational clusters, with respect to organization, program, objectives, curriculum design, human resources, bibliography, and evaluation; (3) career awareness activities developed; and (4) dissemination. The remainder of the document consists of three appendices: integrated career awareness activities (246 pages), which for each of the seven grade levels provides major projects, subject matter focus, career development concepts, teacher goals, student performance objectives, a wide range of suggested activities for various occupational clusters, and suggested human and material resources; suggested musical activities to correspond with occupational clusters (5 pages); and an annotated bibliography (15 pages), which lists books, audiovisual materials, kits, prints, puzzles, and games suitable for use in K-6 career awareness projects. **Descriptors**—\*Administrative Change, Comparative Analysis, Educational Legislation, Organizational Change, Political Issues, \*State

Boards of Education, \*State Legislation, Superintendent Role, \*Vocational Education Identifiers—\*Illinois

The document reviews nine separate bills which were introduced to the Illinois General Assembly in 1973 to implement Article X of the 1970 Illinois Constitution by creating a State board of education. Also discussed is a House Joint Resolution which is under consideration and which is a constitutional amendment that would revert the State to the elective Superintendent of Public Instruction system without a State board. The document focuses on the concerns of vocational education, whose interest in structural change and administrative reorganization in Illinois relates particularly to the primary role vocational education plays in Illinois' rapidly growing junior college system and the problems to be anticipated should the General Assembly adopt a policy providing for a board limited to the elementary-secondary level. The review of the pending bills is therefore preceded by a brief overview of the legislative history of Federal vocational education enactments, and is followed by a table comparing the bills on 18 points, including vocational education special provisions. A six-page section then discusses the comparative implications for vocational education; a briefer section is devoted to a discussion of the value of a separate vocational education board. Descriptors—\*Adult Basic Education, Adult Education, Bibliographic Citations, Curriculum Development, \*Futures (of Society), \*Metric System, Teaching Methods, \*Technical Education, \*Vocational Education

Part of an Office of Education three-year project on metric education, the position paper is intended to alert and prepare teachers, curriculum developers, and administrators in vocational, technical, and adult education to the change over to the metric system. The five chapters cover issues in metric education, what the metric system is all about, the impact metrication will have on vocational and technical education, the implications of metric instruction for adult basic education, and curriculum and instructional strategies. Each of the chapters is organized into four parts. The first part is a one-page overview which highlights the main points of the chapter. The second consists of some questions and answers which reflect the fears and concerns of teachers, administrators, and students. The third part contains in-depth coverage of the subject, and the fourth is a brief list of references for those who may wish to read further. (Author/EA)

Supervisor Training Manual: Project Skill.

Pub Date Apr 75

Note—30p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Audiovisual Instruction, Change Strategies, Demonstrations (Educational), Discussion (Teaching Technique), \*Emotionally Disturbed, Learning Activities, Lesson Plans, Manuals, \*Mentally Handicapped, Supervisory Methods, \*Supervisory Training, \*Teaching Guides, Teaching Procedures, Training Techniques

Identifiers—\*Project Skill

The manual directs Project Skill trainers in providing supervisors with concepts and methods of training mildly retarded and/or emotionally disturbed workers to perform at or above the minimum level expected of all a firm's employees. The role of the trainer using this manual is to set up and conduct activities which will provoke supervisors to look at and possibly change training methods to be more efficient.

The supervisory training consists of two group sessions of approximately three hours. The manual offers detailed procedures for running each session and exercises to help emphasize training needs. The training concept acknowledges the special problems involved in training inexperienced or disadvantaged persons and is constructed so that the supervisor is constantly conditioned to apply common sense and accumulated experiences to this subject, toward the end of developing a more thoughtful and reasoned approach to training employees. The techniques include a brief film, group discussions, work sheet exercises, and other group exercises which will focus the attention and interest of the group. The teaching strategies are (1) to guide the supervisors into experiencing the idea of the session in their own ways and in their own terms, and (2) to guide them to a positive conclusion. Others Scale, Illinois (Chicago), Parent At-

titude Research Instrument, Rosenberg Self

Esteem Scale, Texas (San Antonio)

The evaluation report examines three ACT demonstration projects (Adolescents in Child Training) in San Antonio, Chicago, and Little Rock designed to involve adolescents in child training through the classroom and actual field experience. Part 1 of the report describes the three projects with respect to their contextual, conceptual, and programmatic components, facilities, decision-making processes and administration, and staff assessment: explains the study's research and experimental design; presents study results related to the demographic characteristics of the ACT service areas, the subjects of the evaluation, comparative analyses, and summary; provides conclusions; and makes overall and individual recommendations for the three projects. Part 1 also contains five appendixes: curricula for Little Rock (third year), 1973 San Antonio summer seminar schedule, San Antonio lesson plans, Little Rock observation schedules, and data collection instruments. Part 2 of the report is a statistical supplement which describes three standardized tests, the Rosenberg Self-Esteem Scale, the Fey Acceptance of Others Scale, and the Parent Attitude Research Instrument, which were administered to the adolescents in the three projects, and tabulates their results. The tests suggest that the changes in self-esteem, acceptance of others, and child-rearing attitudes were too small to attribute definitively to ACT. (Author/JR)

ment Instruments, Performance Based Teacher

Education, \*Rating Scales, Skill Analysis, Skill

Development, \*Statistical Studies, Tables

(Data), \*Teacher Evaluation, \*Teaching Skills,

\*Trade and Industrial Teachers

The purposes of the study were: (1) to ascertain the professional competencies needed by trade and industrial teachers to be effective, as perceived by successful trade and industrial teachers, administrators, supervisors, and teacher educators; (2) to ascertain whether the teachers felt that they had the opportunity and instruction available to develop or acquire the competencies needed to teach effectively; and (3) to construct an instrument for administrators to evaluate trade and industrial teachers' performance. The 169 participants identified 164 competencies in rank order of importance; teachers, administrators, supervisors, and educators were in high agreement as to the necessary competencies and their order of importance. It was discovered that teachers have the greatest opportunity to develop or acquire those competencies to which they assigned highest ratings, while they have less opportunity to develop or acquire those competencies to which they assigned lowest ratings. The competencies were grouped into clusters of: (1) essential preservice competencies, (2) important inservice competencies, and (3) competencies to be developed when time permits. A five-page instrument for administrators and supervisors to use in rating the trade and industrial teachers' performance was developed and is included in the document. The findings of the study are presented in tables of data. (Author/AJ)

Identifiers—Florida

The trend toward competency-based vocational teacher education (CBVTE) is related to other significant trends: the movement toward certification by skills demonstration, the emergence of Teacher Centers, and the increasing emphasis on inservice education. CBVTE focuses on teaching competencies, expecting trainees to possess the technical or occupational skills which comprise their subject matter; it identifies teaching competencies, provides learning activities which focus on their mastery, and assesses them in real teaching situations. It is individual-, performance-, and field-based, rather than group-, content-, and classroom-based. Florida's universities and State Department of Education (vo-tech division) are exploring CBVTE; Florida State University's (FSU) research and development project, the advanced testing of 300 CBVTE modules (which were based on exhaustive task analyses and developed in all vocational subjects in a lengthy cooperative venture at Ohio State University) has taken place on and off campus with preservice and inservice teachers. A wide variety of learning activities and feedback devices are used in the modules. Trainees practice competencies in a simulation and then in a classroom. Problems have included gaining commitment from individual faculty members and hesitant trainees. Statewide testing of the Ohio modules is being considered, and FSU plans an exemplary CBVTE program. Television, \*Educational Television, Program

Descriptions, Program Evaluation, Program

Planning, \*Tutors

Identifiers—\*Paraprofessional Personnel

Adult education opportunities can be increased through cable television technology, which provides home-based instruction as an alternative to the strictures of the classroom or learning center. The 18-month Salem project used television for primary instruction together with the services of paraprofessional tutors as a personal contact for feedback between the adult students and the central staff of teachers and media producers. The initial six months were spent in research on adult basic education, surveys of community needs, and the construction of the TV studio. The plans for television production called for a curriculum in math, reading, and consumer education. The evaluation of the Salem project consisted of a preliminary pilot test and a more rigorous field test; posttests showed an increase in the grade level of the participants. The Salem project included some valuable lessons for anyone contemplating small scale TV production and can also be used as guidelines for a replication of the Salem model. (EC)

The first portion of the guidelines discusses the need to train educational technicians for the field of communications (including education, instructions, industrial organizations or agencies), in order to meet changing educational techniques and the increasing number of resources for learning. A detailed curriculum guide is presented for a two-year post high school program to train educational media technicians in educational technology dealing in visual and audio communication and to give them a knowledge of the uses of media and production equipment. Technical courses are presented first, followed by general education courses and auxiliary technical courses. Five areas of the media are taught: graphics, design, photo/cinematography, television, reprography, and media equipment. A detailed description is presented of each course with the number of hours needed for each divided according to laboratory hours, class hours, and outside study. Texts and references and related media are suggested for each course. Equipment and facilities needed to supply this type of program are described, including estimates of materials and supplies needed for the laboratory and to be purchased by the student. Appended materials include: a bibliography; lists of professional societies and agencies, periodicals, and sources of media; and laboratory plans. (EC)

Identifiers—\*Comprehensive Special Education Act Chapter 766, Massachusetts

The document is an attempt to provide a comprehensive approach to the determination and development of purposeful educational plans in occupationally related areas for special needs children. The synthesis of information compiled from this plan was intended to provide school systems with an accurate account of the requirements of Chapter 766 of the Comprehensive Education Act of 1972, and the core evaluation process; the information was also intended as a potential model for any school system in Massachusetts. The document is the result of an 11-day workshop at which professionals from various areas of special education presented pertinent information related to the education and training of special needs students; participants developed and summarized major issues and concerns to assist in the successful implementation of Chapter 766 at a regional technical school. The resultant materials are organized under four broad headings: (1) developing vocational/technical education for students with special needs, (2) planning instruction for special needs students, (3) major administrative concerns, and (4) summary of workshop participants and final recommendations. Appended are two forms: (1) student information for determining vocational potential and programing, and (2) a survey of services for students with special needs in regional vocational/technical schools. Identifiers—Missouri

The guide to career education is designed to supplement an existing curriculum at the third and fourth grade level; it suggests and outlines a developmental program of learning activities and resource materials which may be integrated with the teaching of academic subject areas. The suggested activities and materials are designed to (1) promote the student's understanding of himself and others, (2) provide occupational information, (3) explore the world of work, and (4) prepare the student for personal decision-making. The program is intended to help the student recognize that educational experiences are a means of achieving life goals. The activities in Volume 1 pertain to social studies, and include a Missouri unit with student worksheets and a collection of student-developed, career-related games and puzzles. The subject areas used to group the activities in Volume 2 are fine arts, language arts,

math, and science. In addition to the suggested resource materials which are listed in conjunction with the learning activities, both volumes contain identical resource guides to audiovisual materials, sources of free career information, and a list of field trip sites in Missouri. (Author/AJ)

**Career Opportunities in Chicago Suburban Area: Field Visits to Business, Industry and Service Agencies by Business Teachers.**

Pub Date 75

Note—103p.

**EDRS Price MF-\$0.76 HC-\$5.70 Plus Postage**

Descriptors—Business, \*Career Opportunities, \*Community Resources, \*Directories, Field Trips, Industry, \*Occupational Information, Services, Student Developed Materials, Suburbs

Identifiers—\*Illinois (Chicago)

The document is a compilation of occupational information obtained by business teachers in a university extension course during field visits to businesses, industries, and service agencies in the Chicago suburban area. Each individual or group of student reporters present information on organizations that are representative of each of the 15 occupational clusters, with the resulting volume containing scores of references organized by student-author. There is a variety of emphasis and depth of detail. In all cases, the names and addresses of the organizations visited are given; in some cases, however, the emphasis is on occupational information such as organizational size and structure, employment opportunities, job descriptions, qualifications, and salaries, while in other cases, the organizations are treated as educational resources and the information presented in the report pertains to procedures for arranging tours and obtaining information about the organization. A contact person is listed for each organization cited. There is no index. (AJ)

Descriptors—\*Adult Basic Education, Adult Educators, \*Adult Students, \*Recruitment, School Holding Power, Teaching Methods

Identifiers—\*Student Recruitment

This handbook discusses the techniques used in recruiting and retaining adult learners for an Adult Basic Education Program. Detailed suggestions concerning door-to-door recruitment include training of recruiters, desirable characteristics for recruiters, and procedures for home visits. Specific ideas for the use of newspapers, radio, television, posters, fliers, billboards, and marquees as recruitment techniques are presented. Suggestions for personalizing instruction in order to retain adult learners in the program are based on the importance of trained, dedicated teachers. Criteria for selecting an adult basic education teacher, ideas for conducting the first class, suggestions for personalizing instruction and motivating students, and a self-rating check list are outlined. Also contained in the handbook are a seven-item bibliography and eight pages of sample materials used in recruitment. (MS)

Coordination, Elementary Education, Elementary Secondary Education, Information Dissemination, \*Material Development, National Programs, Office Occupations Education, Projects, Reports, Secondary Education Identifiers—Business and Office Career Education Curriculum, Project BO CEC

The document reports on the procedures followed and the major meetings and events in a 24 month U.S. Office of Education project carried out by Colorado State University to develop business and office career education curriculum guides for grades seven-nine. The materials developed were: (1) student learning packets or modules, (2) correlated teachers' manuals, (3) a K-14 curriculum plan and strategy, and (4) a resource list of publishers. (These materials are discussed, but not included, in the document.) A national advisory committee was set up, and directors of career education curriculum projects across the nation helped to establish guidelines for articulation and coordination among projects. Materials and information were solicited from career education projects throughout the United States, from State supervisors of business and office and career education, and from business education supervisors of large cities. The National Symposium for Business and Office Education Curriculum Guidelines was held in Denver in 1973 to inform leaders of the project and to develop and disseminate curriculum guidelines. Cooperating teachers participated in workshops, tested materials (titled resource guides) in their classrooms, and contributed to their revision. In July, 1975, a meeting was held in Denver to disseminate the materials nationally. (AJ)

Identifiers—Business and Office Career Education Curriculum, Project BO CEC

The curriculum guide for middle and junior high school grades presents 15 resource units, designed to simulate business career situations, organized into five sections: clerical (receptionist, general office worker, cashier, typist, and accounting clerk), secretarial/stenographic (secretary, court reporter, executive secretary), accounting and data processing (accountant, payroll accountant, data processing worker), and business ownership/professional (director of sales, travel agent, promotion manager, and manager of a small retail store). One additional unit covers writing letters of application and resumes. Each unit provides the unit's purpose, major activities, procedures for the teacher to follow before class begins and during class, optional activities, student materials for the major activities, background information about the occupation described in the unit, and teachers' keys which provide suggestions for discussions related to the simulation activity. Three appendixes (self-awareness activities, guidelines for conducting field trips, and guidelines for conducting interviews) comprise 35 pages of the document. (JR)

The manual for the secondary and postsecondary component of the Business and Office Career Education Curriculum Project consists of four parts. Part 1 contains a concept paper on business and office occupations that describes some of the changes occurring in business and industry and points out some curriculum implications deriving from these changes. Part 2 contains five articles which describe activities secondary and postsecondary business teachers can use to promote career development. Part 3 consists of an article, *Prepare for Tomorrow*, Frederick H. Antil, which describes some changes occurring in the life insurance industry and points out the curriculum implications of these changes for business and office training programs. Part 4 contains a list of 40 publishers of career preparation textbooks and materials for business and office education, with grade levels and subject areas specified, and a list of business and professional organizations from which career-related materials can be obtained. An appendix contains a questionnaire designed to assess the degree to which educators and administrators have integrated technological, employee rights, social, and educational methodology changes into their career education projects. Identifiers—Business and Office Career Education Curriculum, Project BO CEC

The purpose of the units in the guide is to supplement, enrich, and reinforce the usual classroom instruction in seventh through ninth grade mathematics, and at the same time, introduce career education. The 14 resource units are not designed to be the primary teaching device for the math topics with which they deal. Each unit emphasizes an occupational setting (such as communications, industry, public services organizations, transportation industry, etc.) and a specific occupation within that setting. The purpose is to give students a chance to explore various business and office occupations while gaining insight into how and why a knowledge of mathematics is important in everyday work life. The resource units may be adapted to fit an individual school's special objectives; the units have been designed so that activities may be added or deleted. The first one or two pages of each unit gives the purpose, briefly describes the major activities, and suggests procedures. A general information sheet provides teachers with background information about the occupation described in the unit. Teacher's keys provide answers to a simulation activity and provide suggestions for related discussions. The student materials for the major activities are located at the end of each unit. Identifiers—Business and Office Career Education Curriculum, Project BO CEC

The 20 resource English units which comprise the guide for grades seven-nine are designed to supplement, rather than replace, regular instructional materials and are intended for use as enrichment materials to use as reinforcement exercises after regular English units have been taught. The purpose of the guide is to give students a chance to explore various business and office occupations while gaining insight into how and why a knowledge of English is important in everyday work life. The units may be adapted to fit special objectives. The first 12 units deal with grammar and the mechanics of writing, letter writing, the preparing outgoing mail; in all but one, the major activity is a job simulation requiring students to apply their knowledge of the English topic with which the unit deals. Four oral language units each contain two major activities and, as in the first 12, each unit contains a teacher's key, a background information sheet on the occupation, optional activities suggestions, and student worksheets. The remaining four units contain articles from newspapers or periodicals and related discussion questions which cover both literary concepts and career information. (Author/AJ)

Identifiers—Business and Office Career Education Curriculum, Project BO CEC

The purpose of the six units in the seventh-ninth grade curriculum guide is to supplement, enrich, and reinforce the usual classroom instruction in social studies while introducing information about careers. The activities are intended as enrichment to reinforce a regular social studies unit. The units are vehicles for the infusion of occupational information into the general academic studies of geography, American history, and American government. They emphasize the practical applications of skills in these areas by providing students with information about business and office occupations in a variety of industry settings. One 14-section unit is designated geography; two units, history; and two units, government; each of them, however, develops multiple skills and concepts and could, therefore, be used in any social studies class. The first one or two pages of each unit give the purpose, briefly describe the major activities, and suggest teaching procedures. A general information sheet provides teachers with background information on the occupation described in the unit. Teacher's keys provide answers to unit activities, except where students are asked to express their opinions. Student materials for major activities are provided. (Author/AJ)

The instructor's guide presents material for structuring an engineering fundamentals course covering the basic laws of statistics as part of a mechanical technology program. Detailed behavioral objectives are described for the following five areas of course content: principles of mechanics, two-dimensional equilibrium, equilibrium of internal forces, friction, and cross-sectional calculations. The topical outline presents the five areas divided into sub-topics, indicating the number of lecture periods for each topic. The lecture/recitation methodology (including titles of the text and four references) and student activities are briefly described. Evaluation of students according to accomplishment of the behavioral objectives is outlined in detail with numbers indicating the part of the topical outline where the concepts were taught. A sample lesson plan (with a sample problem and a homework problem) and a sample five-problem, three hour final examination are contained in the guide. (MS)

 Descriptors—Business Skills, Curriculum Guides, \*Office Occupations Education, Post Secondary Education, Secondary Education, \*Study Guides, Supplementary Textbooks, \*Typewriting

The manual provides students with basic knowledge and practical applications needed in the efficient operation of the IBM Magnetic Tape Selectric Typewriter (MT/ST). It is designed for use as a text by business training students who have already completed one year of typewriting instruction while they are being instructed in the use of the MT/ST. Suggested adjuncts to the use of the manual are teacher demonstrations, visual aids, use of the IBM MT/ST Training Guide, and use of instructor devised supplemental practice. Fifty-eight lessons following the same basic format are provided. For each lesson an information section describes in detail (with illustrations) the part of the machine or procedure being taught. Comprehension is checked through use of an assignment consisting of several completion exercises. Some lessons also include practice experiences which give step-by-step directions in order to demonstrate a particular procedure on the machine. (Author/MS)

Identifiers—\*Electrical Discharge Machining

The manual is for use by students learning electrical discharge machining (EDM). It consists of eight units divided into several lessons, each designed to meet one of the stated objectives for the unit. The units deal with: introduction to and advantages of EDM, the EDM process, basic components of EDM, reaction between forming tool and workpiece, operating procedures, setup methods, flushing methods, and machining

parameters. Each lesson contains: (1) a statement of the objective, (2) detailed, illustrated information on one aspect of EDM, (3) vocabulary words (56 total, defined in the manual), and (4) a written theoretical or a practical assignment to check comprehension. An achievement test consisting of several questions is included for each unit. The manual also contains a three-item bibliography. (MS)

The teaching guide and course outline for a 12-week course in soils and foundations is designed to help student technicians in a two-year associate degree civil engineering technology program to obtain entry level employment as highway engineering aides, soil testing technicians, soil mappers, or construction inspectors. The seven teaching units are: an introduction, field investigation and sampling, characteristics and classification of soils, improvement of soils, foundations, pavements and subgrades, and retaining walls. A topical outline, behavioral objectives for each teaching unit, employment objectives, a time distribution schedule, methodology with reference materials on which the units are based (texts, periodicals, audio-visuals, and equipment), student activities, assignment sheets (lecture and laboratory), and methods of evaluating progress are included. Seven laboratory experiments dealing with equipment and procedure familiarization for soil testing, density of soils—sand cone method, grain-size analysis of soils, moisture-density relations of soils, moisture content of soil, unconfined compressive strength of cohesive soil, and liquid limit of soils are scheduled in relation to the unit content. Standard designation, purpose, objectives, size of laboratory group, equipment, references, and procedures for each are described. Appended are a sample lesson plan, completion test, true-false test, and quiz. (MS)

Descriptors—Course Content, \*Dishwashing, Laboratory Manuals, Learning Activities, \*Occupational Home Economics, Post Secondary Education, Secondary Education, \*Study Guides

The illustrated manual is designed for student use in learning home dishwashing and in preparing for a job as a dishwashing-machine operator. The six parts cover vocabulary, hand dishwashing, machine dishwashing, problems and checks, special treatment of various dishes, and safety tips. The vocabulary section presents an objective and defines 22 dishwashing terms with accompanying specific illustrative student activities. Suggestions for review and a worksheet to check comprehension complete this section. Objectives, lists of equipment, detailed outline of procedures, review suggestions, and worksheets are provided for the hand dishwashing and machine dishwashing parts. The problems and checks section also includes objectives and a worksheet with information presented in tabular form showing five problems related to dishwashing and how and why to check for each. Parts five and six briefly describe special treatment of dishes and safety tips. A 20-item true-false review concludes the manual. (MS)

The outline of mathematics skills provides for individualized instruction by allowing each student to complete performance tests which indicate the point at which his instruction should start. The course is divided into two parts; one covering operations with whole numbers, decimals, fractions, and percentage; the other dealing with ratio, proportion, square roots, fundamental geometry, and trigonometry with practical applications. The skills in part one are prerequisite to successful completion of part two which meets the performance requirements of the second class machinist classification. The outline contains lists of texts for both parts on which the skills and assignments are based and a pretest for proficiency credit for part one. The course is structured in units (13 in part one, 10 in part two) which are divided into lessons. For each lesson specific performance objectives with corresponding assignments from the texts are indicated. Quizzes for some lessons and tests for each unit (actual forms) are included. An evaluation form for each unit has space for lesson, quiz, and unit test grades and a percentage formula for using these three types of scores in tabulating a final grade. (MS)

The teachers' handbook on vocational education for students with special needs contains seven chapters, each one covering a basic area of concern to teachers of such students. Chapter 1 deals with identifying disadvantaged and handicapped students on the basis of easily recognizable characteristics. Chapter 2 covers assessing the needs of the individual handicapped or disadvantaged student on the basis of health, psychological, educational, social skills information, and work experience records. Chapter 3 discusses common characteristics and attitudes which affect learning in handicapped and disadvantaged students and suggests learning styles and teaching techniques best suited to those students. Chapter 4 provides an annotated guide to instructional materials particularly appropriate for use with special needs students. Chapter 5 discusses the procedures and expected outcomes of individual prescriptive education. Chapter 6 describes local resources and agencies and the primary services which they provide to the student with special needs. Chapter 7 briefly discusses student evaluation. A 10-page bibliography lists works appropriate to disadvantaged, handicapped, handicapped-learning disabled, and vocational education. An appendix contains sample forms useful to teachers in assessing and recording student handicaps, needs, and progress. (Author)

The administrator's handbook contains seven sections, each dealing with a specific aspect of vocational education for students with special needs. Section 1 describes the process of identifying handicapped and disadvantaged students. Section 2 covers assessing the needs of such students. Section 3 discusses developing district pri-

orities to meet the student's needs in terms of personnel, special services, facilities and equipment, and special programming. Section 4 presents a systems chart which summarizes in graphic form the flow of action and interrelationships between the various elements of the vocational education process. Section 5 describes various community agencies, their major emphasis, and the administrator's role in coordinating their resources for optimum use by the school system. Section 6 discusses Individual Prescriptive Education, one solution that has proved successful in satisfying the needs of handicapped and disadvantaged students. Section 7 covers evaluation for establishing accountability, upgrading program efficiency, determining services needed, recognizing problem areas, and meeting program objectives. One-third of the document consists of four appendices which provide sample referral sheets, student data sheets and needs profiles, and instructions for the use of disadvantaged and/or handicapped supplemental services. **Descriptors**—Evaluation, \*Handicapped Students, Individualized Instruction, \*Mentally Handicapped, Multiply Handicapped, Participant Characteristics, \*Physically Handicapped, Post Testing, Pretests, Quadriplegia, \*Teacher Workshops, \*Vocational Education Teachers

The report describes an inservice workshop for vocational education teachers of the physically, mentally, and multiply handicapped. The first third of the report consists of a general introduction and a summary of workshop activities with respect to (1) general information, (2) topics covered, (3) requirements for a letter grade, (4) summaries of four selected consultants' presentations (Teaching Vocational Skills to Handicapped, Frank Bowles; Humanizing Education for the Handicapped, Ruth Diggs; Individualized Instruction Package Development, David Pucel; and a transcript of a presentation on quadriplegia, Steve Heatwole), (5) pretest and posttest results and analysis, (6) analysis of the workshop evaluation instrument, (7) attitudes of workshop participants toward special needs students with special emphasis on employability, and (8) recommendations for future workshops. The remainder of the report consists of eight appendices: workshop news releases and information, sample learning guides for individualized learning packages (one on business forms and job interview information, the other on making a pot of coffee), sample student evaluations of reading assignments from the workshop, description of handicapped persons, solicitation letter, list of workshop participants, pretest/posttest measure, and workshop evaluation scale. **Descriptors**—\*Administrator Attitudes, \*Adult Education, Data Analysis, Educational Attitudes, \*Older Adults, Questionnaires, State Surveys, Tables (Data), \*Teacher Attitudes, Vocational Education, \*Vocational Education Teachers

**Identifiers**—Virginia

The study analyzes the attitudes and perceptions of vocational educators with respect to education for the elderly. An open-ended, closed

form survey questionnaire mailed to a stratified random sample of vocational educators in Virginia was analyzed. An 80.23 percent return was obtained. Few significant differences were found in comparing the stratification variables of sex, age, vocational service area, vocational education status, geographical location, and vocational education level with attitudes toward the elderly. Vocational educators were found to be somewhat homogeneous in attitudes and perceptions. Vocational educators perceived that the elderly were a proper concern of the profession, and that, for the most part, personnel and material resources were inadequate for the task of working with the elderly. It was found that few programs were being offered for the aged by vocational education as a profession, and that where such programs were in effect they were likely to be adult education offerings in skill development areas with the aged eligible to attend, but such activities were not specifically planned for them. Basically, it was found that vocational educators are sensitive to the needs of the aged, but largely unaware of how those needs can be met within the existing structure of vocational education. The report examines the problems, necessary competencies, and inservice needs of those currently employed to teach the disadvantaged and handicapped in vocational/technical schools and programs. The study is based on questionnaire responses of 107 graduate students at Virginia Polytechnic Institute and State University. Of the respondents, 29 percent have masters degrees, 61 percent teach agriculture, business, or home economics; and 63 percent have two to five years of experience teaching the disadvantaged or handicapped. Of the 32 respondents identifying an experience or program which best prepared them for their work, one-half indicated that university courses and work experience both ranked highest. The respondents listed various teaching techniques and curriculum materials including laboratory experience, audiovisual equipment, projects, role playing, open discussions, and guest speakers. Salient teaching problems of the respondents included: students' lack of motivation, poor attendance, and personal problems; deficiencies in instructional materials; and an inability to provide quality instruction to all students. Competencies rated as very important included: knowledge of students' physical, educational, and behavioral characteristics; awareness of appropriate teaching techniques; guidance resources, instructional materials, and laboratory experiences; and practical experience. summary, conclusions, recommendations, and the survey questionnaire are included. The first section of the annual report briefly describes the Nonformal Education (NFE) component of the Center for International Education at the University of Massachusetts. Section 2 discusses the general background and description of the problem of nonformal education and states the purposes and objectives of the university's grant to the center (to increase the capability of the university to assist developing countries with collaborative nonformal education programs). Section 4 discusses the impact of grant-supported activities in achieving grant purposes. Section 5 discusses other resources for grant-related activities. Section 6 covers the utilization of institutional response capabilities in development programs, program personnel and their accomplishments, and domestic and international program linkages. Section 8 tabulates the involvement of minority personnel and women in the program. Five supplemental tables provide a report of funding distribution, expenditure reports, and requests for assistance received. Two annexes provide a statement on planned NFE publications and a preliminary report on the activities of the NFE Center. (JR)

**Descriptors—**\*Agricultural Education, Bookkeeping, \*Curriculum Guides, Farm Management, \*Instructional Aids, Job Skills, \*Recordkeeping, Resource Materials, Secondary Education, Transparencies, Vocational Education, \*Work Experience Programs

The curriculum guide for agricultural science and mechanics 1 and 2 is divided into two units, both of which deal with supervised occupational experience programs in agriculture. Unit A, planning occupational experience programs, covers five problem areas: understanding the value of an occupational experience program, selecting occupational experience programs, developing training agreements and training plans, planning for improvement projects and supplementary practices, and keeping agricultural records. Unit B covers one problem area: summarizing and analyzing farm records. For each of the problem areas the guide provides: situations, teacher objectives, an introduction, group objectives, problems and concerns, references, visual aids, special events, applications and evaluations, and content summaries. The content summaries provide handouts and transparency masters for supplementing the problems and concerns section and for explaining the material in the references. (Author/JR)

Spons Agency—Manpower Administration (DOL), Washington, D.C.

Pub Date Mar 75

Note—93p.

**EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage**

**Descriptors—**Attitudes, \*Bibliographies, Economic Research, \*Females, \*Labor Market, Labor Unions, Laws, \*Literature Reviews, Occupations, \*Sex Discrimination, Unemployment, Wages, Working Women

The first two-thirds of the document is a bibliography on women in the labor market which is divided into 27 categories and sub-categories, the major headings of which are: historical perspective, the supply of female labor in the labor market, earnings of women workers, occupations of women workers (covers occupational distribution, academic and non-academic professional occupations, clerical occupations, blue collar occupations, and service occupations), unemployment among women, women and unionism, attitudes of and toward women working, working women and the rule of law, home production and child care, edited collections of studies on the role of women, bibliographies and review articles, and miscellaneous. The remainder of the document reviews both the theoretical and the empirical literature on sex differentiation in the labor market and focuses on economic research on female/male differences in earnings and occupational assignment. The literature review determined that the sole consistent result of the empirical studies surveyed is that sex discrimination in the form of unequal pay for equal work is of little, if any, quantitative significance. A concluding table summarizes the empirical literature reviewed with respect to data sources and population studied, measure of earnings, statistical method, and explanatory variables and earnings ratio. **Identifiers—**Canada, New York, Oklahoma, Texas

The report of the seminar on inservice vocational education personnel development contains the transcripts of 14 speeches and the reports of six discussion groups. The papers are organized under four main headings: the context of inservice education, which contains three papers on inservice education philosophy, requirements, and responsibility; industry, business, and education cooperation, which contains three papers on inservice personnel development programs and patterns in Texas, Oklahoma, and New York State; competency/performance based personnel development, which contains five papers on performance based teacher education programs for the general needs of vocational teachers and for the specific needs of agriculture teachers, and certification standards and needs; and models, strategies, and change, which contains three papers on an evaluation model, strategies of personnel development of vocational education in Canada, and change in the schools. The six discussion group topics are: principles and strategies of inservice personnel development; needs identification and program evaluation; supervising teachers; recertification and competency based standards; trends, issues, and problems in inservice teacher education; and career development for professional personnel. The seminar program and seminar staff are included. (JR)

**Descriptors—**\*Administrative Principles, \*Administrator Education, Administrator Role, Cognitive Objectives, Course Content, \*Curriculum Development, Curriculum Guides, \*Day Care Programs, Educational Objectives, Evaluation, Interpretive Skills, Learning Experience, \*Program Administration, Task Analysis

The first 16 pages of the report describe the development of the day care administrator training project. They describe: the identification of 32 areas of administrative skill which the curriculum focuses on; the organization of the curriculum along Gagne's model through a task analysis of the terminal, enabling, and teaching objectives; and the development of instructional materials on the basis of cognitive organizers, that is, comprehensive, systematic statements of major learning constructs. The remainder of the report consists of appendixes: brief sample project visitation reports and a summary of results of a letter survey; a lengthy curriculum document, which for each of the 32 skill areas lists tasks, conceptual skills and knowledge, and possible training sources; a curriculum task analysis, which for 10

basic administrator skills specifies educational purposes, learning experiences, continuity and sequence and integration of skills, evaluation of learning experiences, and program evaluation; and teaching-learning transactions for the interpretive function, which contain a curriculum task analysis, a cognitive organizer, and teaching-learning transactions. Descriptors—Career Choice, \*Career Planning, Clinical Experience, Employment, Factor Analysis, Health Occupations, Hospital Personnel, \*Hospital Schools, Job Applicants, Medical Education, \*National Surveys, \*Nurses, Nursing, Occupational Guidance, \*Specialization, Student Characteristics, Student Experience, Students, Tables (Data), Vocational Counseling

The report represents the results of a 1973 survey of senior students in hospital schools of nursing. Prepared by the American Hospital Association (AHA) Division of Career Information, the report is based on data compiled by the AHA Division of Survey Research. More than 11,000 students in 388 schools completed and returned a questionnaire which was divided into three major sections: career goals, career guidance, and individual information. Some of the questions required only checks, others required ranking factors in order of importance, and a few asked for open-ended responses. The study findings underscore the influence of the educational program on job selection. The major findings were that a large percentage of seniors expected to continue their education either on graduation or in the future, that the majority who had accepted job offers selected hospitals as their first employer, that clinical experience appears to influence choice of specialty, and that most students would be willing to work in manpower shortage areas. Several pages of comments interpreting the findings are followed by 41 tables of data. Among the appendixes are the survey questionnaire and tables showing breakdowns of data concerning AHA member and nonmember schools and States and regional data. (Author/AJ)

Identifiers—\*Volunteer Army

With manpower considerations assuming an ever increasing importance for the Department of Defense, the report was prepared as part of a research program intended to bring new methodologies to bear on present and future military manpower problems. The report describes the All-Volunteer Force (AVF) recruiting, classification, and assignment (RCA) processes and examines the emerging issues surrounding those processes. Section 1 describes the operational characteristics of pre-Volunteer RCA; Section 2,

All-Volunteer RCA in terms of the major underlying influences shaping its development; and Section 3, the emerging issues and potential problems acting on RCA and their relationship to one or more of the underlying influences. Pre-Volunteer RCA was relatively simple; the most important influence was the virtual guarantee of a ready supply of high quality people to fill the needs of the Services. The absence of this guaranteed supply has been the dominant factor in shaping AVF adjustments and adaptations; seven major institutional influences acting on RCA are identified, and each relates to one or more emerging issue/problem affecting RCA. Six emerging issues are identified, which have in common a high degree of complexity and pervasiveness and which, together, constitute a major challenge to AVF management. (Author/AJ)

**Horticulture Mechanics Course Outline. Teacher Education Series, Vol. 15; No. 11.**

Pennsylvania State Univ., University Park. Dept. of Agricultural Education.

Pub Date 74

Note—11p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Agricultural Education, Course Content, \*Curriculum Guides, Mechanical Equipment, Mechanical Skills, \*Mechanics (Process), \*Ornamental Horticulture, Post Secondary Education, Secondary Education, Unit Plan, \*Vocational Agriculture

The document provides 17 outlines of brief instructional units in mechanics, which are intended for incorporation into an existing program of study in ornamental horticulture at the secondary or postsecondary level. To facilitate the flexible use of the outlines, a grid is presented on which seven occupational areas (such as arboriculture, turfgrass maintenance, and greenhouse production) are matched with the appropriate mechanics unit (such as plumbing, hydraulics, tree tools, and irrigation systems). The units involve safety, simple mechanical skills, and the operation and maintenance, but not repair, of equipment, and cover both fall and spring semester work. The statements within units may be expanded into performance (behavior) objectives, which may then be broken down into task or skill units. (Author/AJ)

Descriptors—\*Classroom Guidance Programs, Comparative Analysis, Grade 9, Guidance Objectives, \*Guidance Services, \*Junior High School Students, Occupational Guidance, Occupational Information, Pilot Projects, \*Program Evaluation, Self Directed Groups, \*Vocational Maturity

Identifiers—Career Guidance, Maine (Bangor)

The report covers a project in the Bangor junior high schools running from the first week in October 1973 to the last week in April 1974. The study sought to find a way to upgrade the career guidance program at the junior high level with little cost in counselor time. Three junior high schools supplied the ninth grade students to be used for experimental and control groups in the study. A pre-posttest decision with a control group was used for the first part of the test and a post-test only for the second part. In the first school the self-directed search (SDS) test without the use of the SDS kit was administered. In the second school the SDS kits were introduced into the experimental treatment. The third school was used as a control group and used neither the test nor the kits. The Crites Maturity Inventory was used to measure results to determine whether the SDS had stimulated students to seek career information on their own. Results were inconclusive. The third party evaluation (appended to the report) was conducted, recommending the use of SDS kits along with improvements in scheduling and more involvement of classroom teachers. (MU)

Descriptors—\*Adult Basic Education, Adult Education, \*Adult Educators, Knowledge Level, \*Performance Criteria, \*Surveys, Teacher Attitudes, Teacher Behavior, Teacher Certification, Teacher Evaluation, Teacher Response, \*Teaching Skills

Identifiers—Adult Basic Education Teacher Competency Inventory, \*Colorado

A competency inventory was used to determine those Adult Basic Education (ABE) teacher competencies which should be used as a basis for determining ABE Teacher Certification Standards for the State of Colorado. The survey instrument consisted of 170 previously established and validated statements of teacher competency. A sample of 36 ABE teachers (primarily female, ages 25-65) with three or more years of ABE teaching experience and recent ABE training were asked to indicate, on a scale of zero to seven, the degree to which a teacher should be able to perform each competency. The results, presented in tabular form, show the mean scores used to rank the competencies and the following categories into which they were classified to provide another format for viewing the data: scope and goal of adult education, curriculum instructional process, and ABE learner. Those competencies ranked in the top quartile were found to be critical in providing criteria for certification. Most critical competencies were in the instructional process category. A method for clustering competencies was suggested for use in developing courses for certification. Appended are a copy of the inventory and a 14-page computer printout of raw data from the survey. Descriptors—\*Conventional Instruction, Educational Attitudes, \*Individualized Instruction, Post Secondary Education, Questionnaires, \*School Surveys, Student Attitudes, \*Student Opinion, Tables (Data), Teaching Methods, \*Vocational Education

To determine student attitudes toward traditional and individualized instruction, 152 students (92 males, 60 females) selected from the post-secondary instructional areas of agriculture, business, home economics, and trades and industry were surveyed for their opinions. The students responded to 25 statements about each type of instruction saying whether they strongly disagreed, disagreed, were uncertain, agreed, or strongly agreed with each statement. Findings indicate that students prefer individualized over traditional instruction, but they have favorable attitudes toward both methods suggesting that both types of instruction are needed. The survey instrument is appended. (MU)

Identifiers—Hawaii, \*Samoan Americans

Third year project activities, aimed at disadvantaged Samoans living in Hawaii, 20 Years of age or older, unemployed or underemployed, and unable to effectively compete for or maintain jobs, are summarized in the document. Third year's aims included: (1) providing basic education to 75 adult Samoans through vocational interest areas, (2) using innovative curriculum, including peer instruction, and (3) disseminating project materials and information. Basic education was taught in conjunction with sewing, auto mechanics, and consumer education classes, with the vocational involvement of the students motivating their learning of basic educational skills. Teacher evaluation of curriculum, a survey of instructional concepts developed over a three year period, the responsibilities assumed by peer tutors, and pre- and post-test results are provided. Dissemination efforts are discussed. The implementation of bilingual/bicultural teachers, advisory board members, and staff is seen to be a contributing factor to the success of the program, along with efforts to incorporate a concern for the total family unit into teaching methods. Descriptions of instructional materials used and developed, a list of those in contact with the program, reports on various dissemination projects, and a description of the Adult Basic Education tests used are appended. Descriptors—\*Adult Basic Education, Course Descriptions, Curriculum Development, Demonstration Programs, \*Instructional Materials, \*Sewing Instruction, \*Teaching Methods, Vocabulary Development, Vocational Education

Identifiers—Hawaii, Samoan Americans

The document, second of two volumes, presents sewing instructional materials developed in the third year of the project aimed at disadvantaged Samoans living in Hawaii, 20 years of age or older, unemployed or underemployed, and unable to effectively compete for or maintain jobs. Instructional materials are presented in two sets, with the first a 10 lesson series of instructional activities revolving around 50 basic sewing terms. The acquisition of basic educational skills is stressed through vocabulary development, reading, spelling, and writing lessons with practice sheets. Vocabulary lessons utilize both English and Samoan; other materials are presented in English only. Pre- and post-tests indicate progress, and the material may be taught in a group situation or individually. The second set of instructional materials consists of five information sheets that deal with practical sewing skills, with students moving at their own pace with the help of the instructor or peer tutor. Sewing skills include measuring for dress size, laying and cutting a pattern, hemming a skirt, stitching a straight seam, and hand stitching. The instructional materials were custom designed for the project and a discussion concerning other materials used is included in the first volume of the report. (LH)

Descriptors—Construction (Process), Construction Industry, Course Organization, Driver Education, Equipment, \*Individualized Programs, \*Job Training, \*Mechanical Equipment, Military Training, Peer Teaching, \*Performance Based Education, Performance Tests, Program Attitudes, Psychomotor Skills, Research Projects, \*Road Construction, Training Techniques  
As part of the Army's emphasis on performance-oriented instruction in training centers, a study was conducted to determine the feasibility of using self-paced instruction in a gross motor skills course. The Crawler Tractor Operator Course, a seven-week heavy equipment course conducted at Fort Leonard Wood, Missouri was selected for the study involving approximately 300 trainees. Findings indicate that in the self-pacing system, training managers can (a) train on additional pieces of equipment, if trainees are retained for the full seven weeks; or (b) achieve substantial savings in the time and training costs if the trainees are released for assignment upon their qualification in the crawler tractor operator skills. Other findings from the self-pacing study are: (a) the system permits trainees to proceed through the course at their own rate of learning, (b) the rate of learning correlates moderately with individual predictor scores, (c) the system is readily accepted by the trainees, (d) although instructor workload is heavier, motivation and morale are higher, (e) peer instruction can be used, and (f) the system is more economical and efficient. The self-paced performance tests and questionnaires used to sample trainee and instructor attitudes toward the program are appended. (Author/AJ)

Descriptors—City Wide Programs, Crime, Law Enforcement, Manuals, \*Police, Police Action, Police Community Relationship, \*Prevention, \*Program Administration, Program Descriptions, \*Program Development, \*Stealing  
Identifiers—Police Education, \*Robbery Control

The manual was designed as a practical guide for police department personnel in developing robbery control programs. An introductory chapter defines types of robberies and suggests administrative and operational uses of the manual. Research and control strategies are reported according to five robbery types: street (visible and non-visible), residential, vehicle, and commercial. Robbery control projects in five cities (Miami, New York City, Denver, Kansas City, and Minneapolis) are described in detail. A chapter on developing a robbery control project presents a step-by-step process for analyzing the pattern of robberies in a community and planning actions to combat them. Techniques are described that can be adapted for use by police departments of any size. Other chapters deal in depth with organizational and operational problems, training curriculum and methods, and sources of funding. Appended items are: (1) synopsis of robbery programs in 30 cities including program title, descriptions, cost, and a contact for each; (2) analyses of robbery and assault in Worcester, Massachusetts; and (3) public information material used in some of the programs. A 71-item selected bibliography is also contained in the manual. (Author/MS)

Descriptors—Adult Education, Certification, \*Course Content, Course Descriptions, \*Management Education, Post Secondary Education, Secondary Education, \*Teaching Guides

The instructor's guide is intended as an aid in the presentation of a well-organized review course on management in preparation for the Certified Professional Secretary (CPS) Examination. This course can generally be covered in 10 sessions of three hours each and can be used at the secondary or postsecondary level. The 10 lessons cover the following topics: course introduction and definitions; organizations and behavioral science; staffing, compensating, and controlling; experimentation in management, decision making, and selection and training of personnel; other personnel functions; production management; management of marketing and distribution; labor relations, and research and engineering; population, social programs, business-government relations, mergers, and multinational businesses; and management techniques and practices for the CPS. Each lesson's content outline is presented with teaching suggestions and references. A bibliography for general and instructional use is included. (Author/EC)

Identifiers—\*New York, Vocational Education Amendments 1968

The report is the initial segment of a two-phase analysis of the distribution of Federal postsecondary occupational education funds in New York State. It examines the rationale behind New York's distribution of Federal funds as well as detailing the results of those administrative decisions. The document represents the first compilation of its kind and is intended to serve both as a model for reporting the distribution of Federal Vocational Education Act funds for postsecondary education and as a reference guide for the local administrator. Tables of data show how and where funds have been allocated over the five fiscal years of 1970-74 and provide a basis for making projections concerning trends for future allocations. Budgetary categories represented in the tables are: administrative, instructional, equipment, guidance and counseling, and staff development. Occupational clusters represented are: agriculture; distributive; health; office; trade, industrial, and service; engineering-related; and multi-occupations. (Author/AJ)

The 1974 seminar for State directors of vocational education focused on improvement of vocational curricula at the local education agency level. One hundred fifteen persons, representing 43 State vocational units, one territory, and Washington, D.C., attended the seminar. Special emphasis was given to processes and innovative concepts relating to professional development and self-improvement of State directors of vocational education and key members of their staffs. Guidelines and information papers were presented to explain and define methods that can be utilized by State vocational education personnel in discharging responsibilities in the field of curriculum development. The seminar covered the following areas: vocational education programs for persons with special needs (three papers); State level programs to facilitate the dissemination and implementation of new curriculum ideas (three papers); State level management information systems for curriculum improvement (three papers); curriculum changes and improvement in local education agencies (two papers); mechanisms and approaches to curriculum development (two papers); need for curriculum for State personnel development supervisors (one paper); and implementing career education programs (three papers). The full texts of all papers are included in the document. The seminar agenda and a program participant list are appended. (Author/EC)

Identifiers—California, \*Higher Education Act of 1965 Title I

The report on developing community services identifies effective alternative administrative structures and funding patterns which have enabled or could enable Title I efforts in the State of California to be expanded, continued, or adopted when Title I funding to institutions is diminished or terminated. The first of the report's six chapters is an introduction and overview. Chapter 2 describes the research methodology employed. Chapter 3 discusses the diversity of perspectives and interpretations which have been attached to such terms as continuing education, community service, community development, and public service, and offers a means of clarification based on the distinction between education-oriented, community-oriented, and broker-oriented Title I projects. Chapter 4 focuses on the nature of the strengthening and continuing process of continuing education and community services through developmental funding which has, in some cases, occurred as a result of the intervention of Federal Title I funding. Chapter 5 discusses the primary variables which have been found to affect the strengthening and continuing process for various types of efforts, and presents general conditions which have been found to be important to the continuation or persistence of community service efforts. Chapter 6 provides a summary and general conclusions of the study. (Author/JR)

Identifiers—Paraprofessional Personnel

The book, the result of a two-year research project on urban adult basic education (ABE) develops comprehensive and analytical descriptions of significant aspects in the ABE program operation and classroom interaction, and the perspectives of those involved. The study was conducted in large city public schools throughout the country, and the information gathered is presented in chapter form, following an introduction stating methodology and rationale: ABE—The Only Game in Town points out divergent objectives and funding on local, State, and Federal levels; Classroom Dynamics describes student diversity, enrollment, conduct, failure syndrome, testing, teaching approaches, and discipline; The Students deals with motivational reasons for enrolling in terms of race, sex, and age; Teachers and Counselors supplies background and salary information, and perceptions of students and curriculum; Paraprofessionals supplies background and funding information, and defines job duties and recruitment-selection process; Directors explores background and perspectives on students, teachers, the program, funding, salary, and status; Hustling the Community discusses variables in achieving funding and facilities; Improving the Odds analyzes program improvements in terms of the students involved. Descriptors—\*Certification, Diagnostic Tests, \*Driver Education, Educational Research, \*Traffic Safety

Identifiers—Computer Based Systems

The 10 papers in this special report are of interest to safety and enforcement officials, driver educators, and license administrators. They describe driver licensing from several viewpoints and discuss the past, present, and, most importantly, future roles of driver licensing in highway safety. A number of the authors agree that most current licensing practices do little to ensure that applicants possess the knowledge and skills required for safe driving. Most of the papers offer suggestions for research essential for development of better licensing processes. Such research is admittedly costly in both time and money, however, and is likely to suggest licensing and testing procedures that will further increase the cost of administration. (NTIS)

Identifiers—Air Force Academy, \*West Point

During World War Two the United States Military Academy operated a three-year program of instruction. Superimposed on this abbreviated curriculum was full-scale pilot training program. The emphasis of this study is on the problems that arose as a result. Included is a summary of responses to a questionnaire on the value of the flying training which was sent to all living Military Academy graduates of the war years. The emergence of air power as a major factor in the victories of World War Two and the defense of the nation in the postwar years strengthened the conviction that only a separate air academy would enable the Air Force to fulfill the obligations placed upon it by the nation. The West Point experience furnished telling arguments in favor of the proposal. It was also invaluable to Air Force planners in determining the organization and curriculum of the Air Force Academy. Descriptors—Age Differences, Blue Collar Occupations, \*Data Analysis, \*Employment Statistics, Job Layoff, \*National Demography, Racial Composition, Sex Differences, Tables (Data), Unemployed, \*Unemployment, Unemployment Insurance, Working Women, Youth Employment

Identifiers—\*Job Loss

Based on data assembled by the Bureau of Labor Statistics, the document analyzes the unemployment increase in terms of job leavers, re-entrants and new entrants into the job market, and job losers. The period analyzed runs from the fourth quarter of 1973, to the first three months of 1975. Data breakdown is by sex, race, and age, with the focus primarily on the category of job losers. Men under 56 years of age, with 18 percent of them black, have shown the largest increase in job-loss unemployment. Women account for one-third of job-loss unemployment, with those aged 45 and over showing a larger percentage. Occupational breakdown shows job loss unemployment highest among factory production workers with the relative increase higher for women than men. The increase in job-loss unemployment has been matched by the increase in unemployment insurance benefits drawn by workers under State programs. Unemployment rates for unemployed re-entrants, consisting mainly of women and blacks, rose 46 percent; new entrants, largely youths 16 to 19 years of age and one-fourth of them black, rose 37 percent; and job leavers showed little increase. Four tables and six graphs supplement the document. (LH)

Descriptors—\*Occupational Tests, \*Predictive Ability (Testing), Questionnaires, Teacher Certification, \*Teacher Evaluation, Teacher Qualifications, \*Teaching Skills, \*Vocational Education Teachers

The process for the certification of teachers has changed over the years reflecting a transition in the qualifications and background required from a teacher. A common requirement in all States for vocational teachers is actual occupational employment and, in Pennsylvania, an additional requirement is the completion of the occupational competency examination. To determine whether occupational competency evaluation scores are a valid indicator of subject competency, a five-year study of 107 full-time vocational teachers was conducted. Data were collected using a 17-item questionnaire designed to measure subject matter competency of teachers through ratings by their supervisors. An 86 percent return resulted. Occupational competency evaluation scores were obtained from the files in

the Department of Vocational Education of the Pennsylvania State University. Relationships between performance scores and supervision ratings were correlated. Results are tabulated and discussed. The occupational competency areas in carpentry, drafting, electronics, and machine shop were correlated and tabulated according to performance, written portion of the occupational competency evaluation, and supervisors' ratings. The fact that no evidence of a relationship between occupational competency evaluation scores, subject competency, and supervisors' ratings was found is discussed. Bibliographies and the instrument used are appended. (EC)

Descriptors—Behavior Change, Behavior Theories, Communication (Thought Transfer), Curriculum Guides, Decision Making, Employee Attitudes, Group Discussion, \*Group Dynamics, Leadership Styles, Learning Activities, \*Lesson Plans, Management Games, Motivation, Personnel Management, Problem Solving, Resource Guides, Role Playing, \*Supervisory Training, \*Teaching Guides, Teaching Methods

The instructor's guide to the course designed to acquaint supervisors, with such behavioral science theories as motivation, leadership, group dynamics, and change, stresses student participation through group discussion, role-playing, incident-process case discussion, and management simulation or games. The course is organized around four themes (each containing several topics): individual employee (motivation, motivation-hygiene theory, job enrichment, management by objectives, and labor management relations); individual supervisor (leadership styles and communication); employee as part of a group (group decision-making and formulation of primary groups); and supervisor as part of a group (specific leadership roles within groups, resistance to change, and problem solving). For each topic (as well as for an introductory section) the guide provides: (1) preparation information including a statement of behavioral objectives and notes to the instructor covering the purpose of the module, main concepts, typical participant reactions, any special advance preparation, reading sources for each module, necessary visual aids and materials, and applicable trade secrets; and (2) a presentation guide which is divided into a right and a left hand section, the former containing detailed topic presentation, and the latter providing, at appropriate points, basic teaching process instructions. Fifty-six pages of course handouts are appended. (JR)

Identifiers—\*Iowa

Forty-nine Iowa high schools enrolling almost 12 percent of the 1974-75 seniors participated in a survey of career and educational goals to discover the postsecondary plans of high school seniors and to lead to improved services to the students. The survey consisted of a 68-item questionnaire, augmented by 20 local questions; 5,766 questionnaires were returned. A description, extensive tabulation, and comparison of the participating schools are given in terms of location, size of the senior class, percentage of senior class entering postsecondary education, number of guidance counselors, and the majority race enrolled in the school. Other areas surveyed and tabulated were: students and their plans for further college education; their jobs and working patterns; their academic performance in high school; their self-perception on career related characteristics; and the role of the family's income, working status, and attitude towards post-high school activity. The results of the survey are analyzed and discussed. A list of participating schools, letters to the schools, survey of local questions, and survey instructions are appended. (Author/EC)

Descriptors—Educational Legislation, \*High School Students, Job Application, \*Job Place-

ment. \*Program Descriptions, Program Development, Secondary Education, Student Employment, Student Placement Identifiers—Maine

A job placement model, integrated into an existing guidance program, was developed, field tested, and evaluated in the Mt. Ararat School, Maine. The project focused on nine priorities related to job placement, job development, job-seeking and keeping skills, and followup services. Objectives, procedures, and methods of evaluation were set up for each priority. The process was divided into five major areas in which specific activities were conducted: needs assessment, job development, student development and placement, followup (post-graduate and undergraduate), and evaluation. A placement team approach was developed as a model for small schools with limited guidance staff. A successful program was established which led to the writing of legislation to provide similar services to all Maine high school graduates. Conclusions relate to each of the five activity areas and show that the need for job placement among high school students can best be met by existing guidance staff or by a placement team. Five recommendations for promoting job placement in secondary schools are stated. Appended materials (24 pages) include forms used in assessment, development, and evaluation activities; a copy of the legislation; and a 20-item bibliography. (MS)

Identifiers—University of Maine Farmington

The document is the final report of the career development outreach project. The project was designed to actively involve a systematic program of career education, dissemination of occupational information, and career guidance. The project was to make the target population (students, faculty, and staff at the University of Maine at Farmington and individuals referred by community agencies) cognizant of the career resources available to them when making career choices and also to encourage the target population to make their career decision based on realistic information. The functions (individual counseling, testing, placement, community service, group counseling, and resource library) of the center have been tested over the years and proven successful. Survey instruments, forms, and instructional material are appended. (KB)

Identifiers—\*North Dakota

To extend the opportunity for increasing the management efficiency of North Dakota farmers, this program for aiding farm managers and operators was undertaken in July 1971. Objectives, activities, current status of the program, summary, and conclusions are outlined here. Objectives included designing and implementing a records system, providing technical assistance to teachers conducting local programs, and establishing a data bank of information concerning annual farm records in North Dakota. A flow chart of activities, preservice and inservice education for agriculture teachers, and the responsibilities of a State coordinator are outlined. In November 1973, nine schools in the State were conducting programs and estimates for 1974 enrollment indicate a substantial expansion. (MU)

Descriptors—\*Educational Programs, Evaluation Methods, Instructional Programs, Learning, \*Program Development, \*Program Evaluation, \*Teaching Methods, \*Training Techniques, Transfer of Training

Written for students and practitioners who are interested in the systematic development and evaluation of training programs, the document presents a framework for examining current efforts and establishing new instructional programs in education, business, and government environments. Part 1: Assessment and Evaluation, six chapters, presents an instructional systems approach to development and evaluation of programs, and describes three necessary components for establishing an instructional program: (1) specifying objectives in relation to need-assessment, (2) establishing success measuring criteria, and (3) examining program validity and control exerted by experimental designs. Part 2: The Learning Environment, two chapters, examines the theoretical and empirical bases of learning, emphasizing basic as well as complex determinants of transfer of learning. Part 3: Instructional Approaches, three chapters, discusses a variety of training techniques in terms of program description, evaluation, and problem areas faced by the researcher and practitioner. Epilog, Instructional Programs: A Recapitulation lists three suggestions for future research activity: (1) the use of empirical measurement techniques to determine objective achievement, (2) the examination of combined technique approaches, and (3) the evaluation of programs through relevant multiple criteria. Comparative Studies in Adult Education: An Anthology. Occasional papers No. 44.

Pub Date Aug 75

Note—257p.; Syracuse University Publications in Continuing Education

Available from—Publications in Continuing Education, Syracuse University, 224 Huntington Hall, Syracuse, New York 13210 (\$9.00)

Document Not Available from EDRS

Descriptors—\*Adult Basic Education, \*Adult Education, Adult Education Programs, \*Anthologies, \*Bibliographies, \*Comparative Education, Program Descriptions, Research Methodology, State of the Art Reviews

Prepared to assist students and teachers, the document is a collection of 21 papers and a bibliography that have been screened for validity and usefulness at the Ontario Institute for Studies in Education. The papers, some being published for the first time, are arranged in four parts: (1) Overviews (two papers) discusses comparative education categorically and in broader terms of Canadian and African experience; (2) Methodology; General (six papers) defines philosophical, problematic, scientific, typological, and comparative approaches to comparative education; (3) Methodology: Specific to Adult Education (five papers) focuses on comparative education and its influence upon adult education through history, an analytical model, and cultural diffusion; (4) Examples of Application (eight papers) discusses simulation as a teaching method, four strategies for a comparative approach to continuing education, the Canadian Indian, societal and educational differentiation, educational values in a cross-national approach, and vocational training and higher education in the United Kingdom and France, Europe, Australia, and Canada. The bibliography lists 292 titles in English, French, and German which analyze or describe adult education in two or more countries. An introduction and initial paper examine current points of view. Program and Curriculum Guide for Vocational Agriculture/Agribusiness in South Dakota.

South Dakota State Div. of Vocational Education, Pierre.; South Dakota State Univ., Brookings. Dept. of Agricultural Education.

Spons Agency—Office of Education (DHEW), Washington, D.C.

Pub Date [74]

Note—159p.

EDRS Price MF-\$0.76 HC-\$8.24 Plus Postage

Descriptors—\*Agribusiness, \*Agricultural Education, Agricultural Occupations, Course Content, \*Curriculum Guides, Information Sources, Occupational Information, Off Farm Agricultural Occupations, \*Program Descriptions, Program Evaluation, Reference Materials, Resource Guides, \*Vocational Agriculture

The guide is designed for use by agricultural instructors, administrators, supervisors, school boards, and others who are involved in planning instructional programs for vocational agriculture/agribusiness education in high schools and adult education. Part 1 details information pertaining to the administrative aspects of program development, management, and evaluation. It discusses content areas, supporting areas of instruction, adult education, multi-district programs, and total career education in agriculture, that will prepare individuals for job entry and upgrade their occupational training. The process of evaluating such a program is outlined in detail. Part 2, about three-fourths of the document, deals with instruction and outlines, instructional content areas, and supporting areas in agricultural production: animal science; agronomic science; agricultural business management, economics, and marketing; agricultural supplies/services; agricultural mechanics; agricultural products; ornamental horticulture; agricultural resources; supervised occupation experience; and Future Farmers of America. For each it gives a list of examples of performance objectives, occupational titles, and content outline. It also gives lengthy lists of bibliographic sources, references, and instructional aids. Suggested lists of facility and equipment specifications and a sample four year program in vocational agriculture are appended in detail. (Author/EC)

The Elm Study: A Statistical Description of the University and Labour Market Linkages of Three Cohorts of Memorial University of Newfoundland Graduates.

Memorial Univ., St. John's (Newfoundland). Faculty of Education.

Pub Date Jan 73

Note—149p.

**EDRS Price MF-\$0.76 HC-\$6.97 Plus Postage**  
 Descriptors—Attitudes, \*College Graduates, Data Collection, \*Employment Experience, \*Graduate Surveys, Higher Education, Participant Characteristics, Questionnaires, \*Relevance (Education), \*Tables (Data)

Identifiers—Newfoundland

The document presents tabulations of data obtained by means of a 14-page questionnaire mailed to a random sample of 1960, 1965, and 1970 Memorial University of Newfoundland graduates, in 1972. Five hundred usable returns were obtained out of a potential 950, and information on biographic and demographic characteristics, career development, professional attitudes, and evaluation of the university and education was obtained. By using comparisons between the three cohort groups, answers to specific practical questions can be obtained regarding relevance of education to occupation, areas of educational irrelevance, difficulty of obtaining jobs upon graduation, financial support for degree training, job seeking patterns, and attitudes and values regarding educational, political, and social issues. Future use of the data in terms of analysis is planned and will include multivariate model building efforts to identify sociological and social psychological processes of the questionnaire population. Sampling design, research procedure, and findings are discussed and a reference list is provided. The questionnaire, followup letters sent, and 36 tables of data without verbal commentary are appended and make up the bulk of the document. (LH)

**A Study of the Exploratory Agriculture Programs in Virginia.**

Virginia Polytechnic Inst. and State Univ., Blacksburg. Agricultural Education Program.

Pub Date 30 Jun 73

Note—40p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—\*Agricultural Education, \*Curriculum Development, \*Educational Research, Junior High Schools, \*Program Evaluation, Questionnaires, \*School Surveys, State Programs, Statewide Planning, Tables (Data)

Identifiers—Exploratory Agriculture, \*Virginia

Lack of a curriculum guide, resource guide, and overall guidance prompted the State Agricultural Science and Mechanics Committee to survey the instructors of exploratory agriculture programs in the State in order to develop objectives, goals, and resource materials for the program. Opinions were sought from all of the teachers and supervisors concerning the nature of exploratory agriculture programs in Virginia and the teaching modules such a program should include. (Of those surveyed, 96 percent of exploratory agriculture programs are being implemented at the 6-8 grade level; 4 percent at the 4-5 grade level). A questionnaire was developed and mailed to the invited sample, and the data received from 27 usable returns were compiled and analyzed. Findings led to the following conclusions: (1) curriculum development is needed for the program, with written objectives, guides, and teaching materials; (2) a career education focus with guidance, counseling, and adequate record keeping is recommended; (3) with growth of the program, additional funding will be required; and (4) inservice as well as preservice will be needed for teacher training in the area of exploratory agriculture. Identifiers—Navy

The document evaluates Navy Group Four personnel gains in basic arithmetic skills after taking experimental courses in linear measurement and recipe conversion. Categorized as Mental Group Four by receiving scores from the 10th to the 30th percentile of the Armed Forces Qualification Test, trainees received instruction tailored to the level of their abilities and presented within a vocational context. Instruction in measuring linear dimensions was given to 26 Group Four trainees and recipe conversion was taught to 17 Group Four trainees and 23 Commissaryman personnel. All trainees worked individually and at their own rate, with test results showing Group Four personnel achieving proficiency in only some of the required skills. Concluding that mathematical learning capacities of Group Four personnel did not appear to be adequate for learning to perform typically required computational tasks of Navy enlisted men, despite experimental changes in coursework presentation, it is stated that the nature of the difficulties experienced by this group must be clarified before further improvement in training can be accomplished. Tabulation of test results is included and descriptions of meld test problems, the recipe conversion test, and the diagnostic mathematics quiz are appended. (LH)

Identifiers—Navy

The document evaluates Navy Mental Group Four personnel gains in competency of basic communication and computational skills after taking the Practical Arithmetic Self-Study course. Categorized as Group Four by receiving scores from the 10th to the 30th percentile on the Armed Forces Qualification test, trainees received instruction in computational skills up to a ninth grade level of difficulty through three techniques: audio instruction, minimizing direct assistance, and increasing time of study. Audio instruction techniques included reducing reading requirements and the visual complexity of presentation, with neither method improving test scores. Withdrawal of assistance and extension of training time were combined techniques that produced improvement in test scores. Less than half of the trainees involved in the study were able to achieve a ninth grade level, making their performance of typically required computational tasks of Navy enlisted men uncertain. More effective training approaches will have to be developed along with a determination of the nature of difficulties experienced by Group Four personnel. Tabulation of test results are included and the arithmetic operations quiz, attitude questionnaire results, and evaluation of audio techniques, and a sample of standard and audio versions of course material are appended. **Careers in Industrial Sewing for the Apparel Manufacturing Industry: Teacher-Student Guide.**

American Apparel Manufacturers Association, Arlington, Va. Education Committee.; Mississippi Research and Curriculum Unit for Vocational and Technical Education, State College.

Note—95p.; Photographs in text will not reproduce in microfiche

**EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage**

Descriptors—\*Job Training, \*Needle Trades, \*Sewing Instruction, Study Guides, \*Teaching Guides, Trade and Industrial Education

Identifiers—\*Industrial Sewing

The teacher-student guide has been developed as a service to schools in an effort to help them

organize and operate meaningful courses in apparel manufacturing. For the school it furnishes practical information in implementing the course, such as facility design, equipment requirements, and teacher selection. For the teacher it provides a curriculum guide and instructional material. For the student it provides an interesting introduction to the industry, as well as an opportunity to learn skills that may lead to a career in the apparel industry. A systems approach to facilitate learning and motivate students to develop competencies in apparel manufacturing industry has been attempted. Individualized instructional procedure has been sequenced in eight illustrated units (apparel industry orientation, industrial sewing machine, machine operation, basic machine control, motion economy, basic industrial sewing operations, gauges and folders, and overview of other machine types) to aid students in developing skills and performing tasks required to become competent in a specific job or a series of industrial sewing jobs. The design includes concepts, instructional objectives, learning experiences, and evaluations based on task identifications and analysis. Information on suggested methods of instruction, teacher orientation, and requirements for establishing an apparel manufacturing course are appended. (Author/EC)

Identifiers—Arkansas, \*Career Orientation

The guide book has been prepared to assist teachers with career orientation for grades seven, eight, and nine. There are two parts to each unit in the guidebook: (1) the teacher section consists of teacher objectives, suggested teaching activities, factors to consider, and references; (2) the student section consists of student behavioral objectives, a pretest, general information, and review questions. Units covered include: self-understanding for success in the world of work; general study of occupational clusters and exploring selected occupations; making a long range training plan; procedure for seeking, getting, and keeping a job; and a career and society. Suggested guidelines for speakers, a student personal data form, an outline for notetaking, a guide for occupational information, and an evaluation of teacher-pupil class activity are appended. **A Resource Guide for the Maryland Plan's Group Project and Line Production.**

Maryland Univ., College Park. Dept. of Industrial Education.

Pub Date 75

Note—72p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—Charts, \*Educational Programs, Group Instruction, Industrial Arts, \*Industrial Education, \*Industrial Structure, Industrial Training, \*Junior High Schools, Occupational Information, State Programs, Vertical Organization

Identifiers—Maryland, Organization Charts

This guide was developed for teachers who are using the Maryland Plan's group processes—the group project and line production methods. The guide is divided into four sections. The first section is an overview of the entire Maryland Plan. It describes the program which provides high school industrial arts students, from seventh grade through ninth grade, with a theoretical and practical understanding of the role of industry and technology. The second section contains information and examples of industrial personnel organization charts. It discusses organizational and content structure according to types of authority, project organization and management, and examples of organization charts. The third and largest section includes job descriptions and related information to define the various positions in a company's organization covering: the purpose of the job, responsibilities, and other typical titles for that position. This information is included because role playing is one of the primary learning experiences in the group processes. Information about industrial forms and materials are included in the last section. Form design, form control, form design checklist, and form references are given for the maximum promotion of manufacturing objectives. A bibliography is included. (Author/EC)

Descriptors—Career Education, \*Career Exploration, Consumer Education, Curriculum Guides, Grade 8, \*Home Economics Education, \*Industrial Arts, Interdisciplinary Approach, \*Learning Activities, Mathematics Instruction, Prevocational Education, Secondary Education, Unit Plan

The guideline presents two 12-week courses involving an interdisciplinary, partly coeducational, prevocational career exploration program in consumer and homemaking and industrial arts at the eighth grade level, and also a supplementary mathematics program. It is designed to give students an opportunity to explore occupations for themselves and to appreciate the occupations of people in both fields. The first part outlines a 12-week course in Home Economics and suggests activities in the following consumer and homemaking areas: food service careers, child care, clothing and consumer education, housing, employability, and self development. Each activity includes: purpose, objective, activities, materials, and evaluation. The 12-week Industrial Arts

course is intended to instill in the student an attitude and understanding toward tools, processes, techniques, and organization within the construction cluster. Activities in the following areas are described: safety, draftsman, employee-employer relationships, surveyor, heavy equipment, electrician, plumber, bricklaying and masonry, tools and equipment, and construction. Each suggestion includes purpose, procedure, and activities. The math program is designed to acquaint students with the uses of mathematics in all aspects of life using examples from home economics, construction, and family budgeting. (Author/EC)

Descriptors—Comparative Analysis, Educational Research, Teacher Certification, \*Teacher Education, \*Teacher Evaluation, \*Teacher Qualifications, Teaching Quality, \*Vocational Education Teachers, Work Experience

In the past a person with 12 years of work experience in an occupational skill to be taught was considered more desirable than a person with six years. The question of whether there is a correlation between the length of occupational experience as a valid indicator of the quality of the teacher is examined. There are two ways whereby a person with an occupational skill can become a vocational-industrial teacher: the traditional four-year baccalaureate program, and the certification program. Data were collected on the selected personal, professional, and academic characteristics of 63 students enrolled in the Penn State baccalaureate program, 129 students in the certification program, 28 certificate holders, and 23 baccalaureate graduates. The procedures used in this study are described: the selection of population and sample, investigation of the characteristics, and data collection and computer analysis. Conclusions regarding the differences in the two programs are discussed. Research indicates that the number of years of occupational experience has little effect on the outcome of the trade competency examination and that the results of the trade competency examination cannot be used as a predictor for teaching or academic success. References and the format used are appended. (EC)

Identifiers—Alaska

The Alaskan career development education program is a joint school/community systematic approach that provides career awareness in grades K-6, career exploration in grades 7-9, and career preparation in grades 10-12. Some significant reasons for a career development program in Alaskan schools include the very high State unemployment rate, the emergence of native regional and village corporations which require staffing, and the special needs of ethnic minorities. The main areas of the planning model are (1) work, (2) leisure, (3) planning and decision making, (4) home and community involvement, (5) basic studies and occupational preparation, and (6) self-knowledge and interpersonal relationships. A set of concepts, clarifying and defining each area, is further translated into developmental goals, objectives, and activities for Level

One (grades K-3), Level Two (grades 4-6), Level Three (grades 7-9), and Level Four (grades 10-12). (EA)

Descriptors—\*Attitude Tests, Career Choice, Job Satisfaction, \*Military Service, \*Occupational Tests, Rating Scales, \*Test Construction

Identifiers—\*Air Force Occupational Attitude Inventory

The report describes the initial development of the Air Force Occupational Attitude Inventory. From a selective review of studies that ascribed to a multi-faceted approach, several categories or content areas were identified. An extensive item pool was prepared and reviewed by judges to provide information regarding item-category agreement, item ambiguity, and item redundancy. The revised version of the inventory consisted of 348 items distributed across 35 facets. An eight-point bi-polar rating scale without a neutral point was developed for rating the items. Details regarding the final version of the inventory booklet, suitable for administration to airmen, are provided. The entire listing of 348 items and descriptions of the 35 categories are included in the report for possible use of other researchers. Subsequent actions and future uses of the Occupational Attitude Inventory are discussed. Fifteen pages of the report consist of supplementary appendixes. (Author)

**Evaluation of the Job Inventory Approach in Analyzing USAF Officer Utilization Fields. Final Report, 19 June 1972-28 July 1974.**

Air Force Human Resources Lab., Lackland AFB, Tex. Occupational and Manpower Research Div.

Report No—AFHRL-TR-75-22

Pub Date Jun 75

Note—88p.; Report prepared and submitted by Lifson, Wilson, Ferguson and Winick, Inc., Houston, Texas

EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage

Descriptors—\*Job Analysis, \*Military Service, Occupational Surveys, \*Officer Personnel, Questionnaires, Tables (Data), \*Task Analysis

Identifiers—\*Air Force

The purpose of the study was to evaluate and improve the job inventory method of job analysis as applied to officer positions. Seven utilization fields were analyzed and inventories were constructed for another three fields. The basic finding was that the inventory method can be used operationally in the analysis of officer jobs if job analysts use specific approaches to task statement construction and if more front-end research than is usually needed for airman job inventories is performed prior to the finalization of a job inventory. No magic formulas for the construction of task statements exist; however, after heavy front-end work, the job analyst will obtain enough information to resolve the issues of task specificity and breadth of coverage for each utilization field on an individual basis. The report contains 30 statistical tables. (Author)

Descriptors—Comparative Analysis, Enlisted Men, Foreign Countries, \*Job Satisfaction, \*Military Personnel, \*Military Service

Identifiers—Australia, Canada, Great Britain

Negative aspects concerning military career and service life can have widespread effects in

many aspects of the military personnel system. Areas of irritants in the military service discussed, involving Australia, Canada, U.K., and the U.S., are the following: negative aspects of service life, sources of job satisfaction in the military service, and factors related to the termination of service. Identifying these negative aspects would lead to an understanding of the problem viewed by servicemen as irritants in their military career and popular misconceptions of the military service. Deterrents for enlistment motivation in Australia and the U.K. were identified as inadequate monetary compensation and the service term required. Common negative aspects of military service life include dissatisfaction with pay, problem of family separation, and inconveniences of changing stations. Sources of job dissatisfaction among personnel is the performance of duties not directly related to their specialized areas. Military rules and regulations account for the problem of turnover in military service. A bibliography is appended. (EC)

Descriptors—\*Career Education, Educational Programs, \*Elementary Secondary Education, \*Inservice Teacher Education, Manuals, Program Evaluation, Program Improvement, Tables (Data), Teacher Workshops, \*Test Construction, \*Tests

Describing the third phase of a three-phase project designed to provide Hawaiian students with career education programs, the document focuses on training school personnel in implementing career development into existing curriculum and developing instruments for assessing student growth in career development. Inservice training was received by 286 participants in seven, separate, two-day workshops which were activity-oriented. Tests, developed for grades three, six, nine, and twelve, measure achievement categories of self-realization, economic efficiency, civic responsibility, and social relationships. Test design incorporates ease of administration and scoring, with provisions for student questions. Pilot testing occurred at each grade level and teacher evaluation was received. Recommendations for future training programs include a two level approach with careful selection of advanced level participants, and the involvement of administrators, counselors, and community representatives. Testing recommendations include data analysis, lower level test administration to low reading ability students, and incorporating tests into counseling and classroom situations. The outside evaluator, though critical of the program in many aspects, found it did meet its inservice training goals. Sixty two figures and tables are included; a list of advisory committee members, sample workshop agenda, and the tests and administrator manuals for each grade level are appended. (LH)

The packet of 10 curriculum guides, intended to aid in planning and developing materials for the introduction of agribusiness and natural resource education, can be used in statewide educational programs. The guides are appropriate for all levels from elementary to vocational schools and community colleges, although emphasis is on the secondary level. The 10 curriculum guides include the following: (1) agribusiness and natural resource education, (2) animal science, (3) agronomic science, (4) agricultural mechanics, (5) farm business management, (6) agricultural supplies and services, (7) agricultural products processing and distribution, (8) horticulture, (9) agricultural resources and conservation, and (10) occupational experience in agriculture. Each contains units and problem areas for each topic plus appropriate competencies and learning activities. No indication of the level of instruction is made since the agribusiness and natural resource education guide provides this information. In each of the 10 guides is a list of references with sources of references and instructional aids for the nine topic areas. (LJ)

Presenting demographic information on educational achievement in the Southwest region, and, by comparison, the entire United States, the document serves as a resource instrument for those planning educational programs to alleviate adult illiteracy. Information is based upon the 1970 Census and is divided into six chapters which deal individually with data pertaining to the States of Arkansas, Louisiana, New Mexico, Oklahoma, Texas, and the United States. Each chapter provides data regarding the educational level of adults 25 years of age and over in summary, by race, within each race, by Spanish language or surname, within each county, by county, and eligibility for Public School Adult Education. Educational attainment by race, and within each race, using 1960 Census data, is also included, as well as the educational level of those 16 years of age and older who are not enrolled in school. Data are given in table form, without verbal commentary. (LH)

Recruiting Disadvantaged Adults. Library Service Guide No. 12.

Morehead State Univ., Ky. Appalachian Adult Education Center.

Spons Agency—Bureau of Libraries and Learning Resources (DHEW/OE), Washington, D.C.

Pub Date May 75

Grant—OEG-0-73-5341

Note—40p.; For related document, see CE 004 946

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—\*Educationally Disadvantaged, \*Library Extension, Library Services, \*Outreach Programs, \*Public Libraries, \*Recruitment

Identifiers—Library Users

Designed as a guide for public library administrators and personnel, the document suggests ways to recruit new library users from the disadvantaged adult population. Libraries interested in recruitment are assumed to already have materials for the disadvantaged that include easy to read adult content materials, audio-visuals, outreach services, and dialogue with community organizations. The guide is divided into the following parts: (1) Recruiting the Disadvantaged discusses the varying needs of sub-groups within the disadvantaged population and effective ways of approaching each group, (2) Ways of Recruit-

ing explores methods in which the library uses direct contact with the disadvantaged as well as working through community organizations, (3) Recruiting Disadvantaged Adults: Some Suggestions For Interagency Cooperation explores ways the library can work with agencies and organizations, and (4) Suggested Readings lists 43 titles. The handbook is based on the assumptions that undereducated adults, those over 16 without a high school diploma, need information and services to help solve daily problems which the public library can provide, and the subsequent expansions of materials and services aimed at this group would be useful to other adults as well. (LH)

Helping Adults Learn: A Handbook for Home Instruction Paraprofessionals in Adult Basic Education.

Morehead State Univ., Ky. Appalachian Adult Education Center.

Spons Agency—Bureau of Adult, Vocational, and Technical Education (DHEW/OE), Washington, D.C.; Bureau of Libraries and Learning Resources (DHEW/OE), Washington, D.C.; Office of Education (DHEW), Washington, D.C. Right to Read Program.

Pub Date Jul 75

Note—65p.; For related document, see CE 004 945

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

Descriptors—\*Adult Basic Education, Adult Counseling, Adult Students, \*Home Instruction, Home Programs, Individual Characteristics, Instructional Materials, Manuals, Recordkeeping, Recruitment, Resource Materials, \*Subprofessionals, \*Teacher Education, Teaching Methods

Identifiers—\*Paraprofessional Personnel

Designed as a training and reference manual for instructors and their administrators in Adult Basic Education (ABE) home instruction programs, the handbook is based upon experience in six projects in Ohio and Kentucky. Adults receiving home instruction are functionally illiterate and, through a combined lack of transportation, child care, clothing, and self-confidence, find traditional ABE programs unattainable. Six sections present: (1) The Home Instructor—Getting Ready for the Job, discussing qualifications, qualities, duties, resource personnel and learning center functions, and preservice training; (2) The Undereducated Adult, discussing group characteristics; (3) Recruiting and Enrolling Clients, discussing techniques for identifying and contacting potential clients; (4) Instructing and Counseling Clients, covering diagnosis and prescription, placement, methods of testing and instruction, counseling, parent education, and possible problems; (5) Materials, suggesting types of materials and their effective use; and (6) Record Keeping, discussing areas of importance, ways of holding data, and its effect upon ABE programs. Tests for initial placement and formal diagnosis and where to get them, a basic set of instructional materials and their publishers, a list of materials selected from "Everyday Survival Information: What You Need and Where to Get It," and instructor forms are appended. The Guide to Vocational Education in America: Trends to 1978.

Market Data Retrieval, Westport, Conn.

Pub Date 75

Note—216p.

Available from—Market Data Retrieval, Inc., 800 Boston Post Road East, Westport, Connecticut 06880 (\$40.00)

**Document Not Available from EDRS**

Descriptors—Educational Finance, Educational Needs, Educational Objectives, Educational Programs, Enrollment Projections, Expenditures, State Federal Aid, \*State Programs, Student Enrollment, Tables (Data), \*Trend Analysis, \*Vocational Education

The continued growth of vocational education has set new trends in the field of American education over the past decade. Its growth can be attributed to government action to reduce unemployment and job immobility. Vocational education is an important aspect in State planning; each State is required by the Vocational Education Amendments of 1968 to submit an annual

plan to the U. S. Office of Education. State goals for vocational education and plans for construction and renovation of vocational/technical education facilities for 1978 are presented in capsule form. An analysis and tabulation of the trends in enrollments and expenditures in vocational education is presented in three sections: vocational education at the secondary, postsecondary, and adult levels; expenditures for vocational education; and growth prospects for enrollment in vocational education. A description of key priorities for vocational education is divided into four sections: matching education to manpower needs with projections to 1978, consumer and homemaking education, services to the disadvantaged and handicapped, and cooperative vocational education. The methodology used in the projection for 1978 and a special supplement on enrollments in unofficial vocational education courses are appended. (EC)

Descriptors—\*Educational Needs, Federal Legislation, \*Females, Occupational Guidance, Sex Discrimination, \*State of the Art Reviews, Vocational Counseling, \*Vocational Education, \*Womens Education

The increasing popularity of vocational education has helped to prepare both men and women in learning the skills of different trades. However, women's position in learning better trade skills has been hindered by institutional barriers in vocational education training for technical jobs, the trades, and industry. Few studies have been made pertaining to the roles and needs of women in vocational education. Barriers confronting women seeking vocational education include: admission to vocational education courses, which often separates programs and courses by sex in high schools and, in postsecondary programs, the lack of publicity about vocational education programs for adult women; enrollment in postsecondary education programs, hindered for many women by the problems of school location and child care; instruction methods, which tend to produce female stereotypes and where women are barely represented in the administrative levels; and the lack of counseling for women in curriculum and career choices. Improvements in job training for women and guarantees of equity in vocational education should focus on the following areas: Federal laws; Federal, State, and local educational policies and practices; and research and development. An outline of the Vocational Education Amendment of 1968 and 83 notes and references are appended. (EC)

**Determination of the Basic Mathematics Skill Needs and the Need for Mathematics Remediation for Secondary Vocational Education Students.**

Pennsylvania State Univ., University Park. Dept. of Vocational Education.

Spons Agency—Pennsylvania State Dept. of Education, Harrisburg. Bureau of Vocational, Technical, and Continuing Education.

Pub Date Apr 73

Note—150p.

**EDRS Price MF-\$0.76 HC-\$6.97 Plus Postage**

Descriptors—Basic Skills, Educational Assessment, Educational Needs, Relevance (Education), \*Remedial Mathematics, Secondary Education, \*Secondary School Mathematics, \*State Surveys, \*Student Needs, Tables (Data), Teacher Response, \*Vocational Education  
Identifiers—Pennsylvania

On an optical scanning survey form listing 66 basic mathematics skills, all secondary vocational teachers in Pennsylvania were asked to identify mathematical skills essential to success and skills in need of remediation for their specialties. Of 4,839 forms sent out, data from 3,404 yielded the 122 tables (121 pages) of findings arranged according to 61 specialties in the general areas of trade and industrial, technical, agricultural, home economics, business, and distributive education occupations. Two tables for each specialty are presented, ranking the skills according to essentiality for success and according to teacher perceived need for remediation. For each skill, the

rank earned, the number of teachers responding to the item, and the percentage of the group establishing the rank are reported. Pooled rankings of essential and remedial skills are also shown for each vocational area. Every skill is found high in either or both the essentiality or need for remediation rankings. These findings indicate much variation and suggest the need for remediation in all basic mathematics skills. Several implications for using the data to personalize mathematics skill development are stated. A 12-item reference list, sample inventory form, and a vocational specialties list conclude the report. (MS)

Descriptors—\*Agriculture, Employment Projections, Employment Statistics, Employment Trends, \*Enrollment Projections, Higher Education, \*Manpower Needs, National Surveys, \*Natural Resources, \*Professional Personnel, State Surveys, Tables (Data), Trend Analysis  
Identifiers—Ohio, United States

The comprehensive study, based on 1970 census data and other recent information from a variety of sources, provides assessment of trends and a projection of future States as well as the State of Ohio. Besides meeting the primary end objective of providing a basis for projecting enrollment needs in agriculture and natural resources in the College of Agriculture and Home Economics at Ohio State University, the study statistically reveals to decision-makers and to the public "that the number of professional personnel in agriculture and natural resources has been increasing rapidly and can be expected to continue to increase in the foreseeable future." Data are presented in 73 tables which are categorized in seven main sections: (1) Total College-Educated Manpower, and College Enrollments and Degrees (United States); (2) Scientists and Engineers and Degrees (United States); (3) Science and Engineering Doctorates (United States); (4) Trends in Agriculture and Natural Resources (United States); (5) Professional Manpower in Agriculture and Natural Resources (United States); (6) Enrollment and Degrees, Agriculture and Natural Resources (United States); and (7) Selected Professional Manpower Trends and Enrollment and Degrees, Agriculture and Natural Resources (Ohio). Identifiers—Career Guidance, \*North Dakota

The final report of a project to implement a career education guidance and placement program in the school of North Dakota covers the period of time from February 1972 to November 1973. The goals and objectives of the project include improving the guidance and counseling services to all North Dakota high school students; establishing placement services, occupational resource center, and a guidance program for dropouts; and developing a model vocational guidance program with occupational exposure and orientation experiences for secondary students. Procedures that were followed, results and accomplishments, evaluations, and conclusions and recommendations are given. Appendixes contain instruments used in the job placement program, the day-on-the-job program, and the followup program. (MU)

Identifiers—Indiana (Floyd County), Indiana (New Albany)

To integrate educational efforts with the objectives of career education, 25 schools from the New Albany-Floyd County (Indiana) School Corporation initiated a program to introduce career education in all the grade levels (1-12). Specific objectives and goals for the career center, students, staff, and community are stated. The major phases and implementation schedule for elementary and secondary career education programs for 1973-74 are described and related to the results, accomplishments, and evaluations of major activities of these phases. Career education activities utilized community resources at the elementary level. For the secondary level the focus was on career clusters as a means to implement career education. Secondary guidance departments were also involved in career education. A 43-page summary addendum describes in detail research and development activities in career education for the elementary and secondary programs for 1974-75. Appendixes include materials related to the career education activities and a self-image inventory. (EC)

Identifiers—Alabama (Sylacauga)

The purpose of the Sylacauga, Alabama, exemplary program, reported for the period from July 1, 1970 to June 30, 1973, was to demonstrate practices found effective for working with socioeconomically disadvantaged and other dropout-prone students. Program objectives were to provide: (1) student counseling services to help appraise interests, aptitudes, and skills in relation to occupational preferences; and (2) a sheltered work experience vocational curriculum with vocational counseling services to assist students in developing entry level skills for commensurate occupations. Inservice training was conducted and programs developed in five areas: grounds keeping and landscaping, janitorial and custodial, domestic, food service, and maintenance service for building and equipment. The programs centered around work experiences at work stations provided by the school system. Combined with the vocational instruction was a compensatory program in basic communication skills, reading, and mathematics as needed for the jobs. More than half of the students also held part-time jobs, some of them in their areas of study, and earnings from the jobs contributed to students' improved attitudes. Appended materials comprise over half of the document and include: newspaper articles, participant responses, supervisor's checklist, list of project developed materials, resource bibliography, attitude tests, and project budget. A Programmed Enterprise Analysis Teaching Guide for Selected Farm Enterprises in North Dakota: Prepared as Part of the Farm Management Education In-Service Workshop.

North Dakota State Board for Vocational Education, Bismarck; North Dakota State Univ., Fargo. Dept. of Agricultural Education.

Report No.—EPDA-001-75

Pub Date Aug 74

Note—63p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—Adult Farmer Education, \*Agricultural Education, \*Evaluation Methods, \*Farm Management, \*Teaching Guides

The series of programmed teaching guides for the enterprise analysis of selected enterprises was prepared by the participants in a Farm Management Education In-Service Workshop at North Dakota State University. The guide should be useful to teachers of adult Farm Management classes in helping to teach farmers to make a thorough analysis of the particular enterprise under study. Each of the 10 units is presented in a question and multiple answer format showing how to evaluate the enterprise and how to determine what changes should be made to increase its effectiveness. The following topics are covered by the workshop participants for enterprise analysis: alfalfa hay, corn, oats, sunflower production, wheat, beef breeding, dairy, feeder cattle, complete hog enterprise, and hog finishing enterprise. The guides are keyed to a textbook on Farm Business Analysis used in the North Dakota Farm Business Management Educational Program. (Author/EC)

A Five-Year Follow-Up Study of the Non-Teaching Agricultural Education Graduates--1968-73.

Virginia Polytechnic Inst. and State Univ., Blacksburg. Agricultural Education Program.

Pub Date 74

Note—42p.; Figure 3, a map, may not be completely legible in microfiche

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Agricultural Education, \*Graduate Surveys, \*Job Satisfaction, Teacher Employment, Teacher Motivation, \*Teacher Persistence, \*Vocational Agriculture Teachers, Work Attitudes

To determine the reasons why graduates of agricultural education do not enter the profession, or chose to leave it after a period of time, a mailed questionnaire survey was conducted on agricultural education graduates from Virginia Polytechnic Institute and State University from 1968-73. Twenty-four non-teaching graduates were identified and surveyed and 17 responses were gained (71 percent). Personal, educational, and work-related data are tabulated and an analysis of the results is also presented. A wide variety of reasons are given for not entering the profession. The predominant factors were: to secure more personal freedom, to secure a higher salary, to improve their family situation, and to get away from too much red tape. The writer suggests that the report provides important input for teacher educators and those associated with the preparation of teachers of agricultural education in the technical agricultural subject areas. Selected references are given. The questionnaire and letters used in the survey are appended. (Author/EC)

Descriptors—\*Annual Reports, \*Career Education, Educational Development, \*Educational Programs, Educational Resources, Letters (Correspondence), Questionnaires, \*Resource Centers, Resource Materials, Teaching Techniques

Identifiers—Career Information Centers, \*Indiana

The report presents an account of the activities and progress of the Indiana Career Resource Center in its sixth year as a source of ideas and programs for educators developing their own career education programs. It documents the services offered: (1) inservice and preservice training of classroom teachers, student teachers, counselors, administrators, and school board and community members in the concepts and involvement of a career education program; (2) editing and producing media to assist educators, including a career education specialty training directory; (3) developing contacts in the local community and becoming involved with local projects as a means of piloting ideas that could be duplicated in other settings (women's career center, career guidance institute, life planning, conference telephone use in career education) and career development workshops for the Comprehensive Employment and Training Act (CETA). An evaluation and the implications of the effectiveness of these services are given. Four-fifths of the report consists of appended material: a list of consultations, occupational information class evaluation, public relations brochure, film descriptions, career digests, CETA workshop materials, material loan list, feedback form and comments, "People in Careers" evaluation form, conference telephone evaluation forms, career guidance institute questionnaire, letters, and newspaper clippings. gram Development, Program Planning, Student Characteristics

Identifiers—Appalachia, Appalachian Adult Education Center

Developmental procedures, background information, alternatives, and results of four demonstration community education programs established by the Appalachian Adult Education Center are presented in the document. Community educational programs sponsored by the Appalachian Adult Education Center, its educational objectives, and a discussion of the population and geographic area of Appalachia are summarized. General methodology for setting up new programs is discussed, and includes the identification of community needs and resources and their contribution to the program, planning sessions, written agreement of objectives, and the leadership of an outside person. The four sites are (1) Scioto Valley Local School District, Piketon, Ohio; (2) Ashland City Schools, Ashland, Kentucky; (3) Owensboro Public Schools, Owensboro, Kentucky; and (4) Montgomery County Community Schools, Montgomery County, Kentucky. Individual organization, cost, activities, community background, and program effectiveness are discussed. Each program contains home study components and offers aspects of a family learning center, including basic academic skills concentrating on the ABE and GED tests, parent education, and career education. Tables and maps supplement the discussion. Preplanning information sheets, an agenda for a two day workshop, and program related material from Ashland, Montgomery County, and Owensboro are appended and constitute about one-fourth of the document. Occupational Shortages Reporting System, Forecasting Model and Correlation Analysis.

Texas State Technical Inst., Waco.

Pub Date Jul 75

Note—134p.; Revision of ED 106 486

EDRS Price MF-\$0.76 HC-\$6.97 Plus Postage

Descriptors—\*Computer Programs, Data Analysis, Employment Patterns, \*Employment Projections, \*Employment Trends, Job Market, Labor Market, \*Mathematical Models, Prediction, Predictive Validity, Technical Education, \*Technical Occupations, Vocational Education

Identifiers—Texas

The report presents a computer model for forecasting occupational shortages into the near future based on occupational data reported monthly by the Texas Employment Commission for the period January 1970 to July 1975 and on job openings listed in classified want ads from September 1974 to July 1975. The report describes the methodology of the occupational shortages forecasting model and the equations used in the model (least squares method), and describes the features of the computer program with respect to input requirements, computing sequence, and output descriptions. The model predicts occupational shortages by extrapolations of the calculated linear forecasting equations which approximate the nonlinear occupational data. The correlation analysis which shows (1) how well the forecasting line represents the actual data points and (2) the reliability of the prediction is also included. Appendix A of the report (78 pages) presents computer graphical representations of the forecasting model as it applies to 76 technical occupational areas covered in the various departmental course offerings of the James Connally Campus of Texas State Technical Institute. Appendix B (eight pages) provides the computer program of the forecasting model. (JR)

The annotated bibliography represents the core holdings in the area of technology and social change in foreign countries at the Iowa State University Library. The first part of the bibliography (115 pages) contains several hundred individual entries, mostly of books, but including government and United Nations documents, published since 1950, which are grouped under headings arranged alphabetically by subject and by country/geographical area, and which are cross-referenced to other appropriate headings. Part 2 (four pages) annotates 16 topically relevant recent additions to the library's collection. Part 3 (12 pages), a supplemental bibliography, cites about 85 books, reports, and U.S. govern-

ment documents dealing with various aspects of technology assessment. Part 4 (two pages) annotates 23 relevant journals. Where appropriate, the Iowa State University Library call number of each entry is provided. (JR)

**Descriptors**—Educational Assessment, Educational Needs, \*Educational Planning, Employment Projections, Enrollment Projections, Part Time Teachers, \*Prediction, Special Education Teachers, State Surveys, Tables (Data), \*Teacher Supply and Demand, Vocational Education, \*Vocational Education Teachers  
**Identifiers**—\*Minnesota

The report presents the results of a project in the research program area of teacher education conducted by the Minnesota Research Coordinating Unit for Vocational Education. The specific objectives of this project were to: (1) provide an estimate for future need for teachers in vocationally reimbursed teaching positions in Minnesota, and (2) identify and describe the relative size of sources of teachers in these positions. Conduct of the study was accomplished in two phases. The first phase employed the Delphi technique with a group of experts and the second phase involved sampling schools having vocational education programs with vocationally reimbursed positions. The findings show: (1) a need for approximately 370 new teachers each year over the next five years, (2) the estimated average annual total number of full-time teachers in vocationally reimbursed positions over the next five years will be approximately 4,750, (3) a number of reimbursed teachers in new program levels will be added in the next five years, and (4) each program area has a large number of part-time teachers for adult programs. Summary data on future demand and average annual growth or decline of teachers, and summary data on factors affecting the supply of teachers is appended. (Author/KB)

**Third Annual All-Service Vocational Education Conference: Conference Summary.**

North Dakota State Board for Vocational Education, Bismarck.

Pub Date 24 Aug 73

Note—52p.; Proceedings of the Annual All-Service Vocational Education Conference (3rd, Bismarck, North Dakota, August 20-24, 1973)

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

**Descriptors**—\*Conference Reports, \*Conferences, Educational Needs, \*Inservice Education, Speeches, \*Vocational Education, Workshops

**Identifiers**—\*North Dakota

Basically designed as an inservice training activity for vocational education personnel, the conference had three broad objectives: (1) to upgrade the professional personnel, involved in vocational educational programs in North Dakota, (2) to sharpen the focus of the role of vocational education in meeting the needs of people, and (3) to continue to foster a spirit of cooperation among the vocational program areas facing common educational problems. The format of the conference consisted of two components. The first one was devoted to total group participation and the second portion to participation by program area. Summaries of most of the activities and presentations engaged in at the conference are included in the publication. (Author/SN)

Spons Agency—Office of Education (DHEW), Washington, D.C.

Report No—VT-102-013

Note—143p.

**EDRS Price MF-\$0.76 HC-\$6.97 Plus Postage**

**Descriptors**—\*Adult Vocational Education, Distributive Education, \*Instructional Materials, Manuals, \*Metric System, \*Teaching Guides, Transparencies, Worksheets

The United States will convert to the metric system of measurement in the near future, and the distributive education programs in high school and at the adult level will have to train the needed personnel for business. The manual gives the basic conversion methods and instruction in teaching metrics. Metric programs conducted for business personnel would be the same as other distributive education programs, with the addition of promotion and publicity releases. The manual includes topical outlines and suggestions for the instructor in five sessions on program management, metric length, metric area, metric volume and capacity, and metric mass (weight). Transparencies testing materials, and student handouts accompany each section. Also included are supplementary materials, film summaries, promotional material, course evaluation sheets, and a list of material sources. (MF)

**Descriptors**—Career Education, \*Career Exploration, \*Career Planning, Grade 8, Grade 9, Instructional Materials, \*Junior High Schools, Questionnaires, Records (Forms), Self Concept, \*Self Evaluation, \*Teaching Guides, Unit Plan

The exploratory course in career education for grades 8 and 9 is designed to directly involve the student in an investigation and evaluation of information about career opportunities, societal needs, and his personal relationship to the world of work. The purpose of this experience-centered course is to stimulate creative individualism which will lead to better decision-making based on self-appraisal and awareness of occupational opportunities. The units of study include learning activities to help the student gain self-knowledge, understand the role of the individual in the economic system, and relate his studies to occupational planning. He also explores in depth occupations involving work with data, people and animals, and objects and materials. Each of the 10 units is focused on appropriate behavioral objectives. Half of the document consists of appended materials including lists of resources and techniques, sample forms and letters, a personal data questionnaire, vocational interest and self-evaluation surveys, instructional materials, and useful information related to occupational research and teaching. This collection of lesson units for kindergarten and grades 1 and 2 is part of a K-6 series. Its purpose is to provide an early introduction to career education. The lessons for kindergarten focus on school and family work roles. Learning experiences for grades 1 and 2 relate math, science, social studies, language arts, health, and art directly to occupations. Suitable for use at all three levels are lessons designed to promote an awareness of work in general, emphasizing such concepts as the interdependence of jobs, the variety of work, division of labor, and the importance of all jobs. Included also are guidelines for speakers, guest speaker evaluation form, and field trip questionnaire, along with lists of supplementary activities and a list of occupation pamphlets available to teachers and students. The unit of individualized learning activities is designed to provide training in the job skill, lubrication, for the prospective auto mechanic service specialist. The materials in the unit are divided into two sections. The developmental, or preliminary phase, for use by the instructor, includes brief descriptions of the job and of the student population, and listings of the specific tasks, course prerequisites, and objectives. The curriculum phase, for use by the student, contains directions, objectives, activities, worksheets, pretests, and posttests. These two components together form a "job entry", a unit of work which, when completed by the student, insures his training in a designated job skill. Suggestions are included to aid the instructor in his role as guide in the individualized instruction format. (NJ)

**Descriptors**—Career Education, \*Elementary Education, Elementary School Students, Laboratory Procedures, \*Occupational Guidance, \*Orientation Materials, \*Teaching Guides, Unit Plan, \*Vocational Development, Worksheets

**Identifiers**—Career Guidance, \*Career Orientation

The manual is designed to help the elementary level teacher provide some of the information and experiences needed by students in making vocational decisions. Some of the information deals with simulated experiences, in-school work, and field trips, stressing action with a minimum of theory. Other parts of the manual cover a different phase of vocational orientation, using a more theoretical approach based on traditional vocational guidance methods, with emphasis on providing information on personality development. Goals of vocational orientation are student self-evaluation, introduction of the various occupational areas, exploration of the economic and social values of work, exploration of the psychological and sociological meanings of work, description of educational avenues, and the development of students' decision-making ability. The unit-project approach to vocational orientation is applied to the curriculum flow in order to give students some practical experience along with the information. Suggested careers for study in K-7 are presented. Two papers are appended, "Career Guidance: A Developmental Process" (George E. Leonard) and "The Needs of Inner-City Children for Career Guidance" (Doris Jeffries). (MF)

Intended for use at the junior and senior high school levels, the teaching guide for a course in careers is based on the premise that the student needs to know as much as possible about himself in order to make intelligent choices. The major portion consists of lessons designed to promote self-understanding and rational decision-making.

The remaining section is concerned with occupational exploration and includes learning activities, resources and materials, and information useful to the teacher of a course in careers. A 34-page section provides lists of references, an annotated bibliography, and projects related to career and vocational education. (NJ)

**Descriptors**—Cluster Grouping, \*Communication Skills, Employers, Graduate Surveys, \*Performance Specifications, \*Post Secondary Education, Questionnaires, \*State Surveys, Tables (Data), \*Vocational Education Identifiers—Wisconsin

Communication skills classes must prepare students for living and for earning a living. As the postsecondary technical-vocational schools throughout Wisconsin showed great differences in the content of their communication skills courses, both among schools and within various educational programs, a statewide survey was conducted to determine the importance of various communication skills competencies. A list of 40 communication skills or tasks was developed. Questionnaires containing these 40 competencies were sent to employers and to graduates of vocational-technical programs for ranking of the competencies in 15 occupations in job clusters for business technology, secretarial and related science, industrial machine, health vocation, and industrial technology. Detailed rank orders and mean responses are presented in the report. Survey results indicated that some communication skills are more important than others and that different occupations require different levels of competency. Results also supported the cluster concept that vocational programs can be clustered for the purpose of teaching or learning communication skills. The appendix includes a bibliography of communication skills efforts, list of related microfiche documents, correspondence, and survey instruments. (MF)

**Descriptors**—\*Cooking Instruction, \*Developmental Programs, \*Food Service Occupations, \*International Programs, Letters (Correspondence), Metric System, Pilot Projects, \*Post Secondary Education, Records (Forms), Study Abroad, Travel Identifiers—Switzerland

The document describes an exemplary project from January 1, 1973 to December 31, 1974 in which 21 postsecondary cook/chef students were afforded the opportunity to spend six months in a training experience in Switzerland. The project, coordinated through the Swiss Hotel Association, was intended to provide a basis for sharing information with the food industry, especially in Minnesota. All participants reported that the program contributed to their growth. Language and cultural adjustment were seen as the biggest handicaps which were encountered most frequently at the beginning of the experience. Appended materials, making up the bulk of the document, include: list of participants, forms, correspon-

dence, travel tips, metrics in the kitchen, and a program evaluation form. (LJ)

The study was made to determine the earnings of a sample group of Indiana high school vocational program graduates to ascertain the effect hypothesized training has on earnings of high school vocational graduates. The sample was randomly selected from 1972-73 graduates, stratified according to vocational program. Of the 18 independent variables used in the analysis, those found to have any relation to earnings were sex, marital status, year of graduation, job satisfaction, labor union membership, and length of time after graduation before taking a job. Major conclusions were: (1) variables not directly associated with vocational training tend to have a greater influence on the earnings of vocational graduates; (2) socioeconomic status of parents was not a significant influence; and (3) the type of vocational program completed by the graduate did not provide any conclusive relationship with earnings. Appended are: a list of cooperating schools, correspondence, the survey instrument, list of advisory committee and project consultant, and an analysis of nonrespondents. (MF)

**Descriptors**—Correlation, Educational Programs, \*Employment Patterns, Followup Studies, \*Graduate Surveys, High School Graduates, Relevance (Education), Secondary Education, \*State Programs, Tables (Data), \*Vocational Education, \*Vocational Followup Identifiers—Indiana

The objectives of the study were to determine the correlation between the factors of employment patterns and vocational program types for 1972-73 graduates of secondary vocational programs in Indiana. A random sample of 25 schools and graduates stratified for vocational program types (agriculture, business education, distributive education, health occupations, home economics education, and trade and industrial education) comprised the population. Findings are detailed in narrative and tabular form. A majority of the 1,000 vocational graduates sampled did seek employment and a majority worked in occupations at least somewhat related to their vocational training. The only significant differences between job relatedness and mean salary levels were found for the six months' earnings figures in the distribution education program. The relation between job relatedness and earnings was not found to be significant for one year earnings. The study did not support the premise that graduates who worked in an occupation related to their vocational training would earn more than those working in nonrelated occupations. Appended are: correspondence, the survey instrument, an

analysis of nonrespondents, and other project-related information. (MF)

Identifiers—\*Vermont

The opportunity to establish a statewide data  
baseline, beginning with the first year that the  
modern area vocational center concept was im-  
plemented in Vermont, provided the basis for this  
study. A project was undertaken to (1) field test,  
on a state-wide basis, a model for collecting and  
analyzing followup data on graduates from Ver-  
mont's vocational education programs, and (2) to  
develop a followup data file. The data file was  
developed based on a 41 percent return of usable  
former student survey forms. Appended materials  
make up one-half of the document and include:  
list of participating schools, data collection forms  
and manual, and the student data survey form.

cupations, \*Human Relations, \*Interpersonal  
Competence, \*Job Skills, Office Occupations,  
Performance Factors, Reading Skills, Sales Oc-  
cupations, \*Social Characteristics, Tables  
(Data), Technical Occupations, Vocational  
Development, Writing Skills

Identifiers—Mississippi, Social Skills Inventory  
Scale

The primary purpose of the study was an initial  
attempt to identify the basic social skills which  
are pertinent to the general occupational cate-  
gories of (1) trade and industrial, (2) technical oc-  
cupations, (3) health occupations, (4) marketing  
and distribution, and (5) business and office. A  
secondary purpose was to compare the identifica-  
tion of social skills and the ranking of the im-  
portance of these social skills as related to job  
performance. Data were gathered from post-  
secondary instructors and industrial personnel  
within selected industrial settings utilizing a social  
skills inventory scale and interview techniques.  
Seven postsecondary complexes were selected to  
present the institutional input. In addition, indus-  
trial personnel representing the five basic occupa-  
tional categories were selected for participation  
in the study. A major finding was that various  
degrees of social skill competence are of vital im-  
portance to the levels of performance within all  
basic occupational categories. The survey instru-  
ment is appended. (Author/VA)

Education, \*Performance Criteria, Preservice  
Education, \*Program Evaluation, \*School Per-  
sonnel, Teacher Education

Identifiers—Michigan

The report is an evaluation of the Career Edu-  
cation Personnel Model Project (CEPM), which  
was initiated for the Michigan Department of  
Education in the spring of 1972. The purpose of  
CEPM project was to develop competency-based  
instructional models for the preparation and  
training of personnel who plan and implement  
career education programs. The procedures of  
the project involved a review of the literature to  
identify similar studies and the identification and  
validation of competencies and performance  
criteria through consulting with practicing career  
educators. The major goal of the third party  
evaluation was to provide feedback concerning  
the developments and outcomes of the project to  
its staff and funding agencies. The project  
receives an overall positive evaluation. In a spot-  
check for comprehensiveness, it was found that  
appropriate sources were reviewed in the litera-  
ture search. Other assessment techniques in-  
volved interviews with project and staff members  
and third party ratings of the competency lists  
developed in the course of the project. The  
overall conclusion was that the procedures fol-  
lowed were adequate to the task. (NJ)

ondary Education, Occupational Guidance, \*Pro-  
gram Descriptions, \*Program Evaluation, Ta-  
bles (Data)

Identifiers—Career Guidance, Texas (Grayson  
County)

Covering the time period of July 1974 through  
June 1975, the second interim report summarizes  
the activities of a K-12 career education project  
conducted in the Grayson County schools in Tex-  
as. Each of the project components reports on  
the year's activities. On the elementary or occu-  
pational awareness level, the staff worked with  
classroom teachers, helping them to integrate  
career into the daily lesson planning. At the ju-  
nior high level, the project-developed occupa-  
tional investigation curriculum was used, along  
with films, field trips, and resource speakers, to  
orient the students in five job classification under  
each of the 15 occupational clusters. The  
guidance staff conducted group sessions in career  
guidance, focusing on self-awareness, value  
clarification, vocational information, and job-  
seeking skills. By the end of the school year more  
interest in the program was being shown as  
demonstrated by increased participation in  
workshops and other project-sponsored activities.  
More than one-half of the report is taken up with  
the third party evaluation of the project.

lections, \*Mobile Educational Services, \*Occu-  
pational Guidance, \*Occupational Information,  
Resource Materials, Secondary Education

Identifiers—Career Guidance, Wisconsin

The careermobile is designed to bridge the gap  
between education and work for urban and rural  
youth in the Western Wisconsin Vocational,  
Technical and Adult Education District by  
providing occupational and career guidance infor-  
mation through its vast audiovisual resource libra-  
ry. In order to develop its collection of au-  
diovisual resources, an extensive nationwide  
search of filmstrips was conducted. The career-  
mobile began its operation in 1972 with approxi-  
mately 300 commercial career programs. Concur-  
rent production of sound filmstrips at Western  
Wisconsin Technical Institute resulted in the  
development of additional career programs. Thirty-  
two schools were visited during the school  
years 1972-73 and 1973-74. Approximately  
30,000 students received the opportunity to ob-  
tain information and guidance concerning career  
and occupational programs during that time  
period. Appended materials make up three-  
fourths of the document and include: a 20-page  
list of the careermobile's audiovisual materials,  
public relations materials, forms, an evaluation  
instrument, and an evaluation report. (VA)

Descriptors—Demand Occupations, Employment  
Level, High School Graduates, Job Training,  
Machinists, \*Numerical Control, \*Occupational  
Surveys, \*State Surveys

Identifiers—Oklahoma

In order to get a better view of the demand for  
secondary trained numerical control personnel  
and upgraded adult machinists, a questionnaire  
was sent to machine shops throughout the State  
of Oklahoma. The questionnaire was designed to  
show the present level of employment of numeri-  
cal control personnel, the anticipated use of  
retraining facilities, and the anticipated one-year  
and two-year demand levels. The results of this  
study were used to determine the feasibility of  
purchasing numerical control machinists' tools for  
use in the training of machinists. It was found  
that the level of training required did not justify  
the purchase of numerical control equipment at  
this time. (Author/VA)

Alternatives, \*Experimental Programs, Office  
Machines, Office Practice, Secondary Educa-  
tion, Skill Development, \*Stenography, Tables  
(Data), \*Teaching Methods

Identifiers—Arkansas (Little Rock)

A survey conducted in 1974 in the Little Rock  
area revealed there was a demand for office per-  
sonnel who could take shorthand. There was a  
definite need for the initiation and implementa-  
tion of a program at McClellan High School to  
boost enrollment in shorthand courses. The pur-  
pose of this study was to determine if students  
could acquire a proficiency level in transcription  
for employment in a one-year period that exceeds  
the level now achieved in the traditional

shorthand classes. A comparative study was conducted to ascertain whether students could achieve a higher level of skill through the use of machines or by the traditional approach. All students had one hour of instruction daily. The machine method of teaching shorthand appeared to be a superior method. Forty-four percent of the students in the experimental machine shorthand groups had reached a job-entry skill level by the end of the school year. This compared to 6 percent in the control groups of traditional Gregg Shorthand. (VA)

Descriptors—Agricultural Occupations, \*Community Resources, Data Analysis, \*Employment Opportunities, Employment Projections, \*Employment Statistics, Occupational Surveys, State Programs, \*State Surveys, Tables (Data), \*Vocational Agriculture  
Identifiers—\*Connecticut

The publication is a report of phase 2 of a three-phase project to determine the employment opportunities and community resources in vocational agriculture in Connecticut. The study was designed to enumerate job possibilities, to inform farmers and agricultural firm operators of the vocational agriculture program, and to identify the community resources available to State programs in vocational agriculture. Phase 2, conducted between July 1964 and March 1975, involved the collection, compilation, and reporting of the data, and the dissemination of information about the vocational agriculture program. The tabulated data appearing in the report provide information about current and projected employment, income, and levels of experience and education required for beginning employment. Results of the survey indicate that the employment opportunities in agriculture in the State are increasing at the rate of approximately 3 percent per year. The findings also indicate a large number of resources available in the State that could be utilized to enrich the vocational agriculture program. The major portion of the report is taken up with the presentation and summary of the data. Phase 2 procedures are described, and a summary of the activities of phase 1 also appears. A sample interview schedule is appended along with information about project personnel. (NJ)

Identifiers—\*Arkansas

The purposes of the study were: (1) to compare the occupational achievement of vocational education graduates with that of nonvocational graduates, (2) to determine the number of graduates trained in the various vocational areas, and (3) to describe the group of students enrolled in vocational education courses. The study was limited to 1970 graduates of eight high schools in Arkansas. The data were collected by use of a mail-out questionnaire. Thirty-six percent of the sample of 1,749 returned completed questionnaires. Descriptive statistics were used to present characteristics of one-year and two-year vocational education graduates. Chi-square analyses were made comparing data and responses of the two-year graduates and a control group of nonvocational graduates. The following are some of the important findings. More two-year graduates than one-year graduates were employed full-time and in jobs in the same area as their training. More of the one-year graduates were unemployed. More one-year than two-year graduates were attending college. Also, the vocational education graduates had significantly higher achievement records in high school than the nonvocational graduates. Identifiers—Career Opportunities Potential Evaluation, COPE, Elementary Secondary Education Act Title III, ESEA Title III, Pennsylvania (Hummelstown)

An evaluation of a project which initiated an organized program of vocational guidance for the Lower Dauphin Junior High School in Hummelstown, Pennsylvania is described. A special program emphasis had been developed for each of the three grade levels. It was not possible to evaluate the grade 8 program; however, two evaluation forms were used in the grade 7 program and proved to provide sufficient information to make an estimate of the relevancy and appropriateness of the program. The evaluation tool used for the grade 9 program was the self-concept and motivation inventory. This instrument was administered twice for providing information to be

used in the statistical evaluation of program effectiveness. The instrument proved unsatisfactory for this purpose, but gave valuable information concerning the individual. The learning activities for grades 7, 8, and 9, making up the bulk of the document (283 pages), are appended. Organized as lesson plans for each grade level, objectives, teaching suggestions, procedures, required materials, and instructional materials are provided. Grade 7 materials (52 pages) emphasize self-evaluation, grade 8 materials (79 pages) stress vocational interest development, and grade 9 materials (53 pages) deal with career planning and decision-making. Identifiers—Arizona (Tucson)

The document describes the consumer and home economics summer programs for grade 7 and grade 8 girls in two junior high schools. The programs provided opportunities to learn basic sewing and cooking skills, as well as personal improvement such as grooming, hygiene, posture, and modeling. A number of field trips to supplement the class instruction were made. Pretests and posttests were used to evaluate the programs. The tests showed that all of the girls had improved, and the students' own evaluations were very positive. Teachers also felt that the programs were successful and recommended continuation, with more supplies and time allotted for the programs. A 20-page section of the program's instructional materials includes pre- and posttests and other student materials. (MF)

Identifiers—NCTI, North Central Technical Institute, Wisconsin (Wausau)

The principal purposes of the preparation program at North Central Technical Institute (NCTI), Wausau, Wisconsin, were to provide opportunities for certain students to further their general academic development and to explore various vocational fields. Students intended for the preparatory program were those identified by their high school records and by entrance examinations as needing further development before admission to a postsecondary vocational program. The program objectives were accomplished by: (1) assessing the remedial education needs of students through diagnostic testing in reading, English, math, natural science, and study skills; (2) interviewing instructors for their reactions to the program; (3) visiting other schools to examine methods and curriculum materials used in their remedial education programs; and (4) developing programs to meet the specific remedial education needs of individual students. As a

result of these efforts it was recommended that a learning resource center be developed to provide an opportunity for individualized instruction. Three-fourths of the document consists of appended materials: a periodicals bibliography, program objectives, school visitation and seminar report, NCTI structure and functions, forms, and a followup study of students in the developmental program (1970-73). Descriptors—\*Distributive Education, Grade 10, Grade 11, \*Merchandising, \*Project Training Methods, Secondary Education, Student Projects, \*Teaching Guides, Vocational Development

The document explains how to integrate the project training methods into a distributive education curriculum for grades 10 or 11. The purpose of this teacher's manual is to give an overall picture of the project method in use. Ten sample projects are included which could apply to any distributive education student concentrating on the major areas of career development, advertising, display, and salesmanship. Besides describing the individual project, technique, behavioral objective, procedures, timing, and evaluation method are also specified. (LJ)

Descriptors—\*Career Education, Delivery Systems, Facility Guidelines, \*Facility Planning, High Schools, \*Information Sources, \*Resource Centers, Secondary Education

Identifiers—\*Career Information Centers, New Jersey

The handbook is designed to help educators who are considering the establishment of a career resource center. Based primarily on the writer's experience, the document is intended to provide practical assistance in the organization of a high school career resource center. The document is organized around the eight chapter headings of determination of role, physical facilities, staff, public relations, collection of information, delivery system, evaluation, and job placement.

The appendixes make up half of the document and include material used in implementing career resource centers in New Jersey: career center floor plans, correspondence, forms, careers related to subject areas, an explanatory flyer for students, and evaluation instruments. (LJ)

Pub Date Jan 73

Contract—OEC-460-70-014

Note—81p.

**EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage**

Descriptors—\*Course Content, Guides, Industrial Arts, \*Industrial Education, Job Skills, Job Training, \*Machine Tool Operators, Occupational Information, \*Performance Specifications, \*Plastics, \*Task Analysis

Identifiers—\*Industrial Plastics

The guide is designed to provide a basis for effective communication between local education agencies and local advisory committees regarding industrial plastics education and to communicate national and statewide program requirements so that local advisory committees may recommend program requirements that meet local needs with due concern for State and national needs. There is recent evidence that the plastics industry as a whole is less aerospace oriented and becoming more industrial plastics oriented. Hence it is recommended that a school planning a preparatory program carefully review its objectives with its local advisory committee. The document is organized by task analysis and course objectives for the three jobs of machine and hand parts finisher, plastic bench mechanic, and plaster and plastic tooling mechanic. For each vocation, occupational information steps to accomplish each task and what constitutes satisfactory performance are described. (Author/LJ)

Descriptors—\*Career Education, \*Cooperative Programs, Course Content, \*Curriculum Guides, Grade 11, Grade 12, Health Occupations, \*Health Occupations Education, Human Body, Human Development, Legal Problems, Nutrition Instruction, \*Secondary Education, Teaching Procedures, Unit Plan

Identifiers—New Jersey

The two-year cooperative health occupations program curriculum guide was prepared to introduce to the schools, and more importantly to the student, the vocational opportunities to be found in health careers. The student's elected goal should lead to employment upon graduation because of specialized training, and may open doors to advanced education to prepare for a more advanced position in the health field. The document consists of seven units for the junior year: (1) orientation to school and health occupations, (2) introduction to aspects of health and human behavior, (3) growth and development of the person, (4) introduction to legal aspects, (5) body structure and functions, (6) skills related to health occupations, and (7) nutrition. The senior year consists of an orientation to the world of work. Each unit begins with an introduction and then is organized by content, teacher activities, student activities, and desired behavioral outcome. Appended are materials for testing, student records, and lists of recommended textbooks and audiovisual aids. (Author/LJ)

Identifiers—Indiana (Hammond)

A project designed to develop a prevocational program for grade 9 students in a comprehensive area vocational school is described in this final report. The major goals of the project were to enable students to make wise career choices and to develop better work habits and attitudes. Other goals were to identify the possible need for 10th grade prevocational programs and to further involve the community in the process of vocational education. A total of 66 unit packets were written for the cluster areas of graphics, metals, construction, and electricity/electronics. Each of the packets included instruction sheets, audiovisual materials, suggested field trips, and appropriate evaluation instruments. Occupational analysis was used as the basis for package development. The packages are currently being field tested. Appended materials (25 pages) include sample instructional materials and work sheets, a complete unit on basic electricity, and a list of completed units. (VA)

Descriptors—\*Barbers, \*Course Content, Facility Requirements, \*Secondary Education, Skill Development, State Standards, \*Teaching Guides, \*Trade and Industrial Education, Vocational High Schools, Work Experience

Identifiers—New Jersey

The course outline emphasizes the trade of barbering and is intended to be part of a complete course of instruction which provides both a thorough foundation in the fundamental skills and knowledge of the barber trade and the development of good work habits and attitudes, including an appreciation of the importance of safety. The student is intended to have actual barber shop experience in conjunction with this high school level course. The introduction to this guide presents information about how to set up the course, including facilities needed and New Jersey State law. Course content outlines are presented for the areas of: (1) shop safety and sanitation, (2) history of barbering, (3) practical skills, (4) tool information, and (5) personal hygiene and health habits. Related and theoretical course content is also available. Student information sheets, lesson plans, and teacher's aids complete the document. (LJ)

The manual is a 12-hour program for adults who are working or preparing to work as retail salespeople. It can also be used as a summarization manual for high school students. The manual consists of five sessions which take the individual from the human aspect of sales to the related sales technique. The sessions are entitled: employee and customer relations, approaches and presentations, objections and closing the sale, suggestion selling, and sales demonstrations. Each session provides an instructional outline, related methods, and appropriate handouts and transparency originals. The appendix lists keys of session evaluation, promotional devices, suggested films, case studies, and supplementary handouts and transparency masters. (NJ)

**Descriptors**—\*Decision Making, \*Distributive Education, Instructional Materials, Job Training, Learning Activities, Management Games, \*Problem Solving, \*Retailing, Secondary Education, \*Simulation, Vocational Education

The in-basket simulation package was designed to help students learn about working in a department store. Various activities commonly occurring in retailing are simulated through the use of written memos and telephone messages. The learning activities were written for use in either a traditional classroom or a model store. The goal of the package is to acquaint the student with situations surrounding various tasks that must be performed in a store. The scope of topics presented was reduced to functions rather than positions in an effort to better enable the students to identify with the actual units of work to be performed. (Author/VA)

The need for classroom materials which encourage total student involvement served as the basis for the manual. Four games related to the development of human relations skills are presented. In the first game, participants compete as members of a team in performing a task under three types of communication situations: (1) one-way communication, (2) two-way communication, and (3) two-way communication plus visual aids. The second game emphasizes skills in goal-setting both for individuals and groups. The third gaming activity demonstrates the need for cooperation among members of a group to accomplish a group task. The fourth game provides the participants with an opportunity to identify the principles of group consensus making. Performance objectives, required materials, and procedures for conducting the activity are specified in detail for each game. (VA)

The tremendous growth of the food service industry has created a need for well-trained employees in the restaurant business. This manual provides material for waiter and waitress training in developing the overall required skills. The course is presented in four major sections: (1) relations-human and customer, (2) sanitation and food handling, (3) preparation and service, and (4) sequence of service and presenting the check. Each section consists of a three-hour session which can be expanded or shortened as required. Overhead masters, handouts, and sketches of needed materials are included at the end of each section. Identifiers—\*Shoplifting

The retailers' concern about shoplifting and shoplifting losses provided impetus for the development of this programed text. The self-instructional booklet is designed for all retail employees as an aid to preventing financial losses to the store caused by shoplifting. The common characteristics of shoplifters, methods used by shoplifters, and a method of apprehending

shoplifters are examples of topics included in the text. (VA)

The decision-making game is built on a model which adheres to the economic principles of supply and demand. Game participants are faced with the task of generating profit in a simulated competitive situation. The game provides the opportunity for participants to gain a greater understanding of: (1) the relationship between income and costs and resulting profit, (2) the complexity of the buying process, and (3) the income statement. An instructor's guide, worksheets for game players, and teacher information forms are included in the manual. (VA)

Identifiers—\*Entrepreneurs

The purpose of the experimental curriculum is to give grade 11 and grade 12 students an understanding of the problems and decisions that face every businessman in starting and managing a business. Included in this manual are 15 lesson plans and a major student project. The project attempts to serve as a culminating activity for many of the topics discussed throughout the school year in distributive education classes. The project is flexible and permits the teacher-coordinator to adjust both the timetable and type of assignments to his particular purposes. The lesson plans were written so that the material could be presented in 20 minutes or less. (Author/VA)

High school distributive education retail laboratories (school stores) provide practical experiences in an actual store environment. The manual presents information to assist coordinators in creating a distributive education retail laboratory or for improving an existing operation. Sections include preparing proposals to start a school store, vendor's license and sales tax, store policies, wholesalers, store layout, equipment purchase policies, promotional ideas, and 41 pages of sample forms used in financial, appraisal, budgetary, and inventory control. The manual was developed in cooperation with distributive education coordinators at the school store workshop, Toledo, Ohio in March 1974. (MF)

Descriptors—Course Content, \*Decision Making Skills, Distributive Education, Industrial Personnel, \*Industry, \*Instructional Materials, Learning Activities, \*Salesmanship, Secondary Education, Simulation, \*Teaching Guides

In high school distributive education classes the selling function is usually interpreted as it relates to retail sales. The industrial sales representative, however, must act on his own in the field, making decisions without consultation with his superiors. As the total distributive education program grows in sophistication, there is a need to provide curriculum materials for the young person who may be interested in industrial selling. This document presents decision-making exercises developed for the advanced distributive education student who has already completed courses in basic selling and other marketing functions. The material is broken down into separate exercises or modules. Completion time for each will range from one class period to a week. Each exercise includes a decision situation, objectives and activities, pre- and post-tests, and teacher data. The teacher-coordinator may evaluate the student or discuss the exercise after the student's self-evaluation. (MF)

The problems that develop from delegation, as well as those which develop because of the lack of it, have received increasing attention in recent years. The manual presents a program based on the art of delegating authority and responsibility from a management perspective. The course is designed to help managers realize the value of delegation by understanding what and how to delegate and by identifying ways to overcome the forces working against delegation. The program can be conducted in 7 to 20 hours, depending on the background of the individuals in the program. The course was developed for the adult training level, but it can also be used for high school distributive education students and in postsecondary management training. The manual includes transparencies and a listing of films which are annotated. (VA)

Descriptors—Accident Prevention, \*Check Lists, Federal Legislation, Guidelines, High School Students, Reference Materials, Safety, \*Safety Equipment, \*School Safety, \*School Shops, Secondary Education, Standards, \*Trade and Industrial Teachers, Vocational Education Teachers

Identifiers—\*Occupational Safety and Health Act 1970

The purpose of the handbook is to assist the school shop teacher in participating in voluntary compliance with the standards and regulations of the Occupational Safety and Health Act of 1970. The first major section deals with general shop safety and how the shop teacher can use the checklist to control possible safety violations in his shop. The following chapters are of a specific nature, with checklists to meet requirements for the common areas of vocational education: machine tool, welding, woodworking, electricity, automotive, and drafting. At the conclusion of the guide, there is a section dealing with general recordkeeping and accident reporting, a time table for implementation of safety standards, and a suggested instructional reference list. The fundamental principles underlying the application of electricity to tractors and farm equipment are presented. An understanding of the material in the basic manual will enable the service man to understand better the service procedures covered in service manuals on electrical equipment. Topics dealt with are fundamentals of electricity, storage batteries, circuits, and combination motor and generator. (NJ)

Tractor Transmissions. A Teaching Reference.

American Association for Agricultural Engineering and Vocational Agriculture, Athens, Ga.; Farm and Industrial Equipment Inst., Chicago, Ill.

Report No—VT-102-062

Note—29p.; Illustrations have color keying which will not reproduce

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**—\*Agricultural Machinery, Instructional Materials, \*Manuals, \*Power Mechanics, \*Tractors, Trade and Industrial Education

**Identifiers**—Transmissions (Automotive)

The manual was developed as a reference for teaching students about transmissions in farm tractors. The manual is divided into five sections: (1) transmission history, (2) gears and bearings in transmission, (3) sliding-gear transmissions, (4) planetary gearing, and (5) glossary. The working principles of the sliding-gear transmission, the most extensively used transmission in farm tractors are described in detail. (VA)

Tractor Hydraulics. A Teaching Reference.

American Association for Vocational Instructional Materials, Athens, Ga.; Farm and Industrial Equipment Inst., Chicago, Ill.

Report No—VT-102-063

Note—48p.; Illustrations have color keying which will not reproduce

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**—\*Agricultural Machinery, Fluid Power Education, \*Hydraulics, Instructional Materials, \*Manuals, Power Mechanics, \*Tractors, Trade and Industrial Education

The manual was developed to help provide a better understanding of how and why hydraulic principles serve the purposes of weight reduction, increase of physical effort, and more precise control to machines of all types. The four components that are necessary to have a workable hydraulic system—a reservoir, a pump, a valve, and a motor (cylinder) are described in detail. Special emphasis is given to farm and industrial equipment applications. (VA)

Pub Date Mar 75

Note—117p.

Available from—New Jersey Vocational Technical Curriculum Laboratory, Building 4103 Kilmer Campus, Rutgers University, New Brunswick, New Jersey 08903 (\$3.00 plus postage)

**EDRS Price MF-\$0.76 HC-\$5.70 Plus Postage**

**Descriptors**—Course Content, \*Curriculum Guides, \*Electric Circuits, Electricity, \*Electric Motors, \*Electronic Control, Instructional Materials, Secondary Education, Vocational Education

The fundamentals of electric circuits and electric machines are presented in the text, with an emphasis on the practical operation rather than on mathematical analyses of theories involved. The material contained in the text includes the fundamentals of both D.C. and A.C. circuits together with the principles of magnetism and electro-magnetic induction, so as to provide a foundation for the understanding of the principles of electric machinery operation. Application of these fundamentals is made in the discussion of D.C. generators, D.C. motors, transformers, A.C. generators, induction motors, synchronous motors, single-phase motors, and polyphase motors. Review questions are included at the end of each lesson for evaluating student progress or for class discussion. (NJ)

**Identifiers**—Wisconsin

The purpose of the project was to plan and conduct workshops designed to upgrade the basic teaching skills of part-time vocational teachers in the Wisconsin Vocational-Technical Adult Education System. The project consisted of designating the pedagogical skills to be learned, developing an instructional booklet to be correlated with the workshop agenda, conducting four separate one-day workshops, and evaluating the impact of the workshops and materials on the teaching skills of the participants. Although the immediate response was enthusiastic, the follow up survey two months later indicated that teachers may need more time to develop basic teaching skills. The report summarizes the project, outlines the procedures utilized in developing the workshops, and presents the evaluation results. The 20-page "Improving Instructional Skills" booklet used for the teacher training workshops is appended, along with a teacher evaluation checklist, additional project-developed lesson plans, an inservice workshop procedural outline for call-staff, and project correspondence. **Descriptors**—Educational Assessment, Evaluation Criteria, Instructional Materials, \*Learning Activities, \*Performance Based Education, \*Performance Criteria, Student Evaluation, Study Guides, \*Teacher Education Curriculum, \*Vocational Education Teachers

The module, part of a vocational teacher education curriculum unit, provides instruction in the establishment of criteria for student performance in vocational education programs. Establishing these overall criteria involves determining the points in time for performance assessment, the performance objectives to be achieved, and the level of performance required at each assessment. The module contains four learning experiences, each with objectives, activities, and outcomes stated in behavioral terms. A supplementary section includes two information sheets for establishing and charting criteria for student performance, a case situation for one of the learning experiences, checklists, and a critique form for establishing student performance criteria. National Advisory Council for Career Education, Washington, D.C.

Pub Date Nov 75

Note—38p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**—\*Career Education, \*Educational Finance, \*Educational Legislation, Educational Philosophy, \*Educational Planning, Educational Policy, Educational Programs, Elementary Secondary Education, \*Federal Legislation,

Federal State Relationship, Inservice Teacher Education, Program Development, Program Evaluation, State Federal Support  
Identifiers—NACCE, \*National Advisory Council For Career Education

The report of the National Advisory Council for Career Education (NACCE) presents a design for structuring and legislatively implementing elementary and secondary career education at the national level. Part 1 of the report, recommendations for career education legislation, provides a funding schedule over a five-year period to accomplish nine major objectives: State plans for career education; statewide coordination of career education; statewide evaluation of career education; career education review for school board members, school administrators, and community leaders; inservice development of instructional personnel; inservice development of career education counselors; appointment of local career education coordinators; preparation of career education coordinators; and purchase of career education instructional materials and supplies for local schools. Part 2, statement of rationale, argues that the U.S. is ready for extending the developmental authority of the Commissioner of Education through Federal legislation to further integrate career concepts into the mainstream of American education. Furthermore, it proposes the adoption of new Federal legislation designed to assist the States in implementing career education. Part 3, membership and activities of the Council, lists Council members and commissioned papers, and describes the Council's organizational activities, structure, meetings, and various committees. Drug Involvement and Academic Striving.  
Pub Date [73]

Note—9p.; Hard copy not available due to marginal legibility of original document  
EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.

Descriptors—\*Academic Achievement, Academic Aptitude, College Students, \*Drug Abuse, Grade Point Average, \*Motivation, \*Performance Factors, Research Projects, \*Sex Differences, Speeches, Surveys

Identifiers—\*College Behavior Questionnaire

This study attempted to clarify the relationship between drug involvement and academic accomplishments. Unlike other studies, it was controlled for aptitude and sex. In a structured interview, the College Behavior Questionnaire (CBQ) was administered to 77 male and 67 female student subjects. Based on the CBQ results three groups were identified: 26 male and 22 female nonusers of drugs (NU), 30 female and 29 male moderate users (MU), and 15 female and 22 male heavy users (HU). The cumulative grade point average (GPA) of the Ss was the measure of academic achievement. An estimate of each S's degree of satisfaction with his academic performance was obtained. An analysis of variance on the data indicated that only HU males scored significantly lower than NU males. These results suggest that while HU females might benefit from appropriate counseling, disinterest of HU males in academic performance might be responsible for their lower GPA scores. (SE)

Document Not Available from EDRS

Descriptors—\*Adoption, Children, \*Foreign Countries, Foster Children, \*Foster Homes, Interviews, \*Parent Child Relationship, \*Placement, Surveys  
Identifiers—\*Denmark

In this publication a number of conditions which may act as hindrances to extended use of foster care are elucidated. By means of interviews information has been collected from child welfare committees, institutions, and foster home societies, including information about their attitudes to foster home care versus institutional care, their practice and experience of placement in care, cooperation among themselves and their cooperation with parents and foster parents. In addition parents have been interviewed about their attitudes toward foster care and institutional care as well as their relationship with the child and foster parents and with the authorities responsible for the placement. As far as the foster parents are concerned, it has been attempted to elucidate their motives for receiving a child into care, their experience as to the progress of the fostering situation, their relations to parents, and their cooperation with the placing authorities. Among other things the investigation has shown that the fostering situations dealt with here have progressed comparatively problem-free, and that few have been failures. The child's adaptation to the foster home is as a rule extremely good, and strife and conflict between parents and foster parents are infrequent. (Author)

Descriptors—\*Career Planning, Employment Patterns, \*Interest Tests, Occupational Choice, \*Sex Stereotypes, \*Socialization, Test Validity, \*Vocational Counseling, Vocational Development, \*Vocational Interests

Methods for reporting vocational interests which do and do not reflect sex-role stereotypes are examined. Interest inventory validation procedures based on the prediction of occupational preference and group membership are shown to favor inventories providing scores that reflect past sex-role stereotypes and current employment inequities. Reporting and validation procedures minimizing these shortcomings are suggested. These procedures, which are supported by past practice and recent research, result in similar distributions of career options for men and women. Finally, career counseling problems arising from the confounding of reports of human interests with current employment realities are discussed. (Author)

Twiname, John D. And Others  
Using Title XX to Serve Children and Youth.

Child Welfare League of America, Inc., New York, N.Y.

Spans Agency—Children's Bureau (DHEW), Washington, D.C.

Pub Date 75

Note—82p.

EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage

Descriptors—\*Child Advocacy, \*Child Welfare, \*Federal Programs, Health Services, Manuals, \*Self Help Programs, \*Social Services, Social Welfare, State Federal Aid

Identifiers—\*Social Security Act Title XX

With the passage in early 1975 of the social service amendments to the Social Security Act, referred to as Title XX, a major new opportunity to serve children and youth has emerged. Seizing the opportunity will be largely dependent on the well-prepared presentation of a case for the needs of young people by dedicated advocates in every state. Title XX fosters a decentralized program of Federally supported services as set forth in a Comprehensive Annual Services Program (CASP) Plan published by each governor, and prepared and administered by the designated Title XX agency in each state. In addition, the law encourages very active participation by private organizations, agencies, and individual citizens in the development of the plan and, by contract, in the provisions of the services planned. This manual is designed to help advocates for children and youth understand the opportunities in Title XX and prepare for effective participation in the state planning process. The manual is organized as follows: Section 2 describes the background and philosophy of Title XX; Section 3 outlines the operating requirements of the new law; Section 4 describes the planning requirements in Title XX along with detailed examples of how Title XX can be used to fund children and youth-oriented services programs; and Section 5 suggests some "next steps" for state or local action. Available from—Educational Testing Service, Princeton, New Jersey 08540 (no charge)

Document Not Available from EDRS

Descriptors—Career Awareness, \*Career Planning, \*Computer Oriented Programs, \*Decision Making Skills, Guidance Counseling, \*Guidance Programs, Junior Colleges, \*Occupational Information, Program Descriptions, Vocational Counseling

Identifiers—\*Computer Assisted Counseling

This pamphlet describes SIGI, a computer-based System of Interactive Guidance and Information designed to help students in community and junior colleges make career decisions. SIGI is based on a humanistic philosophy, a theory of guidance that emphasizes individual values, a vast store of occupational data, and a strategy for processing information. The system is designed so that students who are at different stages in career decision-making may use SIGI in distinctive ways. The main purposes of SIGI are to increase students' freedom of choice, to develop their understanding of the elements involved in choice, and to improve their competence in the process of making informed and rational career decisions. Descriptors—\*Adjustment Problems, Counseling Goals, \*Emotional Adjustment, \*Group Counseling, \*Personal Adjustment, Program Descriptions, \*Social Adjustment, Workshops

Identifiers—\*Divorce

Although divorce is pervasive on the societal level, it can be an exceedingly difficult time of adjustment on an individual level. One therapeutic method for facilitating "growth" in divorce is a group experience entitled "Divorce Adjustment Groups." The goals of this group are to: (1) help

individuals regain emotional autonomy; (2) mitigate the debilitating aspects of divorce; (3) have a place to safely discharge some of the emotionality of divorce; (4) develop a broader concept of divorce; (5) meet new friends in a meaningful way; and (6) learn coping mechanisms that transfer into dealing with other losses. This paper also discusses the need for, the unique dimensions of, and the process of conducting the group. (RWP)

Descriptors—Child Rearing, \*Family Life, \*Family Structure, Mental Health, Permissive Environment, \*Role Conflict, \*Social Change, State of the Art Reviews, \*Values

Identifiers—\*Nuclear Family

The nuclear family as a vital support system is being undermined by a wide variety of direct and indirect factors. These factors include rapid technological advances, changes in socially accepted child-rearing techniques, changes in moral values, changes in acceptable sexual practices, effects of an improved educational system, effects of the Women's Liberation Movement, and the effects of role-goal conflict. Several programs have been developed to support and strengthen the nuclear family, and their success suggests directions for other similar preventive programs. (Author/SL)

Identifiers—\*China

This paper describes a 21-day visit to the People's Republic of China made by the author and 20 other Americans in August, 1973. The overall focus is on the role of the individual in the development of contemporary China and the attempts to integrate individual and collective goals. The process of socialization in China is examined through a description of the society's major institutions, the role of women, the concepts of work and career, and the integration of theory and practice in education. The political consciousness-raising processes in the society are examined along with recent trends in physical and mental health care, urbanization and industrialization, and marriage and family planning. Will There Be Time for Dreams?

Pub Date 6 Nov 74

Note—16p.; Paper presented at the National Adult Education Conference (Bal Harbor, Florida, November 6, 1974)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Adult Education, Educational Needs, \*Educational Trends, \*Futures (of Society), Higher Education, \*Leisure Time, Speeches, State of the Art Reviews, Work Attitudes

Changing concepts of work and leisure influence each other and are presenting education with a new complex of demands. The arbitrary divisions of a life into periods of education, work and leisure impose related problems, both on institutions charged with preparation and certification and on the individual who meets these divisions with growing skepticism. The job of continuing education is to bring to bear a new perspective on the interrelationships of learning, work and leisure. It must search out more posi-

tive concepts of adulthood and better links with industry and community. It must help to articulate and meet the rising need for a wide variety of adult educational experiences. (Author)

This project was designed to use group process techniques in meeting the career development needs of girls and in dealing with the limiting aspects of female stereotyping. The project consisted of 10 one-hours sessions. The objectives were to give high-school girls an opportunity to get to know themselves better, develop an understanding of the limitations of sex-stereotyping, acquire better decision-making skills and appreciate the need for career planning and information. Basic tenets behind the project were: (1) career development is a process not an event; (2) career development is a personal event of great importance—developing an understanding of that unique event was a component of the project; (3) career development is essentially a socially-bound process—the limiting aspects of female stereotyping, the occupational person concept, and the role of personal values were topics; (4) young people experience a great deal of anxiety in connection with career choice but still spend little time in career planning; (5) change is the dynamic condition under which career decisions are being made, thus decision-making skills received special attention; (6) the essence of career development is experience, so role-playing, simulations and gaming were the primary techniques used in the project. Socialization Theory: Where Do We Go from Here?

Pub Date [Apr 75]

Note—27p.; Paper presented at the Annual Conference of the Western Psychological Association (55th, Sacramento, California, April 24-27, 1975)

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Behavior Theories, \*Child Development, Interpersonal Competence, Psychology, \*Social Development, \*Social Exchange Theory, \*Socialization, State of the Art Reviews

This paper assesses certain aspects of current socialization theory, arguing that there are two major developments in the field of psychology as a whole which need to be more fully assimilated in the work on socialization. The first is the attack on trait theory, and it is argued that socialization research can survive this attack only if it becomes more concerned with structural developmental change in its dependent variables. Second, the impact of the "cognitive revolution" is assessed, and the paper argues that more attention must be given to the ways in which children process inputs from socialization agents, and developmental changes in processing capacities. Finally, it is urged that research attention must be focused on the conditions which sustain the effective performance of socialization agents. (Author)

The Relationship of Teacher Affective Behavior to Pupil Affective Behavior.

Spans Agency—Office of Education (DHEW), Washington, D.C.

Pub Date 26 Mar 75

Note—17p.; Paper presented at the Annual Convention of the American Personnel and Guidance Association (31st, New York, New York, March 23-26, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
**Descriptors—**\*Affective Behavior, \*Behavior Change, Counselor Role, Elementary Education, \*Guidance Services, Peer Acceptance, Research Projects, Self Concept, \*Student Teacher Relationship, \*Teacher Behavior

The study investigated the relationship of teacher affective behavior changes to pupil affective behavior changes in the presence of elementary school guidance services for both populations. Specifically, the study asked: Is teacher change in Intimacy and Esprit related to pupil change in Self Perception and Peer Acceptance? Activities were designed to: (1) provide children with counseling opportunities, individual and group; and (2) provide teachers with consulting activities which included classroom video-taping, private and group focused video-tape feedback sessions, and discussions of classroom management techniques. Analyses of covariance yielded significantly higher Self Perceptions scores among pupils whose teachers' Esprit and Intimacy scores evidenced the greatest change, and Peer Acceptance scores among pupils whose teachers made the greatest gains in Esprit. Additionally, correlated t-tests indicated no significant gains in either Esprit or Intimacy for teachers. On the other hand, significant gains were observed for pupil Peer Acceptance scores. It should be noted that significant decreases were observed for all but one factor of the Self Perceptions Index. It was concluded that positive changes in teacher affective behaviors were associated with positive changes in pupil affective behaviors. Further, the findings suggested that comprehensive guidance services have the potential for influencing such behavior changes. (Author)

**The Interaction of Extraversion, Neuroticism, and Audience Presence in the Performance of a Choice Reaction Time Task.**

Pub Date May 74

Note—52p.; Master's thesis, Northeastern State University

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**  
**Descriptors—**Analysis of Variance, \*Audiences, \*Behavior Patterns, Comparative Analysis, Females, Interaction Process Analysis, \*Observation, \*Performance Factors, \*Psychological Patterns, Research Projects

Ninety-six female introductory psychology students differing in terms of the dimensions of neuroticism-stability and introversion-extraversion performed two sets of thirty trials each on a choice reaction time task. On one of the sets of trials the Ss were observed by two female observers and on the other set of trials the observers were not present. The order of observer presence was counterbalanced in each of the four groups (neurotic introverts, neurotic extraverts, stable introverts and stable extraverts) of 23 Ss. The mean reaction time score of each S under the audience and the no audience conditions was analyzed using a 2 (neuroticism-stability) x 2 (extraversion-introversion) x 2 (order of audience conditions) mixed analysis of variance. The Extraversion x Neuroticism x Audience condition interaction was found to be significant at the .005 level of confidence. This interaction indicated the presence of observers inhibited the performance of neurotic introverts and facilitated the performance of stable extraverts. The Extraversion x Order x Audience condition interaction was found to be significant at the .001 level of con-

fidence. This interaction indicated that the presence of others facilitated the performance of extraverts only if the audience condition preceded the no audience condition. (Author)

**Descriptors—**\*Accreditation (Institutions), Counseling, \*Counselor Training, \*Curriculum Evaluation, Higher Education, Participant Satisfaction, \*Program Evaluation, \*Rehabilitation Counseling, Research Projects, Speeches, Surveys

In accordance with the goals of the Rehabilitation Counselor Education (RCE) accreditation movement, the Council On Rehabilitation Education (CORE) contracted the research aspects of the accreditation project to the University of Wisconsin-Regional Rehabilitation Research Institute to develop a series of data gathering instruments to assess, objectively, the RCE programs that seek accreditation. These instruments included graduate and student questionnaires that were developed to evaluate important input, process and outcome variables. This paper is concerned with the results of these two respondent groups. Results indicate that students and graduates appear most satisfied with the clinical practicum experience and least satisfied with the inability of the curriculum to allow for specialization within the profession (administration, etc.). Opinions of graduates and current students were very similar, and the study clearly indicates that what students perceive as strengths and weaknesses in their training programs does not change once they leave school. **Descriptors—**\*Armed Forces, \*Changing Attitudes, Cross Cultural Training, \*Cultural Awareness, Educational Programs, Military Personnel, \*Program Effectiveness, \*Program Evaluation, Research Projects

Relatively little data exist concerning the effectiveness of Navy intercultural relations (ICR) training programs. In addition, much training research in this area is characterized by methodological and design inadequacies. The

purposes of this study were to design and test a methodological model, and to provide an objective assessment of ICR training impact. It was found that training had a modest but significant effect upon the attitudes of Overseas Duty Training (ODT)/Personnel Exchange Program (PEP) and Human Resource Development Center (HRDC) IDR Personnel. ODT/PEP personnel changed significantly on 13 of 24 scales and HRDC personnel on 9 of 24 scales. Scales measured self-actualization, flexibility, tolerance of ambiguity, acceptance of self and others, leadership styles, and basic motivational patterns. The failure to detect a greater degree of change may have been due to various test ceiling effects or to the nature of the change process itself. Although the real test of program impact necessitates validation against external or in-country criteria, the results did indicate that the impact of ICR training, although modest, was consistent with the hypotheses generated for the evaluation of the training objectives of the program. This French-language guide, based on an English language version, provides day-by-day activities to be implemented in the classroom and the guidance office, specifically to develop leadership in both French-speaking students and teachers. The course is intended to provide life skill training, in French, for French-speaking students. Leadership is analyzed on five dimensions: (1) stimulus, (2) response, (3) research, (4) application, and (5) evaluation. Evaluation is approached in several ways: (1) as a personal judgment; (2) as quantitative measurement; (3) as the efficient executing of performance objectives; and (4) as a continuously evolving process. A problem solving self inventory with suggestions for application in a wide variety of situations is included. (Author/JS)

**Descriptors—**\*Attitudes, \*College Students, \*Drug Education, Health Education, Higher Education, Investigations, \*Research Methodology, Semantic Differential, \*Student Attitudes, Surveys, Tables (Data)

This investigation relates to the research questions: (1) Do college students' perceptions of the dangerousness of specific drugs now parallel the government's listed ranking? (2) Where do legal drugs fall on the continuum of perceived dangerousness? (3) What might be good dimensions to characterize perceptions? (4) What is the relationship among these dimensions? and (5) How might a college drug education course change these perceptions? A questionnaire concerning perceptions of drug usage was administered to two undergraduate drug education classes on a pre-post course basis. Data is presented in numerical tables and graphs along the dimensions of usage, dangerousness, pleasantness, and strength. There were no statistically detectable changes in sources as a result of drug education courses; however the authors discuss the interpretation of the chosen dimensions as having posed discriminating problems for respondents. Descriptors—\*Civil Liberties, Confidentiality, \*Counseling, Counselor Evaluation, Counselor Functions, Educational Responsibility, \*Interpersonal Relationship, \*Responsibility, Speeches, \*Student Rights

Prefaced with citations of the enactment of student rights, this paper outlines the results of a questionnaire dealing with client rights and responsibilities. The right mentioned by the majority of respondents is confidentiality. A Bill of Client Rights and Responsibilities is derived from the survey and presented in three categories: (1) determining if, with whom, and for how long the relationship is to exist; (2) creating a demystified and mutual relationship; and (3) developing quality-control measures, involving client evaluation of counseling outcomes. The author suggests that, as counselors and clients establish the rights within the relationship, they naturally become more responsible to each other, and this responsibility carries over into other relationships. Descriptors—\*Affective Behavior, Behavioral Science Research, Experimental Groups, \*Group Dynamics, \*Methods Research, Research Problems, \*T Groups Identifiers—\*Induced Affect

The purpose of this study was to determine the efficacy of induced affect as a pregroup training experience for coping with stress related to participation in an encounter group. Twenty-six subjects who volunteered to participate in an encounter group randomly were assigned to three treatment groups: Induced Affect Training plus the Encounter Group, Induced Affect Training only and, Encounter Group only. The hypothesis that (a) group participants who did not receive the Induced Affect Pregroup Training would demonstrate significant increases on the Neuroticism Scale of the Eysenck Personality Inventory and (b) group members who did receive such training would not manifest such increases were supported. The implications of using the techniques of induced affect as a pretraining experience are discussed. (Author)

This booklet is part of a series most of which focus on empirical research findings and major theoretical approaches in the area of drug usage. In this volume, the author has compiled a group of English-language short stories and novels which deal with the use of mind-altering drugs, all written since 1900 and falling within the literary category of science fiction. (Not included are stories dealing with drugs whose effects are primarily on the body rather than the mind—immortality serums, for example.) The majority of the stories included in the study date from the post-1965 period, when the wide use of drugs first pervaded the national life. Included is an overview of drug themes in science fiction and an annotated bibliography of 75 novels. (Author/HMV)

This essay is a survey of selected literary works of fiction with drug-related thematic content. The themes represented in the survey reflect popular American attitudes toward drugs from pre-World War II through the 1970's. The roots of these themes, beginning with 17th century French cultural attitudes are explained. The subject has been treated broadly; there is no attempt to analyze literary characters who used drugs (for example, Sherlock Holmes), nor to consider the effect of drugs on the creativity of any authors who may have used drugs. An annotated bibliography of 41 novels is included. (Author)

**Descriptors**—\*College Attendance, \*Counseling Services, \*Dropout Prevention, Educational Finance, Educational Guidance, Higher Education, Speeches, \*Student Enrollment, \*Student Personnel Programs

This paper discusses the student attrition rate, particularly that of freshmen, in economic terms—loss of students means loss of revenue (tuition) and maintains that, with proper planning colleges could retain an additional 10 percent of freshmen students who drop out. The authors contend that many college freshmen are confused by an overabundance of counseling programs and that, not only are these duplicated programs expensive to operate they often provide the student with conflicting information. Specific suggestions are of-

fered for student retention. The authors conclude that communication, cooperation, consolidation and coordination are the keys to a successful and less confusing counseling program. (HMV)

The Canadian Classification and Dictionary of Occupations (CCDO) has been designed for use in manpower research and analysis, conducting surveys, census taking and compilation, planning of educational and training programs, counseling and placement services, rehabilitation, immigration and mobility of workers, and personnel and other operations in business and industry. The basic principle of classification in the CCDO is that of the kind of work performed, but to clarify further the nature of the occupation, other factors are taken into account, such as materials or equipment used or produced, standards met, education or training required, working environment, services rendered, and relationship to other workers. The two-volume set also provides data regarding physical activities, training requirements, worker functions in relation to Data-People-Things, and alternate and related titles where applicable. **An Affective-Perception Psychology of Adolescent Reading Failure.**

Pub Date Jul 74

Note—193p.; Ph.D. Thesis, Walden University

**EDRS Price MF-\$0.76 HC-\$9.51 Plus Postage**

**Descriptors**—Adolescents, \*Interaction Process Analysis, \*Perception, \*Psychological Patterns, Reading Difficulty, \*Reading Failure, Research Projects, Secondary Education, \*Social Exchange Theory

The purpose of this study was to frame the outlines of an interpersonal theory derived from exploratory research among adolescent reading failures. The theory postulates that adolescent reading failure syndrome results from and is maintained by conscious elements of choice manifested in the adolescent's perception preferences. The affective readiness for failure in reading tasks is, therefore, a deeply seated psychological generator of the reading failure disturbance showing extreme resistance to modification through traditional remedial reading school practices, but worthy of as vigorous an exploration as has been undertaken into the more familiar cognitive parameters of successful reading performance. The subjects, 180 seventh, eighth, ninth, and tenth grade Black male students, were evaluated through personal interviews, questionnaires, and observation over an 80-week period by the researcher. Results indicate that adolescent reading failure is accompanied by perception preferences for retreat into one of three views of the world depending upon the interpersonal and intrapersonal pressures of the moment. Such preferences are characterized by: (1) unsocialized aggression, reflecting overt and covert hostile disobedience, quarrelsomeness, physical and verbal aggressiveness, vengefulness, and destructiveness; (2) social approval anxiety, reflecting continuous anxiety, unrealistic fears, immaturity, self-consciousness, inhibition and frustration; or (3) unsocialized withdrawal, reflecting seclusiveness, detachment, sensitivity, shyness, and a flagging desire to form close personal relationships. **Descriptors**—Annotated Bibliographies, \*Behavioral Science Research, \*Behavior Patterns, Bibliographies, Females, Males, \*Sex Differences, \*Sex Role, \*Social Environment

The National Institute of Mental Health recognizes the need for careful research investigations into the influences of sex roles on individual behavior and on societal institutions. During 1973 and 1974 the Institute held a series of research workshops to identify and encourage needed studies on sex roles, their biological and social bases, and their consequences for behavior and society. This research bibliography is one result of those workshops. The bibliography covers literature originating in investigations published both here and abroad, and is directed toward social and behavioral scientists. (Author)

**Descriptors**—\*Career Education, \*Course Evaluation, \*Course Objectives, \*Guidance Programs, Intermediate Grades, Research Projects, Secondary Education, Summative Evaluation, \*Vocational Development

This report summarizes a course evaluation for an intermediate career education course. Objectives of the course were: (1) perceptualization: self- and environmental orientations; (2) conceptualization: directional choice and adaptive behavior; and (3) generalization: accommodation, satisfaction and mastery. The primary basis for the evaluation was the students' achievement on an extensive course test which is appended. The course pretest was administered to 734 students; the post-test to 611 students. The tests were then scored, item analyzed, and statistically summarized. Results indicate significant knowledge improvement related to taking the course. (Author/HMV)

**EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.**

**Descriptors**—\*Career Planning, \*College Graduates, Comparative Analysis, \*Decision Making, Graduate Surveys, Higher Education, \*Occupational Aspiration, \*Vocational Maturity

This study compared 127 vocationally undecided college graduates matched by sex, age, and major with graduates who had selected an occupation on a Survey of Graduating Seniors. Undecideds had a significantly lower GPA than decideds, intended noncareer activities following graduation, less often were going to graduate school, and were far less satisfied with their university experience. Increases in indecisiveness in high school and college might be countered either through vocational counseling geared more to graduates' academic achievement or through facilitating a nonvocational orientation toward college. The Santa Clara County Pre-Delinquent Diversion Program is an attempt to develop and coordinate community based alternatives to the juvenile justice system. The concept of diversion is implemented at the police level by 12 law enforcement jurisdictions, each of which has shaped a distinctive approach to the problem in consonance with the nature of both their police force and community. The objectives of the program were to reduce welfare and institutions (Code Section 601) referrals to the Santa Clara County Juvenile Probation Department by 66 percent during fiscal year 1972-73, and to create expanded and improved services appropriate to the needs of those juveniles diverted within the 12 participating law enforcement jurisdictions. A third objective was to demonstrate, test, and evaluate the pre-delinquent diversion program model. (Author)

Identifiers—\*Hallucinogens

This report is the third of three monographs to provide perspectives on the use, distribution, and control of illicit drugs. The first, conducted in 1971, described the prevalence, use patterns, sources, distribution, and economics of the marijuana market. The second (1972) estimated the cost, benefits, and potential of approaches to narcotic addiction control. The present study compares legitimate production with retail sales to estimate the amount of diversion. Surveys of medical and other usage are compared with retail sales and the estimate of the overall illicit market. The sources, distribution and economics of the illicit market are described with the expected impact of the recently imposed amphetamine quotas. The hallucinogen section is organized in the same format as the previous marijuana report. Appendixes provide further details on the subject and an analysis of the frequency and content of drug related material published in the underground press. (Author)

In 1972, OE sought a means whereby communities might be helped to mobilize their own financial and human resources to respond effectively to their own drug problems and perhaps provide mutual help to one another. The search for a feasible strategy led to the establishment of the Help Communities Help Themselves (HCHT) Program. The principal purpose of this evaluation was to determine the effectiveness of the HCHT Training Program, where effectiveness was to be measured in terms of activity levels produced by the training process. The major dependent variables were defined. (Author)

Identifiers—HCHT, \*Help Communities Help Themselves

The general objective of the study was to provide useful information regarding the effectiveness of various components of the HCHT program. GRC field teams spent two weeks (a full training cycle) at each of the two centers, observing the training processes. Pre-training and post-training questionnaires were administered to trainees at each center. Concurrently, other field team members traveled to the local communities of teams trained six to nine months before (CT, or Comparison Trained teams) and to the communities of teams who were rejected for training a year ago (CR, or Comparison Rejected teams) and administered similar questionnaires to determine how well these trained teams actually operated back home in their communities. Comparisons were made between the pre- and post-training test responses (short-term impact) and the trained (CT) and rejected (CR) team test responses (Long-term impact). (Author)

Identifiers—\*Drinking Drivers

The underlying theme of virtually all of the literature under review can be simply stated: If we are to achieve positive results in combating abusive drinking and its ramifications, we must revamp our thinking on the subject of alcohol and human behavior, discarding stereotypes and negative approaches. Effectively, communicating the basics of alcohol abuse to the professional and the public remains an urgent identification need. No effective prevention panacea has been found to reduce alcohol abuse. The crux of the issue is coordinating and properly implementing existing laws and provisions to deter further abuse of alcohol in the driving situation. Increased attention is being paid to the problem of alcohol abuse and loss of productivity. But, business, industry, government and the military are a long way from accepting the fact that it is a problem that can be effectively dealt with by them, and that sound program is in fact a cost-saving tool of paramount significance. The drinking-driving problem has received much attention, but satisfying results have been lacking. The fundamental hurdle to be overcome is convincing the American public of the dangers involved in drinking and driving. (Author)

Empathy and Stereotype Accuracy of Rehabilitation Counselors as Related to Education and Experience.

Spons Agency—Social and Rehabilitation Service (DHEW), Washington, D.C.

Pub Date [75]

Note—12p.; Paper presented at the Annual Convention of the American Personnel and Guidance Association (31st, New York, New York, March 23-26, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Behavior Patterns, \*Counselor Attitudes, Counselor Characteristics, \*Empathy, \*Prediction, \*Rehabilitation Counseling, Research Projects, \*Work Experience

Empathy and stereotype accuracy of rehabilitation counselors attempting to predict client responses on a problem inventory were studied. Results showed that all subject groups, pre-counselor through experienced counselor, with and without master's degrees, were able to make empathic and stereotype predictions at a level significantly better than chance, although relative accuracy was not demonstrated to increase significantly and directly as a function of either education or experience. Graduate counseling students were more accurate than either non-graduate students or novice counselors. As counselors became more experienced, their understanding of problems typically experienced by clients with certain disabilities improved, but their ability to be sensitive to the problems reported by specific clients decreased. As counselors gained experience, they tended increasingly to perceive their clients as some stereotyped "typical" client. (Author)

Identifiers—\*Sweden

After a short introductory discussion, the results are presented from a series of mapping studies in which headmasters, supervisory teachers, student teachers and different teacher and student groups have expressed their views on co-influence in the school—how they experience the situation today and how they would like the influence to be divided in the future. Assessments are reported from teachers and students both at ordinary schools and at more progressive schools. The results indicate a generally positive attitude towards increased student influence, but also reveal several specific problems that emerge when this attitude is expressed in more concrete terms. Descriptors—\*Academic Achievement, \*Correlation, \*Grade Point Average, \*Military Schools, Multiple Regression Analysis, Performance Factors, \*Prediction

This study used linear models developed by stepwise multiple regression to examine the relationship between performance at the United States Air Force Academy Preparatory School and subsequent grade point average (GPA) at the USAF Academy. Data collected on Prep School graduates in the Academy classes of '71 through '77 who had completed at least their first year at the Academy provided potentially significant quantitative factors for predicting Academy GPA. The proposed Prep School percentage grading method appears promising with regard to its ability to predict Academy GPA. (Author)

Pub Date 75

Note—24p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Achievement, Behavioral Science Research, \*Failure Factors, Locus of Control, Motivation, \*Psychological Patterns, \*Research, \*Success Factors

Identifiers—\*Attribution Theory

This report presents the results of two experimental studies undertaken to investigate some of the differences in success and failure attributions made by actors and observers in an achievement situation. Causal attributions of a person actually experiencing a success or failure (the actor) and someone who read about the situation (the observer) were compared. Both sets of subjects were volunteers drawn from college introductory psychology and geology classes. Actors were found to be relatively more likely to perceive their outcomes as caused by external factors (task difficulty and luck), while observers attributed these outcomes more to internal factors (effort). Attributions for both actors and observers were also strongly affected by whether the outcome was a success or failure. Hypotheses concerning sex differences in attributions were only weakly supported. (Author)

Note—43p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—\*College Bound Students, \*Communication Problems, \*Generation Gap, High School Students, \*Parent Child Relationship, \*Social Values, \*Student Opinion, Surveys

This report details the results of a study undertaken to poll high school student opinion on the "Generation Gap." A panel was randomly selected from students in college preparatory courses, in metropolitan areas located in the four main geographical regions of the United States. Replies to the questions were received from 251 students, in 53 schools, in 12 cities. Two open-ended questions asked the students to report the views that prevail among their friends and classmates as to (1) the main things adults do or say or fail to understand, that bother teenagers, and (2) the main things young people do or don't do that make things worse. The results of the study are reported as patterning of opinions rather than as exact count. The opinion patterns are complemented by numerous examples of student response. (Author/SJL)

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

Descriptors—\*Attitudes, Changing Attitudes, \*Drug Education, \*Group Instruction, Information Dissemination, \*Lecture, Military Personnel, Research Projects, \*Teaching Methods

The purpose of this research was to assess the relative effectiveness in changing attitudes of (a) a lecture method versus a discussion method of presenting drug information, and (b) large groups versus small groups as recipients of drug education efforts. A total of 475 basic trainees at Fort Knox, Kentucky were given a drug attitude and information questionnaire during the early part of "fill week" in their basic training, before they had received any Army training related to drugs. Four days later, the trainees were given a one-hour drug presentation, followed by another administration of the drug attitude and information

questionnaire. The method of presentation was either lecture, structured discussion, or unstructured discussion; group size ranged from five to forty-five trainees. The lecture was objective about drug users, stressed physical and psychological needs rather than drug "facts," and could be used in topical outline form to guide the discussion groups. Thirty-six trainees formed a control group. Neither group size nor method of presentation had a statistically significant effect upon attitude change. This report will be of interest to those concerned with drug education and attitude change. (Author)

Descriptors—Armed Forces, \*Drug Abuse, Information Seeking, \*Measurement Techniques, \*Questionnaires, \*Research Methodology, Research Projects, Sampling, \*Surveys

This report is a product of research conducted under a program exploring improved methods of acquiring data on sensitive topics, such as the scope and intensity of current social problems. In this case, the problem studied was drug abuse in the Army. A mail survey dealing with illicit drug use was conducted, comparing the data acquisition effectiveness of the Randomized Inquiry (RI) technique and a conventional-type questionnaire. The respondents were four stratified random samples, of approximately 500 men each, drawn from the U.S. Army, Continental United States. Variables studied were (a) method used in questionnaire (RI vs. conventional), (b) rank of respondent (officers vs. enlisted men), and (c) effect of advance notice on return rate. Five sensitive questions were developed to get information of the respondents' use of five drugs. Conventional questionnaires yielded more response than questionnaires employing the RI technique; drug usage rates reported were not significantly different under the two techniques. The questionnaire return rate proved to be higher for officers than for enlisted men, particularly when they received advance notice of the survey. Since the research performed for this project is primarily methodological, this report is of interest especially to personnel in the fields of operations research, data acquisition, management, and program planning. The Prevalence of Drug Abuse in the Army: A Comparison of Urinalysis and Survey Rates. Technical Report 75-17.

Human Resources Research Organization, Alexandria, Va.

Spons Agency—Army Research Inst. for the Behavioral and Social Sciences, Arlington, Va.

Report No—HumRRO-TR-75-17

Pub Date Jun 75

Note—77p.

EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage

Descriptors—\*Armed Forces, \*Comparative Analysis, \*Data Collection, \*Drug Abuse, Questionnaires, \*Research Methodology, Research Projects, Surveys

This report describes part of the research conducted under Work Unit MODE, which examined methodological approaches in acquiring valid research data pertinent to critical social problems. It describes a study in which rates of nontherapeutic drug use obtained by a random urine screening program among Army personnel were compared with rates obtained by an anonymous self-report questionnaire. Procedural methodology in the urinalysis program was also examined. Questionnaire administration and urinalysis testing were conducted during the spring of 1973 on a sample of over 1,000 personnel assigned to five posts. The questionnaire was an inventory of drugs on which the subject indicated frequency of use during the previous three days. The field testing procedures in the urinalysis program were examined to determine

variations in administration and to identify problems which could enable drug users to evade detection. As predicted, there was a discrepancy between the self-report rate of drug use and that found in urinalysis, with the self-report rate being much higher. Individual company commanders were particularly instrumental in determining the effectiveness of the urinalysis program. (Author)

New Counselor Strategies--Implementing Learning Disability Programs.

Pub Date Mar 75

Note—23p.; Paper presented at the Annual Convention of the American Personnel and Guidance Association (31st, New York, New York, March 23-26, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Change Agents, \*Counselor Functions, Counselor Role, Elementary School Students, \*Learning Disabilities, Program Descriptions, \*Program Development, \*Remedial Instruction, Speeches, \*Teacher Role, Teamwork

The authors offer remedial techniques which might help counselors to deal with children with learning disabilities. Ninety-five percent of children with learning disabilities suffer difficulties in the visual and auditory modalities. Children with visual problems may experience difficulties in visual discrimination, visual-motor coordination and visual memory. In the auditory modality, a child may suffer from difficulties in auditory discrimination and auditory memory. The authors describe several remedial techniques to treat each of the mentioned learning disabilities, adopting a team approach to the problem. Before a child is treated, an effort is made to determine the specific nature and degree of his impairment. The latter is accomplished by the administration of achievement, and other appropriate visual and auditory tests as well as by the completion of a questionnaire by the teacher describing the details of the problem. Afterwards, the teacher, the counselor, the reading specialist and other specialists consult together and prepare a detailed program for remedying the specific difficulty faced. The program is carried out in a special room called the "resource room." Periodically, similar consultations are held to assess the progress made and to plan new approaches, if necessary. Changing Roles for Women: Implications for Marriage Counselors.

Pub Date Oct 74

Note—18p.; Revised version of paper presented at Joint Annual Meeting of the National Council of Family Relations and American Association of Marriage and Family Counselors (St. Louis, Missouri, October 22-26, 1974)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Changing Attitudes, \*Females, \*Marriage Counseling, \*Role Theory, \*Sex Role, Social Attitudes, Social Work, State of the Art Reviews

The author contends that marriage counselors must be aware of the changing roles for women and the implications those changes have for contemporary marriage counselors. He presents an historical overview of the American woman's place in society, followed by a review of her status today. He also examines women's place in the social and helping professions, and elaborates some of the implications these changing roles have for today's marriage counselors. (Author/HMV)

Initiation and Implementation of Outreach Programs. Student Development Staff Papers, Volume V, Number 2, 1974-75.

Colorado State Univ., Ft. Collins. Univ. Counseling Center.

Pub Date [74]

Note—61p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—\*Counseling Centers, \*Counseling Programs, Higher Education, \*Models, \*Outreach Programs, Program Descriptions, Program Development, Student Development, \*Student Personnel Programs

This paper describes a five-stage process for the development, implementation, and evaluation

of counseling outreach programs. Stage I takes the reader from the formulation of a germinal program idea through the procedures of assessing need for the program, assessing of agency resources, building a program planning team, and conducting a thorough literature search. Stage II sequentially outlines how to specify and enumerate behavioral goals for the program, how to develop its delivery system, how to design evaluation procedures and what to prepare for running the pilot program. Stage III emphasizes the importance of effective program publicity, the necessity of developing staff training methods, some notes on actually conducting the pilot program and ends with a discussion of the importance of studying the pilot evaluation results before deciding to embark on Stage IV. Stage IV consists of offering the program on a regular basis with refinement of training and evaluation methodologies. Finally, Stage V includes the periodic re-examination of the program in relation to its target, purpose, method and changing agency needs. (Author)

Survey of Selected Personnel Functions, May 1975.

Seattle Public Schools, Wash. Personnel Dept.

Pub Date May 75

Note—15p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Elementary Secondary Education, Personnel Directors, \*Personnel Policy, Research Projects, \*Responsibility, \*Role Theory, \*School Personnel, \*School Surveys Identifiers—\*Washington (Seattle)

Twenty western and northern districts, 10 larger and 10 smaller than Seattle, were surveyed to determine the degree of responsibility of the Personnel Departments in selected functions in the following areas: (1) Certificated Staff, (2) Classified Staff, (3) Records and Payroll, (4) Salary Administration, and (5) Negotiations. Information was also sought regarding the position of the top personnel administrator and the major personnel problems as perceived by him. The major findings were: (1) the Personnel Departments of the majority of the districts are responsible for the personnel functions of the Certificated and Classified staffs and the Salary Administration; (2) the Payroll processing function is usually the responsibility of the Business Department; (3) negotiations are a separate function but receive input from the Personnel Department; (4) the overall personnel responsibility usually rests with an Assistant Superintendent reporting to the Superintendent or his Deputy; (5) the Assistant Superintendent for Personnel has ultimate responsibility for the Certificated and Classified staff whether they are administered as a unit or a separate division; (6) in districts with separate geographical administrative units, as in districts with a single unit, the personnel function is centralized; (7) staff development is most frequently the responsibility of the Curriculum/Instruction Division or Personnel; and (8) the major problems are in the area of personnel placement. These are complicated by the need for staff reductions, affirmative action and desegregation. (Author)

A Program to Identify Dropout-Prone Students, Assess Their Needs, and to Design an Individualized Instructional Program Appropriate for Meeting Such Needs.

Spons Agency—Office of Education (DHEW), Washington, D.C.

Pub Date [75]

Note—11p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Academic Failure, Behavior Change, \*Dropout Identification, \*Dropout Prevention, Individualized Instruction, \*Individual Needs, \*Potential Dropouts, Predictive Ability (Testing), Program Descriptions, Secondary Education, Teaching Methods

Achievement testing indicates that the typical student who leaves high school prior to graduation has academic deficiencies considerably below expected grade placement. The need exists for identifying potential dropouts prior to their actual withdrawal. After a dropout-prone student has been identified, an analysis of his specific needs should be made. Finally, specifically

tailored instructional programs based on needs should be implemented to allow the student to achieve academic and social growth. This paper describes such a program. A psychologist and psychometrist developed a battery of tests to help identify prospective dropouts, for whom a remediation program in basic mathematics was developed. Results indicate that the program was successful in encouraging students to stay in school. (Author/HMV)

Descriptors—Behavioral Science Research, College Freshmen, \*Dormitories, \*Environmental Influences, \*Interior Space, \*Physical Environment, \*Psychological Patterns, Research Projects, Sex Differences, Speeches

Identifiers—\*Crowding

Overcrowded residence halls at Rutgers University form the basis for this research study on the effects of overcrowding. Subjects were the occupants of 31 rooms (7 triple male rooms, 7 triple female rooms, 7 double male rooms, and 10 double female rooms). Two sets of measures were used to determine whether crowding caused arousal and stress. The first set involved the measurement of unbound cortisol obtained from urine samples. The second set of measures involved cognitive performance. Results indicate that crowding causes more negative effects on women than on men. (Author/HMV)

This article, published in Learning Notes, a house organ of Cleveland State University, describes the Career Guidance Institute—a program designed to provide counselors with firsthand experiences of the business and industrial centers of Greater Cleveland. Program partici-

pants, counselors and career education specialists from the Cleveland Public Schools, participated in an eight-week program which included in-plant experience for six weeks. The overall purpose of the Career Guidance Institute was to provide career development specialists with knowledge, skills, and attitudes necessary for them to assist economically disadvantaged students to make realistic career choices, and to make an easier transition from school to work. The eight-week program was divided into an orientation phase, an on-the-job phase, and a debriefing phase. (Author/HMV)

Identifiers—\*University of Texas Austin

The 1974 Survival Week Program was an orientation program designed for entering minority and economically disadvantaged students at the University of Texas at Austin. The major purpose of the program was to assist the participants in acquiring the knowledge and skills for academic, financial, emotional, and social "survival" in a complex university environment. The program was held in conjunction with the fall orientation program for all entering students and offered such activities as academic area meetings, registration information meetings, academic pre-advising, communication exercises, sessions on student services and student life, money management workshops, and placement testing. Students completed an evaluation questionnaire which gathered their reactions to the quality and quantity of information and assistance provided to them. Evaluation results yielded positive overall ratings and comments concerning the program, while suggestions were made to improve areas such as placement tests and Ethnic Studies Information. Based on specific recommendations by professional and student staff and participants, the Survival Week Program will be continued with emphasis on the development of more group cohesiveness for the participants. When Children Become Mothers—A Group Therapy Experience with Teenage Single Parents.

Pub Date 23 Mar 75

Note—25p.; Paper presented at the Annual Meeting of the American Orthopsychiatric Association (52nd, Washington, D.C., March 22-24, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Group Therapy, \*Mother Attitudes, Parent Child Relationship, \*Parent Counseling, Parent Education, Program Descriptions, Teenagers, \*Unwed Mothers

Identifiers—\*Advocacy

This paper examines the problem of teenage women who, because of deep-rooted pathological, psychological reasons, become pregnant repeatedly. All too frequently after giving birth to a series of unwanted, uncared for children these women and their children become psychiatric casualties. Attempts by helping agencies to deal with these adolescents are often unsuccessful. In a large metropolitan hospital the Ob-Gyn and Psychiatric Departments established a group therapy program which utilized "advocacy" as a primary mode of treatment. The group was designed as a quasi-family with the therapists emphasizing their roles as mother surrogates. With the therapists as advocates, feelings of self-esteem were reinforced, and the ability to deal effectively with others was conveyed. Problems were dealt with in a dynamic context by way of the group therapy process and advocacy stance. As a result of this corrective emotional experience in the group, the members have taken good care of themselves and their children. They have been better able to negotiate systems, and have made better use of resources available to them. Group members have also requested con-

tinued treatment to deal with "our messes that got us in these troubles." The adoption of this therapeutic stance which emphasized social and psychological advocacy as an expression of good mothering has had many positive results in working with teenage mothers. Such a therapeutic stance has widespread applicability in terms of prevention and treatment. (Author)

Participant Observers: A Low Threat Approach to Junior High Counseling.

Pub Date [72]

Note—37p.; Paper presented at the Annual Meeting of the American Personnel and Guidance Association (31st, New York, New York, March 23-26, 1975)

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—\*Behavior Change, \*Counseling, \*Cross Age Teaching, Experimental Programs, Interaction, Interpersonal Relationship, Junior High Schools, \*Junior High School Students, \*Preschool Children, Program Descriptions

This paper examines a junior high counseling procedure which utilized preschool students as models. Differing with traditional modeling procedures, the junior high students were required to interact with the youngsters as well as each other. Following the interaction, twice-weekly group counseling sessions were conducted for a nine-week period to discuss the interpersonal behavior of the preschoolers and to have the junior high students relate it to their own behaviors. Some structural group procedures were also adopted. The goals of the procedures were increased self-understanding and understanding of others as expressed by improved interpersonal relations with persons both younger and older than the client as well as his peers. The program gained popularity among the students and staff throughout the two years of its existence. The impact of the procedure on participants' behaviors and attitudes as well as the school environment was assessed. The participants for this study included 24 students from a federally funded Title III ESEA experimental junior high school and 12 students from a neighboring traditional junior high. (Author)

This paper describes the Youth Resource Center (YRC) of Glastonbury, Connecticut—a multifaceted treatment facility. The YRC is based on a Systems-Interaction (SI) model of service, which maintains that a system can be changed by intervention at any point in the system; consequently, the same goals can be achieved through various target groups or individuals and various treatment approaches. The YRC is basically comprised of four program elements: (1) treatment (consisting of various therapeutic modalities, such as group therapy, family therapy, etc.); (2) education (such as equivalency preparation); (3) inservice training (workshops for staff and community-at-large presented by various professionals); and (4) creative experiences (such as art, music, dance workshops, kung-fu lessons). Descriptors—Case Studies, \*Geriatrics, \*Mental Health, Older Adults, \*Psychological Patterns,

\*Senior Citizens, Social Workers, \*Sociocultural Patterns, State of the Art Reviews

This paper develops the premise that there is today a new "child" in our culture developed in response to expectations of daily functioning, family relationships, societal status, economic level, medical illness, emotional needs, and financial management. This new "child" is a person who has usually passed the age of 65, and has found that the world no longer relates to him on an adult level. The purpose of the paper is to document the above premise and to suggest an alternative approach. In order to adequately do so, cases referred to the Social Services Department of the New England Memorial Hospital, Stoneham, Massachusetts, have been categorized on a random basis during the past year. The categorization has followed the areas detailed above. Of these an example has been chosen to illustrate the points made. Case studies, well disguised, are presented as an illustration of the topic area. Inherent in each of these case presentations is a clear indication of the methodical, often unconscious, way that the health and mental health professional and paraprofessional contribute to the process of turning a self-managing senior adult into a dependent and, often, neurotic "child." Descriptors—\*Academic Achievement, Academically Handicapped, \*Behavior Change, \*Locus of Control, \*Lower Class Students, Primary Education, Research Projects, \*Self Control, Socioeconomic Status, Verbal Development

The present report covers five studies conducted on the development of impulse control and its role in the academic achievement of lower socioeconomic status (SES) children. The studies were performed on nursery school children and first graders. Results suggested that there are several different types of impulsivity, and that only one of these is related to academic achievement. In general, the research findings from the project show that lower SES children develop verbal control over impulsive behavior more slowly than middle SES children. Furthermore, it was found that lack of impulse control was significantly related to poor academic achievement in the lower SES first graders, even though IQ was controlled. Finally, an attempt was made to train lower SES children in techniques that would lead to increased verbal control over their impulsive behavior. The training techniques developed in this research were found to lead to greater impulse control on specially devised experimental tasks. However, the data were not clear on whether these improvements in impulse control resulted in better academic achievement. Further research is needed on this topic. (Author/SE)

Descriptors—Evaluation, Guidance Objectives, \*Master Plans, Models, \*Occupational Guidance, \*Program Development, \*School Districts, Secondary Education, \*Vocational Counseling

The Master Plan for Career Guidance and Counseling grew out of the recognition that a prerequisite for the provision of an outstanding, efficient and effective career guidance and counseling program was district-wide planning. The plan was funded by the vocational education council with augmented Vocational Education Act funds. The professional counseling staff as

well as administrators, teachers, students, parents and community members were involved in the project in an effort to meet the needs and recommendations of the communities served by the plan. The plan was modified for each high school to adjust to their particular needs. This master plan is scheduled for implementation during the 1975-76 academic year. The present report describes the rationale underlying career guidance and counseling, presents a model which directs the whole plan, discusses the goals and objectives of the plan and offers various assessment and evaluation measures of the procedures and strategies to be followed. Finally, it delineates expected costs of the plan and possible future steps to refinement of the plans. (Author/SE)

Management by Objectives (MBO) in Student Services.

Pub Date [75]

Note—182p.; Not available in hard copy due to marginal legibility of original document

EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.

Descriptors—\*Accountability, Administrative Problems, Administrator Responsibility, \*Evaluation, Higher Education, \*Management by Objectives, \*Objectives, \*Student Personnel Services

Management by Objectives (MBO), provides student personnel administrators some help in responding to the complexity of a constantly changing student community. MBO is a goal- and result-oriented process for effective management. A major MBO assumption is that people work better if they are clear about goals, if they help in setting their own job goals, and if they are clear about how they will be evaluated. For MBO to function successfully, all organization members need to understand and agree with the concept. Several pitfalls that might hinder the smooth functioning of MBO are discussed. Action steps to implement MBO, procedures and designs for setting goals, and the effect of management style on MBO implementation are described. The report presents three case studies in which MBO proved useful as well as common errors in trying to establish MBO-oriented programs. (Author/SE)

Document Not Available from EDRS

Descriptors—Doctoral Theses, \*Effective Teaching, Elementary Education, Grade 2, Negro Students, Reading, \*Reading Achievement, \*Reading Instruction, \*Reading Research, Reading Skills

This study was designed to discover the degree of relationship between a number of predictor variables and reading achievement for 65 black second grade students in two Austin, Texas, schools. The seven predictor variables used were: oral language performance as measured by the Gloria and David Beginning English, Series 20, Test 6 (GDBE); an Estimated Reading Ability Group (ERAG) score; student sex; age; socioeconomic status; school; and teacher. Reading achievement scores from four different reading tests made up the criterion set of variables: The California Achievement Test (CAT), and informal reading inventory (IRI), the LaPray-Ross Graded Word List (LR-GWL), and the GDBE. The 29 male and 36 female subjects were randomly selected from a special communication skills project. Correlations were obtained between the primary predictor, the GDBE, and each of the four reading tests. Three sets of correlations resulted: GDBE Phonology, GDBE Grammar, and GDBE Total scores correlated with each of the four reading scores. All of these correlations were

significant. The teacher variable was a significant independent contributor to the multiple correlation for two reading tests, the IRI and the LR-GWL. (Author/WR)

Descriptors—Adult Basic Education, \*Beginning Reading, \*Correctional Education, Cues, \*Effective Teaching, Prisoners, \*Reading Instruction, \*Reading Programs, Visual Learning Identifiers—Effective Reading Programs, \*Exemplary Reading Programs, Reading with Symbols, Right to Read

One of the twelve exemplary programs summarized in the Introduction to Right to Read's "Effective Reading Programs: Summaries of 222 Selected Programs" (CS001934), this program attempts to raise the reading skills of inmates of the Sierra Conservation Center to the level needed for training in conservation work while in prison, or for outside jobs after parole or release. The seven-week training session uses a reading-with-symbols method, giving the beginning reader visual cues to help identify the sound of a letter or a group of letters. Students first master consonant and vowel sounds from phonetic spelling lists, and as they proceed through the course to special reading books, the cuing with symbols is gradually reduced. The symbols enable the students to progress rapidly enough that they experience feelings of confidence and success in their reading. Students enter the program at the level at which they need work. The content of the program is designed to be of high interest to prisoners. (TO/AIR)

Identifiers—\*Effective Reading Programs, Right to Read

This catalog of reading programs is a result of an intensive search by the American Institutes for Research of reading programs in operation across the nation, followed by computer evaluation of the findings. Although the principal objective of the research was to produce multimedia inservice packages for reading teachers which demonstrate twelve outstanding programs, the number of effective reading programs discovered was too significant to go unreported. Summaries are given for each of the 222 programs judged to have potential for improving reading ability. The size of each program and its target population are described; its starting date, staff, and major features are given; its facilities, materials, and equipment are listed; and its cost is detailed. Sources of further information on each program are also included. The programs outline elementary, secondary, adult, and special education areas and cover a wide range of reading skills, organizational plans, and geographical areas. The twelve programs to be depicted in multimedia packages are also briefly described. More complete descriptions of most of the programs can be found in the ERIC system. (MKM)

Note—11p.; Paper presented at the Annual Meeting of the Western College Reading Association (8th, Anaheim, California, March 20-22, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Developmental Reading, Financial Support, Higher Education, Junior Colleges, \*Learning Laboratories, National Surveys, Program Administration, \*Reading Programs, Remedial Reading Programs, \*Study Skills, \*Tutorial Programs, Tutoring, Writing Skills

A national survey of learning laboratories in institutions of higher education, conducted in 1974, is reported in this document. Questionnaires consisting of 70 items on administration, budget, other programs, facility, staffing, services, clients,

hardware and software, and evaluation were sent to all college and university learning centers in the United States. Responses were received from 1,258 of the 3,389 campuses listed in the "Educational Directory." Tables show both the responses to 13 of the questions and the returning institutional variables such as level, student population, name of program center (learning center, learning resource center, reading/writing lab, tutorial program, and other), and type of offering. Survey results show that more than half of the program centers are less than five years old, 85 percent are less than 10 years old, program centers have diversity of functions, and 61 percent of all respondents have program centers. The academic background of program administrators and funding of learning program centers is noted. (MKM)

Identifiers—National Assessment of Educational Progress, Right to Read

The functional literacy of various groups of 17-year-old students was assessed to discover whether the reading skills which are usually taught in the schools are adequate for functioning in everyday life. Eighty-six test exercises were classified according to the various formats of reading materials they represent and according to the types of behaviors they elicit. The highest expected level of performance was determined by the achievement level obtained by a group of superior readers on a standardized reading test. All groups performed highest on drawings, pictures, signs, and labels and second highest on charts, maps, and graphs. Most groups performed third highest on passages, fourth highest on forms, and least well on reference materials. Comparison of the results of this test given in 1973-74 with a truncated version given to 17-year-olds in 1970-71 showed all groups gained in functional reading skills. Three exercise parts consisting of questions about an insurance policy statement, a traffic ticket, and an application form were answered well by no group, including the superior readers, which raises the question of further defining functional reading. Perinatal Events as Precursors of Reading Disability. Interim Report No. 17.

Minnesota Univ., Minneapolis. Dept. of Psychoeducational Studies.

Spons Agency—National Inst. of Education (DHEW), Washington, D.C.

Bureau No—BR-6-1176

Pub Date Dec 74

Grant—OEG-32-33-0402-6021

Note—62p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—\*Anomalies, Learning Disabilities, Minimally Brain Injured, \*Neurological Defects, Neurologically Handicapped, \*Perinatal Influences, \*Pregnancy, \*Reading Difficulty

A number of studies have been done on the relation between reading disability and complications of pregnancy and birth. The procedures and results of major studies are critically reviewed in this document, with attention given to issues of research design, test use, and statistical methods. Although none of the studies reviewed is free of methodological problems, the weight of the evidence supports the hypothesis that perinatal problems, especially low birth weight, are related to reading disability. Neonatal neurological damage is suggested as the major independent variable for investigators to pursue in the future. Included are an annotated list of references, an

extensive table charting the findings of the major studies discussed in the document, and an appendix listing the reading and intelligence tests used in the major studies. (Author/JM)

Stewig, John Warren

Book Illustration: Key to Visual and Verbal Literacy.

Pub Date May 75

Note—11p.; Paper presented at the Annual Meeting of the International Reading Association (20th, New York City, May 13-16, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Childrens Literature, Elementary Education, Folklore Books, \*Illustrations, \*Oral Communication, Verbal Development, Visual Arts, \*Visual Literacy, \*Visual Stimuli

Visual and verbal literacy skills are crucial to children because of their relationship to reading, and to adults because of their social utility. Such skills are, paradoxically, among those least often developed in a systematic fashion in elementary schools. One reason for this is that component subskills of visual and verbal literacy are infrequently identified. The three subskills identified in this paper are describing, comparing, and oral valuing. An effective way of encouraging children to learn these skills is to use illustrations from children's literature. The approach offers many advantages because illustrations are easy to locate, plentiful, and of much interest to children. The teacher attempting to use this approach will find that children respond eagerly and in the process develop valuable visual and verbal literacy skills. (TS)

A perceptual motor approach to learning phonics is presented in this teaching guide which includes a screening test and 50 learning games encompassing a wide array of phonics skills. Directionality, gross-motor skills, sensory-motor skills, and auditory and visual perceptual skills may be introduced to the children and taught during the games which are based on moving about on a floor grid according to verbal or visual directions. The total body movement activities require complete attention on the part of the learner and provide benefit to the hyperactive and nonattentive child as well as the "normal" child. (MKM)

Identifiers—Elementary Secondary Education Act Title III, ESEA Title III

An ESEA Title III project in language arts, this program emphasizes instruction tailored to the individual learner's needs. In the fall of 1974, Southside Elementary School, Crestview, Florida, adopted the program which is described and evaluated in this paper. Program components include team teaching in an open space classroom; the use of informal inventories and careful observa-

tion to diagnose each learner's language needs; a written reading prescription for each learner; assignments in programed materials, reading kits, basal readers, listening stations, workbooks, and learning games; and inservice teacher training. While the program was received enthusiastically, the results of the evaluation showed no significant gains in reading achievement when compared with the previous year. In fact, all gains were lower for the project year than for the year before. Another finding was differences in reading achievement gains for different ability levels. Higher ability learners achieved larger gains. (MKM)

Descriptors—\*Attention, \*Beginning Reading, Language Development, \*Paired Associate Learning, Primary Education, \*Reading Instruction, Reading Research, \*Reading Skills, Research Methodology

Identifiers—\*Distractibility (Reading)

This paper represents an attempt to study the graphemic-phonemic associations that are formed during the acquisition and subsequent retention of beginning reading responses and to evaluate the heuristic value of viewing the formation of these associations as a classical conditioning process. Two experiments—one on first graders and one on first and third graders—are contained in this paper. These replications and extensions of Samuels' (1967) tests in both laboratory and classroom of the distractibility of pictures in the initial acquisition of reading responses to printed words resulted in both failure to replicate the original findings and in a major reinterpretation of the design. Application of the classical conditioning model to Samuels' test of attentional processes in beginning reading revealed that it does not provide an adequate test of attention, but rather, constitutes a test of either learning to read using intrinsically-produced, visually mediated responses or learning to read using extrinsically-produced, verbally mediated responses. Various eye problems and the effects they can have on children's reading abilities are explored in this pamphlet, which is one of a series designed to answer parents' questions about their children's reading development. Topics discussed are the demands on vision made by reading, problems that affect visual acuity (nearsightedness, farsightedness, and astigmatism), problems that result from refractive differences (double vision, crossedness, walledness, and accommodation), color blindness, identifying visual problems (symptoms and vision screening), and what parents can do in regard to their children's vision. An annotated bibliography of two books is provided, six reference books are listed, and questions for thought and discussion are included. (JM)

Descriptors—\*Computer Assisted Instruction, \*Evaluation, \*Eye Fixations, \*Eye Movements, Eye Regressions, \*Reading Processes, Reading Research

Identifiers—\*PLATO

Information on six research programs which studied eye movements during reading and evaluated aspects of PLATO-displayed reading instructional material is provided in this report. An analysis of eye movements of "competent" and "less competent" readers reading for general and detailed information showed many differences between them. One of the findings is that competent readers made fewer saccadic eye movements per line of print and spent less time on fixation pauses. In addition, when reading for detail, they did not change the size of the informational chunk taken in during each fixation pause but did

increase the amount of time spent on such fixation pauses. Less competent readers decreased the informational chunk taken in per fixation but did not change the amount of time spent per fixation. Also reported are a pilot study concerning blink or saccad suppression of information, a study of eye movements as readers scan back from the end to the beginning of a new line, and the development of a procedure for measuring head movements. A study of informational chunking which investigated the effects of the wider angular distance of the PLATO display and typed materials suggests that a drop in efficiency of reading speed is noted when reading these compared to reading a printed book format. **The Acquisition of Literacy by Children and Adults.**

Pub Date 75

Note—48p.; Paper prepared for the Delaware Symposium on Curriculum, Instruction, and Learning: The Acquisition of Reading (2nd, University of Delaware, June 1975)

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage  
Descriptors—\*Adult Literacy, \*Cognitive Development, Cognitive Processes, Decoding (Reading), \*Language Ability, Language Development, \*Listening Comprehension, Literacy, Literacy Education, \*Reading Development, Reading Research, Reading Skills, Study Skills, Teaching Models

A developmental model of literacy based on language and cognitive skills is presented in this paper. Two independent learning strands suggested as major factors in achieving literacy are learning to understand language by eye (reading) as skillfully as one can understand language by ear (auding) and learning to use the printed medium for literacy task performance in understanding various graphic displays using iconic, linguistic, and schematic representations. Examples of advanced information processing skills involved in the latter are presented and explained. A study designed to assess discrepancies between auding and reading skills of adults in a literacy training program used the Durrell Listening Reading Test and obtained auding scores for the adults of only the fifth-grade level. In a second study, it was observed that adults who scored at the eighth-grade level on a standardized reading test may be less developed than a group of average fifth-grade readers in automaticity of decoding. This and other studies surveyed suggest that learning to understand language by eye as skillfully as by ear may take several years after the initial decoding has been mastered. (MKM)

Note—14p.; Paper presented at the Annual Conference of the Western College Reading Association (8th, Anaheim, California, March 20-22, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Educational Programs, Higher Education, Learning Activities, \*Reading Programs, \*Study Skills, Teaching Techniques, \*Training, \*Tutorial Programs, Tutoring, \*Tutors

A program for tutorial assistance and tutor training at the University of Texas at Austin is described in this document. The tutorial assistance program attempts to provide help with both study skills and specific course content, since students experiencing academic difficulty in a specific course may request tutoring aid, not realizing that their approach to learning may be interfering with their mastery of the course. Two types of positions for student tutors are: tutor consultants or advisors, who interview prospective tutees, serve as paraprofessional learning specialists, and act as consultants with student tutors in their efforts in guiding a student's learning; and student tutors, who actually tutor the student in a course. Training for the tutor consultants has focused on expanding their knowledge and expertise in interviewing skills and diagnostic techniques, learning skills and teaching strategies, consultation techniques, and administrative skills. Methods for training have included workshops on selected topics of interest, weekly staff meetings, and individual weekly meetings with the director. (MKM)

Identifiers—\*Formula Phonics Videotape Reading Chain Program

A new kind of reading-language processing system, which has been in use at the Patterson Road School (Orcutt, California) since December 1972, is described in this document. The program consists of two ungraded reading chains of twelve groups each (determined by reading comprehension) which meet for 45 minutes daily, read material above the group's tested total reading

level, and decode unfamiliar words using the Formula Phonics System learned by videotape at the beginning of the program. Reading matter—short stories first, then novels and other works—is chosen for literary worth and interest level and instruction is designed to teach critical thinking with open-ended questioning and to reinforce thinking processes and reading skills by writing tasks keyed to the reading experience. Pupils move up on the chain upon the teacher's recommendation. Detailed information about the reading chain design, staff development procedures, specific methodology, and the school is included in this document. A separate leaflet contains a discussion of a program evaluation scale and an evaluation-contrast form to be used after viewing "Video Trip to Patterson Road School." (JM)

**Thinking About Reading.**

Pub Date May 75

Note—12p.; Paper presented at the Annual Meeting of the International Reading Association (20th, New York City, May 13-16, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Beginning Reading, \*Cognitive Processes, \*Language Experience Approach, Reading, Reading Development, Reading Instruction, \*Reading Processes, Reading Research

Cognitive confusion is the common state of young persons in regard to concepts of units of writing. In the past 10 years, research has accumulated to show that all children pass through the important stage of initial cognitive confusion in learning to read. Children often confuse "writing" with "drawing," "letter" with "number," and so on. Cognitive confusion is a natural outcome of normal environmental conditions which cannot be avoided, but if it persists too long it may prevent the child from understanding the task of learning to read. Several studies about helping children to develop language concepts have been conducted. The general key to improving this kind of concept learning is the use of the language-experience approach. Children need experiences of spoken and written language which are relevant to them and which allow them to discover the functions of reading and writing. (TS)

**Children's Reading Achievement as a Function of Varying Specificity of Purpose Setting Directions.**

Pub Date 74

Note—13p.; Study prepared at the University of Delaware

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Behavioral Objectives, Grade 6, Intermediate Grades, \*Reading Ability, \*Reading Achievement, Reading Comprehension, Reading Instruction, Reading Research, \*Reading Skills, \*Teaching Methods

This study was designed to confirm the hypothesis that objectives which focused on items of information best facilitated reading retention among a population of elementary school children while controlling for the children's reading level rather than for the "density" of the reading passage. Two 550-word reading passages taken from "Life in the Ancient World" were rewritten to conform to sixth-grade readability levels. Alternate form reliability was established in a preliminary investigation in which cloze tests constructed from both passages were administered to a group of 45 sixth graders. It was concluded that, given the design of this study, neither specific nor general reading directions influenced the level of reading achievement. It may be that sixth-grade children just have not yet developed the reading skills necessary to use reading directions of the type provided in this experiment. For these children, purpose setting directions which are facilitative may be those which are discussed, verbalized, or in some manner internalized, rather than those presented in a list. (RB)

United Nations Educational, Scientific, and Cultural Organization, Paris (France).

Pub Date 75

Note—52p.

Available from—Department of Mass Communication, Unesco, Place de Fontenoy, 75700 Paris, France (\$2.65 paper)

Document Not Available from EDRS

Descriptors—\*Effective Teaching, \*Literacy, Reading Development, \*Reading Habits, Reading Instruction, \*Reading Interests, \*Reading Materials, Reading Research, Surveys

As a response to the close of the 1972 International Book Year sponsored by UNESCO, this study was suggested concerning the reading habits of people throughout the world. A concern was expressed that without reading practice reading skills already learned would be quickly lost and life-long education would not take place. The author surveyed studies of reading habits throughout the world, noting differences in the readership of various countries and between adults and children. In almost every country usually twice as many children read as do adults, a difference that is even greater if one considers the difference between the life spans of each group. Topics explored in this study which are related to promoting reading habits are: the effective teaching of reading, the results of research on motivations for reading and reading interests, the factors which influence reading interests, the methods for determining individual reading interests, the promotion of developing reading interests and the reading habit, and some suggested tasks for research. Ideas are drawn from research performed in many countries. A bibliography is included. (MKM)

A Study of the Relationship between Syllabication Ability and Reading Comprehension.

Pub Date 75

Note—5p.; Unpublished study prepared at the University of Colorado at Denver

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Intermediate Grades, \*Reading Comprehension, \*Reading Instruction, \*Reading Research, \*Syllables, \*Word Recognition

Identifiers—\*Syllabication Ability

The purpose of this study was to determine the strength of the relationship between syllabication ability and reading comprehension. Pre- and post-tests using the syllabication and comprehension subtests of the Stanford Diagnostic Reading Tests were administered to 275 middle school children involved in corrective and developmental reading programs. The results of the study indicate that there is a slight correlation (.13) between gain in syllabication ability and gain in reading comprehension, but it is suggested that it may not be great enough to justify teaching syllabication rules in an attempt to improve reading comprehension. It is recommended that experimental studies be conducted to determine if instruction in syllabication improves word recognition ability and/or vocabulary. (LL)

Monster Moose Reading.

Pub Date 75

Note—35p.; Paper presented at the Annual Meeting of the Transmountain Regional Conference of the International Reading Association (2nd, Calgary, Alberta, Nov. 13-15, 1975)

EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.

Descriptors—\*Beginning Reading, \*Child Language, Language Skills, Primary Education, Reading Materials, \*Reading Programs, \*Self Concept, Story Telling, \*Student Developed Materials, Teaching Techniques

Monster Moose (MM) Reading is a program specifically aimed at improving children's language, beginning reading, and self-concept development through the creation and utilization of student-authored reading materials which feature a series of wordless picture books about a magical moose. The MM Program is based on the following general principles of learning: that language, reading, and thinking are interdependent; that children learn new language best if they feel the need for verbal communication; that children learn new language best when it is associated with something they already know or with something they can see or feel; and that children will learn new language best when it is heard and used often. In this document, teaching techniques are suggested in order to help the teacher facilitate listening, develop speaking, aid writing, and promote reading. Ten story outlines for the teacher to elaborate upon and narrate to the class are included. (LL)

Descriptors—Educational Resources, Periodicals, Publications, \*Reading Instruction, Research Tools, \*Resource Materials, \*Scholarly Journals

Identifiers—\*Educational Resources Information Center, ERIC

Practical techniques for keeping abreast of the professional literature on the teaching of reading are contained in this booklet. Topics of the six chapters are: purposes for professional reading, criteria for choosing a wise search plan, how reading information is organized, how to keep up-to-date through browsing, the ERIC system and how to use it, and how to do a topical search in five phases. Also included are a bibliography and five appendices: sample pages from the ERIC "Thesaurus," a checklist on how to use the "Current Index to Journals in Education," the table of contents of "A Guide to Information Sources in Reading," a checklist for evaluating educational research, and a list of journals containing articles on reading. Hopkins, Carol J. Moe, Alden J.

The Validation of a Synthetic Syllable Count Appropriate for Computer-Determined Readability Estimates.

Pub Date 75

Note—26p.; Paper presented at the Annual Meeting of the International Reading Association (20th, New York City, May 13-16, 1975)

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Computer Programs, Computers, Elementary Secondary Education, Higher Education, \*Readability, \*Reading Research, \*Syllables

The purpose of this paper was to investigate letters-per-syllable constants as predictors of true syllable counts for basal readers and trade books at five instructional levels. One hundred fifty language samples of approximately one hundred words each were selected and keypunched for computer analysis to determine average word length and total number of running words. Manual syllable counts for each sample were also performed. Their values were then used to calculate letters-per-syllable predictors for each level. The use of letters-per-syllable constants predicted between 73 percent and 90 percent of the variance of the actual syllable count. It was concluded that this procedure for calculating the

number of syllables makes it possible to program a computer to compute readability of language samples using readability measures which rely on syllable counts. (TS)

**Implementing Diagnostic/Prescriptive Reading Innovations.**

Rand Corp., Santa Monica, Calif.

Report No.—P-5406

Pub Date Apr 75

Note—19p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Elementary Secondary Education, Instructional Innovation, \*Reading Diagnosis, \*Reading Improvement, \*Reading Instruction, \*Reading Programs, Reading Research, Teaching Methods

Identifiers—\*Diagnostic Prescriptive Approach, Elementary Secondary Education Act Title III, ESEA III, Right to Read

The results of fieldwork in six diagnostic/prescriptive reading projects in school districts within and around Santa Monica, California, are summarized in this paper. The fieldwork was designed to examine the process of implementing diagnostic/prescriptive approach reading projects and was done as part of a large Rand study of innovative projects in four federal programs: Title III of the Elementary and Secondary Education Act; Title VII (the Bilingual Program) of the same Act; the Vocational Education Act, Part D; and the Right to Read Program. Fieldwork data were collected through semistructured interviews with superintendents, project directors, principals, teachers, and others with a knowledge of the project, such as district office personnel or parents. The adaptation and implementation problems observed in the six reading projects strongly suggest that the diagnostic/prescriptive approach to organizing reading instruction imposes behavioral change demands on teachers that require substantial extra resources to implement and, even more important, to continue. **Oral Aspects in the Primitive Fiction of Newly Literate Children.**

Pub Date 75

Note—35p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Children's Literature, \*Composition (Literary), \*Creative Writing, Educational Research, Elementary Education, Literary Analysis, \*Oral Expression, \*Reading Research  
 Various aspects of 145 representative oral and written compositions of six- and seven-year-old new literates are discussed in this paper. The determination to label these compositions as "primitive fiction" was made primarily on the assumption that children's first attempts at fictive narrative take on the aspects of their cultural literary heritage, as each child reweaves the unique complexities of oral language patterns. Discussed are such topics as evidence of listener awareness, stylistic and rhetorical contrivances, and individualization in plots and motifs. It was concluded as follows: that through representative and interpretive projections, newly literate children show a marked preference for reappraising and reorganizing received literature in relation to their own sense of creative awareness; that the most predominate conventional patterns in the

newly literate child's fiction are those which most resemble conventional aspects of oral traditional literature; and that the literature of newly literate children is a sophisticated form of primitive art which should be judged on its own terms and not by standards of contemporary adult literature. I.S.C. (Indiana State Council) Reading Test Survey.

International Reading Association. Indiana State Council.

Pub Date 75

Note—6p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Achievement Tests, Elementary Education, \*Mental Tests, \*Questionnaires, \*Reading Instruction, \*Reading Tests, State Surveys

Identifiers—Indiana

A questionnaire was designed to study the uses made of reading tests by classroom teachers in Indiana with at least one year of experience in their respective classrooms. Of the 185 questionnaires distributed by local reading councils, 51 questionnaires were returned. The teachers responding taught in grades one through seven. They reported using 37 different tests: 84 percent used a battery of tests accompanying a basal reading series; 139 percent used reading achievement tests (some teachers used more than one achievement test); 41 percent used diagnostic tests; and 10 percent reported using intelligence tests as reading tests. Some of the responses indicated that most teachers probably use the previous year's scores to determine level of reading material and group placement and that they interpret grade equivalent scores as representing reading ability. Grade equivalent scores were found to be the most commonly filed test information in cumulative folders. (MKM)

**The Effects of Post-Adjunct Questioning on Learning from Written and Oral Instruction: Interaction with Individual Differences.**

Pub Date Apr 75

Note—30p.; Paper presented at the Annual Meeting of the American Educational Research Association (Washington, D.C., March 30, 1975-April 2, 1975)

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Higher Education, \*Individual Differences, \*Learning Modalities, Learning Processes, Listening Comprehension, \*Questioning Techniques, Reading Comprehension, \*Reading Difficulty, Reading Research, \*Teaching Methods

Identifiers—\*Post Adjunct Questioning

The objectives of this study were to determine the effect post-adjunct questions exert on: learning from oral and written instruction, learning by high and low ability readers, and learning material which requires different levels of intellectual processing. No significant main effects occurred between question and no-question groups. Post-adjunct questions exerted greater effects on oral rather than on written instruction. Post-adjunct questions did not exert any effect on items which require different levels of intellectual processing. High ability readers performed equally well without the questions. Low ability readers favored questions. Questions without corrective feedback render such questions ineffective. (Author)

Descriptors—\*Children's Games, Educational Games, Elementary Education, \*Learning Activities, Primary Education, Reading Development, \*Reading Games, \*Reading Instruction, \*Reading Skills

This book provides approximately 150 games for children in kindergarten through grade six. The games are arranged according to level of difficulty, with examples and illustrations, and are listed under eight major skills: phonetic analysis, structural analysis, word meaning and comprehension, organization, critical and creative thinking, literature interpretation and stylistic elements, dictionary and glossary skills, and word lists. Each game is also listed under a major sub-skill, including such skills as initial consonant sounds, final consonant sounds, consonant digraphs, silent letters, vowels, rhyme, plurals, root

words, compound words, syllables, context clues, homonyms, reading for details, sequence, listing, making comparisons, creating mental images, use of dialogue, alphabetical order, accent marks, and multiple meanings. For each game, the materials required, directions for playing, possible variations, and the number of players are given. (TS)

**Functional Literacy--Basic Reading Performance; An Assessment of In-School 17-Year-Olds in 1974. Press Summary.**

Education Commission of the States, Denver, Colo. National Assessment of Educational Progress.

Spons Agency—Office of Education (DHEW), Washington, D.C. Right to Read Program.

Pub Date 75

Note—20p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Comparative Analysis, \*Functional Illiteracy, \*Literacy, \*Reading Achievement, Reading Research, \*Reading Skills, Secondary Education, \*Socioeconomic Influences

Identifiers—\*National Assessment of Educational Progress, Right to Read

In 1974, the National Right to Read Effort asked that the National Assessment of Educational Progress (NAEP) conduct a Mini-Assessment of Functional Literacy (MAFL) in conjunction with its regular assessment of ten learning areas usually taught in school. The first MAFL was administered to 5,200 17-year-olds statistically selected to represent the entire population of in-school 17-year-olds in America. These students were asked to answer questions and complete basic everyday reading tasks which had been selected by a panel of reading specialists appointed by Right to Read. All groups gained in functional reading skills measured by the 64 exercises which were used both in the regular NAEP reading assessment in 1971 and in the MAFL in 1974. (Summary figures are included which list percentages of response for categorical groups tested—superior reader, region, national, sex, race, parental education, and community). (LL)

**Some Patterns for Initially-Stressed Two-Syllable Words.**

Southwest Regional Laboratory for Educational Research and Development, Los Alamitos, Calif.

Spons Agency—Office of Education (DHEW), Washington, D.C.

Report No—SWRL-TN-1-71-10

Pub Date 71

Note—22p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Beginning Reading, Communication (Thought Transfer), \*Communication Skills, \*Linguistics, \*Phonics, Primary Education, Program Development, Reading Instruction, Reading Research, Taxonomy, \*Word Study Skills

An illustrative taxonomy for some patterns for initially stressed two-syllable words which can be used in word attack instruction is presented and discussed in this paper. It is designed to be a part of an integrated communication skills program produced by Southwest Regional Laboratory (SWRL). Examples of word patterns whose primary dimension of classification is word ending are listed. The terminal design requirement was to sequence letter-sound rules used in phonics-based word attack instruction so as to optimize the rate at which items from the speech lexicon become decodable and hence potentially items of the sight lexicon. Thus, since a majority of the

two-syllable words of English are initially stressed, variations of this pattern are suggested for introduction systematically and early in reading instruction. (MKM)

**The Informal Language Inventory: Practical Language Assessment Form for Elementary Classroom Usage.**

Pub Date 74

Note—143p.; Ph.D. Dissertation, Kansas State University

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-14,363, Mfilm-\$7.50, Xerography-\$15.00)

**Document Not Available from EDRS**

Descriptors—Doctoral Theses, Elementary Education, \*Language Arts, Language Research, \*Language Skills, \*Language Tests, Language Usage, Linguistic Competence, \*Measurement Instruments, \*Test Construction

Identifiers—\*Informal Language Inventory

The purposes of this study were to develop an informal language inventory for classroom teachers to use in screening a child's speech, to have classroom teachers use the inventory with students to determine if they could use it, and to determine if teachers would use the assessment form after they had had some experience with it. The development of the informal language inventory involved the expertise of researchers, both through literature and through a panel of authorities who were asked to examine it. Twenty-one second and third grade teachers in Fort Riley and Junction City, Kansas, used the "Informal Language Inventory: Practical Assessment Form for Elementary Classroom Usage" to elicit speech samples of five of their students and also filled out a questionnaire expressing their opinions concerning understanding, value, and use of the Informal Language Inventory. The results of this study indicated that the Informal Language Inventory is pedagogically and linguistically sound if the opinions of the researchers and experts called on for assistance in construction and validation are respected, if the philosophy of the literature is valid, and if the classroom teacher follows the procedures suggested in the inventory. **Multiple-Selective Programs in English in the State of New Jersey.**

Pub Date 74

Note—317p.; Ed.D. Dissertation, Rutgers University The State University of New Jersey

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-17,356, Mfilm-\$7.50, Xerography-\$15.00)

**Document Not Available from EDRS**

Descriptors—Curriculum Design, \*Curriculum Development, Doctoral Theses, Educational Programs, Educational Research, \*Elective Subjects, \*English Instruction, \*Language Arts, Secondary Education

Identifiers—\*New Jersey

The purpose of this study is two-fold: it determines and describes quantitatively the current status of multiple-selective programs in English in the public schools of New Jersey, and it analyzes and appraises qualitatively—using case study—two-semester elective programs for grades 11 and 12, the predominant pattern of course offerings of New Jersey elective curricula. To secure data for the first part of the study, information was collected from official reports of school districts in New Jersey, questionnaires directed to supervisors in the state, and letters to language arts consultants in each of the 50 state departments of education. Data for the second part of the study was obtained from analyzing curriculum documents, student attitude surveys, and chairpersons' reports of classroom visitation and through interviews with administrators, chairpersons, and guidance counselors. The study reports that more than one-half (52.3 percent) of the New Jersey public high schools have instituted multiple-selective programs in English. According to the stated intentions of supervisors of English, by the school year of 1976-77 at least two-thirds of the schools will have instituted such changes. (Author/RB)

**Patriotic and Historical Plays for Young People.**

Pub Date Oct 75

Note—262p.

Available from—Plays, Inc. Publishers, 8 Arlington St., Boston, Massachusetts 02116 (\$4.95 paper)

**Document Not Available from EDRS**

Descriptors—Comedy, \*Drama, Dramatics, History Instruction, \*Instructional Materials, \*Scripts, \*United States History

The one-act, royalty-free plays in this book dramatize notable events in United States history. Historical selections include dramatizations of the Declaration of Independence, the Boston Tea Party, the Continental Army at Valley Forge, the birth of the Constitution, and George Washington crossing the Delaware and feature such historic figures as George Washington, Thomas Jefferson, Benjamin Franklin, Thomas Paine, Molly Pitcher, Paul Revere, and Betsy Ross. Several comedies present a fanciful and lighthearted view of history, three reading plays provide variety and flexible programming, and the short choral readings may be used in informal classroom situations or as curtain raisers before longer plays. (JM)

**A Comparative Study of Ratings of Proposed Teacher Competencies for Middle School English.**

Pub Date 74

Note—134p.; Ed.D. Dissertation, Florida Atlantic University

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-14,349, Mfilm-\$7.50, Xerography-\$15.00)

**Document Not Available from EDRS**

Descriptors—\*Comparative Analysis, Doctoral Theses, Educational Research, Elementary Education, \*English Instruction, Middle Schools, \*Performance Based Teacher Education, Teacher Education, Teacher Qualifications, \*Teaching Skills

Identifiers—Florida (Broward County)

The purpose of this study was to develop and apply an instrumented procedure for deciding the relative importance of a tentative set of professional competencies proposed for middle school teachers of English. The results of this rating procedure were intended to demonstrate one way in which the broader educational community could be involved in expressing choices and in setting priorities for programs of competency-based teacher education. A selected group of 50 senior high school students, 50 teachers of middle school English, 50 educational leaders, and 50 patrons of middle schools in the south central administrative area of the Broward County, Florida public school system were asked to rate the importance of a set of 12 general competencies and 60 subcompetencies for training and certifying English teachers. It was concluded that the procedure developed by the study proved feasible and useful for determining the relative order of importance assigned to the proposed teacher competencies for middle school English. Applications of the procedure are recommended for use by those who seek systematic ways to broaden public involvement in teacher education decision-making. (Author/RB)

Note—13p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Composition (Literary), Educational Research, \*Grammar, Intermediate Grades, \*Language Patterns, Speech Habits, Standard Spoken Usage, Vocabulary, Written Language

Little is known about grammatical sophistication in the written language of school-age children. This study provides normative data on the occurrence of different complexity levels of major grammatical parameters in written compositions of nine-year-old children. These parameters include productivity of language, correctness of language usage, the frequency of occurrence of the T-unit (minimal terminable syn-

tactic unit), extent of vocabulary diversity, and extent of expressed abstractness. Results also suggest dimensions of similarity and of difference between grammatical sophistication of oral and written language. Findings can contribute to the development of classroom instructional activities within a written language program. A list of references and a table of findings are included. (Author/JM)

**Document Not Available from EDRS**

Descriptors—\*Books, \*Canadian Literature, Higher Education, Literature Appreciation, \*Reading Habits, \*Reading Interests, Research Methodology, Socioeconomic Status, \*Surveys

Identifiers—\*Book Exposure Project, Toronto

This report provides a summary of the Book Exposure Project, which took the form of an exploratory study conducted in an area of north Toronto. Free books were included with a questionnaire designed to gather information about the following topics: the recipients' social and economic characteristics, their television viewing and radio listening habits, their opinions of the book, their impressions of Canadian literature as recalled from their high school days, and their reading and book purchasing habits. An attempt was made to determine the following: whether the book exposure process as initiated in this study was a practical research methodology, whether the questions posed were adequate and reliable, and whether it was possible to gather information to assist Canadian publishers in promoting the sale and use of Canadian books. The bulk of this report consists of a presentation of the results of the survey in both narrative and table form. (RB)

**Descriptors—**\*Class Activities, \*English Instruction, \*Instructional Films, Instructional Materials, Literary Analysis, \*Literature Appreciation, Secondary Education, Student Reaction, Teaching Guides, Teaching Methods  
**Identifiers—**\*Protocol Materials in English Film Series

The Protocol Materials in English (PME) project was set up to study literature and the teaching of literature in an effort to determine whether it is possible to discover hierarchies of concepts and to create materials to illustrate those concepts. In the film series "Responding to Literature," the category system presented has as its point of reference the source within a literary work of the reader's response. The ten aspects of the literary work that have been identified in this guide for "Responding to Literature" are those that produce responses in readers and that readers talk about. Six concepts deal with the contents of literature, three with literary form, and one with the author in the work. The section of this guide devoted to the ten films in the series contains an explanation of the concepts each film is illustrating, a summary of the major points made in each film, and appropriate activities for preservice and inservice settings. In addition, there are essays about theories of reader response and the use of category systems in the teaching of English. (RB)

**Identifiers—**\*Protocol Materials in English Film Series

The Protocol Materials in English (PME) project was set up to study literature and the teaching of literature in an effort to determine whether it is possible to discover hierarchies of concepts and to create materials to illustrate those concepts. This guide—second in a series—focuses on the acts that the reader performs in responding to a given literary piece. These acts can be more or less creative according to the extent to which the reader participates in the reading experience by recreating the world of the book, investing the self, derive meaning, and finding worth in the text. Put more formally, these acts can be identified as imagining, personalizing, clarifying, and valuing. This book is designed to complement four films, each of which explicates a theory about the creativity of reader response. The guide ends with some questions and answers about the PME film series for studying literature. (RB)

**Can Pre-adolescents Produce Metamorphic Figures? A Training Study.**

**Pub Date [75]**

**Note—7p.**

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
**Descriptors—**Elementary School Students, \*English Instruction, \*Figurative Language, Grade 5, Intermediate Grades, Language Arts, Language Instruction, Language Research, \*Language Usage, \*Metaphors

In order to gain further information about the emerging metaphoric capacity of preadolescents, a training study was devised in which subjects were seen repeatedly over a period of several months. Thirteen fifth grade students from a lower-middle-class background were randomly selected to compose a training group and 18 matched subjects formed a control group. All subjects were given a pretest which consisted of 10 unfinished vignettes whose completion required a simile (an explicit metaphor). The completion task consisted of two parts: subjects first created their own endings for each item and then chose an ending from several which were presented to them. The study clearly documented the fact that fifth graders in this population could produce and appreciate figurative language. Metaphoric endings were preferred by all subjects by the third week of the study; metaphoric endings were routinely produced by all of the subjects by the sixth week of the study. Although individual rates of progress varied widely, the stages through which subjects passed in acquiring metaphoric understanding were remarkably similar. (RB)

**Descriptors—**\*African American Studies, \*Course Descriptions, Course Objectives, Higher Education, \*Literature Programs, \*Negro Literature, Secondary Education, Teaching Methods

This paper outlines a system of methods for teaching Afro-American Literature at the secondary and college level. Seven goals of the methodology are presented for the course, including making the students familiar with various definitions of black literature, helping the students use the tools of literary analysis in the discussion of black literature, and teaching the students about several major figures in Afro-

**CS 202 261**

American literature—their background and their major works and themes. Methods to achieve these goals include reading, discussing the readings in small groups, writing brief plot summaries, writing abstracts of articles relevant to black literature, keeping a journal of personal responses, and viewing films and filmstrips. Various methods of evaluating and comparing Afro-American literature are also suggested, including a discussion of the works of Richard Wright and Imamu Amiri Baraka. (TS)

**Descriptors—**\*Composition (Literary), \*Educational Research, Elementary Secondary Education, English, English Curriculum, English Instruction, \*Grammar, Language Research, \*Language Skills, \*Writing Skills  
**Identifiers—**Australia

The purpose of this study was to carry out a longitudinal study of the direct effects of traditional and transformational English grammar on children's writing skills. The investigation was conducted entirely in one large, coeducational high school on the outskirts of Auckland, Australia, beginning with the third form and ending with the sixth form. Three-hundred eighty students participated. The results presented show that the effects of such grammar study are negligible in terms of improving writing skills. (RB)

**Explorations in Language Study: Language, Experience and School.**

**Pub Date 74**

**Note—79p.**

Available from—Edward Arnold (Publishers) Ltd., 41 Maddox Street, London W.1, England (1.50 pounds, paper)

**Document Not Available from EDRS**

**Descriptors—**\*Educational Problems, Elementary Education, Failure Factors, Language Arts, \*Language Development, \*Language Instruction, \*Language Skills, Linguistics, \*Literature, Teaching Methods

The thesis that "as things are" some pupils enter school predisposed to success while some enter it predisposed to failure is explored in this book. The first question raised, in chapter 1, is why the schools are allowed to discount as irrelevant to the educational endeavor the experience of language and life that children bring to school with them. Chapter 2 discusses the language acquisition process. Chapters 3 and 4 review the nature of the school as a community and the place of the pupil within it, while chapter 5 examines attitudes toward language that are prevalent in school. Chapter 6 looks at the kind of demand typically made on pupils' language in school, and chapter 7 explores the opportunities students are normally given to develop the ability to meet the demands made on them. The final chapter argues the need for all teaching to be informed by an adequate and relevant knowledge of the nature and function of language as a first step toward achieving a situation in which some students no longer need to enter school already heading for failure. **On the Validity of Analytic Ratings.**

**Pub Date 75**

**Note—7p;** Unpublished study prepared at the Univ. of Colorado at Denver

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors—**\*Composition (Literary), Educational Research, English Instruction, \*Evaluation Methods, Higher Education, \*Test Reliability, \*Test Validity, Writing Skills, Written Language

The purpose of this study was to examine the reliability of the analytical method of grading essays in relation to the holistic method. It was hypothesized that the use of the analytic method

to rate college composition papers produces high rater reliability at the expense of biasing the raters and thus lowering the validity of the grades. Six essays, all on the same topic, were used for the study. It was concluded that the analytic method of rating produces a higher reliability among raters than does the holistic method, but that the analytic method produces a lower validity for the grades on the papers than does the holistic method. On the basis of the study, the hypothesis that the analytic method lowers rater validity by introducing rater bias was logically, but not statistically, accepted. (RB)

**The Ballantine Teachers' Guide to Science Fiction.**

Pub Date 75

Note—346p.

Available from—Ballantine Books, 201 East 50th Street, New York, New York 10022 (\$1.95 paper)

**Document Not Available from EDRS**

Descriptors—\*English Instruction, Higher Education, Literary Analysis, \*Literary Criticism, \*Science Fiction, Secondary Education, \*Teaching Guides, Teaching Methods

A guide for teaching science fiction in secondary and college classrooms, this book contains an introductory essay that covers a variety of points about teaching science fiction, with a discussion of the audience, the correlation between science and fiction, and the changing role of science fiction. In a second essay, four categories of science fiction are defined—hard science fiction, soft science fiction, science fantasy, and fantasy. The remaining fifteen chapters deal with specific science fiction titles, each one generally giving a story summary, an in-depth analysis, and various classroom topics and projects. Works such as "Stellar 1," "The Ginger Star," "Childhood's End," "Fahrenheit 451," "The Space Merchants," "Nerves," "Under Pressure," and "Rendezvous With Rama" are examined. (TS)

Note—161p.

**EDRS Price MF-\$0.76 HC-\$8.24 Plus Postage**

Descriptors—\*Child Language, Classrooms, Elementary Education, Family Environment, Listening, \*Negro Attitudes, \*Negro Dialects, Neighborhood, Parental Background, \*Parent Attitudes, Reading, Speaking, Writing

The short-range purposes of this study were (1) to determine parental attitudes about the appropriateness of two varieties of Black English for their children in three contexts (classroom, neighborhood, and home) and in four language arts areas (listening, speaking, reading, and writing), and (2) to show how parents' attitudes are related to their demographic, socioeconomic, political, and linguistic characteristics. Eighty parents of first- and sixth-grade children, randomly selected in two cities, provided data through interviews and a questionnaire. Eighteen independent variables were operationalized, with eight of the variables showing a significant relationship to parents' attitudes on the chi-square test of significance. Findings showed that parents have rules for the use of several varieties of Black English; accept Africanized English in listening and speaking, but not in reading and writing; accept Africanized English in the home and some community contexts, but not in schools; and accept Africanized English in informal settings, but seldom in formal ones. (A bibliography, nine appendices, and twenty-two tables are included.) (Author/JM)

Identifiers—\*Popular Culture

This loose-leaf book is a guide to an interdisciplinary course stressing a humanities approach to the study of American civilization. Each of the 90 lessons in the guide lists specific goals, materials, procedures, and alternative or additional suggestions on ways to teach about American civilization in the 1920s, the 1930s, and in the period from 1945 to 1960. Lessons are arranged in groups according to subject matter. Topics of the groups are: culture, history, popular culture (radio, movies, and best sellers), architecture and painting as artifacts, poetry and plays as artifacts, and dancing and music as cultural exemplars. Concluding lessons deal with the term project, student evaluation, and the final test. Six appendixes contain material on such topics as extending the American Humanities course and decade novels as artifacts. An extensive bibliography is also included. (TS)

**Some Uses of Language in Responding to Literature.**

Pub Date 75

Note—24p.; Paper presented at the Annual Conference of the New York State English Council (25th, Buffalo, October 9-11, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Language Usage, \*Literary Analysis, \*Literature Appreciation, Response Mode, Secondary Education, \*Student Reaction

This paper argues that people can be trained to use language to respond to varieties of literature with more discrimination and with more confidence than in the past. This is true first, because there are now studies which detail categories of response to literature; and second, because clinical psychiatrists and psychological counselors have developed uses of language which can be directly applied to the process of responding to literature. Two versions of a classroom discussion about "A Spring Night" are given in the form of a script. The most significant techniques developed by psychologists which can be used directly in responding to literature are described. Also examined are four types of responses to poetry (sense, feeling, tone, and intention) and five general categories of response to literature (meaning, feeling, structure, theme, and value). (TS)

Descriptors—\*Class Activities, Critical Reading, Elementary Secondary Education, \*Instructional Materials, \*Newspapers, Reading, \*Reading Interests, \*Reading Materials, Teaching Methods

This booklet describes the daily newspaper—how it works and why it is a vital part of society, explains some of the choices the newspaper offers its readers, discusses some of the ways it gets people to read certain stories, and explores the definitions of what makes up the news. The news, as it is presented in the newspaper, is broken down for easier understanding through examples of the pyramid structure, headlines, and other aspects of newspaper format. Various sources for newspaper stories are examined, including quotes from prominent individuals, information from wire services and syndicates, and news gained by covering events in the community. The purpose of editorials in the newspaper is also discussed, the advantages of the advertising section for the newspaper reader are reviewed, and the use of photography is examined, with emphasis on the importance of photographs in telling what does not come across in the news stories. The booklet concludes with a glossary of newspaper terms. (RB)

Identifiers—\*Foreign Press

While there is certainly an abundance of excellent material concerning the world's press today, since World War II there has been an absence of any type of systematic synthesis of this information which might be used as a text or reference book by persons interested in the broad aspects of international communication. This book is intended to provide such a synthesis. Like the earlier ones, this edition deals chiefly with the newspaper press of the principal nations, but there is also some emphasis on the magazine press. New sections which differ from the 1964 edition are the overview of the U.S. press, which appears at the end of part one, and the in-depth survey of African nations which were colonies when the 1964 edition was compiled. This book is used to best advantage in courses dealing specifically with comparative press systems or as

a supplemental text for several basic journalism and social science courses. The objectives of the book are to present a panoramic picture of the world's press systems and to provide students who desire a more intensive study with many sources for further investigation. (RB)

**Sentence Combining: A Means of Increasing Reading Comprehension.**

Pub Date 75

Note—73p.

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

Descriptors—Elementary Education, Grade 7,

\*Learning Activities, \*Reading Comprehension, Reading Games, Reading Improvement, \*Reading Processes, \*Reading Research, \*Sentence Structure

Identifiers—\*Sentence Combining

The purpose of this study was to determine whether practice in transformational sentence combining will aid students' reading comprehension by giving them a large repertoire of syntactic constructions from which to draw when matching constructions contained in the materials they are expected to read. The first section of the document discusses the background of and need for the study, including the language processes (oral language, awareness of language structure, and syntactic maturity in written language) in relation to reading. Twenty-four seventh grade students were the subjects of this study, twelve for the experimental group and twelve for the control. Problems for sentence combining were constructed largely by the investigator, although in the beginning it was found that all students needed the preliminary models and exercises developed specifically for this research study. Some of the primary findings were that there appears to be a close link between a student's reading level and the same student's syntactic maturity level; that the greatest gains in reading comprehension from sentence combinings appeared to be from among the lower and middle groups of readers; and that experimental students made large gains in writing fluency. **Women in Literature of the Old Testament.**

Pub Date [75]

Note—12p.; Study prepared at the University of Idaho

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Biblical Literature, \*Characterization (Literature), \*Females, \*Judaism, \*Narration, Religious Cultural Groups

Identifiers—\*Old Testament

According to Edith Hamilton, "The Bible is the only literature in the world up to our century which looks at women as human beings, no better and no worse than men. The Old Testament writers considered them just as impartially as they did men, free from prejudice and even from condescension." The Bible portrays Rebekah, Rahab, Deborah, Jael, Esther, and Judith and their contributions to the nation of Israel with faithfulness and extreme candor. These women are represented in the Old Testament as multidimensional human beings—self-reliant, resourceful, influential, and courageous—but at the same time capable of resorting to morally questionable means in order to accomplish their ends. This straightforward portrayal of women is due largely to the fact that the Hebrew mind was intrinsically realistic, which accounts for much of the directness and simplicity of the Old Testament narratives and also for the fact that the writers had a respect for self-determined and resourceful women. Descriptors—Authors, \*Bibliographies, \*English Instruction, Fiction, Higher Education, Poetry, \*Reading Materials, Secondary Education, \*Twentieth Century Literature, \*World Literature

Identifiers—Nobel (Alfred), \*Nobel Literature Prize

This bibliography is a compilation of works by 44 Nobel Prize winning authors presently available at the Dutchess Community College library. Each entry describes the piece of literature for which the author received an award, provides a brief sketch of the writer, includes a commentary on the themes of major works, and lists the writer's works. An introduction to the bibliography provides background information on the life of Alfred Nobel and the prizes made available to individuals who have made contributions toward humanistic ends. The bibliography may be used as a reading guide to some classics of twentieth century literature or as an introduction to important authors. Authors listed include Samuel Beckett, Henri Bergson, Pearl Buck, Ivan Bunin, Albert Camus, and T.S. Eliot. (RB)

**Certain Assurances: The Utilities of Science Fiction and Fantasy in Shaping the Future.**

Pub Date 75

Note—21p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—English Instruction, \*Fantasy, \*Futures (of Society), Higher Education, Imagination, \*Literary Analysis, Literature, \*Science Fiction, Secondary Education, \*Social Values

Science fiction and fantasy play an important role in shaping the future while stimulating readers' imaginations. They expand our consciousness and provide living images of the world of creation, not as it is or was, but as it has the potential of becoming. Any literature, art form, or medium of expression which is capable of affecting the imaginative processes of modern man is not a distraction, it is an important force in shaping the collective dream of society. Science fiction is making it possible for mankind not only to imagine earthly paradises, commercial or visionary, but also to create them, make them work, and live within them. The utility of science fiction is that it prepares mankind for those changes of consciousness which alter experience. The contributions of science fiction to the literature on the imagination are varied, and science fiction has also been seen as the new mythology. (RB)

Descriptors—\*Adolescent Literature, \*Annotated Bibliographies, \*Booklists, \*Books, Junior High Schools, Literature, Literature Appreciation, \*Reading Materials, Secondary Education

Written for adolescents, this most recent edition contains annotations for over 1,500 publications in the fiction and nonfiction categories. Most entries have been published in the past few years, though well-written older books are also included. Topics covered under fiction include books on adventure, family life, freedom, friendship, fantasy, folklore, love, what it's like to be a member of a minority group, coping with physical handicaps, growing up female, growing up male, living in America, being in sports, solving a mystery, living in other parts of the world, imagining the future, traveling in space, and magic and the supernatural. The nonfiction section lists books about animals; adventurers; American leaders; athletes; scientists; world figures; writers; the fine arts; government; health; American and world history; hobbies; occupations; personal growth and development; places and people of the world; the sciences; social issues; sports; witchcraft, magic, and the occult; and poetry. The book also contains lists of reference tools, short story collections, and standards that have been successful. (RB)

**EDRS Price MF-\$0.76 HC-\$9.51 Plus Postage**

Descriptors—\*Child Language, Consonants, Language Development, Language Research, Language Skills, Oral Expression, \*Phonology, Preschool Education, Primary Education, \*Speech, \*Spelling, Vowels

The primary purposes of this study were to investigate the phonetic bases of nonstandard spellings invented by preschool and primary-grade children, to devise appropriate experimental techniques for eliciting judgments of phonetic relationships from young children, to identify the specific characteristics that influence children's categorization of speech sounds, and to identify the significance of children's phonetic judgments for phonetic classification and for the teaching of literacy. The six chapters of the book discuss such topics as invented spelling, experimental studies of clusters, experimental studies of prenasal nasals, and studies of vowels. Some of the major conclusions reached in this study are that (1) the basis for certain common nonstandard spellings is that children categorize speech sounds in unexpected but phonetically justified ways; and (2) categorization of speech sounds is an important component of early language learning because it influences children's efforts in spelling, giving rise to certain types of apparent errors which teachers should understand in order to respond appropriately. Descriptors—\*Educational Assessment, \*English Education, \*English Instruction, \*Language Arts, Literature, Literature Appreciation, \*National Surveys, Reading, Reading Skills, Writing, Writing Skills

Identifiers—\*National Assessment of Educational Progress

This book is intended for English language arts teachers at every level, as well as for curriculum and research specialists and other persons concerned about teaching and learning English. It provides factual information and interpretive statements of two kinds: a description of National Assessment and how it works; and a presentation of the actual contents of the writing, reading, and literature assessments, with a synopsis of the questions asked and the answers obtained. Chapter one is an introduction and chapter two gives facts about National Assessment. Chapter three discusses writing assessment and topics such as writing objectives and exercises, the assessment of essays and writing mechanics, and the uses of holistic scoring. Chapter four explores reading assessment and focuses on reading objectives and themes, reading exercises, inference sentences, and problems in analyzing reading comprehension. Chapter five examines literature assessment and such topics as literary works, literary language, reading habits and attitudes, and assessing response to literature. Chapter six is a summary discussion of such topics as students' knowledge of English and positive aspects of National Assessment. (TS)

*Brown, Lurene***Guilt in Literature.**

Pub Date 75

Note—20p.; Unpublished study prepared at Ohio University

Available from—Lurene Brown, Ohio University, Athens, Ohio

EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.

Descriptors—Drama, Ethics, \*Literary Analysis, \*Literary Criticism, \*Literature, \*Moral Issues, Moral Values, Novels, Poetry, Short Stories, Social Values, \*Thematic Approach  
Identifiers—\*Guilt

In this paper, guilt in literature is considered within the following four categories: private guilt, shared guilt, implied guilt, and public guilt. Among characters in literature that suffer from guilt as a private matter are Arthur Dimmesdale in "The Scarlet Letter," Pip in "Great Expectations," Edna in "The Awakening," and K. in "The Trial." The sharing of guilt can occur either because of the need of one person for another's assurance or assistance, or as the result of complicity. Those characters discussed in this category include Abbie and Eben in "Desire Under the Elms," Biff and Willie Loman in "Death of a Salesman," and Claudius and the Queen in "Hamlet." Works of literature in which guilt is implied include "Oedipus Rex," "Phaedra," "To Kill a Mockingbird," "Grapes of Wrath," and "The Scarlet Letter." Public revelation for wrongdoing is a prominent thematic element in "Antigone," "Billy Budd," and "Crime and Punishment." Suggested readings for each of the categories of guilt include short stories, poems, novels, and drama. (LL)

Pub Date 75

Note—232p.

Available from—St. Martin's Press, 175 Fifth Ave., New York, New York 10010 (\$18.95 cloth)

Document Not Available from EDRS

Descriptors—\*Child Language, Early Childhood Education, \*Language Development, Language Research, Language Skills, \*Learning Processes, \*Linguistic Competence, Literacy, Oral Communication, Primary Education, \*Speech

The two primary purposes of this book are to extend information about children's language learning and to look at existing notions of how children acquire language by considering what is meant by linguistic competence. The introductory chapter presents an account of two approaches to the study of language acquisition and outlines the author's viewpoint on conducting her investigations. The first approach was a study of her son at almost three years of age, while the second approach was a study of the language skills of young school children in order to describe the development of their speech, to consider how literacy affects their knowledge of language, and to explore their competence in various tasks requiring discrimination and judgment of linguistic data. Remaining chapters discuss early speech, the language of the preschool child, the language of school children, early states in literacy, linguistic competence, and form and function in children's speech. (TS)

Pub Date 75

Note—143p.

Available from—Prentice-Hall, Inc., Englewood Cliffs, New Jersey 07632 (\$4.95 paper)

Document Not Available from EDRS

Descriptors—\*Classroom Games, Communication (Thought Transfer), Educational Games, \*English Instruction, Instructional Materials, \*Learning Activities, Listening, Play, Reading, Role Playing, \*Simulation, Speaking, \*Teaching Methods, Writing

Six simulation games for English instruction in the classroom are offered in this book, the aim of which is to encourage communication. In simulation games, rules are structured to correspond to those that are an integral part of a real situation, with supporting documentation replicating actual materials pertinent to the situation. The contents of the games have to do with prison reform, car purchase, conservation, the roles of the sexes, government spending, and genetics and the family of the future. The materials include photographs, graphs, cartoons, and drawings that encourage realistic visualization of the situation. Each game consists of four segments: role choice, strategy round, negotiation round, and decision making. Each game takes from 35 to 55 minutes and little teacher supervision is necessary. (TS)

*Nagengast, Susan***Censorship and the Community: A Survey of Parental Attitudes Toward Controversial Issues in High School English Programs.**

Pub Date 75

Note—59p.; Master's Thesis, University of Minnesota

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—Academic Freedom, \*Censorship, \*English Instruction, English Programs, Films, Grade 10, \*Instructional Materials, \*Parent Attitudes, Secondary Education, \*Surveys

A survey of 225 parents of high school sophomores in a Minnesota community was undertaken in the fall of 1974 to determine parental attitudes about potentially controversial issues in high school English materials. In one sense, the intent of the survey was to determine "community standards." With the exception of objectionable language, parents were generally tolerant and not prone to censorship. Other topics included in the survey were questions about using literature or films that contain violence, black characters, drug use, antireligious viewpoints, and sexual relationships and questions about general attitudes concerning the function of literature in high schools. No significant differences were found to exist in the attitudes of subjects in different age, sex, or education groups. Parents were more tolerant of films than of books. (Author)

Descriptors—\*American Culture, \*American Literature, American Studies, Cross Cultural Studies, \*Cultural Awareness, Cultural Background, Cultural Differences, \*Ethnic Groups, \*Ethnic Origins, Higher Education

Since all American literature has been written or recounted by members of ethnic groups, teachers and scholars of American literature should concern themselves with an ethnic American literature. Although immigrants and their descendants have been culturally assimilated to varying degrees over a period of years, they have nonetheless remained significantly ethnic in a social sense. In order to cope adequately with multiethnic American literature, American literary studies should become international and Americanists should become multilingual as a group, minimally bilingual as individuals. Furthermore, they should become sensitive to the characteristics of ethnic cultures and of immigrant experiences. Toward this end, Americanists will have to join and work cooperatively with three groups of professional colleagues: literary and linguistic specialists in the non-English languages, specialists in the history and culture of the nations and regions from which American immigrants came, and specialists in the sociocultural history of ethnic groups in the United States and in the North America of pre-Columbian and colonial times. Descriptors—\*Communication (Thought Transfer), \*Foreign Relations, Higher Educa-

tion, Literature Reviews, \*Mass Media, \*Nationalism, Political Issues, \*Publicize, Research

One of the cherished myths of the 1960s and the 1970s has been that the countries of the world are at last giving up their long-standing nationalism and are approaching the one world that Wendell Wilkie, Dag Hammarskjöld, and many others used to talk about. There is indeed much evidence to indicate that this may be true. On the other hand, Peter Drucker has warned us that the political units of the world are on a collision course with the economic concept of one world. He points out that there is really no economic substitute for the nation state. There is increasing evidence to indicate that nationalism is on the rise and that advertising planners as well as economists and all sorts of internationalists may be in for hard times during the next decade. A review of the literature, using Western Europe as a case in point, provides support for Drucker's position. (Author/RB)

**The Multinational Business Organization: A Schema for the Training of Overseas Personnel in Communication.**

Pub Date Apr 75

Note—21p.; Not available in hard copy due to marginal legibility of original document

**EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.**

Descriptors—\*Behavior Patterns, Communication (Thought Transfer), \*Cross Cultural Studies, Cultural Factors, Foreign Relations, Higher Education, \*Organizational Communication, \*Schematic Studies, \*Social Values

American businesses, government agencies, and cultural organizations are engaging increasingly in multinational activities. Such activities place Americans and the constituents they represent in different cultural contexts that involve and require adjustment and adaptation to situations and people with different value systems and behavior patterns. This paper focuses on the primary cross-cultural verbal and nonverbal communication elements entailed in the behaviors of personnel in multinational organizations. A schema for the training of overseas personnel is proposed, and examples of different problems arising in cross-cultural contacts are given. The schema represents a continuum for observing and classifying a wide range of culturally determined behaviors. The areas covered in this schema deal with the most recurrent behavioral variables involved in cross-cultural communication breakdowns. Even though the categories in the schema may interrelate or occasionally overlap, the intent is to arrange them in an order of a likelihood of priorities of occurrence in interactional contexts. (RB)

Descriptors—Behavior Patterns, \*Communication (Thought Transfer), \*Decision Making, Ethics, \*Group Behavior, \*Group Dynamics, Higher Education, \*Political Issues, Public Officials

Identifiers—\*Watergate

This essay explores the group dynamics relating to the events surrounding the Watergate coverup and attempts to identify the factors that predispose of the parties involved to make inappropriate, foolish, and ineffective choices concerning a criminal case in which none of them initially was culpable. The initial Watergate breakin is briefly outlined, and the details of the Watergate coverup are described extensively through the use of manuscripts from the Watergate hearings and books written by such eminent political commentators as Theodore H. White, Arthur Schlesinger, and Dan Rather. Four points of view are then offered to account for the behavior patterns and decision-making procedures of the individuals involved in the Watergate coverup. Each of these views is dismissed as only a partial explanation for the coverup because President Nixon could still have made the right decision to avoid culpability. In conclusion, the author argues that to understand why Nixon did not, one has to focus on the communication behavior of the group involved as that behavior reflects the forces that inhibited their ability to make not only what would have been "the easy" decision but the right one as well. (RB)

**Dialects for the Stage: A Manual and Two Cassette Tapes.**

Pub Date 75

Note—182p.

Available from—Theatre Arts Books, 333 Sixth Ave., New York, New York 10014 (\$39.95 Manual and 2 Cassettes)

**Document Not Available from EDRS**

Descriptors—\*Dialects, Dialect Studies, \*Dramatics, \*Magnetic Tape Cassettes, \*Regional Dialects, \*Speech Instruction

This document contains a manual and two cassette tapes designed to help actors and actresses learn to speak various dialects. The tapes and the manual are arranged for the play-it-and-say-it method of dialect acquisition. The first three parts discuss the tapes and the manual in general, the dialect texts and dialect data, and the steps involved in learning dialects. Part 4 gives written and taped examples of nine North American Dialects, including such dialects as Midwestern, Southern, and French Canadian. Parts 5, 6, and 7 give examples of standard English (North American and British), the dialects of Great Britain and Ireland (Cockney, Welsh, North British, Scottish, and Irish), and European accents (French, Italian, German, Russian, Spanish, and general European). Part 8 gives the symbols and sounds of the International Phonetic Alphabet and lists the names of the speakers for each taped dialect. (TS)

**An Investigation of Sex Differences in Regard to Nonverbal Body Gestures.**

Pub Date 75  
Note—19p.; Paper presented at the 1975 Summer Conference of the Speech Communication Association

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
Descriptors—\*Behavior Patterns, \*Body Language, Communication (Thought Transfer), Educational Research, Higher Education, Interpersonal Relationship, \*Nonverbal Communication, \*Sex Differences

Designed to provide clues to research questions on sex differences nonverbal in communication, this paper contains the results of dyadic conversations processed on video tape. Twelve undergraduate and graduate student volunteers were solicited along with employed nonstudents between the ages of 19 and 30. Results indicated that males displayed more nonverbal gestures than did females, regardless of the sex of the conversation partner, and that males displayed slightly more gestures with males than with females. The findings of this study indicated that nonverbal communication serves as an illustrator of and a supplement to the verbal element, but also acts as the functor for gender display. The data from the study are presented in both narrative and table format. (RB)

**A Critique of "An Exploratory Investigation of the Effects of Communication Apprehension in Alternative Systems of Instruction" by Michael Scott, Michael Yates, and Lawrence Wheelless.**

Pub Date 75  
Note—8p.; A Critique Presented at the Annual Convention of the International Communication Association (Chicago, Illinois, April 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
Descriptors—\*Analytical Criticism, \*Communication (Thought Transfer), \*Communication Problems, Educational Alternatives, Educational Research, \*Learning Processes  
Identifiers—\*Communication Education

In this critique, comments and suggestions are offered that might be integrated into future research by Scott, Yates, and Wheelless on the topics of communication apprehension and alternative instructional approaches. These authors suggest, in their paper, that one's level of communication apprehension should be predictive of

attitudes held toward, and of satisfaction with, various instructional methods. This paper concludes that while the overall question posed by Scott, Yates, and Wheelless is interesting, the approach and the methodologies chosen for testing the research are weak. (TS)

**Women and Society: The Mass Media.**

Pub Date 75  
Note—26p.; Paper presented at the 1975 Summer Conference of the Speech Communication Association

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**  
Descriptors—Communication (Thought Transfer), Cultural Images, \*Females, \*Feminism, Life Style, \*Mass Media, Publications, \*Sex Role, \*Sex Stereotypes, Social Values, Television

Males and females have become vitally concerned with sex-role images in the mass media because of the ubiquitous nature of the media. Mass media, which have heavily penetrated Americans' lives, have the potential for initiating, reinforcing, or denying certain social values. In studies of various media, including magazine advertising, magazine fiction, television programing, television advertising, children's literature, instructional films, comic books, coloring books and many more, the males in all enjoy a wider variety of roles and goals than do media females. While males are portrayed in important positions in government, education, politics, the industrial world, and the family, females in the media are circumscribed by their sexuality and domesticity. Furthermore, research indicates that children personalize and utilize media content as an information source for their social roles. Other evidence indicates that the media have perpetuated sex-role stereotypes which are actively functioning at all levels of society and across all social institutions. (A nine page bibliography on this issue is included.) (LL)

*Blahna, Loretta J.*  
**A Survey of the Research on Sex Differences in Nonverbal Communication.**

Pub Date 75  
Note—13p.; Paper presented at the 1975 Summer Conference of the Speech Communication Association

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
Descriptors—Behavior, Body Language, Communication (Thought Transfer), Individual Differences, \*Nonverbal Communication, Psychological Patterns, \*Sex Differences

Although the bulk of recent research on nonverbal communication has involved studies of the functions of nonverbal behavior (emotion conveying, regulation, and adaption), a few studies have focused on the differences in nonverbal communication variables between men and women. These differences have been found in vocal patterns, intensities, length of speaking turn, eye gazing and contact, amount and timing of smiling behavior, posture and movement, spacing, and the amount, initiation, and area of touching. In addition, the same or similar nonverbal behaviors may be given different meanings by observers, as in vocal patterns, the smiling behavior of parents, and eye behavior. If future studies confirm that sex is a significant variable in nonverbal communication, sex should be a consistent component of further research design, teachers should be aware of the differences in a classroom context, and women and men may want to acquire new nonverbal behaviors to expand their repertoire of communication. (Two charts are included, one on simulated vocal cues and personality types and one on touching.) (JM)

Having as its goal the further development of understanding through the communications media, this document examines the utilization of broadcast media from both technological and sociological vantages. The papers contained herein were presented at the twenty-third annual Broadcast Industry Conference held at California State University in San Francisco in 1973. Divided into four parts, the contents include "International Satellite Problems," which summarizes the extent to which satellites are used around the world, the role of satellites in specific countries (Korea, China, Canada, and India), and the problems satellites are creating; "International Broadcasting Problems," which discusses the implications of broadcasting on the educational, social, and political elements of various countries; "American Broadcasting Problems," which explores the nature of American television and the philosophy behind it, while also commenting on the changing patterns of television; and "Broadcast Facilities of Pacific Nations," which contains a run down of the broadcast capabilities of nations in the Western Hemisphere. The intent of this paper is to come to terms with some of the philosophical issues raised by community involvement in the education power structure. The literature reviewed identifies some of the underlying assumptions and explores some implications of increased citizen involvement for both educators and the society they serve. Two modes of thought emerge in the literature on community involvement: the democratic ideal that citizens should have control over the governmental institutions they create, and the contradictory view that the experts (educators) should have control over policy. The complex nature of the issues, as viewed by professional educators and community involvement advocates, is developed in the report. (Author/MLF)

Descriptors—Building Plans, Cost Effectiveness, \*Educational Specifications, \*Facility Requirements, \*House Plan, Interaction, Open Educa-

tion, \*Recycling, \*School Improvement, School Organization, School Planning, Senior High Schools, Space Utilization

A task group was charged with remodeling an existing connected old building-new building complex to make it feasible for a house-oriented senior high school educational program. Constraints to be resolved were keeping costs low, maintaining departmental proximity while encouraging interdisciplinary activities, providing for small groups, and arranging for even utilization of facilities. The group decided on an interactional houseplan that organized academic disciplines by department and the students into heterogeneous groups each with 25 students and one faculty member. Physical modifications to meet the needs of this reorganization are itemized. Background information contained in the report includes school floor plans, community demographic characteristics, educational philosophy and objectives, curriculum program, extracurricular activities, enrollment projections, specifications for teaching and learning areas, and comparisons between the new middle school and the present high school. Descriptors—Academic Ability, \*Academic Achievement, Bibliographies, Educational Equality, Educational Opportunities, \*Educational Research, Elementary Secondary Education, \*Equal Education, \*Nature Nurture Controversy, Social Factors, \*Socioeconomic Background

This monograph discusses some basic concepts and reviews some of the more salient research findings dealing with equality of educational opportunity. Major emphasis of the author's inquiry is on how educational opportunity and educational attainment relate to social background. Chapter 1 attempts to clarify what is meant by equality of educational opportunity. Chapter 2 discusses the relationship between IQ and educational attainment, on the one hand, and occupational success. Chapter 3 argues that the concept of ability must be regarded in a sociological context. Chapter 4 is a comprehensive review of European and American research on reserves of talent, using Sweden as an illustrative case. Chapter 5 examines how various features of the formal educational system affect educational opportunity. Chapter 6 considers the relationship between home background and educational attainment. Finally, chapter 7 presents the author's conclusions and elaborates on some of the policy implications of the findings. (Author/JG)

Identifiers—Virginia (Arlington)

Schoolhouses have the potential to serve a larger constituency by providing social services such as day care, health care, adult education, senior citizen clubs, and recreation. The numbers of school-age children are declining, so using school space for community programs is being considered by many school districts. This issue reports on one community, Arlington, Virginia, that has extensive experience in the use of school space for other community purposes, and on two midwestern districts that converted vacant

discount department stores into career education facilities. (Author/MLF)

Identifiers—\*Street Academy

The Street Academy is an alternative school specially designed for students aged 12 to 18 who cannot acclimate to the regular public school system. The purpose of the evaluation is, generally, to see if the program is serving the students for whom it was established. The evaluation is also concerned with such areas as academic skills development, student absenteeism, the rate at which students are acquiring high school credits, evaluations of the teaching staff, student perceptions, student and parent perceptions of

the program, and parent evaluations. Extensive data are presented on the evaluation findings. On the whole, the program was found to be making positive progress toward meeting its objectives. There are, however, a number of areas that should be examined more closely and a number of changes that may have to be seriously considered if the Street Academy program is to grow in the proper direction and be of optimum service to its students and the community. Recommendations are included. (Author/IRT)

**Identifiers**—\*Southeast Community Education Center

The Southeast Community Education Center is a nondenominational, elementary alternative school that enrolls up to 90 children on a first-come, first-served basis. It is intended to provide a community education center whereby the educational needs of minority group youngsters can be fulfilled in a true "community school." The total school program is envisioned as a model for community involvement and humanistic education for families within the community. The program evaluation is concerned with academic achievement in reading and mathematics, reduction in absenteeism, staff evaluations, student evaluations, parent evaluations, and evaluations of college educators working with the school. The findings are presented in detail. The Southeast Community Education Center clearly attained its major objectives during the 1974-75 school year. Five reasons for the center's success and five recommendations for possible development are given. (Author/IRT)

**Identifiers**—\*Walbridge Academy

Walbridge Academy, the oldest alternative education program in the Grand Rapids School System, has a student population of about 250 students in grades 7 through 12. The majority of students are admitted to Walbridge on a first-come, first-served basis; however, some positions are reserved for students who have been placed on extended suspension by the regular schools. The school employs a behavior modification system centering on token points. The curriculum includes reading, math, science, history, social studies, and English. The evaluation objectives focused on student progress toward graduation, social and academic attainment, program strengths and suggestions, and program observation and description. Extensive information on the findings in the areas of student population, academic achievement, absentee rates, high school credit acquisition, a follow-up of 1973-74 school year students, staff evaluations, student evaluations, and parent evaluations are included. Walbridge Academy is achieving its objectives with a large proportion of its students. Suggestions are included in an attempt to aid further improvement of the program. (Author/IRT)

**Identifiers**—\*Sweet Street Academy

The Sweet Street Academy is a school within a school. Most of its 26 students are below grade level in reading and mathematics and have histories of behavioral difficulties or adjustment problems. The objectives of the program are to build meaningful personal relationships with each student and to develop student reading and mathematics achievement. Extensive data is presented on findings related to the student population, academic achievement of the students, attendance rates, staff evaluations, interviews with the staff, student evaluations, parent evaluations, and evaluations of the program by members of the staff of the parent school. The evidence seems to indicate that the program is successfully achieving the goals of building a meaningful personal relationship with students and improving reading and math achievement. The major problems within the program seem to stem from the lack of opportunity for full planning and for preparation for the admission of students. Recommendations are offered to help improve the program. (Author/IRT)

**Assessing the Organizational Health of School Systems.**

Pub Date 21 Feb 75

Note—12p.; Paper presented at the Annual Convention of the American Association of School Administrators (107th, Dallas, Texas, February 21-24, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Change Strategies, Educational Change, Elementary Secondary Education, \*Evaluation Needs, \*Organizational Change, \*Organizational Effectiveness, \*Program Evaluation, \*School Systems

In considering the organizational functions of school systems, the following assumptions need to be examined: client achievement cannot be used as a major index of organizational health; organizational functioning relates closely to the utilization of available human and material resources; maximizing available resources increases organizational adaptability to change; and schools have limitations and need to recognize them. Characteristics leading to an assessment of organizational health include clearly stated purposes and responsibilities, a systematic process for evaluation, a built-in spirit and attitude toward change, and an ability to utilize influence as a feedback mechanism for growth and development. Such characteristics permit school systems to retain their uniqueness relative to their own situations. Procedures for gaining control over the above characteristics would vary from school system to school system. However, the outcome for different school systems should be the same; improved efficiency and productivity could result in better educational opportunities for the children and community. Despite the diversity of national circumstances, all countries have the common aim of providing the right kind of school buildings in the right place, at the right time, and at the right cost. The objective of the present study is to establish the best institutional means for achieving this aim and, insofar as there are common patterns between countries for such institutional arrangements, to try to identify them. The institutional arrangements for school building relate essentially to the total period from the initiation of a project (that is, as soon as the need for a school and its type and size have been determined) through completion of the building and its subsequent maintenance and evaluation. The processes involved in this must, moreover, be viewed at all times in the wider context of forward planning of school building programs if implementation is to be effective and resources properly used. Indeed, the framing of school networks and of forward capital programs to meet educational needs are key factors in the whole matter. (Author/IRT)

A management-by-objectives project designed to provide a rational basis for implementing a programming-planning-budgeting evaluation system in the school district is summarized. The project goal was to design and implement an accountability model utilizing participative management as a tool for development. Three organizational phases involved in the project were (1) identification of the needs of the school district and organization of the administrative functions in line with these needs to develop a system of accountability; (2) identification of the educational program of all grade, content, and special areas in behavioral terms; and (3) development of the supportive programs into an operationalized management-by-objectives system. Accountability: Brand L.  
Pub Date May 75

Note—13p.; Paper presented at the National Forum on Educational Accountability (Denver, Colorado, May 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Academic Achievement, \*Educational Accountability, Educational Administration, \*Educational Objectives, Elementary Secondary Education, Management by Objectives, \*Performance Criteria, \*School Responsibility, Teacher Responsibility

Effective accountability always involves four essential elements: Knowledge of what is required, knowledge of who is responsible to whom, knowledge of how to be successful, and knowledge of the consequences of not being successful. The movement in education now called accountability has added the additional requirement that educators stipulate the objectives to be achieved by students, the actual success in achieving them, and the costs incurred in the process. This is probably best called performance accountability; its underlying theme is that the objective of education is learning, not teaching. The appropriate unit of accountability for results is the school and the school district. If the school as a system does not attain its objectives—if students do not learn—the system is redesigned until they do. Regardless of the results, the students or parents or teacher are not blamed for failure to learn. (Author/JG)

Descriptors—Conceptual Schemes, Economic Research, \*Educational Research, \*Educational Sociology, Higher Education, Models, \*Research Methodology, \*Social Change, Social Sciences, Socioeconomic Influences, Student Teacher Relationship, \*Systems Analysis

This book explores the possibilities in a new approach to educational analysis—a fusion of methods drawn from economics, sociology, and social psychology. The author combines his explanation of socioeconomic analysis with the presentation of several examples that illustrate the application of his method to different analytical problems. The book is organized into three parts. In part 1, the author shows how socioeconomic analysis might be applied to the educational systems described in Plato's "Republic" and Lerner's "The Passing of Traditional Society." He then presents a model that attempts to capture selected aspects of the relationship between modern societal change and higher education curriculum. Part 2 discusses two models, one dealing with the curricular implications of changes in teacher supply and demand, and one dealing with the dynamics of change in American higher education during the 1960s. Part 3 first presents a model designed to describe the social dynamics within a school and then offers a detailed analysis of teacher-student interaction within a particular course. (Author/JG)

Together: Schools and Communities. Handbook [and] Resource Directory.

Institute for Responsive Education, Boston, Mass.; Massachusetts Advisory Council on Education, Boston.

Pub Date Aug 75

Note—331p.

Available from—The Institute for Responsive Education, 704 Commonwealth Avenue, Boston, Massachusetts 02215 (\$4.00)

Document Not Available from EDRS

Descriptors—Community Control, Community Involvement, \*Cooperative Planning, Elementary Secondary Education, \*Information Sources, \*Resource Guides, Resource Materials, \*School Community Cooperation, \*School Community Relationship  
Identifiers—\*Massachusetts

This publication consists of two separate but related parts, a handbook that discusses possible approaches to developing improved school-community collaboration and a resource directory that lists approximately 800 agencies and publications that may be helpful to educators and citizens who are contemplating some type of collaborative arrangement. Although both sections are aimed primarily at Massachusetts residents, they contain considerable information of value to residents of other states as well. Entries in the resource directory are grouped according to whether they describe special agencies, Massachusetts agencies, out-of-state agencies, or publications. In addition, three separate indexes list entries by title, by topic, and by potential users. (JG)

Descriptors—Educational Trends, Elementary Secondary Education, \*National Surveys, School District Spending, \*School Statistics, \*School Surveys, \*Statistical Data, Student Enrollment, \*Tables (Data)  
Identifiers—\*United States

Basic educational data, for fall 1974, on all public elementary and secondary day schools in the United States, the District of Columbia, and some outlying areas under U.S. jurisdiction are presented in this report. National trend data since fall 1970 are included for selected items. Detailed data, by state or other area, are provided on the numbers of local school districts, staff, pupils, and high school graduates in fall 1974, as well as estimated expenditures for school maintenance and operation and average salaries of professional instructional staff for the 1974-75 school year. Also included are data on the numbers of public elementary and secondary day schools for 1973-74. Most of the data are also shown separately for the 20 most populous cities. The information presented here was gathered in a survey of public elementary and secondary day schools conducted by the National Center for Education Statistics in cooperation with education officials of the individual states. Descriptions of survey procedure, other methodology, and coverage are included in the report, and a replica of the report form and instructions sent to respondents is presented in the appendix. R&D Funding Policies of the National Institute of Education: Review and Recommendations. Final Report.

National Inst. of Education (DHEW), Washington, D.C.

Pub Date Aug 75

Note—110p.

EDRS Price MF-\$0.76 HC-\$5.70 Plus Postage

Descriptors—Educational Development, Educational Improvement, \*Educational Policy, \*Educational Research, Federal Aid, Federal Government, \*Federal Programs, \*Government Role, Regional Laboratories, \*Research and Development Centers

Identifiers—\*National Institute of Education, NIE

This report reviews the education research and development funding policies of the National Institute of Education (NIE) and attempts to evaluate the impact of those policies on the nation's education research and development system, particularly the regional education laboratories and research and development centers established by the Federal government in the 1960s. The report is based on the work of ten consultants and represents a synthesis of the different consultants' views. An additional paper prepared by one of the consultants is included as an appendix. Individual chapters of the report discuss the task

and procedures of the consultants, the role of research and development in improving education, present resources for education research and development, the context for policy-making at NIE, policy directions at NIE, and the conclusions and recommendations of the consultants. (JG)

Descriptors—\*Educational Facilities, Elementary Secondary Education, Flexible Facilities, Modular Building Design, \*Open Plan Schools, Questionnaires, School Design, \*School Surveys, \*Student Attitudes, Tables (Data), \*Teacher Attitudes

Identifiers—Canada (Toronto), SEF, \*Study of Educational Facilities

This study attempts to evaluate Toronto-area schools built using the Study of Educational Facilities (SEF) building system from the standpoint of the teachers and students who use the schools. While the SEF building system did not dictate an open-space plan, all local school boards in the Toronto area designed their SEF schools with varying degrees of open space. Emphasis of the study was on analyzing students' and teachers' reactions to open-plan schools, rather than to SEF schools as such; however, only SEF schools were included in the survey. An extensive questionnaire was administered to a sample of 979 grade five and grade eight students from 22 SEF schools to determine their attitudes toward the open educational program and building design. A longer and more sophisticated questionnaire was completed by 535 of the 586 professional staff members at the same 22 schools. Responses to the different questionnaire items are presented in graph and table form, grouped in separate chapters according to subject matter. Replicas of the student and teacher questionnaires and sample floor plans of several SEF schools are included in the appendix. (JG)

Identifiers—\*Indiana (Highland)

This publication describes the Highland Superintendency Team Assessment Program, an effort to apply the principles of management by objectives to the evaluation of school district administrative personnel. Section 1 presents the basic rationale and goals of the assessment program and explains the concept of "educational leadership by objectives" that underlies the assessment program. Section 2 discusses indicators of administrative effectiveness in eight specific task areas. Section 3 provides a detailed description of the procedures and requirements of the assessment plan, and section 4 presents evaluation reports and forms developed for use in the assessment program. School Improvement Through Developing Leadership Capacity.

Pub Date 31 Jul 75

Note—13p.; Paper presented at the Council of Chief State School Officers' Institute (Laconia, New Hampshire, July 31, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

**Descriptors**—\*Administrative Personnel, \*Educational Administration, \*Inservice Education, \*Leadership Responsibility, \*Leadership Training, \*Management Development, \*Professional Continuing Education, \*School Improvement, \*Social Change

School administrators on all levels are facing new challenges and demands for new skills and capabilities. More and more is being demanded of education as society becomes more and more complex. As more is demanded, the responsive capabilities and leadership sophistication of school administrators become critical factors in meeting the challenge of education in modern America. The school administrator must be accepted as a leader, and he must earn this acceptance through his performance. Very little money is spent to develop leadership for the vast educational enterprise that spends \$108 billion a year and involves three of every ten Americans on a full-time basis. More than \$2 billion a year in federal money is spent on undergraduate grants, loans, and fellowships, but the practicing school administrator has no access to a sabbatical, grant, or fellowship. School administrators should be offered more renewal opportunities—more experiences that will bring new insight and fresh ideas to the school. For it is hard for any organization to exceed the quality of its leadership. (Author/JG)

This booklet provides an overview of the changes in the area of student rights in recent years. Most of these changes have been mandated by the courts and cover such areas as discrimination, student records, searches, religion in the schools, freedom of speech and assembly, suspension, and expulsion. The author holds that in the future there will be a decline in student rights litigation because teachers and administrators have become and will continue to become more aware of legal principles in the schools. **Identifiers**—\*Illinois (Quincy)

This paper focuses on four participants in the public schools: parents, students, teachers, and administrators. These parties make up the key school community. This discussion highlights the rights and responsibilities of each of these major groups, especially in the curriculum, budget, and personnel areas of educational organization. In order to provide perspective, the discussion begins with the broader relationship of the school to the public community. This broad framework also emphasizes the emerging roles of the four participants as they deal with the dramatic changes that have taken place in society and that impinge on the school. After an extensive discussion of the problems associated with public participation in the schools, the subject changes to the solutions that are possible. Emphasis is placed on educational alternatives that allow the key participants to be involved in the governance of the schools and that allow each parent, each student, and each teacher to choose the type of educational environment to which he or she is attracted. In this way each participant controls his choice; no type of education is imposed on anyone. (Author/IRT)

**Identifiers**—\*West Virginia (Kanawha County)

Divided into three main sections, this monograph about the Kanawha County textbook controversy deals with lessons drawn from that conflict. In answering the question of what happened, the author begins with events that predated any outward signs of dissent, such as the phasing out of the citizen advisory committee on textbook selection, and follows the major events to their conclusion. The section on why it happened focuses on the National Education Association assessment, responses to that assessment, and analyses that appeared in the local papers. The lessons to be learned center on the issue of control of the schools. The author notes that the battle of the books was a battle for man's destiny and that the control of schools is a legally shared responsibility that gives all the people a chance to help shape that destiny. **Descriptors**—\*Community Education, \*Community Resources, \*Community Services, Continuous Learning, \*Educational Resources, Elementary Secondary Education, Human Capital, Human Resources, \*Resource Materials

No matter what its size or location, every community has vast resources potentially useful for teaching and learning. However, these rich resources can become teaching tools only if they are located and analyzed and the resultant information is made accessible to teachers. This book indicates how these resources can be organized and made readily available to all persons in the community. Unlike traditional learning materials, community resources are nonbook in character. This means that learning from them requires the learner to rely heavily on his powers of observation. Therefore, teachers have a responsibility for helping children develop competency in observing as well as literacy in reading. (Author/IRT)

**Descriptors**—\*Cross Age Teaching, Elementary Secondary Education, Program Descriptions, Summer Programs, Teacher Role, \*Teaching Methods, \*Tutorial Programs, \*Tutoring

Children teaching other children is not a new idea, but it is an effective way for older children to have a chance to help younger children and to learn effective methods of helping. This booklet describes numerous effective tutoring programs while outlining the origins of cross-age helping programs, pointing out traps to watch for, and noting key elements in an effective program. Emphasis is given to the need for training and supporting the older, tutoring students. Many programs have training programs to help the older students learn (1) how to relate constructively to small children, (2) how to teach specific subjects or skills, and (3) how to use their own creativity to invent games and other learning activities to help those younger. #### Document Not Available from EDRS

**Descriptors**—\*Ability Grouping, Ability Identification, Elementary Secondary Education, \*Equal Education, \*Socioeconomic Influences, \*Socioeconomic Status

This booklet provides a synthesis of the few existing well-designed studies of ability grouping's status and impact. The body of the report has three main sections: preliminary statements, conclusions, and recommendations. The preliminary statements serve to define ability grouping and

outline the ways in which it is used. The conclusions are presented as numbered statements followed by supporting detail. Read in sequence, these statements form a logical argument or brief in support of the recommendations that follow. The recommendations are also presented in a numbered statement format. It is recommended that most forms of ability grouping not be used. A major reason for the recommendation is the negative effect ability grouping has on children of lower socioeconomic status. Ways in which alternative practices, singly and in combination, may be used to achieve the improved schooling originally sought via ability grouping are included in the conclusions. (Author/IRT)

Descriptors—Behavior Standards, \*Discipline, \*Discipline Policy, \*Discipline Problems, Elementary Secondary Education, \*Guidelines, \*Self Control, Student Behavior, Student Rights

Before discussing discipline policies and practices specifically, the authors survey the basis for discipline, the kinds of discipline, the needs and sources of discipline, and the relationships between parents and students and discipline. The authors point out the need for encouraging self-discipline and make the point that discipline and punishment are not the same thing. The bulk of the booklet discusses and provides examples of discipline policies on the district, building, and classroom levels. The discussion of classroom discipline provides general tips on classroom control, an analysis of problem types and problem situations, and suggestions for establishing classroom standards. (IRT)

Descriptors—\*Career Education, Citizenship, \*Curriculum, \*Curriculum Development, \*Curriculum Evaluation, Elementary Secondary Education, Individual Development, \*Self Actualization

After positing the need for the bedrock of schooling (reading, writing, and computing numbers and quantities), the author examines the content and presentation of the rest of the curriculum. Two guiding principles are used in this examination: (1) surprisingly few particular pieces of knowledge and skill must be mastered by everybody in the same form, and (2) generally, what is truly essential is some big goal and there may be many different ways of reaching that goal. The author is particularly interested in four purposes of the curriculum: offering a career education, enabling students to live with technology, developing effective citizenship, and promoting personal fulfillment. The author considers that much of the knowledge currently a part of the curriculum is deadwood and calls for a return to the old ideal of a liberal education. A liberal education is simply an education that uses organized content, drawn from high in the culture, in the making of a human being. Toward that fulfillment, the greatest essentials are readiness for a fine lifetime career, effectiveness as a citizen, and enrichment of the inner self to its full potential. (Author/IRT)

Descriptors—Guidelines, Leadership, \*Leadership Training, \*Parliamentary Procedures

This is not a manual on parliamentary procedure. It is a discussion that posits that parliamentary procedure is not a complicated and esoteric subject of interest and of use only to an enlightened few who have the fortitude to plow through a whole manual on the subject, but that parliamentary procedure is a practical tool of leadership. Three selected topics that are of central importance and that may be used to illustrate methods of analysis and preparation are presented here. The topics and the order of discussion are chosen as generally representative of a natural progression of events in a deliberative assembly. The topics are (1) review of the first principles of parliamentary discussion and deliberation from which are derived the various motions, procedures, and practices; (2) discussion of the preparation of original main motions calling for action by an organization; and (3) review of the conventional motions and procedures and their functional uses in the discussion and approval or disapproval of main motions. **Teacher Attendance Improvement Program. A Joint Business-Educator Project.**

Greater Newark Chamber of Commerce, N.J.  
Pub Date Aug 75  
Note—23p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Change Strategies, Educational Administration, Elementary Secondary Education, \*Guidelines, Labor Economics, Management Systems, \*Personnel Policy, Problem Solving, \*Teacher Attendance, \*Teacher Employment

Identifiers—\*Attendance Improvement Plan, New Jersey

This report reviews the experiences of two New Jersey school districts that have initiated Attendance Improvement Plans (AIP) for professional school personnel. It is intended to summarize a 1974 report entitled "Program to Improve Teacher Attendance." The districts that participated in the pilot project were Newark, with approximately 72,000 students, and Ewing Township, with approximately 5,200 students. Each district developed its own policies and procedures for improving staff attendance, based on an analysis of staff absences in the district. During the first two years of AIP implementation, the staff absence rate in Newark dropped from 6.8 percent to 5.5 percent, while the absence rate in Ewing fell from 3.3 percent to 2.2 percent. Some of the steps taken by the two districts are described, and suggestions are offered for superintendents who would like to initiate an AIP in their own district. (JG)

**Assessing Competency Needs in Administration.**

Pub Date Aug 75  
Note—16p.; Paper presented at the meeting of the NCEA Interest Group on Competency-Based Education for Administration (Bozeman, Montana, August 22, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Administrator Attitudes, \*Administrator Role, Data Analysis, Elementary Secondary Education, \*Job Analysis, National Surveys, \*Occupational Surveys, \*Principals, \*Research Methodology, School Administration, Systems Approach

The purpose of this study was to specify and test a methodology for deriving competency statements for the role of principal, using a need assessment technique derived from system theory.

A national sample of secondary school principals was selected from a group of principals previously identified for their overall excellence in developmental activities. Respondents were asked to rate the importance of each of 39 competency statements that were developed in an earlier job analysis of the principalship. The 39 competencies were then grouped into seven competency areas, and the data were analyzed to calculate the relative importance of each category area as perceived by the respondents. Principal as school climate leader and principal as leader in community relations ranked as the highest of seven areas of competence. Principal and management and principal and student personnel ranked lowest of the seven and were significantly lower (at the .01 level) than the highest two areas. (Author/JG)

Descriptors—\*Administrative Policy, Educational Administration, Educational Change, \*Educational Trends, \*Graduate Surveys, \*Graduation Requirements, National Surveys, Secondary Education, Statistical Data, \*Student Attitudes, Student Characteristics

Identifiers—\*Early Graduation

This publication examines the growing trend toward early high school graduation, describes some of the characteristics and attitudes of early graduates, and discusses possible administrative responses to the increasing popularity of early graduation. Much of the discussion is based on the results of a school survey taken during the 1974-75 school year. The survey showed that 53.7 percent of American public high schools currently provide by policy for early graduation, and that the percentage of early graduates rose from 2.2 percent of the class of 1971 to 7.7 percent of the class of 1974. Most early graduates were successful, well-adjusted students who decided to graduate early for a wide variety of reasons. More than two-thirds of early graduates were female, and most graduated one semester ahead of their class. Three years after graduation, only 9 percent of 1972 early graduates felt they would have been better off to graduate with their class. Implications for school administrators of the trend toward early graduation are discussed, and the early graduation policies of seven high schools throughout the United States are described briefly. (JG)

**Productivity in Education. Two Addresses.**  
Texas Instruments, Inc., Dallas.

Pub Date Jun 74

Note—52p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—\*Change Strategies, \*Educational Economics, \*Educational Improvement, Educational Research, Educational Technology, Elementary Secondary Education, Individualized Instruction, \*Productivity, School Industry Relationship, \*Student Teacher Ratio

This booklet consists of two papers delivered by Patrick Haggerty, chairman of Texas Instruments, Incorporated, on the general topic of productivity in the American educational system. The first paper, "Education, Work, and Productivity," points out that while productivity per man-hour in the private sector of our economy has been increasing, productivity per man-hour in the educational sector has decreased markedly as educators continue to push for lower student/teacher ratios. The author suggests that this trend can be reversed by utilizing such technological advances as video cassettes and instructional television networks to extend education beyond the classroom and improve educational results while increasing student/teacher ratios. The second paper, "R & D and Productivity in Education," suggests that improved educational productivity can best be achieved by changing from our present teacher-oriented educational

system to a student-oriented system. To achieve this shift will require an expansion of research and development efforts focusing on student-centered education, the author argues. (JG)

**Planning the Use of Educational Resources or the Planner's Dream Is Beautiful, But Oh...Does It Work?**

Pub Date May 75

Note—24p.; Paper presented at the Conference on Educational Planning of the Calgary Board of Education (Calgary, Ontario, May 5-9, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors—**Change Strategies, \*Conceptual Schemes, \*Educational Administration, Educational Objectives, \*Educational Planning, \*Educational Policy, \*Models, Organizational Theories

The planner's model requires people to be rational in setting educational policies and spending resources to implement those policies. It is assumed that if an organization has difficulty in planning, the fault lies with the people, not with the model. Two images of the school cover the conceptions commonly held by many people. The image of the school as a unit of production rests on a belief that organizations act like people. Alternatively, the school may be seen as a public utility rather than as a factory. This service model of the school accounts for the fact that people develop strongly held normative views about schools and that these views frequently conflict. There are four serious objections to the planning-production model of the school. First, schools are not really organized around educational goals; second, it is very difficult to evaluate schools; third, educational policy is not made according to plan; and fourth, useful means for identifying and measuring educational resources are lacking. To improve educational planning, people must first overcome the rationalist bias in planning and look more closely at moral and experiential bases for planning. Second, people in education must be much more experimental about discovering educational purposes, applying educational resources, and evaluating the consequences of their efforts. (Author/JG)

**Into the Mainstream. A Syllabus for a Barrier-Free Environment.**

American Inst. of Architects, Washington, D.C. Spons Agency—Rehabilitation Services Administration (DHEW), Washington, D.C.

Pub Date Jun 75

Note—51p.

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

**Descriptors—**Annotated Bibliographies, \*Architectural Barriers, Building Design, \*Building Improvement, Civil Rights, Environmental Influences, \*Facility Guidelines, \*Facility Requirements, Federal Legislation, Performance Specifications, Physical Environment, \*Physically Handicapped, Standards

This syllabus contains practical information necessary to plan a barrier-free environment. The first chapter provides an account of what has happened in the past generation to make buildings and spaces accessible to handicapped persons and reviews the most recent laws, codes, and standards that prescribe the accessibility of buildings. The second chapter describes the basic physical and procedural barrier conditions that the handicapped face. The third chapter contains solutions to the removal of barriers, including drawings illustrating some of the most common conditions. It also contains techniques for organizing community barrier-free action groups and methods for evaluating compliance with applicable laws and regulations. The fourth and final chapter offers supplementary sources of information: annotated published sources, a sample questionnaire for use in evaluating accessibility of buildings, and a listing of public and voluntary agencies whose staffs can help in more detail with guidance in particular areas. **Assessing the Economic Impact of Educational Innovation.**

Pub Date 7 Feb 75

Note—35p.; Best copy available

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors—**\*Educational Administration, Educational Change, \*Educational Innovation, Elementary Secondary Education, \*Management Systems, \*Models, \*Program Budgeting, Program Costs, Systems Analysis

**Identifiers—**\*Nova Complex Schools

This paper demonstrates a process for investigating the economic and budgeting impact of educational innovations on the educational systems where they are introduced, based on the assumption that the money to finance educational innovations will have to be shifted from existing programs or other innovations. To illustrate the use of his analytical procedure, the author examines two separate models of educational innovations. Model A represents an attempt to introduce one major organizational change into a school, while Model B illustrates an attempt to implement a number of changes simultaneously. (JG)

**Descriptors—**\*Costs, \*Educational Finance, Elementary Secondary Education, \*Expenditure Per Student, National Surveys, Operating Expenses, \*School District Spending, Statistical Data, \*Tables (Data)

This publication presents detailed 1974-75 statistical data on the expenditures of local school districts throughout the United States. The reported figures reflect only actual spending by local school districts; state spending for textbooks and other local, state, or federal funds that are not funneled through individual school districts have been excluded. Extensive data tables present average per-pupil costs for a variety of specific budget categories. Costs for each category are expressed both as a percentage of total costs and in terms of average dollars per pupil. Data are presented separately for each state and the District of Columbia, and for each of the ten administrative regions of the Office of Education. In addition, national data are presented for each of seven school district enrollment categories and on a region-by-region basis for the same seven enrollment categories. (JG)

**Identifiers—**Connecticut, IGE, Individually Guided Instruction

At the present time, over 2,000 elementary schools in this country have adopted a model known as Individually Guided Education (IGE). This research carried out in 59 elementary schools in Connecticut disputed the claim of IGE advocates that the organizational component of the IGE model known as Multi Unit School (MUS) offers a more facilitative environment than do other administrative arrangements. Furthermore, it revealed a diminished leadership role on the part of the principal and an apparent lack of assumption of leadership functions by other staff members. (Author)

**Descriptors—**\*Attendance Records, Elementary Secondary Education, Fringe Benefits, \*Leave of Absence, \*Personnel Policy, State Boards of Education, Substitute Teachers, Tables (Data), \*Teacher Administrator Relationship, \*Teacher Attendance, Teacher Discipline, Teacher Motivation, Teacher Welfare, Teaching Conditions

This report details the work done in two New Jersey school districts to reduce the frequency and magnitude of professional illness absence. It deals with the circumstances of this improvement as well as with the philosophy and the new methods and procedures adopted and followed.

The history of the state sick leave policy is traced from 1895 to the present. The problem of absenteeism is presented in terms of policy implementation, in relation to ways absence is measured, and in respect to recent studies on the subject. Experiences of private business and industry in improving attendance are cited as models for school administrators. The school principal is seen as the single necessary person who must be involved in the development, implementation, and evaluation of the effectiveness of any attendance improvement plan. Various management activities are suggested. The data section of the report contains a set of narrative-charts illustrating the absenteeism rate of New Jersey teachers and that from selected studies of private sector employees. (Author/MLF)

Identifiers—Afghanistan

This paper discusses some of the factors affecting educational planning in underdeveloped countries and attempts to identify and formulate evaluation criteria suitable for appraising educational planning in such countries. Although the analytical framework proposed is applicable to any country, it is designed specifically for use where lack of data and shortage of qualified planners make it impossible to apply sophisticated mathematical models that demand the analysis of detailed statistics. To illustrate the discussion, the author makes frequent use of examples drawn from his experience with the use of educational planning for the first and second levels of education in Afghanistan. In recent years there has been an unprecedented development of educational systems in developing countries. However, analysis of educational and training systems in developing countries shows serious inadequacies, imbalances, and inadaptations. Thus, the remarkable quantitative expansion of educational systems has not been a satisfactory solution to the problems that face developing countries. According to data published by the Development Aid Committee (DAC) of the Organization for Economic Cooperation and Development, total net public and private assistance in 1968 for all DAC countries was 0.77 percent of gross national product. Altogether, assistance accounts for about 8 percent of total educational expenditures in developing countries. Obviously, any serious study of educational policies can be worthwhile only if it is based on a preliminary study of the objectives and means of promoting economic and social development. If UNESCO could take full responsibility for the technical tasks within its competence in the elaboration of educational development policies, it would help coordinate and give direction to the action of all donor countries. Identifiers—France

This paper attempts primarily to establish the guidelines of a reference framework for studying educational inequality as it relates to ethnic, religious, and socioeconomic divisions within society. In his analysis, the author focuses mainly on inequality between different socio-occupational categories. The discussion is organized in two major sections. Section 1 is a study of the mechanism of inequality, based mainly on French statistical data, and section 2 is an analysis of ex-

planatory factors that create and maintain educational inequalities. Because the analysis model is based mainly on research in western countries, it is pointed out that the model may be of limited value in studying educational inequality in other societies with different social systems. (JG)

Management is concerned with the conception and choice of goals. A manager must first determine his own goals within the framework of overriding organizational objectives and limitations. Second, a manager must determine what methods he will use to achieve his goals—on the basis of cost-benefit comparisons. Third, the manager must design his specific management plan, which must include a monitoring system that permits him to observe and respond to any deviations from the original plan. Educational preparation is a critical factor in the development of effective managers. First, managers must develop analytical ability and learn to treat knowledge and perceptions in a problem-oriented fashion. Second, managers must learn to interpret ideas creatively. Third, managers must have the ability to lead and motivate people. Fourth, managers must be able to understand and organize information flow. Fifth, managers must understand how to delegate. Educational management is often hindered by political considerations and other noneducational factors. Also, in the operational area of education, it is extremely difficult to measure cost effectiveness. However, the lessons of business administration and factory management are still largely applicable to educational management. (Author/JG)

**Descriptors—**\*Administrator Role, \*Change Strategies, Curriculum Development, Educational Administration, \*Educational Change, \*Educational Improvement, Educational Planning, Elementary Secondary Education, Research and Development Centers, Teacher Administrator Relationship, \*Teacher Role

The crucial problem for educational administrators concerned with improving the quality of education is how to build into their systems the capacity to change. Four major factors are necessary for an education system to remain sensitive and adaptable to change: a proper understanding of their own role by administrators, availability of well qualified teachers, encouragement of flexibility in teachers and schools, and provision of change-making research institutions. The administrator's role is to organize a system that enables educators to do their work effectively. The essential step toward divesting administrators of technically educative functions is improvement of the quality of teachers. When teachers are well educated and have access to continued professional training, administrators are able to encourage local initiative and autonomy. The role of administrators then is to set up innovative machinery or change-making institutions. The simplest such institutions are committees of teachers and advisers; however these groups are rarely able to generate really new ideas, techniques, or methods. For that, more formal, specialized research and development institutions must be set up. (Author/JG)

**Identifiers—**Europe (West), United States, USSR

The structures of primary and secondary general education in a number of industrialized countries are compared to show that there are all possible combinations of educational "systems" that are, in most cases, the outcome of a remote historical legacy. This legacy, regardless of its merits, should not be considered as inviolate, but rather should be subjected to new thinking time and time again, to allow for new factors (political, social, economic, cultural, scientific, and so forth) conducive to its evolution. The countries under consideration are the six member countries of the European Economic Community and the United States, Great Britain, and the U.S.S.R. The organizational structures of vocational and technical "secondary" education are not considered. The problems of reforming the structures of secondary education are not abstract: the difficulty does not lie in conceiving a system considered as ideal, but in conceiving transitional systems, concrete ways of changing over from the present parallel stream system to the reformed

EA 007 544

system, and in accepting the difficulties arising from this transition. (Author/IRT)

Planning is a complex activity that varies a great deal from country to country depending on such variables as the administrative structure of the country. The complexity of the task is increased because the five planning activities—issuing directives for planning, preparing plans, approving plans, implementing plans, and evaluating and revising plans—overlap each other. Educational planning poses specific administrative problems in three areas—determining the location of a planning agency in a governmental structure, sorting out the relationship between politics and administration, and resolving the issue of involving public opinion in planning. **Descriptors—**\*Developing Nations, \*Economic Development, Economic Factors, Educational Benefits, \*Educational Economics, \*Educational Planning, Elementary Secondary Education, Fiscal Capacity, Higher Education, Non-formal Education, \*Resource Allocations

It is fundamental in planning to see why and how expenditures on education should be limited and related to other priorities as part of economic and social planning. Integration of education with economic needs involves three elements. First, the identification of the general limits on educational expansion in the economic development planning context. Second, consideration of some of the requirements for economic development. Third, the application of the principle of selection of priorities to the educational system itself as part of economic and social planning. In order that the limited resources available to education should be well spent in relation to economic development, educational planning should consider (1) the integration of primary education with adequate measures for postprimary training as part of rural development; (2) the change and expansion of secondary and higher education in relation to future employment possibilities; (3) the creation of a mass approach to nonformal education whereby those who are working are also learning; (4) the territorial location of educational effort so as to contribute most to other types of development planning; and (5) the unit costs and the efficiency of the educational system. Because projections of manpower requirements can be an important factor in educational planning, it is important that the planner understand how they are undertaken and be able to participate in them, particularly in discussing matters of direct relevance to education. This lecture provides an introduction to the principles and the problems involved in manpower projections for educational planning. It considers (1) analysis of the existing situation of education and employment in order to prepare the basis for an educational plan that takes account of employment requirements and possibilities; (2) the main practices and principles involved in preparing a perspective plan for education in the light of manpower needs; and (3) some objections to the manpower approach to educational planning. This book contains four monographs based on research conducted in a number of African countries between 1965 and 1967 in an attempt to illuminate some of the problems confronting educational planners in developing countries. The book is one of three related volumes of case studies on educational planning in the English-speaking countries of Uganda, Tanzania, and Nigeria. Each volume consists of several previously published monographs, which have been collected in book form to facilitate comparison of the approaches taken in different countries to common problems. This volume contains studies on the process of educational planning in Uganda, Tanzania, and Nigeria. Included are the following monographs: "Educational Planning and Development in Uganda," by J. D. Chesswas; "The Process of Educational Planning in Tanzania," by A. C. Mwingira and Simon Pratt; "The Planning of Primary Education in Northern Nigeria," by J. F. Thornley; and "The Organization of Educational Planning in Nigeria," by A. C. R. Wheeler. (Author/JG)

This book contains three monographs based on research conducted in a number of African countries between 1965 and 1967 in an attempt to illuminate some of the problems confronting educational planners in developing countries. This book is one of three related volumes of case studies on educational planning in the English-speaking countries of Uganda, Tanzania, and Nigeria. Each volume consists of several previously published monographs, which have been collected in book form to facilitate comparison of the approaches taken in different countries to common problems. This volume contains studies from Nigeria and Tanzania on the costing and financing of educational development. Included are the following monographs: "The Costing and Financing of Educational Development in Tanzania," by J. B. Knight; "Financing of Education in Nigeria," by A. Callaway and A. Musone; and "The Integration of External Assistance with Educational Planning in Nigeria," by L. Cerych. (Author/JG)

This booklet offers a summary of research literature on educational productivity, as well as interpretive comments by the author on the im-

plications of such research for restructuring educational programs at the elementary and secondary levels. The booklet is organized in three sections. Part 1 describes the principal methods and techniques used in school productivity research and discusses the strengths and shortcomings of each. Part 2 describes the findings of school productivity research, focusing especially on the impact of teacher characteristics, educational practices, school service organization, and pupil characteristics. Part 3 discusses the implications of what we know about school productivity for future public policy. (Author/JG)

Photographs and descriptions of four projects using fabric to enclose large spaces are published so that administrators and designers looking for ways to build recreational facilities can consider these innovative shelters. Three of the four examples in this publication are air-supported structures: University of Santa Clara, Charles Wright Academy, and Milligan College. The other type of fabric roof, at La Verne College, is held up from a mast in a similar fashion to a circus tent. Four more large structures under construction or on the drawing boards are briefly described. Technological information and costs are provided. (Author/MLF)

This report describes the APL (Accountable unit, Program, and line item) budget system, a computerized three-dimensional program budget system that has been implemented in the Cambridge (Massachusetts) School Department. Various chapters discuss the differences between traditional budgeting and program budgeting, present an overview of the APL system, describe the implementation of the APL system in the Cambridge School Department, and provide an indepth analysis of the APL system and some of the difficulties encountered during its implementation at Cambridge. A glossary of important terms and sample budget forms and output budget reports for the APL system are included in the appendix. (JG)

Developing School Drug Policy: A Guide for Administrators.

Maine State Dept. of Educational and Cultural Services, Augusta.

Pub Date [75]

Note—47p.; Not available in hard copy due to paper color of original document

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Administrator Guides, Administrator Role, Confidentiality, Discipline, \*Drug Abuse, Due Process, Educational Policy, Elementary Secondary Education, Expulsion, Police School Relationship, \*Policy Formation, \*Principals, Rehabilitation, \*School Policy, Search and Seizure, Student Records, Student Rights, Suspension

**Identifiers—Maine Drug Education Program**

This administrator's guide is intended to aid local school administrators who formulate policies and procedures for dealing with drug-involved students. The guide suggests alternatives for those engaged in such policy-making rather than mandating a single course of action for all school districts. The guide is not intended to limit a community's prerogative to determine its own rules and regulations under existing state and federal law. Drug policies should be flexible and possess a high degree of individual application, as simplified, rigid, and general policies are frequently unworkable. Any action designed to help students meet and cope with their problems must steer a course between two concerns: what is best for the individual and what is most desirable for the total school population. In the sections on individual topics—the role of school personnel with respect to confidentiality, pupil records, the school's relationship with the police, student rights, procedures regarding suspension and expulsion, and procedures regarding readmission—an attempt is made to state the issue clearly, to refer to pertinent law, to suggest possible approaches to policy, and to explain, where necessary, the reasons for the approaches taken. A sample school policy is appended. (Author/IRT)

**The Environmental Impact of School Closures.**

Pub Date 23 Aug 74

Note—45p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**—Educational Facilities, Educational Finance, \*Educational Planning, Elementary Education, \*Enrollment Trends, \*Facility Planning, Literature Reviews, \*School Closing, \*School Size

Officials representing 60 school districts contributed information to this assessment of the experiences of school districts that have closed elementary schools in the past few years. The data collected were examined and assessed according to five major topics: (1) criteria used for school closure decisions, (2) optimum elementary school size and methods of determining building capacity, (3) amount of cost savings resulting from closure of elementary schools, (4) disposition of buildings that had been closed, and (5) impact of elementary school closures on surrounding neighborhoods. The three criteria cited most often as reasons for closing schools were declining enrollments, age of building, and desegregation efforts. Closure is a simple solution to the problem of excess space, but it is also a source of other problems, problems far more intricate and complex and much more difficult and costly to solve. Once an elementary school is closed, the environmental forces of out-migration, population decline, and neighborhood deterioration are set in motion. Numerous charts and a review of the literature on optimum school size are included. (Author/IRT)

This booklet takes a brief, factual look at the changes in Canadian education over the past 15 years and identifies some social changes that seemed to have an influence on education. Changes in public involvement in education, curriculum, status of teachers, financing, and the federal government's growth in financial assistance to education are described. Highlights are cited from provincial reports of committees, commissions, task forces, and surveys that have discussed the aims and objectives of education. (Author/MLF)

The major purpose of this book is to provide information needed to plan, design, equip, and finance a sports-related facility. Planning and financing are discussed and guidelines offered for securing and compiling data for analysis in justifying new facilities. Other chapters discuss determining facility needs and eventual plans, selection of the architect, program objectives, and the interrelationships of philosophies, policies, programs, and facilities. Checklists and specifications cover the principles and concepts of planning (1) indoor facilities, (2) a sports arena and special events center, and (3) outdoor activity areas. Criteria are offered for the visual, thermal, atmospheric, and sonic environment, and information is provided about synthetic surfacing materials. Several examples of the use of modern technology to meet current facility needs are selected to demonstrate versatility in design concepts and functional uses. Appendixes contain checklists for planning indoor facilities, natatoriums, stadiums, and highlights of specifications for making facilities accessible for the physically handicapped. An index is also included. (MLF)

**Descriptors**—\*Curriculum Design, \*Curriculum Development, \*Curriculum Evaluation, \*Curriculum Planning, \*Educational Objectives, Elementary Secondary Education

The term curriculum development is a fairly new one in the educational language, though it is being used with increasing frequency. The purpose of this book is to explain what is meant by curriculum development and what is involved in curriculum planning. It outlines the relationship among the various elements in the curriculum and explains the factors that influence this relationship. Its purpose is not to suggest to teachers either what or how they should be teaching their pupils. This book, hopefully, will help teachers to establish a logical process enabling them to build a curriculum that, at any given time, is the best one they can provide for their pupils. It will also indicate the factors that influence the curriculum and, therefore, need to be taken into account. The chapters focus on situational analysis as well as on the four major stages of the curriculum development process: selection of objectives, selection and organization of content, selection and organization of learning experiences (methods), and evaluation. **Identifiers**—\*Adventure Playgrounds, England

EA 007 578

A report on adventure or "junk" playgrounds—areas that provide opportunities for children to build, dig, and play with materials under their own direction—begins with brief sections on the establishment of the original playground in Copenhagen, and the first American experiment, in Minneapolis, in 1950. The main body of the report is concerned with the first four major pioneer projects centered in Liverpool, London, Bristol, and Grimsby. Material is drawn from official reports and publications, newspaper and magazine articles, minute books, personal discussions, and files of the author's work with adventure playgrounds. It details the goals and approaches used; the problems arising from the inevitable untidiness of the playgrounds; and the difficulties of leaders expected to understand, supervise, and provide for the varying needs of all types and ages of children. The final two chapters discuss the language of play and playleadership in respect to role, training, and career structures. A bibliography and list of information and resource centers conclude the report. (Author/MLF)

**Creative Survival in Educational Bureaucracies.**

Pub Date 74

Note—205p.

Available from—McCutchan Publishing Corporation, 2526 Grove Street, Berkeley, California 94704 (\$9.75, Quantity discounts)

**Document Not Available from EDRS**

**Descriptors**—\*Bureaucracy, \*Change Strategies, \*Educational Administration, Elementary Secondary Education, Higher Education, \*Organization, Organizational Climate, Organizational Effectiveness, \*School Organization

In order to survive creativity in and change educational organizations, the decision-maker needs to understand how these organizations presently function. Educational organizations are discussed as sociopolitical systems and a conceptual framework is proposed for analysis, planning, implementation, and evaluation. The five functions that educational organizations perform for students are identified and described: confinement, training, indoctrination, sorting, and providing the conditions for personal or self-development. Most educational organizations are based on a bureaucratic model; a case is built for a new organizational model that retains the bureaucratic form for governance functions while using the professional form for curriculum and instruction matters. A number of operational guides are offered to aid the decision-maker in getting the most out of his organization as it is presently structured, while at the same time working toward a new organizational model. This book reports on public hearings that examined issues related to the question "Who controls the public schools?" The hearings concerned the citizen's role in the establishment of policy and in decision-making in the operation of the public schools. Hearings were held in Minneapolis, St. Louis, Portland (Oregon), Atlanta, and Los Angeles. Testimony was also taken from citizen activists from Alabama, Mississippi, Florida, and South Carolina. The book also includes chapters on the major governance issues and offers a governance plan claimed to be "a first step toward returning control of American schools to the people they serve." Descriptors—Affective Objectives, Cognitive Objectives, \*Drug Abuse, \*Drug Education, Elementary Secondary Education, Evaluation, Objectives, \*Program Descriptions, \*Program Evaluation

An examination of the extensive drug education literature as well as of specific school drug education programs indicates that the present confusion over drug education results from confusion over definitions, goals, approaches, and evaluation. This report, based on an examination of recent literature and on information and printed materials on specific 1974-75 school drug education programs, contains descriptions and examples of the goals, teaching methods, and evaluation techniques used in drug education programs. Pertinent definitions are presented within each area. The seven major goals of drug education, each or any number of which could be the goal of a program, are to increase an individual's knowledge about drugs, to affect an individual's attitudes toward the personal consumption of drugs, to alter an individual's drug use behavior, to increase an individual's participation in alternatives, to enhance an individual's ability to clarify his or her values, to improve an individual's decision-making skills, and to improve an individual's self-concept. The major approaches used are the cognitive and affective and a combination of the two. Outlines of drug education programs used in 13 school systems and an extensive bibliography are included. **Document Not Available from EDRS**

Descriptors—Contract Salaries, Elementary Secondary Education, Merit Pay, \*Principals, \*Salaries, \*Salary Differentials, Statistical Data

This study analyzes and reports the various methods public school systems use to schedule salaries for supervising principals. No attempt is made to prescribe or recommend procedures for scheduling salaries; rather, present practices are identified, described, and analyzed. Some unusual practices are included. For example, the procedure of relating the salary schedule for principals to the salary of the school superintendent rather than to the salaries of teachers. In general, there are four major components of the salary schedules analyzed in this study: (1) base for the schedule, (2) structure of the schedule, (3) incremental pattern of the schedule, and (4) advancement on the schedule. The extensive statistical data covers 272 public school systems with enrollments of 300 or more. (Author/IRT)

Training Procedure Manual for the Mentally Retarded.

Fairview Hospital and Training Center, Salem, Ore.

Pub Date 75

Note—237p.

EDRS Price MF-\$0.76 HC-\$12.05 Plus Postage

Descriptors—\*Custodial Mentally Handicapped, \*Daily Living Skills, \*Eating Habits, Exceptional Child Education, \*Hygiene, Institutionalized (Persons), Mentally Handicapped, Motor Development, \*Self Care Skills

Presented is a training procedure manual for institutionalized moderately, severely, and profoundly retarded persons. Teaching activities are suggested for the following skill areas: motor

development and awareness (including sensory stimulation, mat skills, and music and basic rhythm); toileting; eating skills (such as straw sipping and table manners); dressing; hygiene (including handwashing and shaving); grooming; clothing care; homemaking skills (such as dusting and simple cooking); scholastic skills (including color concepts and simple budgeting); and survival, travel, and social skills. Within each area, tasks are broken down into sequential steps and appropriate cue words are provided for the trainer. The manual also includes a training program for adults to learn how to deal with children. (CL)

The Santa Cruz Eleven: A Comprehensive Plan for the Education of Autistic and Seriously Emotionally Disturbed Children.

Santa Cruz County Board of Education, Calif.

Spous Agency—Bureau of Elementary and Secondary Education (DHEW/OE), Washington, D.C.

Pub Date Sep 74

Note—243p.

EDRS Price MF-\$0.76 HC-\$12.05 Plus Postage

Descriptors—\*Autism, Childhood, Definitions, \*Demonstration Projects, Early Childhood, \*Emotionally Disturbed, Equal Education, Exceptional Child Education, Financial Support, \*Program Descriptions, Program Evaluation, Regular Class Placement, Staff Improvement, Student Evaluation

Identifiers—\*California (Santa Cruz), Elementary Secondary Education Act Title III, ESEA Title III

Reported are the results of the 3-year Santa Cruz pilot project involving 11 disturbed children (4- to 12-years-old) to determine if autistic and severely emotionally disturbed (SED) children could benefit from a public school program. A program description and recommendations for implementation are presented in ten chapters having the following titles: "Pleading the Fourteenth for the Autistic and Seriously Emotionally Disturbed" (legislation and special education), "Diagnosis and Definitions: Who are the Autistic and Seriously Emotionally Disturbed?", "The Santa Cruz Program—A Description", "The Santa Cruz Behavioral Characteristics Progression Chart" (a tool for assessing the development of a handicapped pupil), "Transition: The Big Adventure" (integration of children into a regular class program), "Evaluation: How Effective Was the Santa Cruz Program?", "Manpower Planning and Development" (putting together the program staff), "The Classification System: Where Do the Autistic-SED Fit?", "Delegation of Responsibility: The Local Comprehensive Plan" (preparing a detailed report of programs and services provided), and "A Financial Model for Special Funding." Results are seen to provide evidence that public school education is feasible for autistic and SED children. Appendixes are included, such as a comparison of terms used by three classification systems for individuals with exceptional needs. (SB)

EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage

Descriptors—Community Resources, Exceptional Child Research, \*Handicapped Children, Residential Programs, State Legislation, State Programs, \*State Surveys, Surveys, \*Trend Analysis

Identifiers—\*Deinstitutionalization, Developmental Disabilities

To identify trends in institutional reform and deinstitutionalization of the developmentally disabled, 34 administrative documents emanating from a federally funded planning grant program were examined. Documents were gathered in

response to a survey letter to state Developmental Disabilities Councils, and fact sheets summarizing the documents were prepared. A comparison technique evaluated the presence of legislative, organizational, budgetary and client centered trends. Data produced such recommendations as the need in Alaska and Minnesota for public information about available community services, and in Michigan and Vermont for community mental health centers to assume responsibility for providing community based services. Also identified were critical deficiencies impeding deinstitutionalization (including lack of alternative residential services) and institutional reform (such as insufficient public funding). (Included in three appendixes are state document fact sheets.) (CL)

**Identifiers**—Complementary Teacher Training Program, George Washington University

The report describes and evaluates George Washington University's Complementary Teacher Training Program during the 1971-74 period. It is explained that the demonstration program was designed to prepare undergraduate special education resource teachers to work directly with mainstreamed handicapped (including learning disabled and emotionally disturbed) elementary students and as consultants to school staff members. Cited are positive results of the training in such areas as self-esteem, interpersonal relationships, and professional information; and noted is the fact that most program graduates have secured employment as either complementary (22), special education (6), or elementary education (6) teachers. Extensive appendixes include information on the results of research evaluating the program, responses by teachers and principals to questionnaires about program and trainee effectiveness in their schools, a journal article describing the program, course outlines, and four bibliographies that list approximately 300 references. **Expert Meeting on Education of the Deaf: Paris, 30 September-4 October 1974. Report of the Meeting.**

United Nations Educational, Scientific, and Cultural Organization, Paris (France).

Report No—ED-74-CONF-645-17

Pub Date 29 Nov 74

Note—18p.; Proceedings of Expert Meeting on Education of the Deaf (Paris, France, 30 September-4 October 1974)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Aurally Handicapped, Conference Reports, Cultural Differences, \*Curriculum, Deaf, \*Educational Methods, Exceptional Child Education, Foreign Countries, \*International Organizations, \*Normalization (Handicapped)

Summarized are the papers given by 13 experts in education of the deaf from 12 countries who attended a conference sponsored by the United Nations Educational, Scientific, and Cultural Organization (UNESCO) which focused on curricula, teaching methods, adaption to the community, and problems of the hearing impaired. Topics discussed included curricula for handicapped children in developing countries, curriculum and methods for teaching the deaf in specific countries such as Nigeria and Argentina, training of teachers for the deaf, language development and communication of the deaf, detection of deaf children and guidance of their parents, and integration of the deaf into school and society. Among recommendations by the conference listed are that a continuum of educational programs be offered for hearing impaired children ranging from total custodial care to complete integration and that longitudinal research to conducted into individual integration experiments, that the importance of early diagnosis and treatment be publicized by means of the mass media, and that UNESCO stimulate international and regional cooperation to improve educational services to the hearing impaired. **Attention and Concentration in Trainable Mentally Retarded Children.**

Pub Date Jan 70

Note—70p.; Not available in hard copy due to marginal reproducibility of original document

**EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.**

**Descriptors**—\*Attention Span, Discrimination Learning, Exceptional Child Research, Mentally Handicapped, Program Effectiveness, \*Teaching Methods, Time Factors (Learning), \*Trainable Mentally Handicapped

Evaluated was the effectiveness of the TAC (Training in Attention and Concentration) Program with seven trainable retarded persons, 8- to 20-years-old. Pre- and posttest data were obtained on the Maze-trial test, a picture discrimination test, buttons test, and object sort test. The TAC Program consisted of 10 structured les-

sons on such tasks as examining objects by touch with eyes closed and matching two objects by similarities and by differences. Results suggested that the more severely retarded Ss worked more diligently as a result of training, that the group demonstrated an increased ability to observe differences in objects, and that Ss increased their ability to form concepts regarding shape, color, and size. **Identifiers**—\*Supplemental Security Income Program

The report examines the need for an outreach program to alert families of low-income handicapped children (from birth through 18 years old) to assistance available under the Social Security Administration's Supplemental Security Income (SSI) program. In an introductory section, it is explained that unknown numbers of SSI-eligible children are not receiving benefits; and a model program to facilitate early identification, correct diagnosis, enrollment, and service delivery is proposed. Discussed in section 2 are feasibility issues related to alerting SSI-eligible children, using volunteers in a model outreach program, and evaluating the effectiveness of SSI operations. Presented in section 3 is a detailed description of the proposed demonstration project, including such design as initial organization training staff coordinators and volunteers, preparing publicity materials, and project operations related to outreach, escort service and data collection. Sections 4 and 5 deal with criteria for recommending Atlanta, Georgia as a demonstration site and with staff and budgetary considerations. Included in the appendixes are lists of member agencies of the National Council of Organizations for Children and Youth and of persons interviewed concerning the demonstration project. (LH)

**Career Education for the Handicapped; Focus: Rural and Remote.**

Washington State Intermediate School District 109, Everett.

Pub Date 75

Note—120p.

**EDRS Price MF-\$0.76 HC-\$5.70 Plus Postage**

**Descriptors**—\*Administration, \*Career Education, Curriculum Design, \*Curriculum Guides, Educational Objectives, Elementary Secondary Education, Exceptional Child Education, \*Handicapped Children, Program Planning, Records (Forms), \*Rural Areas, Staff Role, Student Evaluation, Work Study Programs

**Identifiers**—Needs Assessment, Washington

Intended primarily for special education teachers and principals, the manual describes procedures for organizing and implementing career education programs for handicapped students in rural or remote areas. The program descriptions, methods, and sample forms contained in the manual were used successfully by one or more of five small, rural school districts in the state of Washington. Among suggested steps for developing career education programs are identifying key personnel (such as vocational teachers), establishing a community advisory committee, assessing student and faculty needs, selecting goals, and providing supportive services (through inservice teacher training and the use of itinerant staff members). Focused on are the following aspects of program management: delegating responsibilities to vocational rehabilitation and guidance counselors, developing a work activity guide for clarifying staff roles, problems of supervising students' work-study experiences in

rural areas, visitation records and other forms for student evaluation, and career education activities. Types of program evaluation are briefly discussed, and lists of materials and resources for career education programs are appended. (LH)

**Language Sampling, Analysis and Training: A Handbook for Teachers and Clinicians.**

Pub Date 74

Note—56p.

Available from—Consulting Psychologists Press, 577 College Ave., Palo Alto, California 94306

Document Not Available from EDRS

Descriptors—Aphasia, Exceptional Child Education, Glossaries, Individualized Instruction, \*Language Handicapped, \*Language Patterns, Learning Disabilities, Psycholinguistics, \*Remedial Instruction, \*Student Evaluation, \*Teaching Methods

Identifiers—\*Needs Assessment

Intended for teachers and speech clinicians, the handbook and accompanying worksheets describe research-based psycholinguistic procedures for needs assessment and individualized instruction of language-delayed children, including aphasics. Four main chapters explain how to collect a language sample (a systematic transcription of the student's spoken responses); how to analyze the sample (including instructions for counting words and classifying sentences); how to write training programs based on analysis of the sample; and how to conduct, record, evaluate, and report the results of training programs. Examples of instructional techniques are offered throughout the text. Also provided is a glossary of linguistic and behavioral terms. Five appendixes contain instructions for counting morphemes and categorizing sentence constructions, analyses of two samples from language-delayed children, and a practice exercise in sentence classification (with answers). **A Program of Stimulation for Infants Born Prematurely.**

Spons Agency—National Institutes of Health (DHEW), Bethesda, Md. Div. of Nursing.

Note—32p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—Aural Stimuli, Body Weight, Followup Studies, \*General Education, \*Infancy, Kinesthetic Perception, Physiology, \*Premature Infants, Program Effectiveness, \*Research Projects, \*Sleep, \*Stimulation

Examined was the effect of low frequency auditory and kinesthetic stimulation on the sleep behavior of seven premature normal infants. Stimulation consisted of positioning in a rockerbed and exposure to a recorded heartbeat for 15 minutes an hour. Measured were Ss's sleep wakefulness, weight change, and gestational development. Analysis of the data indicated that the duration of Ss's quiet sleep was significantly increased while a control group's declined.

Although not significant, positive differences were also found in measures of weight gain and maturation. Results of followup evaluations favored the six experimental Ss over the five control Ss on such measures as the Home Inventory for infants and the Bayley Infant Scales. (CL)

Identifiers—\*Project PRICE

Presented are nine papers delivered at the 1975 Trainer's workshop of Project PRICE (Programming Retarded in Career Education). It is explained that Project PRICE is designed to develop an inservice model for training regular and special educators to provide effective career education to educable retarded students from kindergarten through grade 12. Discussed in Part I by N. Gysbers is the need to view career education from a life-centered rather than work-centered approach. C. Kohaska details such career education considerations as mainstreaming, normalization and the economic situation. A framework of the major systems and methods for implementing values education are provided by E. Moore. Part II contains descriptions of methods for teaching the following career education competencies: daily living skills (by C. Earhart), personal social skills (by C. Magnuson), and occupational abilities (by J. Alexander). The development of the competency to utilize recreation and leisure time is addressed in Part III by G. Hitzhusen, L. Johnson, P. Verhoven and J. Goldstein. (CL)

**The Hearing-Impaired Mentally Retarded: Recommendations for Action 1975.**

Spons Agency—Rehabilitation Services Administration (DHEW), Washington, D.C.

Pub Date 75

Note—164p.

**EDRS Price MF-\$0.76 HC-\$8.24 Plus Postage**

Descriptors—Aurally Handicapped, Exceptional Child Education, Exceptional Child Services, \*Financial Policy, Interagency Cooperation, \*Legislation, Mentally Handicapped, \*Multiply Handicapped, \*Program Design, \*Program Development, Severely Handicapped, Staff Role

Recommendations for action in serving the hearing impaired mentally retarded (HIMR) are presented by a committee composed of representatives from the American Speech and Hearing Association, the Conference of Executives of American Schools for the Deaf, and the American Association on Mental Deficiency. The population is defined to include those individuals who have hearing impairment, subaverage general intellectual functioning and deficits in adaptive behavior. Reviewed are the constitutional and legal rights of handicapped persons, and outlined are significant federal funding provisions affecting services to the HIMR. Problems within the existing system of services are summarized, and suggestions for program coordination (such as development of comprehensive data systems and establishment of a national information center) are made. Prevention services and early identification are described among the aspects of a continuum of services for the HIMR. Considered in a discussion of personnel availability and utilization are the use of interdisciplinary personnel and training programs for professionals and paraprofessionals. Listed are the committee's issues and recommendations for such areas as legislation, financing, administrative and organizational structure, and teaching, management and supervision. Included in four appendixes is a list of professional and governmental resources. (CL)

**Cost Effectiveness for Gifted and Talented Educational Programs.**

Ohio State Dept. of Education, Columbus. Div. of Special Education.

Pub Date [75]

Note—15p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Cost Effectiveness, \*Educational Programs, \*Evaluation Methods, Exceptional

Child Education, Expenditure Per Student, Gifted, Guidelines, \*Measurement Techniques, Program Budgeting

Presented is a systematic approach for analyzing cost effectiveness of gifted and talented educational programs in terms of categorizing funds, prorating expenditures, designing a data collection form, determining cost effectiveness, and considering multiple variable implications. All costs are reported to be subsumed under six major categories: administration, staff support personnel, supervision of instruction, direct instruction, auxiliary services, and operation and maintenance of school plant. Described are the methods of prorating expenditures which include the time method, average daily membership, time flow area, hour consumption, and quantity consumed method. A layout for a data collection form is provided as well as a measure for obtaining a cost effectiveness ratio. Also outlined are two examples of a multiple variable ratio system which notes ways to measure and weigh five major variables (student achievement, children's attitudes, parent concern, community input, and teacher opinion) in both self-contained and enrichment programs. Procedure examples and tables are also provided. (SB)

Brasel, Kenneth E. Quigley, Stephen P.  
The Influence of Early Language and Communication Environments on the Development of Language in Deaf Children.

Illinois Univ., Urbana. Inst. of Research for Exceptional Children.

Pub Date 75

Note—159p.

EDRS Price MF-\$0.76 HC-\$8.24 Plus Postage

Descriptors—Aurally Handicapped, Comparative Analysis, \*Deaf, Early Childhood Education, Educational Methods, Elementary Secondary Education, \*Environmental Influences, Exceptional Child Research, \*Language Ability, \*Manual Communication, \*Oral Communication, Parent Influence, Performance Factors

Seventy-two deaf Ss (10- to 19-years-old) were tested, employing the Test of Syntactic Ability (TSA), the language sub-tests of the Stanford Achievement Test (SAT), and analyses of written language samples, in a study of the influence of early language and communication environment on their later syntactic language ability. Ss were divided into four groups: the Manual English (ME) Group whose parents were deaf, had a good command of English, and used manual communication in the form of Manual English; the Average Manual (AM) Group whose parents were deaf, had language showing gross deviations from Standard English, and used manual communication with the Ss from infancy; the Intensive Oral (IO) Group who had been enrolled in a formal Oral educational program and whose parents had received formal training in using oral methods exclusively and intensively with their children; and the Average Oral (AO) Group who had been enrolled in a formal Oral educational program and whose parents had received no formal training in oral methodology. Results showed significant superiority of the ME group over the two Oral groups on five of the six test structures of the TSA; and significant superiority of the ME group over the other three groups on all four sub-tests of the SAT. (Author/LS)

Liben, Lynn S.

A Developmental Approach to the Experiential Deficiencies of Deaf Children.

Spons Agency—Grant Foundation, New York, N.Y.; Society for Research in Child Development, Lafayette, Ind.

Pub Date 75

Note—16p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Aurally Handicapped, \*Cognitive Development, Communication Problems, \*Deaf, Environmental Influences, Exceptional Child Education, \*Learning Theories, Manual Communication, \*Physical Environment, \*Social Development

Considered are ways in which developmental theories, methodologies, and research findings may be used to clarify the concept of experiential deficiencies of deaf children. Examined are the effects on deaf children of deprivations in physi-

cal experiences (such as the reduction of information about objects provided by auditory feedback) and in social experiences (such as the limitation imposed on parent-child interaction due to lack of a common communication mode). The author stresses the need for a communication system shared by the deaf child and the people in his environment, and suggests use of Signed English (rather than American Sign Language) in educational settings and in homes with hearing parents. (LS)

Worley, John C., Jr.

The Establishment of Learned Reinforcers in Mildly Retarded Children. IMRID Behavioral Science Monograph No. 24.

George Peabody Coll. for Teachers, Nashville, Tenn. Inst. on Mental Retardation and Intellectual Development.

Pub Date 73

Note—94p.

EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage

Descriptors—\*Educable Mentally Handicapped, Exceptional Child Research, Learning, \*Learning Theories, Mentally Handicapped, \*Motivation, Reinforcement, Social Influences

Research regarding the establishment of learned reinforcement with mildly retarded children is reviewed. Noted are findings which indicate that educable retarded students, possibly due to cultural differences, are less responsive to social rewards than either nonretarded or more severely retarded children. Characteristics of primary and secondary reinforcers are described, and learning theories relevant to motivation are evaluated for their potential in changing mildly retarded students' reinforcement systems. Considered are procedures for establishing reinforcement based on three categories of learning theory: contiguity theory (including operant conditioning), cognitive theory, and exposure theory (including drive theory). Proposed is an integrated theory of reinforcement which incorporates principles from existing theories. (CL)

Learning Disabilities: Diagnosis and Prescription.

Note—11p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Cooperative Programs, \*Diagnostic Teaching, Educational Needs, Elementary Education, Exceptional Child Education, Inservice Teacher Education, \*Interdisciplinary Approach, \*Learning Disabilities, \*Student Evaluation

Identifiers—Elementary Secondary Education Act Title VI, ESEA Title VI, Maryland

The author advocates an interdisciplinary team approach to diagnosis and prescription for the elementary school learning disabled (LD) child. Described is a 5-year project, funded under Title VI, operating within 11-18 elementary schools surrounding the University of Maryland Hospital. Biweekly services are offered to participating schools by a task-oriented multiprofessional team that includes a nurse, a physician, a diagnostic and prescriptive educator, a psychologist, a communications specialist, and a social worker, as well as the child's classroom teacher and principal. Stressed is the importance of monitoring the child's educational needs and re-evaluating his progress on a regular and frequent basis. Successful results of the interdisciplinary team approach are said to include observable educational improvement for 52 percent of LD children served during 1971 and improved inservice training (in such areas as early identification and development of specific prescriptive techniques) for regular class and resource room teachers. (LH)

Instructional Support: Ego Enhancement for Potential School Dropouts.

Plattsburgh City School District, N.Y.

Pub Date [75]

Note—12p.; Report from Beekmantown Central School

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Culturally Disadvantaged, Demonstration Projects, \*Disadvantaged Youth, Economically Disadvantaged, Exceptional Child Research, Inservice Teacher Education, Instructional Materials, Parent Counseling, \*Primary Education, \*Program Effectiveness,

\*Remedial Programs, \*Self Concept, Teaching Methods

A study of 13 disadvantaged first grade students enrolled in a 4-year remedial education program was conducted to determine program effectiveness in terms of academic skill and self-concept improvement. A model was developed which used the learning center approach within classroom boundaries, and involved a psychologist, a reading teacher, classroom teachers (for grades K-3), and volunteers. The teacher-directed educational program consisted of a highly-structured, slow-paced teaching method; materials such as basal readers, language development kits, and audiovisual equipment; a parent involvement component; and preservice and inservice training for teachers. Results obtained by comparing Ss with controls from regular grades showed that experimental Ss progressed faster in word recognition, did not differ significantly in IQ level, attained a significantly higher level of maturity, and showed a significantly lower incidence of personality and interpersonal adjustment problems. (A diagram illustrating the model and statistical tables are also provided.) (SB)

The Relationship Between Affective and Cognitive Development in Down's Syndrome Infants.

Pub Date Apr 75

Note—14p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Affective Behavior, \*Cognitive Development, Emotional Development, Exceptional Child Research, \*Infancy, Mentally Handicapped, \*Mongolism

Examined was the association between affective and cognitive development in 14 Down's Syndrome infants (4- to 8-months-old). Mothers administered a series of 30 laughter items each month, and experimenters gave the Uzgiris-Hunt scales of cognitive development at 13 and 16 months, and the Bayley scales and Infant Behavior Record at 16 months. Available data indicated that Ss lagged well behind normal infants in onset of laughter and smiling although they fol-

lowed the order of laughter items category by category (laughing first at auditory and tactile items and then at more cognitively complicated social and visual items). Results also demonstrated a clear relationship between cognitive and affective development, especially with regard to stages of object permanence and operational causality. (CL)

**Identifiers**—\*Developmental Disabilities

Described is an innovative program of non-categorical education for both normal and developmentally delayed infants and preschool children. Focused upon are such aspects of program design and operation as early intervention, integration of delayed and nondelayed toddlers and preschoolers matched on the basis of developmental level rather than chronological age, parent involvement and education, and developmental programming. It is noted that the educational curriculum covers sensorimotor, motor, social and language development for infants, toddlers and preschoolers. Administration of the infant and parent training components are discussed, daily program activities for toddler and preschool classes are outlined, and the rationale for developmental programming is explained. **Descriptors**—\*Architectural Barriers, \*Employment Opportunities, \*Equal Education, Exceptional Child Education, Federal Aid, \*Federal Legislation, \*Handicapped Children

**Identifiers**—\*Education of the Handicapped Act, S 6

The report of the Senate Committee on Labor and Public Welfare deals with S. 6, a bill to provide financial assistance to the States for improved educational services for handicapped children under the Education of the Handicapped Act. Included are sections to extend entitlement through 1979, to establish eligibility and application provisions, to strengthen the administrative and evaluative responsibilities of the Commissioner of Education, to remove architectural barriers, and to require affirmative action in the employment of qualified handicapped individuals. Also presented are the additional views of five senators who disagree with the full committee's action insofar as it fails to require all states to provide special educational services (including early identification and evaluations) to preschool handicapped children. **Descriptors**—\*Equal Education, Evaluation, Exceptional Child Education, \*Federal Aid, \*Federal Legislation, \*Handicapped Children, Identification

**Identifiers**—\*Education of the Handicapped Act, S 1256

The report of the Senate Committee on Labor and Public Welfare deals with S. 1256, a bill which contains amendments to extend through June 30, 1977 the entitlement formula for payments to the states provided under Part B of the Education of the Handicapped Act as amended by Public Law 93-380. It is explained that the amended bill's purpose is to enable the states to provide equal educational opportunity for handicapped children 3-through 21-years-old and that payments may also be used for the early identification and assessment of handicapping conditions in children under 3 years of age. Included are brief sections describing the need for legislation; hearings that have been held; a section-by-section analysis of S. 1256; and changes in existing law with regard to state entitlements, grants to states, and allocations of appropriations. **A Summary of Selected Legislation Relating to the Handicapped, 1974.**

Department of Health, Education, and Welfare, Washington, D.C.

Report No.—DHEW-OHD-75-22002

Pub Date May 75

Note—45p.; Superintendent of Documents, U. S. Government Printing Office, Washington, D.C. 20402 (\$0.70); For related document, see EC 060 221

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**  
**Descriptors**—Exceptional Child Services, \*Federal Legislation, \*Handicapped Children  
**Identifiers**—93rd Congress

Summarized are 32 legislative acts benefitting the handicapped that were enacted by the 93rd Congress (1973-1974). Given for each act are the title, public law number, and synopses of the law's general scope and implications for the handicapped. Listed as major legislation benefitting the handicapped are 1973 Social Security and Rehabilitation Amendments; the Housing and Community Development Act of 1974, and 1974 Education, Rehabilitation, and Social Services Amendments. Also summarized is other legislation, including 1973 Maternal and Child Health Amendments, 1974 Social Security Amendments concerning the Supplementary Security Income program, and Juvenile Delinquency and Prevention Act of 1974. Appended are a chart on the legislative history of 36 1973-1974 laws relating to the handicapped and cross references from previous (1963-1972) federal legislative summaries. (LH)

**A Sequence for Helping Children Having Mild to Moderate Functional Articulation Problems.**

Pub Date Nov 70

Note—63p.

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

**Descriptors**—\*Articulation (Speech), Auditory Training, Elementary Education, Exceptional Child Education, Individual Activities, Non-professional Personnel, \*Sequential Learning, Speech Handicapped, \*Speech Therapy, \*Teaching Guides, \*Teaching Methods

Presented are specific sequential procedures for use by paraprofessionals in correcting children's mild to moderate articulation problems. The sequence consists of eight activities to prepare the child for the program, five steps in the area of ear training, and ten steps to teach speech production. Activities and minimum teaching times are suggested for ear training goals such as learning sound position in words and production goals such as producing the sound correctly in syllables. Instructional materials provided include pictures associated with the sounds being worked on, and pictures to be colored or completed (connect-a-dot) by the child as a reward for correct responses. **Initial Characteristics and Short Term Changes of Boys Enrolled in a Physical Developmental Clinic.**

Maryland Univ., College Park.

Spons Agency—Office of Child Development (DHEW), Washington, D.C.

Pub Date [75]

Note—54p.

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

Descriptors—\*Behavior Change, Childhood, \*Clinics, Demography, Exceptional Child Research, \*Handicapped Children, \*Parents, Perceptual Motor Coordination, Performance Tests, \*Physical Development, Rehabilitation Programs

A Study of 18 handicapped males (mean age 7 years) and their parents was conducted to ascertain initial characteristics on entering a physical development clinic, and to detect changes in the functioning level coinciding with their first exposure to the clinic program. Both prior to and following completion of the 8-week clinic program, Ss were given the Child Behavior Inventory (CBI) tasks and a battery of tests to assess motor, visual perception, and intellectual functioning, while parents filled out a CBI form and then participated in a structured interview. Results were divided into four areas of research: demographic characteristics, pre- and post-session CBI results, pre- and post-session test battery results, and post-session interviews with parents. Among the findings were that the Ss made up a heterogeneous population and that little positive change is shown by first time enrollees on objective measures although parents reported improvement in coordination. Evidence suggested that exposure to more than one 8-week session of the clinic program is necessary to promote measurable change, and that different outcomes may depend on the initial status of the child. (Tables are included to explain statistical data.) (SB)

Descriptors—Exceptional Child Research, \*Grouping (Instructional Purposes), \*Handicapped Children, Observation, Program Effectiveness, \*Program Evaluation, \*Regular Class Placement, Research Needs, Resource Centers, Special Classes

Identifiers—\*Project PRIME

Discussed in connection with Project PRIME (Programmed Reentry into Mainstream Education) is the need for educational research to as-

sess the comparative efficacy of three instructional settings (regular resource, and self-contained special education classes) for providing services to handicapped children. It is explained that data on the classroom ecological structure (including physical environment, personnel, group structure, and instructional activities) were gathered from observations of teachers in approximately 400 regular, 100 resource, and 150 self-contained classrooms. Noted among findings were differences between regular and special classes in the number of students and instructional personnel (which affected grouping patterns and instructional approaches), and stressed was the need in future analyses to study the effect on student outcomes of each ecological characteristic, both singly and in interaction. Descriptors—Diagnostic Teaching, Exceptional Child Research, \*Home Instruction, Intervention, Itinerant Teachers, \*Multiply Handicapped, \*Parent Role, \*Precision Teaching, Preschool Education, Program Descriptions, \*Program Effectiveness

Identifiers—Developmental Disabilities, \*Project Portage, Wisconsin

Evaluated was the effectiveness of the Portage Home Visit (PHV) Parent Involvement Program in improving the IQ's, and motor, language, adaptive and personal-social developmental skills of 36 multiply handicapped developmentally delayed preschoolers in rural Wisconsin during 36 consecutive weekly sessions. Home trainers provided parents with technical assistance, an instructional model that included a prescriptive precision teaching approach using positive reinforcement, and information on how to record the children's performance in regard to the prescribed activities. Analysis of pre- and post-test data indicated that Ss showed significant gains in IQ, adaptive behavior, language development and personal-social skills, but that the PHV program was not effective in enhancing their motor coordination skills (due perhaps to the severity of Ss' physical deficits). (LH)

**A Longitudinal and Comparative Look at Cognitive Development in EMH Children.**

Pub Date Mar 75

Note—23p.; Paper presented at the Annual Meeting of the American Educational Research Association (Washington, D.C., March 30-April 3, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—Child Development, \*Cognitive Development, \*Cognitive Processes, \*Educable Mentally Handicapped, Exceptional Child Research, Longitudinal Studies, Maturation, Mentally Handicapped, Problem Solving, Secondary Education, \*Student Evaluation

Identifiers—Piaget (Jean)

Examined longitudinally were the rate and proportion by grade level of the cognitive development of 202 13- to 16-year-old educable mentally handicapped students. A 20-item written test composed of eight problem solving and 12 cognitive development items representing the concrete I, concrete II, and formal I operations levels of Piagetian theory, was used. Results over a 12 month period indicated that 68 percent of the Ss showed no change in developmental level, 92 percent of those making a gain increased by one level, and 6 percent demonstrated losses. Data suggested that curriculum materials should be appropriate to the student's level of cognitive development, and that measures of developmental level provide more educationally relevant information than IQ scores. **EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.**

Descriptors—Aurally Handicapped, \*Deaf, Elementary Secondary Education, Exceptional Child Research, Grade 1, Grade 2, Grade 4, Learning Characteristics, \*Performance Factors, \*Reading Skills, \*Visual Stimuli, \*Word Recognition

To investigate the development of the process whereby deaf Ss attend to the orthographic structure of written materials, the perception of words and letter sequences by 108 deaf and hearing Ss matched at three grade levels (grades 1, 2, and 4) of word reading was studied. Ss were shown three sets of structured/unstructured stimuli (such as "VUNS" and "NSUV") and were instructed to write down all or as much of the stimulus as they could after the cessation of the stimulus presentation. It was found that both the deaf and hearing Ss were influenced by orthographic structure at the earliest levels and that the hearing Ss showed no over-all superiority in this task. An additional finding that fourth grade level deaf Ss performed better than hearing Ss on unstructured items led to the conclusion that older deaf Ss had developed a compensatory skill permitting superior perception of unstructured items. Descriptors—Adolescents, \*Cognitive Processes, \*Educable Mentally Handicapped, Exceptional Child Research, Intermediate Grades, \*Learning, \*Memory, Mentally Handicapped, Recall (Psychological), Secondary Education

Number of stimulus items presented together (one, three or five) and instructions to organize were studied in a multitrail free recall experiment with 83 educable retarded adolescents. Results of individual sessions in which Ss were asked to recall 15 common words indicated that presentation of three stimuli together produced the highest subjective organization but that this blocking did not influence overall number of correct responses. Blocking did, however, extend the recency effect in the serial position curve. Instructions to organize resulted in neither higher organization nor more correct responses. (Author/CL)

Descriptors—Attention Span, Behavior Change, \*Emotionally Disturbed, Exceptional Child Research, \*Intermediate Grades, \*Mathematics, \*Positive Reinforcement, \*Problem Solving, Success Factors

A study involving 20 emotionally disturbed boys (9- to 11-years-old) was conducted to determine the effects of tactile and verbal reinforcement on attention to task and accuracy. Ss were given arithmetic problems to work during 16 20-minute sessions under four conditions: tactile reinforcement (intermittent touch pressure applied to Ss shoulders as they worked); verbal reinforcement (intermittent praise by the teacher); a combination of tactile and verbal reinforcement; and control treatment (no reinforcement cues). At the end of each period, scores were calculated for each S on both attention to task and accuracy of performance. Results showed that the combination treatment was most effective in producing high attention to task and high accuracy in problem solving; that tactile and verbal reinforcement alone ranked second and third in effectiveness; and that combination, verbal, and tactile treatments were all superior to the control with the exception that verbal reinforcement alone failed to produce higher problem solving accuracy. EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.

Descriptors—\*Behavior Change, Exceptional Child Research, Feedback, Graduate Students, Higher Education, \*Operant Conditioning, Program Effectiveness, Reinforcement, \*Social Influences, Speech Handicapped, \*Speech Therapy, \*Stuttering

Investigated with a 26-year-old male graduate student were the immediate and long-term effects of social reinforcement and feedback on the incidence of stuttering. The S's speech dysfluencies were recorded under baseline and intervention conditions in three settings: two classes the S taught and a weekly hour-long conversation period with peers. Reinforcement consisted of graphic feedback (histograms) of the percent decrease in disfluency (delivered immediately after each session) and verbal praise. Intervention was judged successful due to the 62 percent decrease in stuttering at the end of intervention, and a 95 percent decrease observed at the 3-month maintenance check. (LS)

Note—41p.; Paper presented at the Annual Meeting of the American Educational Research Association (Washington, D.C., March 30-April 3, 1975)

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Achievement Tests, Elementary Education, Exceptional Child Research, \*Learning Disabilities, Test Results, \*Test Validity  
Identifiers—\*Peabody Individual Achievement Test

Two validity studies were made of the Peabody Individual Achievement Test (PIAT) with 152 learning disabled and 115 non-learning disabled children (ages from 7 to 10 years). In the first study, Ss' scores on the PIAT, California Achievement Test (CAT), and the Wide Range Achievement Test (WRAT) were correlated; in the second study scores on the PIAT and the Metropolitan Achievement Test (MAT) were correlated. Results indicated substantial validity when the PIAT was used with the WRAT, the CAT, or the MAT as criterion measures, with highest correlations observed between the PIAT and the WRAT and lowest correlations found for mathematics subtests. Results suggested the appropriateness of using the PIAT as a time saving individual assessment measure with learning disabled children because its format does not require writing answers or reading mathematics word problems. **A Model for Learning Disabilities as a Prerequisite to the Evaluation of a Prescriptive Instructional System.**

Pub Date 75

Note—42p.; Paper presented at the Annual Meeting of the American Educational Research Association (Washington, D.C., March 30-April 3, 1975)

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Definitions, Elementary Education, Exceptional Child Research, \*Identification, \*Intelligence Quotient, \*Learning Disabilities, Perceptually Handicapped, Student Characteristics, \*Visual Perception

In an effort to examine the pragmatic effects of definitions of learning disabilities and identification procedures, information was gathered on the characteristics of 53 children (grades 1 through 7) who had been previously diagnosed as learning disabled. Results of tests such as the Wechsler Intelligence Scale for Children and the Illinois Test of Psycholinguistic Abilities were subjected to hierarchical grouping and discriminant analysis in an attempt to define similar characteristics separating the variables into the most homogeneous groups possible. Results indicated that intelligence and visual perceptual skills were the distinct roots differentiating the following groups: low intelligence factor with a severe visual perceptual problem, average intelligence factor with a severe visual perceptual problem, average intelligence factor with a low visual perceptual problem, and high intelligence factor with a moderate visual perceptual problem. Results suggested the need to reexamine identification procedures and differentiate educational prescriptions based on the group characteristics designated by the analysis. (DB)

Descriptors—Diagnostic Teaching, Exceptional Child Education, \*Identification, Instructional Materials, \*Intervention, \*Junior High Schools, \*Learning Disabilities, Parent Participation, Parent Role, Program Budgeting, \*Program Descriptions, Program Evaluation, Regular Class Placement, Team Teaching

Approximately 400 learning disabled (LD) junior high school students in eight schools were provided identification, diagnosis, and intervention services during 2 years of a program based on meeting students' needs for special help, mainstream success, and parental understanding. Program objectives included significant gains in language achievement, an increase in school attendance, and provision of information and counseling to parents. Among staff positions of the program were a speech and hearing specialist, a perceptual-motor specialist and the learning disa-

bilities teachers. The program involved referral, screening, diagnosis, intervention, and evaluation components. Evaluation indicated that significant improvements attributable to project intervention occurred in the areas of achievement test performance, self concept, and mainstream performance. Additionally, parents indicated strong support for the home involvement aspect. Identified were 15 program strengths (such as the team approach to diagnosis and remediation) and program problems such as classroom teachers who were unfamiliar with needs of the LD child. The total cost of the program was \$223,000 or \$320 per student during the first year (1972-73). (Appended are lists of instructional materials and equipment and diagnostic instruments used in the program.) (DB)

Descriptors—\*Acceleration, Career Planning, Comparative Analysis, Exceptional Child Research, Females, \*Gifted, Grade 7, Junior High Schools, Males, \*Mathematics, Performance Factors, \*Program Planning, \*Sex Differences, Values, Vocational Interests

To determine possible implications of sex differences that might be useful for educators planning accelerated programs for mathematically gifted students, four measures of values and career-related interests were administered to three groups (totaling 78 Ss) of gifted seventh grade girls and boys. Results indicated that male Ss showed strong theoretical and investigative orientations compatible with scientific pursuits and academic acceleration in mathematics, that female Ss exhibited stronger interests in social and aesthetic values and careers, and that female Ss were considerable less rejecting of "masculine" careers than were male Ss of "feminine" careers. It was also found that female Ss were characterized by feelings of conflict when presented with opportunities for educational acceleration in theoretical and investigative pursuits, suggesting that gifted girls should be taught by socially oriented female mathematicians, that their course content should relate theoretical mathematics to applied problems with a social interest appeal, that they should be offered career counseling that relates classroom experience to future jobs, and that special program opportunities for mathematically gifted adolescent girls should involve a sufficient number of female students to minimize feelings of social stigma associated with appearing "different" or "unfeminine." Descriptors—\*Curriculum Evaluation, \*Educable Mentally Handicapped, \*Exceptional Child Education, \*Information Utilization, \*Mentally Handicapped, \*Problem Solving, \*Rating Scales, \*Special Education, \*Student Evaluation, \*Teacher Evaluation

Identifiers—\*Social Learning Curriculum

Discussed are personnel issues in special education from the perspective of an observational evaluation of an experimental course of study, "Social Learning Curriculum," used with students in 17 intermediate (ages 9 to 14 years) classes for the educable mentally retarded. Included is the 60-item rating scale which was used to evaluate teachers and students for the curriculum objectives of critical thinking and independent action. Results are examined in terms of the curriculum model based on emergence of a problem, differentiation of elements, and integration of problem elements with new knowledge. Findings are seen to indicate a wide variation in the implementation of the curriculum and suggest the need for providing teachers with training in the process of implementation as well as the content of a new curriculum. Note—22p.; Report from the Project on Conditions of School Learning and Instructional Strategies

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Educational Methods, \*General Education, \*Grade 1, \*Learning Modalities, \*Oral Communication, \*Primary Education, \*Projects, \*Prose, \*Reading Comprehension, \*Recall (Psychological), \*Research, \*Visual Stimuli

Several experiments involving approximately 130 6-year-old children were conducted to examine the effects of overt illustration on first graders' learning from oral prose. In all experiments, experimental Ss heard prose selections after or during which they illustrated selection content with plasticized figure cutouts and background scenes while control Ss copied or colored geometric forms during the illustration period. After hearing three or five passages, Ss orally recalled passage content and answered simple factual questions about each passage. Results showed that illustration facilitated prose learning only when the child was given the correct pieces for his illustration or had the illustration done for him. When children selected the pieces for each illustration out of a common pool of 20-30 cutouts, the illustration activity had either a negative or no effect. (Author/SB)

Teacher Training in the Area of Emotionally Disturbed Children; Innovation Grant: Final 3-Year Program Evaluation and Research Report.

American Univ., Washington, D.C. Dept. of Education.

Spons Agency—Bureau of Education for the Handicapped (DHEW/OE), Washington, D.C.

Pub Date Jun 73

Note—77p.

EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage

Descriptors—Child Development, \*Emotionally Disturbed, \*Exceptional Child Education, \*Graduate Study, \*Higher Education, \*Interpersonal Competence, \*Performance Based Teacher Education, \*Program Descriptions, \*Program Evaluation, \*Special Education, \*Statistical Data, \*Teacher Education, \*Teacher Improvement

Identifiers—\*Final Reports

Evaluated was a 3-year graduate program to train teachers of emotionally disturbed (ED) children. The program's major goals were the acquisition of basic knowledge in special education and child development, the attainment of skills for professional teaching competence, and the development of deepened sensitivity to oneself and others. The training sequence involved an intensive learning experience (seminars and internships) and practicum experience in different activities (such as classroom teaching) at a therapeutic school for ED pupils. Before and after each academic year, three groups of eight students each were administered test batteries (measuring competencies, attitudes toward education, and interpersonal characteristics) along with two self-evaluation instruments. Results comparing pre- and post-program attitudes showed that trainees reported they felt less disturbed by overly aggressive behavior of children, increased their skill in decoding affective statements, tended to see others as less lovable and less competent, and checked a greater number of favorable adjectives when rating themselves. Follow-up interviews indicated that graduates felt the program provided the most effective training for those areas (personal sensitivity and behavior management) which they also considered most relevant. (Tables and figures are provided.) (SB)

Identifiers—\*Child Mental Health Specialist

Described is a 2-year program to train child mental health specialists (CMHS) in providing care services to normal and emotionally disturbed children. Training of the child care professional is seen to involve three major areas: parenting (becoming aware of and dealing with the feelings of the disturbed child), clinical management (understanding and responding to the child's behavior), and fundamental education (acquiring skills in teaching normal as well as abnormal children, assessing developmental stages, and remedying learning disturbances). A 2-year CMHS training program is cited which provides training for degree at three levels (art associate's, baccalaureate's, and master's). The trainee is reported to participate in supervised training in clinical settings with children presenting a broad range of psychopathology (such as schizophrenia and antisocial tendencies). Provided is a list of academic courses taught for each level of the training program. (SB)

Descriptors—Blind, \*Exceptional Child Research, \*Partially Sighted, \*Program Planning, \*Reading, \*Research Needs, \*Research Proposals, \*Sensory Aids, \*Technology, \*Visually Handicapped, \*Visually Handicapped Mobility

To stimulate research proposals, the report stresses the need for a comprehensive research and development program regarding sensory aids for the visually handicapped and describes 17 representative projects viewed as warranting immediate attention. The 17 projects are categorized in two different ways. In a brief summary section, projects are classified according to whether they relate primarily to organization and planning or to R and D needs. Provided in the next section is a more detailed description of short-term projects that may be expected to yield successful early results (including new reading and mobility aids for the blind and studies of

visual capabilities among the partially sighted) as well as long-term projects (involving broader research in such areas as vocational opportunities, public information programs, sensory aids centers, technological applications, and research on the reading process among sighted individuals). Also listed are 19 source documents said to define problems, to describe the current state-of-the-art, or to indicate organizations and people currently active in the field of sensory aids for the visually impaired. Descriptors—\*Administration, Conference Reports, \*Delivery Systems, Equal Education, Exceptional Child Education, \*Handicapped Children, Regular Class Placement, \*Special Education, \*Urban Education

Presented are five papers and reactions of panel members from the 1973 conference on special education and decentralization sponsored by the Council of Great City Schools, Committee on the Education of Exceptional Children. R. Nystrom provides an overview of decentralization theory and process and suggests that reasons for the development of decentralization include a general distrust of professionals and the political and social aspirations of minority group members. Results of two studies are reported: the effects of decentralization on special education in two large urban school districts (E. Avery et al), and a survey of decentralization and special education in the Great City schools (N. Nash). M. Gittell focuses on the decision making process to distinguish political and administrative decentralization, and describes the impact of the process on such special education issues as mainstreaming and the right to education mandates. Discussed by M. Shedd are strategies and considerations involved in decentralizing the administration of special education in large city public schools. A conference summary is offered by E. Willenberg. Included in three appendixes is information about decentralized and centralized school systems in such cities as Atlanta, Detroit, and Cleveland. (CL)

Descriptors—Delivery Systems, Exceptional Child Education, \*Handicapped Children, Inservice Education, \*Junior Colleges, \*Literature Reviews, \*Paraprofessional School Personnel, \*Special Education, Surveys, Trend Analysis  
Identifiers—Final Reports, \*Needs Assessment

The report on paraprofessionals in special education focuses on updating information on utilization and training and recommendations for future directions. Reported in the literature review (1973-75) is a continuing trend toward favorable reception and positive use of paraprofessionals in special education. From questionnaires (a sample is provided in Appendix A) mailed to directors of 12 community colleges involved in training paraprofessionals in programs for handicapped children, findings are reported in terms of types of programs; number of paraprofessionals being trained, graduated, and employed; and program highlights and changes. Workshops and conventions are seen to demonstrate that the paraprofessional is a successful part of the delivery of instruction to handicapped children. Also summarized are three critical areas which are needed in the training and utilization of paraprofessionals: organized dissemination of materials, management and training skills for professionals to work with paraprofessionals, and closer examination into training models for paraprofessionals to work with severely handicapped children. Descriptors—Adjustment (to Environment), Conceptual Schemes, \*Conference Reports, Discriminatory Attitudes (Social), Exceptional Child Services, \*Handicapped Children, \*Housing, Housing Deficiencies, Models, Normalization (Handicapped), \*Physical Environment, Psychological Needs

Presented are proceedings from the first National Conference on Housing and the Handicapped (Houston, 1974) sponsored by Goodwill Industries to develop methods for improving housing facilities for the handicapped. E. Noakes's paper deals with such basic housing needs as homes planned for independent living to which services can be delivered and homes planned for congregate living with appropriate services provided inhouse. Responses to the topic from E. Weinrich and R. LaPierre cite prejudicial attitudes as major problems for the handicapped. Provisions of the Housing and Community Development Act of 1974 are related to the needs of the handicapped by M. Jackson, and responses to his address are given by L. Kirk and K. Arneson. Alternate housing models are reviewed, including programs in Fall River, Massachusetts, and Fargo, North Dakota. P. Roos proposes principles for normalizing the housing for handicapped people, including providing a range of options and minimizing obstacles. E. Fiorito and M. Thompson suggest ways to achieve the goal. Considered by J. Shover are responsibilities of public and private organizations in providing housing, and comments regarding her presentation are offered by C. Guelli and E. Leonard. Listed are recommendations adopted by four conference discussion groups. In the concluding address, A. Adams calls for a coalition to develop a national housing strategy. Included in four appendixes are a list of conference participants and special provisions for the handicapped, disabled and elderly of the Housing and Community Development Act of 1974. (CL)

Descriptors—\*Attitudes, Child Care, Childhood, \*Drug Therapy, Exceptional Child Education, \*Hyperactivity, \*Information Dissemination, Questionnaires, \*Surveys

Identifiers—Freedman Report

A two-phase survey was conducted to examine the impact of the "Report on the Conference on the Use of Stimulant Drugs in the Treatment of Behaviorally Disturbed Young School Children" (Freedman Report) upon its intended audience. Questionnaires were mailed to professionals (in medicine, psychiatry, and education), public managers (for education and public health) and both randomly selected and concerned laymen (those who had requested information on hyperkinesis); the 1,673 returned questionnaires were evaluated for awareness of drug treatment and attitudes toward its use, dissemination and effect of the Freedman Report, and sources of information about hyperkinesis. Among the results were that most respondents were aware of drug treatment, that the Freedman Report was best known among professionals in medicine and least known among laymen, and that the principal source of information on child hyperkinesis was professional literature. Recommended were the development of a dissemination base and publication of future communications with design and appearance consistent with audience preference. (Included are figures such as a graph on the search for index medicus for journal articles and attachments including literature on hyperkinesis.) (SB)

Descriptors—Adjustment (to Environment), \*Community Resources, Exceptional Child Research, Group Living, Interviews, \*Mentally Handicapped, Parent Attitudes, Prevention, Social Services

Identifiers—\*Deinstitutionalization, Montana

Reported are findings and recommendations from the University of Montana's Project on Community Resources and Deinstitutionalization which were derived from interviews with 86 service providers and nine social workers and from surveys of 61 retarded persons and their parents. It is explained that service providers most frequently identified the need for sheltered living arrangements to prevent institutionalization and depopulate the institutions, and that social workers felt community education and greater resources would increase the level of community acceptance. Summarized are parental views on such topics as satisfaction with their child's living arrangement, lack of community services, and confusion over service terminology. Described are recommendations for such service aspects as planning, program development and service coordination (including the need for program goals to conform to the developmental model and normalization principles); advocacy; placement procedures (including participation in decision making by residents and their parents or advocates); and residential services (including development of aggressive program for foster home recruitment). ness, \*Special Health Problems

Described is an instructional program that  
served approximately 125 hospitalized children in  
grades 1-12 during a 2-year period. Attention is  
given to the background and institutional climate,  
organization (including administration, staff, and  
physical facilities), operation (including objec-  
tives and strategies for individualized instruction),  
outcomes (such as providing an academic pro-  
gram which allows the child to keep up with his  
nonhospitalized peers) and limitations (such as  
inability of some students to participate), the  
need for further evaluation of program effective-  
ness, and future priorities in such areas as pro-  
gram funding and expansion of services. (LH)

Presented is Volume 2 of a final report on a  
project to determine current practices and poli-  
cies likely to result in maximized adoptive place-  
ments for mentally, emotionally, or physically  
handicapped children. Data on families that  
adopted handicapped children are analyzed, two  
methods for disseminating project findings (a  
placement workshop and a handbook for child  
welfare workers) are described, and recommen-  
dations are offered for improving community  
education and for modifying agency and govern-  
mental policies related to service delivery. In a  
concluding chapter, 19 major project results (in-  
cluding findings that prior experience with han-  
dicapped individuals significantly and positively  
affected a family's willingness to adopt a han-  
dicapped child) are summarized and evaluated,  
and future research needs are suggested. Ap-  
pended are copies of the questionnaires sent to  
agency directors and to workers. (LH)

dicapped

Identifiers—Elementary Secondary Education Act  
Title III, ESEA Title III

Presented is the curriculum guide from the  
Home and Family Living Laboratory, a project of  
the Child Development Center (St. Paul, Min-  
nesota) which serves educable mentally retarded  
and trainable mentally retarded teenagers and  
young adults. It is explained that the laboratory  
setting is a house (next to the school building)  
which accommodates 12 students, and that the  
purpose of the program is to facilitate transfer of  
home maintenance and home economics skills to  
a real life situation. Introductory information in-  
cludes: a history of the project, a description of  
mainstream (association with non-handicapped  
students) aspects of the program, take-home ac-  
tivities coordinated with each curriculum unit,  
and a guide for media to be used with each unit.  
Seven curriculum units cover the following topics  
(with sample objectives in parentheses): living in  
a neighborhood (understanding the rights and  
responsibilities of a property owner); money and  
the consumer (locating the price tag on an item);  
personal needs within the family (learning groom-  
ing and meal management); interior home care  
and planning (vacuuming); home maintenance  
(raking leaves); home emergencies (handling  
home fires); and leisure time (participating in  
games and hobbies). Provided for each unit are  
objectives, learning activities, vocabulary,  
teaching aids/resources, related academic objec-  
tives, and evaluative criteria. (LS)

Descriptors—\*Aurally Handicapped, Exceptional  
Child Education, \*Individualized Instruction,  
Job Skills, \*Program Descriptions, Program  
Development, \*Programed Instruction, Pro-

gram Effectiveness, Secondary Education,  
Teaching Methods, \*Vocational Education

Reported are the origins, development, and  
preliminary evaluation of a self-instructional  
training system to prepare deaf high school stu-  
dents for entry-level electronic assembly jobs in  
industry. Description of the training system  
focuses on the following topics: the instructional  
concept on which the system is based; the  
method of instruction (including samples from  
programed texts and filmstrips); the seven learn-  
ing objectives (such as mechanical assembly and  
component installation); and administrative  
characteristics (such as length of the curriculum  
and teacher requirements). In a section on  
development of the training system, antecedents  
of the project (such as a World War II training  
program) are discussed, and a chronology of pro-  
ject development is provided. Preliminary evalua-  
tion involving developmental testing and on-site  
tryout of prototype materials with approximately  
85 hearing impaired students is said to have  
yielded findings that the program results in  
achievement of the specified learning objectives,  
allows for adaptation to individual differences,  
stimulates peer-tutor relationships, can be highly  
motivating, requires full-time administration by  
teachers, and is based on a valid instructional  
model. (LS)

ment, Emotionally Disturbed, Exceptional  
Child Research, \*Eye Movements, \*Eyes,  
\*Hyperactivity, \*Perceptual Motor Coordina-  
tion, Problem Solving, \*Vision Tests

Identifiers—\*Electrooculography

A study involving 18 hyperkinetic children  
(from 3- to 12-years old) was conducted to test  
the hypothesis that hyperactive children manifest  
the same type of hypermotility in their eyes as in  
the rest of their body. Ss were observed under a  
series of test conditions (including manual  
problem solving) which elicit short and long  
periods of fixation, pursuit movements, small and  
large saccadic movements (rapid, involuntary  
jumping of the eyes from one fixed point to  
another); and optokinetic nystagmus (rapid in-  
voluntary oscillation of the eyeballs); and eye  
movements were measured by electrooculog-  
raphy. In comparison to controls, hyperkinetic Ss  
were generally unable to hold their eyes steady  
either in direct forward or in lateral gaze; Ss  
tended to continue to use combined head and eye  
movements at a later age when problem-solving;  
and Ss tended to have more saccadic movements  
to non-target areas during pursuit. (Graphs are  
provided.) (SB)

tional Problems, \*Etiology, Exceptional Child  
Education, \*Hyperactivity, Motor Develop-  
ment, Nutrition, Social Adjustment

Hyperactivity in children is explained in rela-  
tion to behavioral characteristics, precipitating  
factors, and stimulant medication therapy. The  
basic mechanism of hyperactivity is seen to be  
impulsive style in motility, attention, and so-  
cialization. Problems caused by impulsivity are  
noted to include feeding problems, school dif-  
ficulties, and peer alienation. Two factors are re-  
ported to precipitate hyperactivity which are  
emotional (stress) and chemical (food additives).  
The use of stimulant medication therapy is  
discussed in terms of goals; type and advantages

of drug chosen; dosage; when to stop medication; and effects on growth, appetite, and sleep. (SB)

**Descriptors—**Aurally Handicapped, \*Child Development, Communication Problems, Concept Formation, Emotionally Disturbed, \*Exceptional Child Education, Family (Sociological Unit), Gifted, Intervention, Language Development, Learning, Learning Disabilities, Mentally Handicapped, Perception, \*Research Reviews (Publications), Sexuality, Visually Handicapped

Fourteen research reviews are presented in two sections: child development research (seven papers) and the application of the research to exceptional children (seven papers). Topics discussed in Section I are language acquisition by Kenneth Ruder, William A. Bricker, and Charlotte Ruder; perception by James J. Gallagher; concept formation by Irving Sigel; learning by Harold W. Stevenson; family relationships by Earl S. Schaefer; identification and sex role by Nicholas J. Anastasiow and Michael L. Hanes; and children's response to intervention programs by Merle B. Karnes and James A. Teska. Section 2 covers the topics of children with intellectual superiority by Catherine B. Bruch; children with intellectual subnormality by James W. Moss and D. Luisa Mayer; children with learning disabilities by Jeanne McCrae McCarthy; children with social and emotional problems by Frank H. Wood; children with visual handicaps by Richard G. Umsted; children with hearing impairments by Doin E. Hicks; and children with communicative disorders by Doris J. Johnson. Also provided are an index of names and a subject index. (SB)

**A Comparison of Self-Concept Between EMR and Non-EMR Students.**

Pub Date Jun 75

Note—39p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors—**\*Educable Mentally Handicapped, Exceptional Child Research, \*Intelligence Quotient, Junior High Schools, Mentally Handicapped, \*Reading Ability, Secondary Education, \*Self Concept

The self-concept of 20 educable mentally retarded (EMR) junior high school boys in special classes was compared to that of 20 non-EMR junior high school boys in regular classes. Two self-concept scales (the Piers-Harris Children's Self Concept Scale and the "How I See Myself" Scale by I. Gordon) were used as measurement instruments. Also collected and compared were Ss' IQ scores and reading grade levels. The results of the study indicated that EMR Ss had more negative self-concepts than non-EMR Ss; however the differences were not significant. Correlations with self-concept and reading were positive but low, however there was no relationship between IQ and self-concept among the EMR students. There was a high positive relationship between IQ and self-concept among non-EMR students and a low positive relationship between reading and self-concept. (Author/LS)

**An Annotated Catalog of Visual Materials Relating to the Identification and Management of Handicapping Conditions of Preschool Children.**

Appalachia Educational Lab., Charleston, W. Va. Spons Agency—Appalachian Regional Commission, Washington, D.C.

Pub Date Jun 75

Note—168p.

**EDRS Price MF-\$0.76 HC-\$8.24 Plus Postage**

**Descriptors—**\*Audiovisual Aids, Catalogs, Exceptional Child Education, Films, \*Handicapped Children, Identification, \*Preschool Education, \*Resource Guides, \*Teacher Education, Video Tape Recordings

**Identifiers—**\*Appalachia

Presented is a catalog of 232 visual materials (films, slides, or videotapes) relating to identification and management of handicapping conditions of preschool children. Section I contains information on 118 visuals including title, type, length, production date, producer, distributor, cost, an evaluative summary, audience, and sources in the Appalachian area. Annotated visuals are also indexed alphabetically by title and categorically under the following headings: autism, Down's Syndrome, emotionally disturbed, hearing impaired, informational, instructional, language, learning disorders, mental retardation, physical and neurologically handicapped, visually impaired, and testing and assessment. Section II lists unreviewed visuals alphabetically by title within categories (such as films and videotape), and only title and distributor for each entry is given. (SB)

**Descriptors—**\*Community Resources, Exceptional Child Research, Institutional Environment, \*Mentally Handicapped, \*Normalization (Handicapped)

**Identifiers—**\*Deinstitutionalization

Presented is an overview of issues and concepts related to deinstitutionalization and the development of community based services for the mentally retarded. Explained are distinctions between mental retardation and developmental disabilities, and between decentralization, deinstitutionalization and institutional reform. Forces in the deinstitutionalization movement are analyzed, including normalization and legal action. Resistance by parents and economic interests are said to be among barriers to deinstitutionalization. Elements of a comprehensive service system, including adherence to a developmental model are considered, and comprehensive system services such as family support and child development services are described. Given are examples of deinstitutionalization efforts in Connecticut, Nebraska and California. Approaches to deinstitutionalization in rural areas receive special consideration. (CL)

Summarized are data gathered during phase I of a state survey of administrators, funded under Title III, to determine the number of handicapped children receiving or in need of special education services in Indiana. The following are among survey results highlighted in the first chapter: 19,061 pupils were estimated by public school principals to need placement in appropriate special education programs; approximately 82,815 exceptional students were estimated to be receiving special services during 1973-74; and respondent principals viewed lack of parental cooperation, labeling of students, time lag between formal referral and final placement, and inadequate special education facilities and personnel as major problem areas in providing needed services. Presented in chapters 2 and 3 are a detailed description of survey methods and an analysis and summary of the data gathered. Discussed in an addendum are reasons underlying different estimates of prevalence among children with various exceptionalities. (LH)

**Identifiers—**\*Iowa

Presented by the Iowa Department of Public Instruction are recommendations for comprehensive hearing conservation services and educa-

tional programing for hearing impaired (HI) pupils. Part 1 consists of Iowa's Rules of Special Education which are arranged under 10 divisions: authority, scope, general principles and definitions; methods of providing programs and services; district and area responsibilities; planning; services and program management; personnel; facilities; materials and equipment; program review; public participation; and finance. In Part 2 specific interim procedures in the 10 division areas are outlined for hearing conservation services and education of HI pupils. Appendices to Part 2 include a list of suggestions for helping the hard of hearing child in the school room, and various record and report forms. Part 3 provides the following reference materials: lists of referral agencies and professional organizations; chapters from the school laws of Iowa on topics such as school for the deaf and compulsory education; and American Speech and Hearing Association guidelines regarding audiometric symbols, identification audiometry, and audiology programs in educational settings for HI children. **Trends and Patterns in Achievement Test Results and Baseline Expectancy Data for Future Performance: Programs for Emotionally Disturbed Children, Physically Handicapped Children, Learning Disabled Children, and Children with Minimal Brain Injury. Annual Program Evaluation Report 1973-1974.**

Pub Date Mar 75

Note—278p.

EDRS Price MF-\$0.76 HC-\$14.59 Plus Postage

Descriptors—\*Academic Achievement, Age Differences, Elementary Secondary Education, \*Emotionally Disturbed, Exceptional Child Research, Expectation, Intelligence Level, \*Learning Disabilities, \*Minimally Brain Injured, \*Physically Handicapped, Program Evaluation, Statistical Data

Identifiers—Pennsylvania (Montgomery County), \*Stanford Achievement Test

Summarized are the results of testing (Stanford Achievement Test) during 1973-74 in four Montgomery County, Pennsylvania programs for handicapped children: physically handicapped, emotionally disturbed, minimally brain injured, and learning disabled. The study attempted to establish realistic expectancy levels of performance for children at various ability and levels within each program. It is explained that within each program, the children were stratified into the following subgroups: individual intelligence test verbal scores, global age levels (elementary versus secondary), specific age levels, and entry levels (pretest scores). Reported are results showing achievement patterns ranging from less than half a year to somewhat less than a full year for each year of instruction. (The major portion of the document consists of tables detailing achievement test results.) (DB)

**Specialized Vocational Training Program Development. Final Report.**

Bristol Township School District, Pa.

Report No.—R-17-5009

Note—369p.

EDRS Price MF-\$0.76 HC-\$18.40 Plus Postage

Descriptors—Child Care, \*Curriculum Guides, \*Educable Mentally Handicapped, Exceptional Child Education, Home Economics, Job Skills, Mentally Handicapped, \*Nonprofessional Personnel, \*Prevocational Education, School Services

Identifiers—Pennsylvania (Bristol)

The final report of the Bristol Township School District (Pennsylvania) training program for the educable mentally retarded presents instructional units for the areas of preschool education, child care, shipping and receiving, maintenance and food services. It is explained that the project uses school service personnel to supervise students in vocational training situations within the school. Classroom teachers are said to use the manual to help students understand the roles of service personnel. Each unit is color coded and contains daily lesson plans with information on general concepts, behavioral objectives, readings experiences, learning experiences, and student activities. Also provided are separate student activity sheets which can be reproduced for classroom

use. Examples of lessons are awareness of body parts and safety on the playground (teaching the preschooler unit); growth and development in early childhood (child care unit); safety aspect of lifting and stacking procedure (shipping and receiving unit); using a time card and ordinary outside house maintenance (maintenance unit); and kitchen equipment (food services unit). **Interdisciplinary Team Functioning: A Case Team Approach to Habilitation in a Residential Facility for the Mentally Retarded.**

Willowbrook Developmental Center, Staten Island, N.Y.

Pub Date Jan 75

Note—38p.; Not available in hard copy due to marginal legibility of original document

EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.

Descriptors—Conceptual Schemes, Exceptional Child Services, \*Information Systems, \*Interdisciplinary Approach, \*Mentally Handicapped, Models, \*Residential Programs

Detailed are the functions, structure, and relationship to data gathering systems of an interdisciplinary team habilitation approach in a residential center for mentally retarded persons. Deficiencies of the system currently in operation at Willowbrook Developmental Center (New York) are reviewed. It is explained that suggested reorganization is based on the case team approach with each member designated case manager for certain residents. Stages of team functioning are described, and an individual case is traced through the four stages (case team assessment, treatment team consolidation, program implementation, and resident evaluation). Also considered are such implementation factors as provision for case review, participation by therapy aides on case teams, and strategies for phasing in the new system. (CL)

**Study of Excess Costs of Educating Handicapped Pupils.**

National Center for Educational Statistics (DHEW/OE), Washington, D.C.

Report No.—NCES-75-223

Pub Date 75

Note—53p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—Costs, Exceptional Child Research, \*Expenditure Per Student, \*Financial Policy, \*Handicapped Children, Questionnaires, Special Education, State Programs, \*State Surveys, Tables (Data)

Reported are findings from a survey of eight state education agencies on the excess cost of educating handicapped children. Among findings presented are that no state surveyed has all the data required for a detailed analyses of excess costs; few states maintained a detailed accounting system for special education programs; few provided cost information on institutionalized children under the care of other state agencies; and prevalence estimates of various handicapping conditions varied widely. Major types of problems with survey data are summarized for each state. Provided are tables depicting the costs of special education (including salaries of teachers, administrators, specialists and paraprofessionals) compared to the costs of regular education for each state. Emphasized is the need for a uniform data system for analysis of excess costs of educating handicapped children. Appended is a sample questionnaire submitted to the surveyed states. (CL)

Pub Date 75

Grant—OEG-0-71-4157(607)

Note—15p.; Paper presented at the International Federation of Learning Disabilities (Second International Scientific Conference, Brussels, Belgium, January 3-7, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Educational Objectives, Exceptional Child Education, Learning Characteristics, \*Learning Disabilities, Mentally Handicapped, Reading, Reading Comprehension, \*Reading Skills, Task Analysis, \*Teaching Methods

Reported is the development of instructional procedures to teach learning disabled and mentally handicapped children reading skills, based on their particular verbal learning and language characteristics. Focused on is the development of prototypes of teaching procedures based on cross connecting the learning, language, and reading domains. Detailed are the following steps of prototype development: specifying a behaviorally stated instructional objective for the reading skill, identifying the aspect of learning or language involved in the instructional objective, identifying the independent variables which influence that aspect of learning or language, and expressing variants of the independent variables as teaching procedures. It is explained that prototypes have been developed for teaching the following 13 reading skills: identifying main ideas and supporting ideas, identifying word meanings from context, learning word meanings-synonyms, learning word meanings-homonyms, learning word meanings-concepts, learning sight vocabulary, learning word meanings-compounds, learning word meanings-affixes, recalling and comprehending sentences, learning through sentences, learning through connected discourse, directions, and identifying main ideas and supporting ideas in connected discourse. Kinetic-Family-Drawing of Kindergarten and First Grade Children with Delayed Perceptual and Motor Development.

Pub Date 75

Note—8p.; Paper presented at the International Federation of Learning Disabilities (Second International Scientific Conference, Brussels, Belgium, January 3-7, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Body Image, \*Emotional Problems, Exceptional Child Research, Family Attitudes, \*Learning Disabilities, Projective Tests, \*Psychological Evaluation, Self Concept, \*Withdrawal Tendencies (Psychology)

Identifiers—\*Kinetic Family Drawings

Kinetic-Family-Drawings were obtained from 50 kindergarten or first grade children with delayed perceptual and/or motor development and 50 controls to investigate the effectiveness of this instrument as a measure of socio-emotional dimensions of high risk low achievers. Each child was asked to draw each member of his family (including himself) actively doing something. Drawings were scored on the criteria of isolation, bodily concerns, and rivalry. Results indicated that Ss having delayed development were differentiated from controls by a greater sense of isolation and bodily concern. Rivalry was not a significant discriminator. (Author/DB)

Incidence of Learning Disabilities in Juvenile Delinquents and Nondelinquents: Implications for Etiology and Treatment.

Pub Date 75

Note—7p.; Paper presented at the International Federation of Learning Disabilities (Second International Scientific Conference, Brussels, Belgium, January 3-7, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Delinquency, Exceptional Child Research, Incidence, \*Learning Disabilities, \*Testing

Investigated was the incidence of learning disabilities in juvenile delinquents at a Rhode Island Training School. Ss and nondelinquent controls were administered the Halstead-Reitan battery of measures including the Wechsler Intelligence Scale, the Wide Range Achievement Test, and tests of sensory imperception. Results found the five predictors utilized (Verbal IQ, Performance IQ, Halstead's Impairment Index, the Trailmaking Test Part A, and the Trailmaking Test Part B) discriminated significantly between delinquent and nondelinquent groups with 87 percent of the delinquents and 78 percent of the controls being correctly classified as a result of the five neuropsychological indexes. The most powerful individual predictors were the Performance IQ and the Impairment Index. (DB)

A Behavioral Experimental Analysis of Dyslexia.

Pub Date 75

Note—26p.; Paper presented at the International Federation of Learning Disabilities (Second International Scientific Conference, Brussels, Belgium, January 3-7, 1975); Best copy available

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—\*Behavior Change, \*Dyslexia, Exceptional Child Research, Learning Disabilities, \*Operant Conditioning, \*Remedial Reading, \*Teaching Methods

Identifiers—\*Staats Action Reading Technique

Two groups of six children (aged 9 and 10 years) were given either traditional remedial reading treatment or behavioral therapy consisting of the Staats motivated Action Reading Technique. The method involved positive reinforcement for correct responses during three phases of instruction: individual word phase, oral reading phase, and silent reading and comprehension phase. Both dyslexic and non-dyslexic Ss receiving the behavioral intervention significantly improved in reading achievement to approximately the same degree, and the dyslexic Ss improved in several perceptual and attentional measures as well. Results supported the theory that dyslexia can be viewed as a function of deficient learning history. (Author/DB)

Presented is the fourth in a series of formative evaluation reports on "Me and My Environment", a 3-year environmental sciences program for 13- to 16-year-old educable mentally handicapped (EMH) children. The rationale and standards for monitoring instructional effectiveness are explained, and student performance is reported on field tests of items assessing instruction in Units 1 ("Exploring My Environment"), 2 ("Me as a Habitat"), and 3 ("Energy Relationships in My Environment"). Described is a small-scale field test in which techniques of observing, describing, comparing and ordering objects were taught to 14 EMH students through the use of stereograms and viewers. Discussed are the implications for curriculum development of a survey of 235 EMH adolescents concerning their attitudes toward and use of tobacco, alcohol, and unprescribed drugs. Four abstracts of studies on the functional abilities of EMH students are provided, and comments are offered relating findings about cognitive abilities and students' manipulative skills to curriculum development. Descriptors—\*Creativity, \*Demonstration Projects, Exceptional Child Research, \*Gifted, Measurement Techniques, Parent Attitudes, \*Program Descriptions, \*Program Evaluation, Staff Improvement

Identifiers—Elementary Secondary Education Act Title III, ESEA Title III, West Virginia

Presented in the annual (1973-74) evaluation of Project Talented and Gifted are results of an appraisal of over 50 student participants (10- to 12-years-old) and the project staff and resource personnel. The project is described as a 3-month institute to provide experiences in areas such as learning to use creative thinking and problem-solving strategies, in language arts, science and mathematics, and music. Procedures, results, and evaluation instruments are described in three sections: the experiment, student-parent perceptions, and other sources. Reported are findings which include that Ss showed significant improvement in verbal originality; that the program did not appear to have brought improvement in areas of figural fluency, flexibility, originality, and elaboration; that both parent and student perceptions indicated that students were weakest in initiative and/or leadership experiences; that staff assessment was generally positive; and that recommendations made by resource personnel were both pertinent and valuable. Recommendations are noted for the project's second year which include special attention and emphasis to development of creative thinking abilities in fluency, flexibility, originality, and elaboration. Descriptors—\*Creativity, \*Demonstration Projects, \*Exceptional Child Research, \*Gifted, \*Measurement Techniques, \*Parent Attitudes, \*Program Descriptions, \*Program Evaluation, \*Staff Improvement

Identifiers—Elementary Secondary Education Act Title III, ESEA Title III, West Virginia

Presented in the annual (1974-75) evaluation of Project Talented and Gifted are results of an appraisal of over 50 student participants (10- to 12-years-old) and the project staff and resource personnel. The project is described as a 3-month institute to provide experiences in areas such as learning to use creative thinking and problem-solving strategies in language arts, science and mathematics, and music. Results and recommendations from the first evaluation are outlined and instruments used for the second evaluation are described in three sections: the experiment, student perceptions, and other sources. Reported are findings which included that Ss showed significant improvement in verbal originality and figural flexibility; that Ss improved in the areas of self-strength and individually; and compared to Ss' self-perceptions in 1974, 1975 Ss' self-perceptions significantly improved in environmental sensitivity, initiative, self-strength, individuality, and intellectuality. Recommendations for the project's third year are noted which include the continued encouragement of effective use of the library. (SB)

The Gifted Child: Today and Tomorrow.

Pennsylvania Association for the Study and Education of the Mentally Gifted.

Pub Date 74

Note—49p.; Highlights of the 1974 PASEMG Conference at Pennsylvania State University

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Conference Reports, \*Creativity, \*Curriculum Development, \*Exceptional Child Education, \*Financial Support, \*Gifted, \*Legislation, \*Parent Associations, \*Parent Role, \*Program Planning, \*Research Reviews (Publications), \*Teacher Role

Reported are the proceedings from a 1974 conference on programming for gifted children which was sponsored by the Pennsylvania Association for the Study and Education of the Mentally Gifted. Reviewed in a keynote address by J. Gowan are 12 outstanding research studies conducted during the past 25 years regarding identification and education of gifted students, and discussed are curricular models for stimulating their development and creativity. Discussed in a section on parent involvement are state and federal legislation, funding and special education policies concerning programs for the gifted (N. Bingham); procedures for launching parent groups (S. Gutin and R. Manning); and suggestions for fostering giftedness, insuring appropriate public school opportunities, and raising the gifted child in a single parent family (J. Gowan). A final section on teacher involvement contains three brief papers on humanities (J. Farr); Stimulating creativity (L. Roslund and M. Stitt); and guidance for teachers. (LH)

Identifiers—California

Presented is a 2-part report on educating the gifted in California schools. Included in Part One on program planning are brief sections on goals, proposed legislation, the role of the Gifted and Talented Education Management Team, a 3-phase proposal for implementing work plans (in such areas as management, preservice and inservice training, research and evaluation), and experimental programs for gifted disadvantaged students. Considered in Part Two are portions of a Blue Ribbon Committee report that deal with general philosophy; a definition of gifted individuals (in terms of intellectual, leadership, and creative abilities); major program goals; basic needs (including multiple learning options); program principles in the areas of counseling, curriculum design, and staff development; and program recommendations regarding aspects such as evaluation, individualized instruction, parental involvement, funding, and staffing ratios. Provided is a chart relating program principles and recommendations; and appended are lists of Blue Ribbon Committee, planning team, and Department of Education staff members. (LH)

Careers in Integrated Early Childhood Programs. California State Univ., Northridge. Preschool Lab.

Spons Agency—Rehabilitation Services Administration (DHEW), Washington, D.C.

Pub Date Aug 75

Note—272p.

EDRS Price MF-\$0.76 HC-\$13.32 Plus Postage

Descriptors—\*Changing Attitudes, \*Curriculum Design, \*Demonstration Projects, \*Early Childhood Education, \*Exceptional Child Education, \*Handicapped Children, \*Information Dissemination, \*Performance Based Teacher Education, \*Practicums, \*Program Descriptions, \*Program Evaluation, \*Regular Class Placement

Described is a 4-year project to design and implement a competency-based training model which prepared teachers and administrators for careers in early childhood programs that integrate normal and handicapped children. Discussed in the introductory chapter are the project's rationale, overview, objectives, and training setting. Chapters II through V cover such aspects of the competency model achievement strategies as the process for selecting trainees; development of a teacher assessment profile; the didactic module (including coursework in child development, independent study, and guest lectures on meeting the special needs of handicapped preschoolers); and the practicum module (including direct classroom experience, curriculum design, and child assessment techniques). Attention is given in Chapter VI to a survey designed to assess how exposure to the integrated preschool program affected trainees' development of accepting attitudes toward handicapped children. The concluding chapters focus on dissemination of project materials and project evaluation. Also provided are numerous charts and tables; bibliographies of books, journal articles, and films; and 9 appendixes (including a discussion of labeling and guidelines for curriculum design). (LH)

Descriptors—Agencies, \*Audiovisual Aids, \*Bibliographies, \*Childrens Books, \*Curriculum Guides, \*Elementary Education, \*Exceptional Child Education, \*Handicapped Children, \*Instructional Materials, \*Interpersonal Relationship, \*Peer Acceptance

Presented is a guide for teaching elementary school children to understand classmates and others with special needs which was developed as a result of a project involving 16 classroom teachers and a nurse consultant in developing an exemplary program. Listed are concerns frequently voiced by teachers such as a child asking embarrassing questions. Described in terms of course instruction and teacher application are curriculum methods which include group discussions, field trips, and inviting guests with special needs. Also noted are curriculum materials such as reading and audiovisual aids. Children's drawings and comments are included in each curriculum section. Provided are appendixes with information on 145 resource agencies, 90 books appropriate for children in grades K-8, 26 pamphlet sources, and 26 audiovisual materials. (SB)

**Descriptors**—\*Curriculum Development, \*Exceptional Child Education, \*Gifted, \*Independent Study, \*Individual Characteristics, \*Sciences, \*Secondary Education, \*Skill Development, \*Teacher Role, \*Teaching Guides

One of a series of publications for teachers, consultants, and administrators, the guide offers recommendations for curriculum development and science instruction for gifted students in grades 7-12. Discussed in the introductory chapter is creation of a school environment that fosters skills of interdependence (Communication with other scientists) as well as independent inquiry. Chapter 2 deals with characteristics and identification of gifted secondary students, the teacher's role in stimulating scientific interest, differences between conventional and singular giftedness, and the functions of the lecture and investigative approaches. Among the topics explored in a chapter on curricular strategies are types of curricula (such as the learning activity package or LAP program), a conceptually based curriculum, and instruction in investigative arts. A final chapter focuses on independence training, designing and evaluating LAPs for the junior high curriculum, and a consortium module for senior high curricula. (LH)

**The Relativization "Which That It Is" in Israeli Hebrew.**

Pub Date [72]

Note—16p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*Comparative Analysis, \*Contrastive Linguistics, \*Diachronic Linguistics, \*English, \*Form Classes (Languages), \*Grammar, \*Hebrew, \*Language Research, \*Pronouns, \*Sentence Structure, \*Syntax

**Identifiers**—\*Relativization

The first part of this paper provides a description and discussion of the major aspects of the process of relativization in Israeli Hebrew: (a) the use of a subordinating relative particle which in most cases can neither be deleted nor replaced and which is prefixed to the first constituent of the embedded S; (b) the obligatory pronominalization of the coreferential NP in the embedded S; and (c) the function of the relativized NP in determining whether or not the pronominalized form of the NP of the embedded S will be deletable. The second part of the paper deals with: (a) a hypothesis that historically the relative marker in Hebrew, in practically all cases of relativization, was preceded by a pronominalized relative; (b) a discussion of the possibility that Hebrew in an analogous manner closely parallels English in its historical development, leading us to consider some interesting claims about subordinating processes in general; and (c) a description and discussion of relative clause reduction as further support of some of the notions put forward in (a) and (b). **Descriptors**—\*College Language Programs, \*Cultural Awareness, \*Cultural Education, \*Culture Contact, \*Foreign Culture, \*Language Instruction, \*Life Style, \*Program Design, \*Second Language Learning, \*Sociocultural Patterns, \*Study Abroad

This paper aims at increasing the cultural impact that overseas programs can have on their participants. Too often such programs rely on cultural learning through haphazard and chance experiences. In its stead, a carefully organized program of cultural knowledge and experiences is advanced. Centered around a thematic approach to analysis of the foreign life style, the program involves face-to-face interviews and field experiences which bring students into direct contact with the foreign people and their social organiza-

tion. Field assignments are accompanied by written guidelines to aid in the culture quest. Discussion-type seminars help sharpen understanding of the subject matter, and special sessions for teachers to design cultural materials for classroom use back home provide appropriate pedagogical application. **Accountability in Educational Reform Programs through Instrumentation Analyses and Design Variation: Evaluating Cognitive Growth in Illinois Bilingual Programs, 1972-73.**

Pub Date Feb 73

Note—30p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**—\*Bilingual Education, \*Bilingualism, \*Cognitive Measurement, \*Educational Accountability, \*Educational Objectives, \*Elementary Education, \*Evaluation Criteria, \*Evaluation Methods, \*Evaluation Needs, \*Measurement Instrument S, \*Program Design, \*Program Evaluation, \*Spanish Speaking, \*State Aid, \*Student Evaluation

**Identifiers**—\*Elementary Secondary Education Act Title VII, \*ESEA Title VII, \*Illinois

The bilingual situation in Illinois is described briefly, and an outline of the instructional objectives of local bilingual programs is given. The programs are to be: (1) measurable and oriented toward the end-of-year-product, and (2) organized within the guidelines for state-funded bilingual programs. The main part of the report describes the design of the procedures set up to evaluate these programs based on the following recommendations from the Office of the Superintendent of Public Instruction: (1) prior to implementing a bilingual program in a community a sociolinguistic survey should be conducted there; (2) priority should be given to early childhood programs, preferably pre-school and kindergarten; (3) 'standardized' instruments, rather than criterion-referenced tests should be selected as measurement tools; and (4) insofar as possible, a true experimental evaluation design should be employed, with randomly assigned treatment and control groups. The aim was to select and implement the combination of designs and instruments which would most effectively give an accurate picture of local bilingual education programs. Actual evaluation findings are not reported here. Anticipated design refinements for future years are mentioned, and three tables give: (1) a description of the measuring instruments, (2) statewide evaluation designs and project sites, and (3) between-groups hypothesis. **Identifiers**—\*Communicative Competence

This study examined acquisition and development of children's social/symbolic and strategic communication abilities within a sociolinguistic model of communicative competence. The major theoretical perspective was derived from Mead's symbolic interactionism and the cognitive-developmental theories of Piaget and Werner. Role-taking was the central concept used to examine the developmental variation and achievement of specific communicative abilities in two communicative task situations: (1) social/strategic or "persuasive," (2) social perspective taking, or "empathy." Measures of role-taking ability were developed, based on qualitative criteria established by the social/symbolic requirements of the communication task. Two additional sub-skill indices of role-taking ability were also

developed: a communication construct measure and a communication "management" score. The sample consisted of 61 grade school children, 27 males and 34 females, ages 9-12, from three ethnic groups (Caucasian, Black, and Spanish American), all having a low socio-economic background. Results showed that older children and Caucasian children demonstrated significantly greater role-taking ability, that general role-taking ability operates across task situations and conceptual domains, that grade level was minimally important in communication construct usage, and that the ability to manage the ongoing situation across tasks showed a significant developmental increase. **Meanings and Distribution of the Perfect in Present-Day American English Prose.**

Pub Date 74

Note—16p.; Paper presented at the annual TESOL conference (8th, Denver, Colorado, March, 1974)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*American English, \*English (Second Language), \*Language Instruction, \*Language Research, \*Linguistic Theory, \*Prose, \*Semantics, \*Syntax, \*Verbs, \*Written Language

**Identifiers**—\*Perfect Verb Forms, \*Tense (Verbs)

This paper explores the meanings and distribution of the perfect in contemporary American English prose, with reference to problems encountered in teaching English as a second language. The English perfect comprises forms traditionally called present perfect tense, past perfect tense, and perfects of the infinitive, gerund and present participle. All forms have a tense function: to situate the action or state conveyed by the lexical verb in a time period which begins before and extends to a point of reference that varies depending on the perfect form in question. Each instance of the perfect conveys one of three secondary meanings: single action, iteration, continuation. This meaning depends partly on the nature of the lexical verb and partly on context. The verification of this theory of meaning of the American English perfect and a study of its distribution in contemporary writing are accomplished by use of the Standard Corpus of Present-Day American English. Instances of the perfect from approximately 300,000 words, or 30 percent of the Corpus are extracted with 10 words of context from either side, analyzed for meaning, and the distribution of the various forms in written American English is determined. **Identifiers**—\*Generative Semantics

This report describes work on a pilot system for a fully automatic, high-quality translation of German scientific and technical text into English and gives the results of an experiment designed to show the system's capability to produce quality mechanical translation. The areas considered were: (1) grammar formalism, mainly involving the addition of features to permit the generation of multiple translations for an input sentence, (2) programming, consisting of completing the main components of the linguistic research system which is a generalized programming system for the mechanical translation of arbitrary languages, (3) linguistic description, concentrat-

ing on the coverage of the German surface syntax, a complete description of German and English standard grammar and syntactic choice grammar rules, and (4) lexicographic description. The characteristics of the system are: (1) the translation process is completely autonomous without human pre-analyses and/or pre-editing, (2) the output reflects quality features normally associated with a competent human translation, (3) the translation process is bidirectional, (4) the programs are language independent, and (5) the system is machine independent with respect to the programming language. **Rhetorical Competence: Queries and Questions.**

Pub Date 17 May 75

Note—15p.; Paper presented at the North Central Regional Linguistics Conference (Univ. of Minnesota, May 16-17, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—Deep Structure, \*Language Ability, Language Usage, \*Linguistic Competence, \*Linguistic Performance, \*Linguistic Theory, Native Speakers, Oral Communication, Transformation Generative Grammar

Identifiers—Illocutionary Force, Performative Analysis, \*Rhetorical Competence

A native speaker of a language possesses both grammatical and rhetorical competence. A grammatical model, in its deep structure, represents an "is a" relationship. It seeks to offer some explanation of a human being as a human being. A rhetorical model represents a "counts as" relationship. It seeks to offer some explanation of a human being as a social animal. Linguistic models, such as the performative analysis, that attempt to integrate illocutionary force into a grammar are ill-conceived. An illocutionary act must be context-oriented. A rhetoric relates illocutionary force and context. That is, a particular chunk of linguistic material (generated by the grammar, without orientation to context) counts as a particular illocutionary act (the actualization of an illocutionary force) in a particular context. Queries, a rhetorical concept, underlain by basic assumptions or sincerity conditions (Austin's proper thoughts and feelings), and questions, a grammatical concept, provide interesting examples of and insights into incongruities resulting from the nexus of grammatical and rhetorical competence. (Author)

Descriptors—Audiolingual Methods, Classical Languages, Cultural Awareness, \*Curriculum Guides, Educational Objectives, \*Greek, Humanities, Humanities Instruction, Instructional Materials, \*Language Instruction, \*Programed Texts, \*Secondary Schools

This is a student's programmed text for Level Beta of a humanistic approach to instruction of Classical Greek and Greek culture in secondary schools. The goals of the program are to help students become aware of: (1) the impact of Hellenic civilization on contemporary society, including the impact of the Greek language on English; (2) the similarities and differences between classical civilization and that of the present; and (3) Classical Greek as a viable form of communication within its cultural milieu. The programmed text is divided into five units: (1) Kings, Tyrants and Democracy, (2) Athens, (3) Sparta, (4) the Struggle with Persia, and (5) the Golden Age. Each unit consists of a series of sentences or paragraphs with information to be supplied by the student. The content of the units is divided between cultural and historical material and material for language instruction. Language is taught by audiolingual methods, according to principles of structural linguistics. The appendix contains an edited English version of the Hippolytus, by Euripides, accompanied by a discussion. It follows the same format of the units, with some of the dialogue presented in Greek. **Syllabification and French Phonology.**

Ottawa Univ. (Ontario).

Pub Date 73

Note—18p.

Journal Cit—Cahiers Linguistiques D'Ottawa; n3 p25-41 Aug 1973

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—Consonants, \*Descriptive Linguistics, \*French, Generative Phonology, \*Linguistic Theory, Morphemes, Phonetics, \*Phonology, Pronunciation, \*Syllables, Vowels

Much research has focused on the question of whether phonological rules can and should be stated more appropriately in terms of the syllable than other units, notable segments and various boundaries. Formulation of rules without reference to the syllable obscures the motivation and unity of alternations. French has rules for consonant deletion preceding other consonants and in a phrase-final position which may be summarized: "Delete morpheme-final consonants in syllable-final position." The syllable-final position also affects assimilation, devoicing and neutralization of position of articulation. Syllable-final nasals cause nasalization of the preceding vowel; once again use of syllable boundaries allows simple statement of diverse processes. In French, the syllable-final, or weak, consonant assimilates to the following one. A theory of J. Hooper concerning syllabification on a universal basis is countered with evidence that rules that reposition syllable boundaries cannot be anywhere rules. The French rule of consonantal gemination and the tendency for open syllables support this contradiction. Resyllabification cannot precede the "loi de position"; it cannot therefore be an anywhere rule. Contradictions mentioned here do not completely invalidate the principles of syllabification, although the nature of certain types of resyllabification remains in doubt. (CHK)

This volume contains papers presented at the Kittamaquidi Conference on the Uncommonly-Taught Languages, in Columbia, Maryland, September 29-October 2, 1974. The volume has two main sections. The first contains papers dealing with conceptual issues of developing materials for uncommonly-taught languages, without extended reference to any specific language. Papers in this section include the historical background of foreign language and area studies research under the National Defense Education Act, a look at the relationship of foreign language enrollment statistics to uncommonly-taught languages, a study of career opportunities and demands for language skills in the business community, an examination of changing trends in schools and the implications for materials development in second language learning, and proposals for adapting existing language materials for specialized purposes. The articles in the second part of the volume recommend priority needs for teaching materials in African languages, Amerind and Creole languages in the Americas and the Caribbean, Chinese, Japanese and Korean languages, Arabic and Persian, Slavic and East European languages, languages of South and Southeast Asia, and Uralic-Altaic and Inner Asian languages. **A Transformational Linguistic Analysis of Syntactical Structures in the Written Language of Selected Preschool, Kindergarten and First Grade Children: Fifteen Case Studies.**

Pub Date 74

Note—132p.

**EDRS Price MF-\$0.76 HC-\$6.97 Plus Postage**

Descriptors—Case Studies, \*Child Language, \*Language Development, Language Research, Linguistic Performance, \*Primary Education, Psycholinguistics, Syntax, \*Transformation Theory (Language), Visual Stimuli, \*Written Language

A study was conducted to examine syntactical development in spontaneous written language of selected preschool, kindergarten and first grade children. The two major experimental questions were: (1) Will there be development towards greater complexity in the syntax of spontaneous writing and how should it be described? (2) What transformational linguistic analysis of spontaneous writing at the acquisition and early development stages tell about the ability to express syntactical relationships in writing? Spontaneous written language in response to a stimulus picture was obtained weekly from 5 children each at three grade levels (8 boys and 7 girls, ages 4-7) over a ten week period. Each child was tested individually. A case study approach was used to analyze each written corpus. A battery of tests for background data, letter recognition, letter writing, word writing, oral reading, vocabulary and drawing was administered. Results revealed parallels between acquisition and early development in oral and written language, ability to produce linguistic forms and to express syntactical relationships, and increasing movement towards complexity in spontaneous writing. Each child's written language corpus is included. Appendices contain relevant statistical data. (CLK)

Descriptors—Adults, \*Cognitive Processes, \*Language Development, Language Research, Linguistic Theory, Preschool Children, \*Psycholinguistics, \*Semantics, Sentences

Contrary to earlier assertions, young children do not interpret the word "different" to mean "same." Both two-and-a-half year old children and adults interpret requests for same or different objects appropriately, apparently following conven-

tions of conversational discourse. These data offer no support for a discrete semantic feature model of acquiring word meanings. (Author)

**Descriptors**—Aphasia, \*Cerebral Dominance, Cognitive Processes, Comprehension, \*Language Handicaps, \*Language Research, Language Usage, Learning Disabilities, Linguistic Competence, \*Neurolinguistics, Neurological Defects, \*Neurologically Handicapped, Speech Pathology, Visual Stimuli

**Identifiers**—Language Dominance, Language Pathology

Three objectives of research reported here were to describe the neural organization underlying language usage and language loss, to study activities occurring in both cerebral hemispheres, and to study neural changes related to changes in syntactic complexity of stimuli. A dichoptic procedure was chosen. A subject faced a viewing screen on which were flashed a fixation stimulus and two different short sentences, one on either side. The subjects were required to select a response picture appropriate to the sentences. Three subject groups were tested: (1) controls with no history of neurological damage; (2) a group of aphasic patients with unilateral left hemisphere brain damage; (3) a group with unilateral right hemisphere brain damage. The general conclusion was that the right hemisphere appears capable of processing some syntactically simple language stimuli; however, as stimuli become more complex, the left hemisphere may be necessary for comprehension. Testing involving cortical visually evoked responses recorded over both hemispheres simultaneously was conducted to see if visual AER's can be used to detect cortical language processing. It appears to be a useful means to study intra- and inter-hemispheric neural language systems. Charts and graphs illustrating research methods and findings are included. (CHK)

ferences, Cultural Environment, Cultural Images, Cultural Interrelationships, Cultural Traits, Culture Contact, Immigrants, Life Style, Non Western Civilization, \*Refugees, Relocation, Social Structure, \*Sociocultural Patterns, United States History, \*Vietnamese

**Identifiers**—\*Indochinese Culture

This guide was adapted from an article by Arthur Gordon originally titled "How to Understand Those Mystifying Americans." Each page of the text is divided into two parts, with the English version given on one side and the Vietnamese on the other. The guide is composed of two main sections. The first is addressed to Indochinese refugees and gives: (1) a sketch of the general American character, (2) a general historical background of the United States, and (3) some of the salient features of present-day American social and cultural life. The second part is addressed to sponsors, employers, friends, etc. of refugees from Indochina. It is organized as an alphabetical glossary. Each word represents a concept that has to be dealt with in everyday life, such as bank, children, climate, friends, food, games and sports, language, names, offensive behavior, police, time. Each annotation gives the knowledge of and/or attitude toward the concept that an Indochinese person would most probably have. It then suggests how Americans should handle these social situations. A short bibliography suggests further reading. (TL)

This guide addresses itself to individuals or groups wanting to help with Vietnamese resettlement. It is noted that there is a distinct advantage to group sponsorship because the costs of support are spread and it allows for extended maintenance while the language is learned and jobs are located. The first part of the guide outlines: (1) the steps to be taken in order to set up a sponsorship program, including suggestions for leadership, organization, meetings, headquarters, and publicity; (2) the functions of the sponsorship program, including public relations, fund raising, jobs, housing, food, clothing, recruitment of volunteers, and reception and (3) the setting up of learning opportunities, which include language classes, a business and professional council, and social and cultural orientation. Addendum 1 discusses more specifically some of the topics treated in the outline. Names and addresses of people or organizations that have information on particular areas are given throughout the outline. Addendum 2 is a menu for a full Vietnamese meal, with recipes. (TL)

**Descriptors**—\*Cambodian, Citizenship, Community Services, \*Daily Living Skills, \*Guides, Immigrants, Medical Services, \*Refugees, \*Relocation, Sociocultural Patterns

This guidebook was written for distribution to Cambodian refugees at Indiantown Gap refugee camp, and contains general information on life in the United States. The first section deals with the official aspects of being a foreigner in this country: such topics as filing alien registration forms, applying for citizenship, getting assistance from public agencies, and so on. The second section contains information on aspects of American life controlled by government agencies on the national, state, and local levels; it describes the services provided by police departments, libraries, schools, post offices, Medicare and Medicaid, etc. The third section discusses the practical aspects of life, including housing, shopping for food, looking for a job (with information on unions, social security, insurance, etc.), banking, and opening a business. The last section deals with transportation, including information on buying a car, using public transportation, and getting around in general. (LL/BBR)

Rutherford, William E.

Communication's the Name of the Game. CATESOL Occasional Papers, No. 1, Fall, 1974.

Pub Date Nov 73

Note—10p.; Paper presented at the CATESOL Northern California Conference (San Francisco, November 3, 1973)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Applied Linguistics, \*Communication (Thought Transfer), English (Second Language), \*Language Instruction, Language Research, Language Teachers, \*Language Usage, \*Linguistic Performance, Linguistic Theory, Oral Communication, Second Language Learning, Sociolinguistics, Speech Habits, Teaching Methods, Verbal Communication

Identifiers—\*Extrasentential Expressions, Locutionary Expressions, Speech Acts

Most of what has been taught in the language classroom for a long while has been generally a reflection of the particular concept of language popular among linguistics at the time, but recently this trend has begun to break down. Recent texts are starting to be organized according to considerations besides linguistic criteria, for example, psychological and pedagogical criteria. We are becoming increasingly more aware that linguistics should not be viewed as the sole source of information about the nature of communication. That language study should not be the exclusive province of experts in one area of academic specialization is demonstrated with the example of "extra-sententials." These are various expressions used in verbal communication, such as "in all seriousness" and "to begin with," which have no grammatical connection to the sentence but refer instead to the locutionary expressions, to some aspect of the various kinds of speech acts. These expressions, considered in relation to a set of postulates that accompany speech acts, have three main functions: (1) a neutral verbalization of the postulate, (2) raising the possibility of doubt as to whether the postulate is being adhered to, and (3) rectifying a violation of a conversational postulate. Extra-sententials, then, are tools for communication, and some way should be devised to include them in language instruction. More attention should be given in language teaching to the communication situation, that is, to the perceptions and intentions of the participants. (CLK)

Descriptors—Audiolingual Methods, Classical Languages, Cultural Awareness, \*Curriculum Guides, Educational Objectives, \*Greek, Humanities, Humanities Instruction, \*Language Instruction, Programmed Instruction, \*Secondary Schools, \*Teaching Guides

This is a teacher's guide for Level Beta of a humanistic approach to instruction of Classical Greek and Greek culture in secondary schools. The goals of the program are to help students become aware of: (1) the impact of Hellenic civilization on contemporary society, including the impact of the Greek language on English; (2) the similarities and differences between classical civilization and that of the present; and (3) Classical Greek as a viable form of communication within its cultural milieu. The present guide is divided into five units: (1) Kings, Tyrants and Democracy, (2) Athens, (3) Sparta, (4) the Struggle with Persia, and (5) the Golden Age. Each unit is divided into an average of 12 lessons, with specific objectives and activities outlined for each lesson. Language is taught by audiolingual methods, according to principles of structural linguistics. Basic principles to be followed by the teachers precede the main text. The appendix gives suggestions as to how the Hippolytus, by Euripides, should be introduced and taught. (CLK)

Descriptors—\*English (Second Language), \*Instructional Materials, Language Instruction, Language Skills, Oral English, Pattern Drills (Language), Phonology, \*Pronunciation, Second Language Learning, \*Teaching Guides, Teaching Methods, Textbooks, \*Vietnamese Identifiers—Pike (Kenneth L)

This is the first in a four-volume experimental series of instructional materials on English for Vietnamese speakers. This volume deals specifically with pronunciation. The lessons are based on a systematic comparison between the Vietnamese and English sound systems, including intonation and stress patterns; the theoretical basis for the comparison is the theory of Kenneth L. Pike. A specific method for presenting sounds to the students is outlined, stressing the fact that the teaching of pronunciation should be systematic. Learning proper pronunciation will improve other skills, such as reading and writing. There are thirty-two lessons, each containing a teacher's guide for presenting and teaching the material and a student's guide for pronunciation practice. (CLK)

Descriptors—Contrastive Linguistics, \*English (Second Language), \*Grammar, \*Instructional Materials, Language Instruction, Language Patterns, Language Skills, \*Oral English, Second Language Learning, Teaching Guides, Teaching Methods, Textbooks, \*Vietnamese

This is the second in a four-volume experimental series of instructional materials on English for Vietnamese speakers. The present volume deals specifically with grammar. The aim of the grammar lessons is to give the students a thorough command of spoken English. The lessons are based on a comparison of English and Vietnamese grammatical structures as revealed through linguistic analysis. The technique of presenting and drilling the patterns is similar to that used in the texts developed at the English Language Institute of the Univ. of Michigan. The accompanying volumes that deal with pronunciation and pattern drills are recommended as additional tools. This volume is divided into thirty-two lessons, in order of increasing difficulty. Grammar points are introduced and drilled separately. It is assumed that the new lexical items in each lesson will be introduced before the lesson is approached. A teacher's guide follows the body of the text. (Author/CLK)

Roulet, E.

The Contribution of Language Sciences to the Diversification of Second Language Teaching Methods in the Light of the Characteristics of the Learners.

Pub Date Sep 75

Note—54p.; Paper presented at a Unesco Meeting on diversification of methods and techniques for teaching foreign languages (Paris, September 15-20, 1975)

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—\*Applied Linguistics, \*Language Instruction, Learning Characteristics, \*Psycholinguistics, Psychology, \*Second Language Learning, Sociolinguistics, Structural Linguistics, \*Teaching Methods

Throughout the fifties and sixties the methodology of second-language teaching underwent a radical change in response to new communication needs, and under the influence of structural linguistics and behavioral psychology. Unfortunately, the effort did not produce all of the results expected, and this probably for two reasons: on the one hand, it was based on a linguistic and psychological foundation which was much too elementary and limited and was soon put in question in its own right; on the other, it did not take sufficient note of the characteristics of the learners. At the same time, disciplines such as psycholinguistics and sociolinguistics made their appearance and developed alongside linguistics and psychology, contributing in the process fresh information concerning the acquisition and use of languages as instruments of communication. Since then, it has become possible to speak of a renewal and a diversification of second language pedagogy in the light of these disciplines, which take better account of the

characteristics of the groups and individuals involved, in particular of their language needs, their attitudes, their motivations and their learning strategies. The last part of the report outlines the methodological implications of this new approach and illustrates them with the help of some recent findings. (Author)

**A Dictionary of the Cherokee Indian Language.**

Pub Date 71

Note—367p.

Available from—J. T. Alexander, Rt. 1, Box 164 M, Sperry, Oklahoma 74073 (\$6.00)

Document Not Available from EDRS

Descriptors—\*Alphabets, \*American Indian Languages, \*Cherokee, \*Dictionaries, English, Letters (Alphabet), Numbers, Orthographic Symbols, Romanization, Syllables, Translation, Writing

Identifiers—Sequoyah, \*Syllabaries

This dictionary is divided into two main sections, each containing approximately 9,000 entries. In the first section, English to Cherokee, the information is organized in 3 columns. In column 1 are found English words in standard English orthography and in alphabetical order, in column 2 the romanized representation of the Cherokee translation and in column 3, the Cherokee word given in the Cherokee syllabary. The syllabary consists of six vowels modified by 17 consonants. The second section is the Cherokee to English portion and is organized in 2 columns only. Column 1 contains Cherokee words organized by vowel groups and column 2 the English equivalents. The pages preceding the dictionary section give the Cherokee syllabary as invented by Sequoyah, the modified symbols in use today and the romanized equivalent for each symbol. The numerical symbols invented by Sequoyah are also given although these were not adopted by the Cherokee. Following the dictionary section, we find cardinal and ordinal numbers, days of the week, months of the year and short phrases of common usage, all given from English to Cherokee only. (TL)

Identifiers—\*Lahori Roman Urdu, Pakistan

This wordbook was prepared to help carry out the policy of the Agency for International Development to encourage Americans stationed abroad to learn the official language at their duty post. The book is intended to be a supplemental text for both private individual study and formal classroom instruction. The bulk of the publication is made up of the 2 sections English Vocabulary and Urdu Vocabulary, each containing about 3,000 entries. The words have been chosen on the basis of frequency of use and relevance, the intention being to help the student grasp the pronunciation and meaning of the most common Urdu words. The Urdu words are presented in Lahori Roman Urdu (LRU), which is any Roman Urdu system which combines "basic" Roman letters with traditional Arabic diacritical marks. The LRU in this book contains 8 of these special letters plus 29 other letters. The term "Lahori" is used because the system was first developed in Lahore. The phonetic dictionary section is preceded by a short history and description of LRU and notes on pronunciation and spelling. It is supplemented by lists of numerical, monetary, compass and calendar terms, personal names, kinship terms, geographical names, conversational phrases, selected grammar tables and lists, plus other information designed to be useful to foreign visitors in Pakistan. ED 112 664 FL 007 128

**Overseas Summer Study Programs: What Students, Parents and Principals Should Ask.**

National Association of Secondary School Principals, Reston, Va.

Pub Date [75]

Note—12p.

Available from—NASSP, 1904 Association Drive, Reston, Virginia 22091

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—High School Curriculum, High School Students, \*Instructional Trips, Pamphlets, Parent Responsibility, Parents, Principals, \*Program Evaluation, Secondary Education, \*Study Abroad, \*Summer Programs, Tourism, \*Travel

This pamphlet offers questions, comments and suggestions to guide high school principals and high school students and their parents in evaluating overseas summer study programs. The main questions one should ask are: (1) Who is the program operator and how do you check him out? (2) What are the aims and objectives of the program? (3) What is the program of study? (4) How does the program actually operate? and (5) What are the financial and administrative arrangements? A final word of caution points out that due to the absence of an overall effective accrediting group, no uniformly accepted standards or controls exist; therefore, "let the buyer beware." This is meant to warn against and help identify self-seeking organizations with little or no interest in education or experience in the development of sound, well-balanced educational tours. Frustration, financial loss and educationally weak experiences can be avoided by careful examination of travel study offerings. (TL)

Usage, Language Variation, Lesson Plans, Pattern Drills (Language), Pronunciation Instruction, \*Second Language Learning, Semitic Languages, Sentence Structure, Substitution Drills, Syntax, Teaching Guides, Transformations (Language), Translation

Identifiers—Saudi Arabia, \*Saudi Arabic, Urban Hijazi Dialect

The three major dialect groups of Saudi Arabia are Hijazi, Najdi and Shargi. Hijazi is used for government and commercial purposes and is the most widely understood. This basic course uses the Hijazi dialect of Jidda, which is designated "urban" to distinguish it from Bedouin varieties. The book will provide students with the basic grammatical structures necessary for a "working" proficiency that will enable them to satisfy routine social demands and limited business requirements. The book consists of 50 lessons, each (beginning with lesson 4) having the following parts: (1) dialogues—for memorization, (2) structure sentences—structures not in the dialogue, (3) grammatical notes—explaining new structures, (4) vocabulary notes—giving new words, (5) drills—including substitution, transformation, question-answer, and translation, (6) situations—English sentences which students should be able to say in Arabic, and (7) cultural notes—comments on speech attitudes, situational behavior, or social etiquette. Every tenth lesson is a review. The lessons are preceded by a guide to pronunciation that includes an explanation of the transcription system used. The Arabic script used throughout is intended for the instructor only. Following the lessons is a series of appendices dealing with specialized vocabulary, social expressions, gestures, and Saudi names, a glossary, and an index of grammatical structures. (TL)

**The Campaign to Promote an Interest in Language Study at Valdosta State College.**

Pub Date Nov 75

Note—8p.; Paper presented at the annual meeting of the South Atlantic Modern Language Association (Atlanta, Georgia, November 5-8, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*College Language Programs, College School Cooperation, College Students, Community Attitudes, \*Community Involvement, \*Educational Attitudes, \*Educational Interest, French, Higher Education, High Schools, High School Students, Inservice Teacher Education, Language Enrollment, \*Language Instruction, Motivation, Secondary Education, Second Language Learning, Spanish, Student Attitudes

Identifiers—\*Georgia (Valdosta)

This paper reports on the techniques developed by Valdosta State College's Department of Modern Foreign Languages to promote interest in the study of foreign languages and culture. The techniques are divided into two major categories: internal and external. External activities include those for the benefit of high school students and teachers and members of the community. These activities include an annual state-wide essay contest and language festival, a cultural exchange program, a group uniting all small high school foreign language clubs, administration of the National Spanish Examination and of the National French Contest, teaching workshops for high school teachers, and various cultural events such as film festivals and exhibits for the community. The internal programs, benefiting the college students and the college community, have instituted laboratory material to be used at home, taped classes, free tutoring sessions, revised curriculum descriptions, double specialization whereby a student can combine languages, and new fields of study in which foreign languages play a major part. Each innovation is described briefly. The results of these programs are increased enrollments and renewed interest in foreign language study. (CLK)

**Play Production as a Medium for Learning Spoken Chinese.**

Pub Date Jun 75

Note—9p.; Paper presented at the Asian Studies on the Pacific Coast Conference (June 20, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

**Descriptors**—\*Chinese, \*College Language Programs, Drama, Dramatic Play, \*Dramatics, Language Experience Approach, \*Language Instruction, \*Second Language Learning, Speech Skills, Teaching Methods

This paper reports on an experiment carried out by the Chinese language program at Oberlin College to use play production as a means of teaching spoken Chinese. The experiment was inspired by the fact that teaching spoken Chinese cannot be solved by traditional classroom methods, particularly at the intermediate level. The lack of texts, the inadequacy of existing texts, the low morale of intermediate students and the difficulty in creating native environment for learning Chinese are factors that justify the use of play production. Play production puts dialogues into a situation that simulates life, the project itself providing an environment which requires verbal communication and mutual cooperation. The tedium and boredom of language learning can be avoided, and the promise of recognition creates a further incentive. But to carry out such a project, one must first obtain a suitable play, by simplifying an existing one, adapting a short story or writing an original play. Once a play is obtained, one must assemble a staff capable of directing the production and get the cooperation of the students. The next steps involve familiarizing the students with the text through discussion, assigning and learning roles, rehearsals and performance. Each of these steps is discussed with specific reference to the Oberlin experience. (CLK)

**A Proposed Investigation of Preschool Bilingualism.**

Pub Date 25 May 75

Note—11p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*Bilingual Education, Bilingual Students, Community Attitudes, Early Reading, \*English (Second Language), \*Mexican Americans, Minority Group Children, \*Preschool Children, Preschool Education, Reading Instruction, Sociolinguistics, \*Spanish, Spanish Speaking

Bilingual schooling in the U.S. is meant to equalize educational opportunity for children of limited English-speaking ability. Despite the proliferation of bilingual programs in many parts of the country, only very modest progress is being made toward the goal of equal educational achievement. We are coming to realize that limited English-speaking children with a 5- to 6-year handicap in English can only very exceptionally catch up. Only if a greater, not just an equal, opportunity is provided, can these children be expected to compete successfully with their English-speaking schoolmates. There are two prerequisites: (1) that limited English-speaking children be given an early start in learning to read, first in their home language and then in English, and (2) that the community accord non-English home languages the same respect as English. The second, involving profound social changes, will take time. Even the first will require years of experimentation. This paper sketches the preliminary steps of a long-term project to test the hypothesis that limited English-speaking children (how many will have to be determined) can learn to read their home language between ages 1 1/2 and 3 and English between 3 and 5. **Descriptors**—\*Arabic, \*Diglossia, Educational Policy, \*Language Planning, Language Standardization, Language Usage, \*Language Variation, Official Languages, Regional Dialects, Social Dialects, Sociolinguistics, \*Standard Spoken Usage

**Identifiers**—\*Sudan

Using as a framework Ferguson's diglossia model with its division into a high and a low variety of the language used, the linguistic situation in the Sudan is described as a continuum. At one end is found the very formal classical Arabic, used for special occasions. At the other end is a casual form which dominates meetings and social gatherings of the elite. In the middle of the continuum is another variety of the language used in classrooms and courts, for example. To fully describe the linguistic reality, regional varieties are also taken into account, as well as differences in men's and women's usage. The Arabic vernacular must be considered as a potential national language, particularly the Arabic of Khartoum. In the future, language planning efforts in the Sudan should include a reaffirmation of the vernacular, but not, however, at the expense of the classical language. Other language planning needs include grammars of the various vernaculars and materials such as dictionaries and textbooks. The process of implementing and coordinating standardization efforts would be helped considerably by the establishment of a specialized agency to deal with language planning problems such as standardization of the lexicon, syntax and orthography. National language policy should also be integrated with educational and economic development. (CLK)

**Discourse Functions of Thematization and Topicalization.**

Pittsburgh Univ., Pa. Learning Research and Development Center.

Spons Agency—National Inst. of Education (DHEW), Washington, D.C.

Pub Date 75

Note—25p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*Cognitive Processes, Connected Discourse, \*Discourse Analysis, Language Research, Memory, Narration, Nominals, \*Psycholinguistics, \*Reading Comprehension, \*Recall (Psychological), Semantics, Sentences, Sentence Structure, Verbs

Thematization, the relative frequency of a discourse referent, and topicalization are conceptualized as related discourse functions. In a probe recall experiment, a word with a thematized referent was a better recall probe than a word with a nonthematized referent. Also, an agent noun was a better prompt than a recipient, and this semantic variable interacted with topicalization so that a semantic recipient was a better prompt when it was topic than when it was comment. In a second experiment, subjects' choice between semantically equivalent active and passive sentences was influenced by thematization. Thematized nouns were chosen as topics more often than nonthematized nouns, and nouns used as paragraph titles were chosen as topics slightly more than non-title nouns. It is suggested that twin discourse functions are served by thematization and topicalization, the former providing stable referential focus and the latter providing momentary referential focus. **Foreign Languages: Don't Sell Them Short.**

Pub Date Sep 75

Note—5p.; Reprint of an article in "Public Education in Virginia," v10 n4 p10-13 Win 1975

Journal Cit—Bulletin of the Modern Foreign Language Association of Virginia; v31 n3 p9-12 Sep 1975

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Career Opportunities, Changing Attitudes, College Language Programs, Educational Attitudes, \*Enrollment Trends, \*Language Enrollment, \*Language Instruction, \*Language Programs, Language Teachers, Secondary Education, \*Second Language Learning, Teaching Methods

This article, in the form of an interview, deals with the status and expected future of foreign language programs in the nation's schools and colleges, and in particular, Virginia's. Despite hearsay, enrollment in foreign language has remained fairly constant in Virginia high schools. French and Spanish have the highest enrollments, followed by German, although French has lost more than 20 percent of its enrollment. Russian enrollment has not obvious pattern and Latin is declining. In colleges and universities, enrollments were

noticeably affected by relaxation of language requirements, although many schools still maintain a language requirement for entrance. Negative reports about declining foreign language programs are overstated, mostly because of the decline in French in urban language programs, which are losing academically oriented students to the suburbs, and because of the priority on basic subjects. Changing trends in public attitudes and in business should affect foreign language study in a positive way, however. A growing spirit of nationalism in other countries is leading to increased use of language other than English for international business negotiations. Acceptance of languages other than English in the United States and improvement in the quality of instruction are also sources of encouragement. The article concludes with some advice to students and a brief discussion of the changes in recent years in FL teaching methodology and the challenges facing FL teachers today. (CLK)

**The Influence of the Revolution on Cuban Spanish.**

Pub Date Jul 75

Note—17p.; Paper presented at the Annual Colloquium on Hispanic Linguistics (2nd, Linguistic Institute, University of South Florida, Tampa, July 17-19, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Culture Contact, Language Styles, Language Usage, \*Language Variation, Morphology (Languages), \*Political Influences, \*Russian, Semantics, Social Change, Sociolinguistics, \*Spanish, Vocabulary

Identifiers—\*Cuban Spanish, Language Contact, Neologism, Word Borrowing

The social, economic, political and cultural changes brought about by the Cuban Revolution have elicited linguistic changes. Although the Revolution is only fifteen years old, these changes have reached the morphological and semantic components of the language. This paper explains the Russian influence and discusses and classifies "rusonol" examples (mixture of Russian and Spanish). The de-Americanization of Cuban Spanish is treated as a parallel development to the Russification of the language. The article also deals with Spanish neologisms which describe the new social order. **Language Curriculum for the Non-Major.**

Pub Date Apr 75

Note—4p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Career Education, \*College Language Programs, College Majors, \*Course Content, Curriculum Development, Instructional Innovation, \*Language Instruction, \*Modern Language Curriculum, Relevance (Education), Second Language Learning, \*Teaching Methods

This paper, a portion of a workshop presentation concerning language curriculum for the non-major, explores some of the reasons for the sad situation in which language programs find themselves today and makes some suggestions for some of the things which we need to do in order to make ourselves more attractive to the students, particularly to the non-major. The possibilities suggested include the following: (1) more flexible scheduling, (2) multiple tracks, (3) more emphasis on communication, (4) more attention to understanding the language, (5) more effective use of the media, (6) more relevant and contemporary course content, (7) more courses on civiliza-

tion and culture, (8) content courses in the language, (9) interdepartmental and interdisciplinary courses, (10) the use of the foreign language department as a resource for other departments and the community, (11) courses in English, (12) awareness of the careers in which knowledge of an FL is an asset, (13) advocacy of double majors, and (14) maximum use of overseas programs for all career areas. Actually, it turns out that simply doing some of the things which are most necessary to make our own major programs viable will at the same time make them more attractive to other students. **Changing Community Attitudes: Public Relations and Publicity for Foreign Language Teachers (Various Forms of Publicity and Public Relation Techniques Favoring Foreign Languages, as Used in Alabama and Other States).**

Pub Date [75]

Note—16p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Clubs, Cocurricular Activities, \*Community Attitudes, Community Relations, \*Cultural Exchange, \*Language Instruction, Language Teachers, Publicize, \*Public Relations, School Community Relationship, Secondary Education, \*Second Language Learning

A number of publicity and public relations techniques can be used to promote and renew interest in foreign language study. Communication should be established with civic organizations and community groups by means of lectures. Foreign language clubs can assume new importance by participating in international friendship organizations. The Partner of the Americas organization, for example, establishes relationships between North American and Latin American cities. Students should be encouraged to become acquainted with the organization and to participate in the various cultural exchange programs. The annual state-wide conventions of the federations of high-school foreign language clubs make for further publicity for foreign languages and cultures. Strategies for organizing such a convention are outlined, followed by a copy of the constitution and by-laws of the Alabama Federation of High School Spanish Clubs. Additional forms of publicity and public relations techniques include promotion of foreign languages through television and radio programs, through newspapers, and by means of communication with public figures, such as political leaders and educators, and community agencies, such as publishers. Bumper stickers are also recommended as a form of publicity. (CLK)

Identifiers—\*Iran (Tabriz), Tabriz University

This article reports on the experience of the Language Centre of Tabriz University in Iran. The Centre is responsible for teaching English in 7 faculties: Engineering, Medicine, Agriculture, Pharmacy, Science, Education, and the School of Nursing. The article first gives the background of the students that are to be taught, followed by an outline of the course design. The first-year courses are divided into general courses meant for all students and specific courses broken down into individual areas of interest. The concentration is on basic features of scientific content. In the second year, only specific courses are offered and concentration is on organization of discourse rather than content. The remainder of the article deals with the problems that arose when the pro-

gram was implemented. The teachers prepared their own materials and found it difficult to combine advanced content with elementary-level English. The courses were organized to be as lively and motivational as possible by the use of diagrams, tables, graphs and interpretation. Possibilities for classroom activities, especially technical ones, were limited. Drills were found not to be very useful in this situation, but humor, discussion and student participation in general proved very fruitful. (TL)

Identifiers—\*England (Essex), University of Essex, Venezuelans

In January 1975, 31 Venezuelan students of science were admitted to the University of Essex. It was suggested that a pre-first-year period be divided equally between attendance of regular college courses and English courses designed especially for them. This article describes the English course hurriedly prepared to meet this specific situation. The general guidelines were: (1) the English teaching section of the scheme should be heavily, though not totally, oriented to the preparation of materials in English for Special Purposes, and (2) grouping should be according to scientific specialty and not according to proficiency in English. The first term was devoted largely to passive work taught in 5 two-hour sessions each week: (1) kernel lessons intermediate, (2) basic English for Science (BEFS), (3) BEFS, (4) continuation of orientation and social English, and (5) listening/reading materials. The materials and activities used for each of these sessions are described. The cloze procedure was used extensively as was the language laboratory for listening exercises. Reading and writing skills were not tackled systematically until term 2, when the 10 weekly hours were divided as follows: (1) kernel lessons, (2) aural comprehension, (3) BEFS, (4) oral production, and (5) reading comprehension and writing. Students will be evaluated on a pass/fail basis focusing on the study skills needed by a first-year undergraduate in science. (TL)

Descriptors—Communication Skills, Course Organization, English (Second Language), \*English for Special Purposes, Language Skills, Manipulative Materials, \*Material Development, \*Science Instruction, \*Science Materials, Scientific Literacy, \*Study Skills

Identifiers—\*Material Selection

This article presents the subject of English for Specific (or Special) Purposes (ESP) from the point of view of the school teacher or university lecturer attempting to teach science to students for whom the medium of instruction is a second language. The skills a student needs in order to achieve success in a science are analyzed as: (1) discipline-specific-strategies for extracting and patterning the data in a particular field, (2) general organizational-for presenting data in written and iconic form, and (2) linguistic skills.

In a second-language situation, the teacher cannot assume that students come equipped with these skills; he must, therefore, teach them in addition to the scientific content of the course. This places constraints on the organization of the course and on the materials that can be used successfully. High-level science materials, such as lectures and lesson notes, modifiable to fit the level of the students' abilities. What seems to be called for is a set of integrated materials which require increasingly complex communication skills and which provide for individualized learning activities. The close cooperation of science and language specialists is needed to produce such materials in many scientific areas. (TL)

**Identifiers**—Communicative Competence, \*Criterion Referenced Teaching, Norm Referenced Teaching

A norm-referenced evaluation system, which evaluates the student in comparison to his peers, is rejected in favor of a criterion-referenced system. The latter, which rates the performance of a student on an absolute standard, makes for an individualized approach. Two kinds of tests are distinguished, the formative, administered during the course of learning, and the summative, which evaluates achievement following a given period of instruction. It is suggested that formative tests be of the criterion-referenced type. A specific testing program is outlined whereby an aptitude test is administered before instruction begins. When instruction begins, testing is tied directly to the teaching process. The advantage of this is knowing immediately which items need more work. Criterion-referenced testing also de-emphasizes competition, reduces anxiety about learning, and encourages teachers to set realistic and reachable goals, thus helping the less able students. Future language instruction should place greater emphasis on the teaching and testing of communicative competence. The results of an experiment conducted at the University of Illinois to determine the effectiveness of incorporating competence training into the learning process reinforce the importance of teaching communicative competence. A suggested foreign language testing program follows the article. (CLK)

**Descriptors**—Definitions, \*Descriptive Linguistics, English, \*German, \*Glossaries, Grammar, Instructional Aids, \*Language Instruction, Language Research, Reference Books, Vocabulary

**Identifiers**—\*Grammatical Terminology

Recent advances in the field of descriptive linguistics have produced not only an entirely new grammatical terminology, but also new definitions of traditional grammatical concepts. The result has been a somewhat bewildering profusion and confusion of overlapping terms. The present glossary is the result of several years of research and of workshops conducted at three annual meetings of the American Association of Teachers of German, with the participation of a large number of American and German linguistics and language teachers. It represents an attempt at defining and translating several hundred terms most commonly used in the teaching of German, and to authors, editors, and publishers of German textbooks in the United States. **Identifiers**—\*Parsing

The course in parsing English is essentially a survey and comparison of several of the principal systems used for understanding natural language. The basic procedure of parsing is described. The discussion of the principal systems is based on the idea that "meaning is procedures," that is, that the procedures of application give a parsed structure its significance. Natural language systems should be content-rather than structure-motivated, i.e. they should be concerned with linguistic problems revealed by parsing rather than with the relation of the proposed structure of the system to the structures of other systems. Within this framework, Winograd's understanding system, SHRDLU, is described and discussed, as are the second generation systems of Simmons, Schank, Colby and Wilks. A subsequent discussion compares all these systems. Concluding remarks outline immediate problems, including the need for a good memory model and the use of texts, rather than individual example sentences, for investigation. (CLK)

The primary contact which many non-native speakers have with the English language is visual. Thus, there exist many competent readers of English who are ignorant of pronunciation. In the past, English pronunciation has been taught in a case-by-case fashion, without regard to principles relating orthography to pronunciation. This is a report on one member of a group of Francophone subjects who worked on improving their pronunciation of English by applying ordered rules to standard English spellings in order to derive correct pronunciations. This subject performed rules on 25 classes of words representing English polysyllables ending in 31 different suffixes. Of 5,225 words he was asked to read, he made 2,941 errors at first, as compared with 296 errors after performing the rules on a few words in each class—an improvement of almost 90 percent. (Author)

**Descriptors**—\*Audiolingual Methods, \*Course Content, Cultural Awareness, \*Curriculum Guides, \*Educational Objectives, \*English (Second Language), Grammar, Language Instruction, Language Skills, Second Language Learning, Speech Skills, Vocabulary Development

This booklet consists of a list of instructional objectives and a content outline for the beginning and intermediate levels of the Montgomery County (Maryland) public ESL program. The publication was prepared to identify performance objectives and to provide guidelines for teachers and administrators, both for teaching and for forming realistic expectations of the students. Objectives for both levels include mastery of the four language skills through the audiolingual approach. For the beginning level, course content is centered on situations and topics which the student will encounter in the United States. These topics include classroom and school procedures, food, social formulas, numbers and measurements, health and safety, weather, shopping, family and occupations, home and community, recreation, and transportation. Grammar and vocabulary relevant to the given topic are introduced in each unit. The intermediate level is organized into structural units, each one dealing with a specific issue of grammar. Vocabulary and situations for practice are left to the discretion of the teacher. (CLK)

**Descriptors**—\*American English, Applied Linguistics, \*Dialect Studies, Grammar, Language Research, Language Usage, \*Language Variation, Nonstandard Dialects, Phonology, \*Regional Dialects, Sociocultural Patterns, Socioeconomic Status, \*Sociolinguistics

**Identifiers**—\*Appalachian English, West Virginia

The aim of the research reported here was to describe dialect diversity in Appalachia (Monroe and Mercer Counties, West Virginia) and to examine the possible effect of this diversity on education. The present volume contains the first two parts of the report, the third being submitted separately. The first part includes chapters 1-5, the second 6-9. Chapter 1 sets forth the sociocultural setting for the study, while chapter 2 establishes a sociolinguistic framework for viewing the linguistic diversity of the region. Chapters 3 and 4 outline the main features of Appalachian English, focusing on phonological and grammatical levels of language organization. Educational considerations are discussed in chapter 5. Part One is intended primarily as a reference work for educators, particularly reading specialists, language arts specialists and speech pathologists. In

Part Two, several select features of Appalachian English are examined in more technical detail; this section is intended primarily for the professional linguist. Chapter 6 deals with "A-prefixing," and chapter 7 with irregular verbs. Chapter 8 discusses the perfective "done," and chapter 9 deals with subject-verb concord. Appendix A provides a sample of two interview questionnaires, one used for adults and one for adolescents. Appendix B consists of a sample informant interview, and Appendix C gives a complete list of the informants who participated in the project, including their age, sex, and occupation. A bibliography concludes the volume. (Author/CLK)

The paper discusses some of the "belief systems knowledge" used in language understanding. It begins with a presentation of a theory of personal causation. The theory supplies the tools to account for purposeful behavior. Using primitives of the theory, the social aspect of an action can be described. The social aspect is that which depends on beliefs and intentions. Patterns of behavior, called "social action paradigms" (SAP's) are then defined in terms of social actions. The SAP's provide a structure for episodes analogous to the structure a grammar provides for sentences. (Author)

In many languages (e.g. Latin, Greek, Russian, Turkish, German) the relationship of a noun phrase to the rest of a sentence is indicated by altered forms of the noun. The possible relationships are called (surface) "cases." Because (1) it is difficult to specify semantic-free selection rules for the cases, and (2) related phenomena based on prepositions or word order appear in apparently case-less languages, many have argued that studies of cases should focus on meaning, i.e. on "deep cases." A representative sample of proposed case systems is examined. Issues such as surface versus deep versus conceptual level of cases, and the efficiency of the representations implicit in a case system, are also discussed. (Author)

Theory vs. Taxonomy: On Teaching 'Syntactically Irregular' Verbs in Russian.

Pub Date Oct 75

Note—16p.; Paper presented at the National Convention of the American Association for the Advancement of Slavic Studies (Atlanta, Georgia, October 9, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—Descriptive Linguistics, Grammar, \*Language Instruction, Language Patterns, Linguistic Theory, Morphology (Languages), \*Russian, Second Language Learning, \*Semantics, Sentence Structure, \*Syntax, Taxonomy, Teaching Methods, \*Verbs

This paper suggests methods for teaching the Russian verbs that govern what are loosely termed "objects" in oblique cases. The case government of such verbs is not necessarily an individual irregularity. Definite patterns emerge, both morphological and semantic, to facilitate grouping these verbs into classes. Russian verbs requiring genitive objects are examined first. Such verbs fall into two major semantic groups, each defined as the semantically polar opposite of the other. It is demonstrated that the groups share an underlying and very abstract semantic feature along the lines of Jakobson's theory of the semantic invariance of case. Verbs governing the dative are then examined. Some of these are examined from the viewpoint of "extended indirect objects," while others are seen as statives requiring a dative referent or addressee. Certain morphological similarities of these verbs are noted. Finally, some instrumental-governing verbs are examined as an extension of the agent/instrument categories of passive sentences, and a few others are assigned the more general meaning "use as if it were an instrument." It is concluded that the application of semantic groupings such as these, of varying degrees of abstraction, is an effective way of pedagogically systematizing an otherwise apparently unsystematic body of data. Mitchell, Stephen A.

Tradition and Change in Swedish Address Forms.

Pub Date 16 May 75

Note—12p.; Paper presented at the Minnesota Regional Conference on Languages and Linguistics (Minneapolis, Minnesota, May 16-17, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Changing Attitudes, Diachronic Linguistics, Indo European Languages, \*Language Usage, \*Oral Communication, Political Influences, \*Pronouns, Social Attitudes, Sociocultural Patterns, \*Sociolinguistics, Synchronic Linguistics

Identifiers—Address Forms, \*Swedish

In most European languages, choice of address form classifies the relation between speakers. The first theoretical framework for analyzing address form usage was established by Brown and Gilman (1960) in their investigation of the semantics of pronoun use in a wide variety of Indo-European languages, which concluded that Europeans use the informal pronoun with increasing frequency.

This appears to be true of Swedish, in which greater avoidance of second person personal pronouns is practiced than in other European languages. The problem of choosing an appropriate term in Swedish has been complicated by a feeling that the grammatically correct use of the second person plural to a single individual was impolite. One was expected to use other forms. Recently, however, this practice has changed towards a more general use of the informal pronoun, due partly to a number of political and social pressures. This paper discusses both aspects of Swedish address form usage: the diachronic, with emphasis on social and political factors which have produced considerable change in the system during this century, and the synchronic, focusing on age and formality as possible factors in form choice. **Ergativity in Caucasian Languages.**  
 Caford, J. C.  
 Pub Date [74]  
 Note—59p.  
**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**  
**Descriptors**—\*Case (Grammar), \*Caucasian Languages, Contrastive Linguistics, Descriptive Linguistics, \*Linguistic Theory, Nominals, \*Sentence Structure, Syntax, \*Verbs  
**Identifiers**—\*Ergativity

The ergative construction is characteristic of all 37 languages of the Caucasian group. After definition of "subject" and "object," a summary is given of 13 Caucasian intransitive and transitive sentence-types, with respect to the case forms of their subjects and objects. The principal "symptoms" of ergativity are: (1) subject in an oblique (ergative) case; (2) object in the nominative (or absolutive) case; (3) verb agrees in class and/or person and number with the object; and (4) in N.W. Caucasian only, pronominal prefixes in the sequence O-S-V. Numerous deviations are discussed. Arguments are presented against the once-popular view that the ergative construction is "really" a passive construction. In the N. Caucasian languages, the ergative transitive construction systematically contrasts with a nominative transitive construction (subject in nominative, object in nominative or oblique case). The ergative construction highlights the effect of the verbally expressed activity on the object; the nominative construction highlights the activity of the subject. Ergativity in all ergative languages can be classified as Functional (i.e., in meaningful contrast with a non-ergative transitive construction), as in N. Caucasian, Chukot-Kamchadal, Eskimo-Aleut, or Formal (i.e., as a mere obligatory formal feature of transitive sentences), as in Georgian and the Iranian, Dardic, and Indic ergative languages. **The Potential Markers in Mandarin.**  
 Pub Date 75

Note—25p.; Paper presented at the Annual Meeting of the South Atlantic Modern Language Association (Atlanta, Georgia, November 8, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
**Descriptors**—Deep Structure, \*Descriptive Linguistics, \*Linguistic Theory, \*Mandarin Chinese, Semantics, Sentence Structure, Surface Structure, Syntax, \*Transformational Generative Grammar, \*Verbs

**Identifiers**—\*Potential Markers

In Mandarin Chinese the two lexical items "de" and "bu," when inserted into a verb-verb construction, function as positive and negative potential markers, respectively. Their insertion, however, is not very regular or uniform, because some V-V constructions require their presence, while some others take them optionally, and still others do not occur with them at all. The purpose of this paper is thus twofold: first, to study their distribution, and second, to account for their co-occurrence or nonco-occurrence in the V-V constructions involved. It is claimed here that with the help of the semantic properties of the V-V constructions, we can easily predict where they can be inserted, and where they must be excluded. (Author)

**Identifiers**—\*Student Financial Aid

A survey launched in 1972 to continue to provide a national data base on financial aid to graduate students in sciences and engineering yielded statistics based on a 100 percent response rate from 6,559 master's and doctorate departments in 339 institutions awarding science and engineering doctorate degrees, including 104 separate

medical schools. Characteristics of graduate enrollment examined were enrollment status (full- and part-time), distribution among fields of science, level of study, citizenship, control of institution (public or private), sex of students, type and sources of major support. Postdoctoral utilization by field of science was examined in terms of type and source of support. Trend data for the period 1967-73 were derived by linking the 1972-73 data to statistics provided for 1967-71 on National Science Foundation traineeship applications. Findings include these: In 1973 doctorate-granting institutions enrolled 218,000 full- and part-time students, with full-time enrollment (164,300) down 3 percent from 1972 and part-time enrollment up 4 percent. Decline in full-time enrollment since 1967 was 5 percent, with students dependent on federal support down 40 percent. Graduate departments utilized 16,400 postdoctoral appointees in 1973 (a rise of 31 percent from 1967 to 1972), 69 percent of whom received federal support. Detailed statistical tables are included. Identifiers—North Carolina, \*Student Financial Aid, Tuition Assistance Grant Program

There are 39 private colleges and universities in North Carolina. In 1974, 56% or 24,188 of the total undergraduate enrollment at these institutions were residents of North Carolina. The state has a policy of general financial assistance to the private sector amounting to \$200 each academic year for each full-time resident undergraduate enrolled in these institutions. The institutions are obligated to match these funds. This report provides an overview of the private colleges and universities and the present state policy toward them as well as the contributions of these private institutions to the state while outlining their needs. These institutions have made it clear that state assistance should be in the form of aid to students and not aid to the institutions. The report recommends the establishment of a Tuition Assistance Grant program which would provide aid to needy North Carolina undergraduates to assist them in meeting tuition charges to attend an accredited private college or university which they select and to which they are admitted. The funds appropriated for the Tuition Assistance Grant program would respond to the problem of enrollment difficulties caused by the tuition differential between public and private institutions. Geographic origins or permanent residence of all first-time credit course students attending the SUNY institutions during the 1973 fall term are surveyed. This report includes eight tables of basic data in relation to the four coordinating areas of New York state. These areas offer a policy and planning framework for meeting the educational needs of the citizens of any given area of the state while maximizing the efficient use of the existing academic resources in a given area. Tables are included that list the State University institutions in each area and show the permanent residence distribution of the full-time first-time students by area as a percent of total enrollment. During the 1970's, the percentage of college-

going within New York state students served by the State University has steadily increased, even when the college-going rate itself has remained stable or declined. Some limitations of the study are cited with regard to data collection procedures. (LBH)

Descriptors—Administrative Personnel, Educational Equality, Educational Finance, \*Educational Legislation, \*Federal Aid, Federal Legislation, Financial Needs, Financial Support, \*Higher Education, Legislators, Scholarship Loans, \*Student Loan Programs, Tuition, \*Work Study Programs

Certain aspects of the Guaranteed Student Loan, National Direct Student Loan, College Work-Study, and Supplemental Educational Opportunity Grants programs are reviewed and evaluated. The rules and regulations OE provides to educational and lending institutions for administering the federally sponsored student financial aid programs are found to be consistent with the provisions of the authorizing legislation. Generally, financial aid offices did not consider race, sex, athletic ability, academic record, and alumni relationship of student applicants. However, some financial aid officers were influenced by one or more variables in addition to need, such as age, class in school, and place of residence. The present process for allocating loan funds to educational institutions is apparently not equitable. Some institutions receive all or more than the total funds they need to meet the needs of their students while others receive substantially less than their actual need. Regional review panels do not have enough time or data to make appropriate review of institutional applications. Recommendations to HEW are offered. (LBH)

Descriptors—Boards of Education, \*Early Childhood Education, Educational Equality, Educational Philosophy, Educational Planning, \*Educational Policy, Educational Practice, \*Higher Education, Institutional Schools, \*Public Education, School Administration, \*Secondary Education, State Boards of Education  
Identifiers—\*Maryland

The structure and governance of education in Maryland from early childhood through the graduate school is described in a report to the governor. A summary is included of the commission's views of education, as well as a brief review of the status of education, a proposed structural reform, and a series of recommendations. The recommendations deal with: duties and responsibilities of the Joint Education Board at the state level; duties and responsibilities of state and local boards for secondary and elementary education and for institutional education; duties and responsibilities of the state board for higher education; boardsmanship; and principles of equality. Minority statements are included. (LBH)

The supply of scientists and engineers should be viewed not only in terms of quantity, but also in terms of quality and preparation. Forecasts have proven inaccurate in the past so that industry must assure an adequate quantity of students entering the science and engineering fields by the promise of employment. The quality of the professionals can be assured by attracting the best of the foreign students as well as the best American students. And good preparation can be assured by keeping the relationship between the industry and the educational community dynamic. Further, it is necessary for the universities to join in seeking additional innovative ways to make academic and industrial scientists and engineers more aware of each other's jobs and challenges through greater cooperative efforts. Identifiers—\*Massachusetts

The economic well-being of higher education in Massachusetts is seen as a vital concern to the state. It is described as a single system, with independent and state components. Discrimination in the right of access to higher education is cited for the 42 percent of the state residents who attend independent colleges and universities in the commonwealth; i.e., those not state-owned and taxpayer subsidized. Public and private institutions are equated in terms of goals and actual costs, but differences are cited in terms of price to the student. Statistics are reported to indicate the economic benefit to the state of private institutions as well as the economic burden carried by the institutions themselves. Comparative graphs are presented on expenditures such as maintenance, retirement and insurance costs, cost-of-living adjustments, fuel efficiency, debt service, and taxpayer/student expenditures. The Massachusetts House Bill 2882, which provides an apportionment to each qualified Massachusetts high school graduate that the student can take to the college of his choice within the common-

wealth, is supported with modifications recommended. It is concluded that if the General Court continues to restrict its subsidy of public higher education to the state sector and continues to discriminate against the independent sector, it will eventually destroy a significant part of the system of quality education in Massachusetts. **Identifiers**—Project AHEAD

Project AHEAD (Army Help for Education and Development) is a program carried out by hundreds of participating colleges and universities to aid veterans and current military personnel in completing their education. The project can be used by recruiters to encourage volunteers to prepare for their personal futures as well as for their military advancement and promotion. It allows communities and community leaders to keep youth in their own areas by recruiting youth for post-Army commitment in their own state. Project AHEAD is seen as a method of tying existing educational programs together under a single marketing plan which will strongly appeal to educators, parents, influencers, and the educationally motivated man or woman. The program of higher education is operated by the participating colleges, with the Army acting only as the vehicle for implementing it. The potential market for the schools is new enlistees entering the Army and the 780,000 soldiers already on active duty. (LBH)

**Identifiers**—\*Commission on the Future, Lutheran Educational Conference of North America

The Lutheran Education Conference of North America established its Commission on the Future in 1972 and developed a series of proposals for projects that would result in documents useful for planning among the colleges related to the Lutheran Church. At the request of the Commission an overview of the current status of higher education in the United States reflected in the contemporary literature was drawn up. In addition, the commission requested that this overview be particularly directed to the implications for planning for the Lutheran colleges. The supporting documents for this report are the five monographs that review recent developments in American higher education in terms of enrollment, students, governance, instructional programs, and finance. This document attempts to relate the general findings of the review of the literature to the 45 institutions affiliated with the American Lutheran Church, Lutheran Church in America, and the Lutheran Church-Missouri Synod; and concentrates on the implications drawn from the literature for the future of private and church-affiliated institutions of higher education. Two basic developments during the late 1960s and early 1970s will have long-term consequences for higher education in the United States. The first is the striking change in population trends; the declining birth rate reached a low of 15.6 live births per 1,000 population in 1972. The second factor examined is the apparent shift in attitude toward college going among the traditional group of college-age persons. These two factors will obviously not in themselves account for all of the changes that will take place in higher education before the year 2000, but numbers of students who finally enroll will always establish the context within which institutions must develop strategy, and will set the parameters within which changes will be effected. In reporting on the recent literature in these areas, the report makes no attempt to establish specific projections for any group of institutions, much less any individual institution. It does, however, examine the predictions of several other sources. The report examines the traditional pool from which college enrollments are drawn and the expanding college going pool, the "new student," and its impact on both public and private institutions. **Descriptors**—\*College Students, \*Educational Trends, \*Higher Education, \*Literature Reviews, Longitudinal Studies, Managerial Occupations, Political Attitudes, Social Values, Student Attitudes, \*Student Characteristics, Student College Relationship, Student Motivation, Student Opinion

Contemporary American college students are compared with students of the 1960s, whose actions have become points of reference for discussions of the pre-1960s and post-1960s. Longitudinal studies are reviewed that indicate the gap within the generation of young people in 1969 was greater than the gap between the generations. The campus was becoming highly politicized, with a large proportion of students sharing the views of the minority group of revolutionaries. A 1971 study noted a change in mood, away from personal despair and depression. The 1973 students seemed more prepared to accept or at least work within the established political lines and had more confidence in society. Striking differences are noted between entering in 1966 and those in 1973, with increases in interest in business fields and decreases in engineering. Increasing numbers of women and minority students are cited. Problems in the job market are

seen, and opportunities in the 1970s are outside the traditional professions, concentrated instead in government administrative and management fields, business management, sales, advertising, and other service industries. Developments in student attrition rates are also discussed. (JMF)

The term "governance" refers to the process and structure by which and through which decisions about current and projected activities on the campus are reached. The critical issues in governance in the mid-1970s are singled out and recent literature concerning them is presented. Those critical issues are: (1) the role of students in governance; (2) the creation of structures that allow the exercise of power and authority within the university; (3) the role of the faculty in governance, particularly as this is conditioned by the development of collective bargaining and questions of tenure; (4) the developing of state-wide coordination systems; and (5) the role of the president in the contemporary college or university. **Descriptors**—Course Content, \*Curriculum, Curriculum Development, Curriculum Research, \*Higher Education, \*Instructional Design, Instructional Programs, \*Literature Reviews, Program Content, \*Undergraduate Study

Changing curriculum involves more than effecting variations in content of particular courses; it involves the sum total of experiences afforded the student in the pursuit of his educational objectives. Rather than debate whether what is happening is new or different or evidence of change, this review of the current literature reports what is being written about curriculum and leaves it to the reader to make judgments about degrees or kinds of change. There is an attempt to compare program elements over time and to analyse these trends toward change in terms of three kinds of responses by institutions that have resulted in new programs: (1) the creation of new institutions; (2) the transformation of existing institutions as in the "cluster colleges" and the "college-within-college" as well as totally reorganized colleges; and (3) change through accretion and attrition, i.e., the addition of new programs or emphases and the dropping of old programs. The transformation is illustrated by gradual changes and developments in general education, in the areas of concentration or majors; the development of new areas of concentration; the changes in academic calendars to allow for more course experimentation; and procedural changes, such as new grading systems, variations in advising,

development of contract and performance-based courses, and others. (JMF)

An analysis of the current literature presents a mixed picture of the financial crises affecting colleges and universities all over the country. This report presents an overview of the way in which this financial situation appears to have developed and the variety of suggested solutions. Sources of income for an institution are reviewed and ways of increasing these sources are discussed. Further, the report discusses categories of expenditures and what institutions have attempted to do in becoming more efficient through instituting economies. Finally, the report turns to general issues of policy as these relate to both income and expenditures, and notes what several national commissions have suggested as possible approaches to dealing with the situation. Educational experiment and development in the disciplines and professional schools at 11 midwestern universities is examined in a compendium of reports. The purpose is to exchange information among college teachers, administrators, and educational researchers about ways to improve the conditions for learning. Most of the reports focus on changes in a particular discipline area, but many of the arrangements can easily be adapted for use in other departments and interdisciplinary programs. Department-based projects are described along with those dealing with institutional support. The latter covers institutional facilities, instructional media arrangements, and broad programs which span different disciplines. The last section of this report is the cumulative index to all 11 reports, which has been updated by deleting references to projects that are no longer active. (LBH)

**Descriptors—**\*Aerospace Education, \*Astronomy, Career Choice, Doctoral Programs, Economic Factors, Educational Policy, Employment Opportunities, \*Employment Projections, Employment Trends, \*Higher Education, Manpower Utilization, Occupational Guidance, Scientific Research, \*Scientists, Statistical Data

Statistics on both the production of astronomers and the employment opportunities now available and reasonably expected for the near future are examined. Barring the sudden and unexpected restoration of basic science to public favor, there seems to be no way of restoring equilibrium between the demand and the supply in astronomical employment without a sharp curtailment in the rate of production of new Ph.D.'s. The problem will probably not be solved even if the rate of supply is reduced by one or two factors. The committee has recommended a number of steps that might be taken to increase the number of positions available to astronomers, particularly in college teaching and in industry, where astronomers are under-represented as compared with scientists in other branches of physics. The report is intended to be a guide for students preparing to enter graduate school about their chances of finding employment, and also to encourage faculty members to take appropriate steps to broaden and diversify the training of their graduate students. **Identifiers—**\*Common Core of Data Program

Major policy issues are delineated and specific categories of postsecondary education data identified that are needed at the federal level to address these issues. This report constitutes a significant phase in the Common Core of Data (CCD) program which is a major new concept of the National Center for Education Statistics. CCD provides an integrated and interlocking system of educational statistics to meet federal, state, local, and institutional needs for planning and management. Federal policy issues include providing equal educational opportunities, meeting manpower needs, promoting recurrent education, stimulating educational diversity, and encouraging research in the national interest. The data needs reflect the broad dispersal of federal programs supporting postsecondary education and the important policy issues underlying them. The identified data needs call for varied collection methodologies, including surveys, samples, and case studies. NCES is suggested to provide a data coordination role as a national center with expanded operations and influence, as well as coordination with states and the postsecondary education community of associations, institutions, and individual researchers. **Descriptors—**\*Administrative Personnel, Conference Reports, \*Department Directors (School), Educational Finance, Faculty Recruitment, Financial Support, \*Grants, \*Higher Education, Private Colleges, \*Science Departments, Science Teachers, Teacher Role, Workshops

**Identifiers—**\*Research Corporation

To provide firsthand knowledge of investigators and institutions for the evaluation of grants proposals, the Grants staff or Research Corporation visits hundreds of colleges and universities each year. Their finding reveal that department chairmen have a unique influence on the conduct of research and the motivation of students, as well as the total environment in which faculty and students work. Working sessions for heads from public and private institutions are reported. Each conference included 18 newly appointed chairmen, three highly successful resource people, and several additional special discussion leaders. Topics covered included: the chairman as administrator; responsibilities of the department leader; creating and sustaining an active department (e.g., recruiting new faculty members, faculty evaluation, stimulating creative activity); current departmental problems in chemistry, physics, and biology; managing money and obtaining support; heads' recruiting and advisory responsibilities to the students; and planning for the future. Appendices provide the Student Course Evaluation Form; Faculty Evaluation Form; foundation center regional collections; and typical life history of a Research Corporation application. (LBH)

**Identifiers—**\*Nontraditional Education

Innovation programs in higher education are generally received with some skepticism and are often asked to justify their existence and the funding they are accorded. Since the programs are largely efforts to explore and demonstrate effective teaching and learning not present in traditional postsecondary education, the appropriateness of judging their financial right to life by traditional standards is questionable. This study was commissioned to determine the nature and extent of restraints imposed by state and federal funding formulas, guidelines and regulations on emerging, innovative, time- and place-free opportunities in postsecondary education. Administrators from several nontraditional colleges and programs were interviewed in person and 300 questionnaires were mailed to others, with 134 responding. The analysis of these questionnaires revealed much frustration with state and federal funding policies and specific funding and approval problems. It also produced a number of proposed solutions to these problems. Largely these centered on restructuring formulas and guidelines to take into account the special features and purposes of nontraditional education ranging from adding flat or percentages increments specifically for nontraditional program development to finding a more equitable unit of measure than the credit hour. **Survey of Use of Student-Faculty Ratios for Budgeting Purposes in Higher Education.**

New York State Div. of the Budget, Albany.

Pub Date [75]

Note—17p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors—**\*Budgeting, \*Budgets, Colleges, Educational Administration, Educational Finance, Enrollment, Faculty, \*Higher Education, Planning, \*Student Teacher Ratio, Surveys, \*Teaching Load, Universities

**Identifiers—**\*Student Faculty Ratios

The overriding reason for this analysis centers on the widespread, but varied, application of student-faculty ratios (SFR) as a contributing factor in determining the faculty budgeting requirements of public and private institutions. A survey was conducted among heads of state budget offices, heads of central administration for university systems, presidents of public liberal arts colleges, presidents of technical schools, heads of national associations, and state higher education boards to determine how they apply the concept of SFR in the management of public colleges and universities. Of particular concern at this time is the appropriateness of using the ratio data for budgeting purposes in a period of stabilized, and in the near future, declining enrollments. Accordingly, the study identifies alternatives to use of SFR in the budget process. (Author/JMF)

**Descriptors—**\*Females, \*Feminism, Groups, \*Higher Education, National Organizations, \*Professional Associations, Womens Studies, \*Working Women

The data compiled in this study represents the responses of professional associations regarding the activities of women's committees. Respondents completing the questionnaires were either chairpersons or staff for women's committees, or chairpersons of independent women's caucuses. The data analyzed related to the membership count of the association by sex, the existence and length of existence for the women's committee and independent women's group, availability of studies done on the participation of women within the association's affairs and the status of women within the profession, and policy statements enacted by the association on women's issues. Respondents were also asked to designate the person to whom incoming calls or correspondence on women's issues are referred. Documents were also enclosed by the respondents on studies and policy undertaken by the associations. (Author)

Although the International Baccalaureate experiment has basically much in common with other secondary terminal or university entrance examinations, described as traditional, it attempts to seek a solution to the problem of mobile or foreign students and for its various new approaches to the question of assessment. The project is an action-research experiment and therefore will continue to be of interest to students of innovation generally. The initial objectives of IBO were particularly directed to meeting the needs of specifically international schools whatever their focus, but at the same time there was a growing awareness of the potential value of this "education laboratory," with its international perspective, to any country interested in the development of curriculum and examinations. Taking into account the experimental period, IBO now hopes to broaden courses so as to offer not only first-class academic orientation, as at present, but also to open up the way to different types of postsecondary vocational training; to include adult education and possibly lower age groups at the secondary level; and to decentralize IB services. The Council on Higher Education was directed to review external educational options in the State of Washington, to prepare a report describing these options, and to develop guidelines for their establishment. This report provides a full inventory of external options in accordance with the directive. It was agreed that, in determining whether an educational activity would be considered "external," the focus would be on expanding educational access. Options designed to reach out to students who are unable to spend considerable amounts of time attending class on campus were felt to be clearly "external." In light of these criteria, the institutions were asked to examine their off-campus offerings. The document's maps and tables are intended to acquaint the reader with the nature and extent of off-campus offerings. (JMF)

**Identifiers—**\*Georgia

The responsiveness of Georgia's universities, senior, and junior colleges to the state's students is reported. Many new programs were added, modified, or expanded, and were implemented to keep up-to-date with requirements for new types and emphases of instruction, research, and public service that reflect rapidly changing technology and economic and social conditions. Among the several major areas in which university system programs were added or substantially changed were medicine and other fields of human health care, veterinary medicine, teacher education, and vocational-technical education. Two new junior colleges were opened and two additional ones were under development. Progress continued in nondiscrimination activities. Many programs of instruction, research, public service, and employment were offered without regard to race, color, sex, religion, or national origin. The state appropriation for the year was substantially more than that of the previous fiscal year. Appendices are included with data on enrollment, graduates, research, faculties, libraries, changes in academic units, construction, and finance. (LBH)

## Identifiers—AASCU

The American Association of State Colleges and Universities (AASCU) has recognized the changing need within society to provide teaching resources to new student constituencies, which include working adults, housewives, former college drop-outs, and older persons, whether in mid-career or in retirement. To reach this constituency, state colleges and universities have channeled learning resources into external degree programs, off-campus seminars, independent study field learning, and continuing education programs. This report is a compilation of responses provided by the members of AASCU to a survey of programs for older persons conducted in August 1974. The members listed and described special provisions and programs in four general areas: (1) special provisions of increased access by older persons to the regular academic and cultural offerings of the institution; (2) special programs or activities designed for and involving the direct participation of older persons; (3) pre-service and in-service training for professionals and paraprofessionals in aging-related fields; and (4) other institutional initiatives currently underway that relate to the needs of older persons. Descriptors—Conference Reports, Conferences, \*Consumer Economics, \*Consumer Education, \*Consumer Protection, Education, \*Financial Policy, \*Higher Education, \*Post Secondary Education, Seminars

The second National Conference on Consumer Protection in Postsecondary Education was a series of seminars on specific issues. The topics under discussion were (1) protecting the student financial interest; (2) student information needs and systems; (3) postsecondary education institutional responses; (4) regulations and safeguards; and (5) full institutional disclosure. Those taking part in the seminars included persons from consumer groups, federal and state officials with responsibility for consumer protection in postsecondary education, public, private, and proprietary, and others. The seminars resulted in some specific recommendations, the most significant of which was that leadership be exercised in each state by a state postsecondary education agency with responsibility for consumer protection in convening a meeting of all state level agencies and groups with consumer responsibility. There is great diversity among institutions of higher education in their requirements for various curriculums. This report, which is concerned only with the broad requirements as percentages of total requirements, analyzes the Bachelor of Arts and Bachelor of Science curriculums in six un-

dergraduate areas that account for about one-half of all degrees awarded at the bachelor's and first-professional level: humanities, social sciences, physical sciences and mathematics, biological sciences, engineering, and agriculture. Only summary findings in each area are presented. Curriculums designed specifically for teacher preparation are excluded from this study. Data was gathered by specialists in each field by means of questionnaires. The report details the results of questionnaires on 16 curriculums for which data were received from 15 or more institutions. (Author/JMF)

Descriptors—Career Opportunities, Careers, \*Curriculum, Curriculum Design, Curriculum Development, Curriculum Evaluation, \*Health Occupations, Health Personnel, Health Services, \*Higher Education, Hospital Personnel, \*Medical Education, Nurses, \*Nursing, Professional Occupations, Questionnaires, Surveys

In June 1972, the Research Medical Center School of Nursing was awarded a Capitation Grant for approximately \$66,000 under the Nurse Training Act of 1971. This report focuses on one of three projects delineated under this grant: Training for new roles, types, or levels of nursing personnel. The purpose of the project was to gather data relative to the post-graduation vocational and educational activities and future plans of the graduates for the five years 1968-1972. Part 1 of the study outlines the results of a questionnaire sent to the graduates as well as input obtained from the school's director and the Medical Center's assistant director for Patient Services. Part 2 of the study reviews the responses obtained to determine potential implications for the curriculum and to formulate recommendations based upon comments made by the graduates. The questionnaire contained a list of 22 nursing functions and two open-ended questions. The ratings of the nursing functions and responses to the open-ended questions provided the information for the recommendations. (JMF)

**Attrition at a Nontraditional Institution.**

State Univ. of New York, Saratoga Springs. Empire State Coll.

Pub Date [75]

Note—20p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Attendance, Attendance Patterns, \*College Attendance, \*Dropout Attitudes, \*Dropout Characteristics, \*Dropout Identification, Dropout Prevention, Dropout Problems, Dropout Rate, Dropout Research, \*Higher Education, Student Alienation

Identifiers—\*Empire State College, New York, Nontraditional Institutions

Attrition at Empire State College (ECS) is calculated in terms of three types of counts: temporal, activity, and degree progress. The strategy for assessing attrition using these three quantitative techniques is discussed as are qualitative phone interviews. The attrition rate in terms of a temporal count was 28 percent. Phone interviews with 93 leavers in early 1975 showed that the dropout tends to be younger than currently enrolled students, single, working full time in a lower status occupation and enrolled as a half-time student. Students left the college primarily because of personal reasons or job related problems. Poor student-mentor relationships was the top college related reason. Additional findings on the effects of ESC experience, suggestions for improvement, and policy implications for educators and administrators are discussed. A multiple perspectives strategy for examining policy implications of the data is illustrated. (Author)

Identifiers—\*Africa

African universities have a critical role to play in the improvement of the African social fabric. There is no necessary conflict between scholarly and social concern. Tasks facing African universities involve the design and operation of the educational system, especially in regard to entrance qualifications and their relationship to academic standards. African scholars should address themselves to all problems and should have sufficient working contact with policy making and executing agencies to ensure that their academic findings will influence practical events. Since African countries are less developed economically, problems arise in relation to cost and cost effectiveness. The high cost of universities underlines the reasonableness of government concern to see that the choice of university curriculum reflects national needs, but a balance between practical requirements and those of intellectual inquiry must be maintained. Identifiers—\*Africa

Politically-decisive institutions can be divided into two broad categories. One is the category of primary political institutions. These are institutions whose basic reason for existence is itself political; in other words, political parties, the legislature, and the executive institutions of government. The second category is that of precipitatory institutions. These are not directly political in their immediate purposes, but could have an impact on politics far greater than that exerted by some of the primary political institutions. The university in Africa is a precipitatory institution of a different but still decisive kind. While the pure sciences augment the riches of scholarship, and the applied sciences promote technological improvements and socioeconomic welfare, the humanities have to grapple with problems of values and identity and are therefore the most directly connected with the process of political development. The two most serious political crises facing Africa are the crisis of national integration and the crisis of political legitimacy. In the process of national integration a university may help to forge a shared sense of historical identity. The university's role in resolving the crisis of legitimacy should limit itself to the task of creating a climate of political and intellectual sophistication. (Author/KE)

Identifiers—\*Africa

The role of the universities in economic and social development is merely one aspect of the contribution of education and knowledge to economic and social development. Economists fully realize that human resources development is a necessary condition for achieving economic and social progress. To economists the role of higher education in the promotion of economic and social development belongs to the field of

economics of education, a field that together with wealth economics constitutes the rapidly growing branch of economics of human resources. The three basic functions of universities are in satisfying the needs of society for high-level manpower, undertaking scientific research, and assuming a leading role in the promotion of change in social values and institutions in the desired directions. Developing nations vary widely in supply, structure, and state of development of institutions of higher education available to them. Consequently, the content of what constitutes the particular policies that ought to be followed in a particular case will vary from one country to the next. However, no university will be able to fulfill the expected role in the promotion of economic and social development unless provided with facilities required for the proper performance of their functions. Identifiers—\*Africa

The incoherences and the ambiguities of Africa's educational system in which, especially at its higher level, a real African life does not exist result from institutions aimed more at transplanting a European pattern (or an American pattern) rather than implanting the university in the life of African countries and adjusting to African needs. The university should be a center where one would elaborate an expression specific to Africa, actualize the values of its traditions, and draw inspiration from the African past. Instead of artificially accepting an imposing foreign culture, the university should be fit to rediscover or create from African experience a new culture, in other words, a new way of expression. It is the task of the university to solve the much debated question of the cultural unity of Africa, a question essential for the political development of African unity. An institution is recommended that would specialize in applied research to further develop the drive to restore and stimulate culture that will give back to the peoples of Africa a sense of their identity and to the community their historical destiny. Descriptors—\*Bookkeeping, Budgeting, Data Bases, Educational Economics, \*Educational Finance, Financial Needs, Financial Services, Fiscal Capacity, \*Higher Education, \*Investment, Money Management, \*School Accounting, Trusts (Financial)

Identifiers—Market Value Method, \*Unit Method

The unit method of accounting for investments, also called the market-value method, is defined as a procedure for accurately allocating income and investment gains and losses, both realized and unrealized, between component funds of an investment pool. This procedure provides a data base for the calculation of investment performance. Advantages of the procedure are described, and basic implementation methods are outlined. Details are offered on conversion or start up problems, frequency of calculations, valuation dates, accounting for withdrawals, transfer between pools, distribution of income, performance evaluation, number of investment pools, and recordkeeping. It is noted that the unit method can be made as simple or as sophisticated as the institution may desire and its advantages offset the efforts it takes. (LBH)

Social pressures on college administrators regarding disadvantaged students are discussed from the viewpoint of one community college president who emphasizes the vagueness of the term "disadvantaged." It is noted that for many students the campus is their first sustained immersion in a going, middle-class, American community, and that its impact is intense. The problems associated with decentralization of programmatic decision making for ethnic group students are discussed. Current emphasis on individual curriculum development is noted. Questions are raised regarding values and methods of teaching. The role of the academic business officer in relating to both the educational institution and the community at large is assessed. (LBH)

Identifiers—\*Total Return Concept

Investment trends and the total return concept discussed at the NACUBO Regional Investment Workshop are described. A survey was made by the NACUBO Committee on Investment of 1,059 institutions, 189 of which responded. The most important finding was that 26 institutions reported the adoption of total return investing. Other findings were that about 50 percent of the respondents classify and distinguish between endowment and quasi-endowment funds; over half operate an investment pool on a market value basis; all of those respondents have adopted the unit market value method for fund share accounting; and most institutions employ a single external advisor, with a small number having multiple advisors. The total return concept consists of two elements, yield and appreciation, and has a dual basis, one being an investment performance objective and the second a systematic withdrawal or portfolio assets to augment investment yield. Investment objectives for colleges and universities are described and related to this concept. Attention is also directed toward the Uniform Management of Institutional Funds Act, which is being drafted to be applicable to all endowment funds. Recent tax legislation, especially the Tax Reform Act of 1969, is also reviewed. (LBH)

Descriptors—Architectural Elements, \*Building Design, \*Construction Costs, Construction Industry, Cost Effectiveness, Design Build Approach, \*Higher Education, Master Plans, \*Prefabrication, \*School Construction, Structural Building Systems

Identifiers—\*Academic Building Systems

Academic Building Systems (ABS) is an architectural planning and design method which allows the construction owner to respond to the need for less expensive structures, economically adaptable to the changing conditions of the academic world, by providing the owner with the maximum controls over the variable cost factors in educational facility construction. In the ABS open system, more than one manufacturer can supply each of the components of the building system. This is felt to offer the best potential for reducing construction, maintenance, and remodeling costs and for improving the usefulness of academic facilities. The systems approach provides a high degree of coordination of the building components. It takes into consideration standard and repetitive features, life costs of complex buildings, adaptability of station utilization, tradeoffs of higher first costs versus lower life costs, and shorter construction time. The major innovation in the fixed elements is the space module, which is a repetitive unit used throughout the structure and which reduces construction costs by making possible the use of standard units of heating, ventilation, and air conditioning to service each module. Identifiers—\*Audits

Background information regarding the draft of "Audits of Educational Institutions," released by the Accounting Principles Board of AICPA, is presented. Sixteen proposed changes are identified to alert and assist the individual business officer in working with his public accountant or state auditor to assure reasonable interpretations appropriate in the individual situation. Audit Guide proposals are grouped as follows: investments and endowments, primary financial statements, current revenues and expenditures, plant, and other changes. The investments and endowments category covers investment performance, carrying value of investments, funds held in trust by others, and endowment income stabilization reserve. Primary financial statement recommendations deal with reporting formats for balance sheets, statements of changes in fund balances, and statement of current funds expenditures and resources utilized. Current revenues and expenditures include student fees specifically assessed for plant financing, provision for encumbrances, services and facilities provided by religious orders, and revenue and expenditure categories. Provision is made for debt service on the educational plant and for depreciation. Other changes deal with loan fund matching grants, annuity and life income funds, disclosure of pledges, agency funds, and Accounting Principles Board opinions. (LBH)

**Descriptors—**\*Collective Bargaining, Collective Negotiation, \*Contracts, Employment Problems, \*Grievance Procedures, \*Higher Education, \*Negotiation Agreements, Personnel Needs, School Personnel, School Surveys, Teacher Strikes, Tenure, Unions

**Identifiers—**American Federation of Teachers, \*National Education Association

Major trends revealed from an analysis of 46 collective bargaining agreements are discussed. The most obvious trend involves the agent with whom college faculty affiliate, with the National Education Association and the American Federation of Teachers dominating. It is shown that the bargaining model developing in higher education is closely patterned after the public school bargaining model. Two-year colleges are the most widely involved with collective bargaining. A new pattern for college and university contracts appears to be toward state or regional agreements. The diverseness of contract items is noted, including grievance procedures, bargaining agent rights, conformity to law, teaching load, promotion, transfer, reappointment and personnel file policies, leave, life insurance, and various concerns for future negotiations. A trend missing from the higher education contracts is a statement on management rights, as well as statements on retirement, insurance, and tenure. It is shown that eligibility for faculty bargaining unit membership varies. Librarians and counselors are specifically included in most agreements, but supervisors and classified personnel are excluded in all agreements. (Author/LBH)

**Identifiers—**\*Program Classification Structure

Program budgeting is described as a means of enabling higher education to respond effectively to three major accountability concerns. They are (1) the long-term financial implications of a particular programmatic or policy decision, (2) determination of what is being paid for, and (3) understanding that the price being paid for a program is reasonable. A Program Classification Structure (PCS) is described which facilitates the concepts of program budgeting. PCS provides cost centers for the preliminary and support activities of an institution. If an institution determines the cost of instruction in each discipline, degree program costs may be obtained by allowing the dollars to flow from the discipline cost centers to the various degree program cost centers in proportion to the flow of credit hours from disciplines to degree programs. Program output indicators and information exchange procedures are also used, as are student flow models that project enrollments by major and by student level within the institution. Using a program budget, decision makers can compare the costs of various alternatives and weigh these costs against their anticipated benefits. (LBH)

**Descriptors—**Automation, \*Computer Programs, Data Bases, Decision Making, Educational Administration, \*Electronic Data Processing, \*Higher Education, Information Science, \*Information Systems, \*Management Systems, Programming

The requisites for the development of sophisticated and meaningful information systems being applied in varying degrees in universities and colleges are discussed. It is suggested that a philosophy that provides for an adequate, reasonable amount of computer power for administrative use is mandatory, and that users should not be slaves to the computer. In planning computerized administrative systems, the users must actively participate to insure the validity of the systems in meeting their particular information needs in a manner that insures informational integrity. Suggestions are made for educating staff at all levels concerning computer problems, allocations, costs, and time, and for exchanging tested systems with other colleges and universities. (LBH)

**Identifiers—**\*Central Washington State College

Suggestions are offered for making business and financial affairs of educational institutions more personal and accountable to faculty, students, administrators, and the community. Objectives are identified for business managers to: (1) devise more ways for student, staff, and faculty participation in shaping the college culture and managing the organization; (2) provide better evaluation and accountability of efforts; (3) keep the institution relevant to the society that supports it; and (4) devise a built-in reward system for employees. Efforts of Central Washington State College in these areas are described. Internal programs initiated include a departmental evaluation between business and academic staff, an intern program for students, and the use of time productivity logs to help individuals become accountable and more effective in time management. It is concluded that business officers are in the most strategic place to help the institution become positive, constructive, and helpful. (LBH)

**Identifiers—**Common Fund, \*Smith College

Investment and endowment policies for educational institutions are shown to be greatly influenced by the size of the endowment and of the school budget. Administration of pooled funds is discussed with particular reference to procedures at Smith College. Establishment of an independent investment committee, separate from the finance committee, is recommended to determine who will make the investment decisions and to define precisely the objective for the endowment and obtain the board of trustee's agreement. It is emphasized that there is a distinct difference in setting policy and in selecting the individual securities for the portfolio. Specific policies are outlined, as are suggestions for payment options in The Common Fund, a nonprofit membership corporation. The Common Fund allows for the pooling of many small endowment funds of different institutions and the employment of expert management for the investment of these funds. (LBH)

The process of establishing and maintaining relations with a contract feeder is reviewed. Initial contact, reasons for the contact, contract negotiation, key people involved, and the ultimate tools of measurement are mentioned. Possible goals and objectives to be specified to a negotiating contractor are suggested. Items to be covered in the contract are outlined, including term and statement on conditions of termination, facilities for offices and equipment to be provided by the university, insurance and payment schedule details, financial statements to be provided by the contractor, terms of cash income return, Equal Employment or Affirmative Action clause, and lead time clause regarding management replacement. Evaluation of the success of the program can be determined by student satisfaction and budget adherence. (LBH)

**Descriptors**—Accountability, Administrative Organization, Administrative Policy, Collective Bargaining, Decision Making, \*Educational Administration, \*Higher Education, Leadership Responsibility, \*Leadership Training, \*Management Systems, Power Structure, Problem Solving, \*University Administration

The process of university leadership is examined in terms of (1) the development of more sophisticated models of the kind of organization a university is, and (2) the development of more precise delineations of the nature of the multiple leadership tasks that must be performed in a university setting. The university is viewed as an "organized anarchy," characterized by problematic goals, unclear technology, and fluid participation. It is suggested that the job of developing managers for higher education consists realistically in dividing the tasks that confront university administrators into small enough and specialized enough units so that they can be managed. Special leadership skills for each task could then be taught. A second leadership task is to increase institutional sensitivity to minor irritations; a third, to define goals and make more effective use of the resources of the institution in reaching them. Other areas of leadership concern public accountability in the use of resources, collective bargaining stresses, the development of coordinating and planning groups at extra campus levels, and manpower planning and development in universities. Universities must be better understood as management arenas in order to develop more effective leadership in transition periods. (LBH)

**Descriptors**—\*Budgets, \*College Admission, Cooperative Planning, \*Educational Finance, Educational Planning, Enrollment Trends, Financial Policy, \*Financial Problems, Fiscal Capacity, \*Higher Education, Money Management, Policy Formation, Student Costs

Decreasing enrollments of American colleges and universities of all types and geographic regions are described that have resulted in many deficits since 1968-69. Contributing to the financial squeeze are inflation, unionization, and sharp reductions in the level of scholarships and research support. Studies of four-year liberal arts colleges confirm the continued growth and frequency of deficits, despite much publicized and feared budget cuts. Policies of raising tuition, increasing the total amount of financial aid, and setting higher admission goals had the net effect of spending more money and attracting fewer students. These problems are seen to be not merely financial but managerial difficulties. Key trends

are outlined that must be considered in making five or six-year plans, with annual reviewing and updating. Suggestions are offered for cooperative efforts on the part of admissions staffs, business offices, and students to carry out appropriate policies that will help solve the financial problems. (LBH)

**Descriptors**—Cooperative Planning, Cost Effectiveness, \*Educational Administration, Educational Coordination, Educational Policy, \*Higher Education, Institutional Role, Personnel Evaluation, Personnel Integration, Personnel Needs, \*Personnel Policy, \*School Personnel, Shared Services, \*Systems Approach

Discussed is a total systems approach to the problems of personnel policies and practices in higher education administration. It is noted that of the three basic management functions—planning, budget, and personnel—the personnel function has been the slowest to adapt to the process of rapid change. Adoption of a new philosophy is needed that will provide coordination and integration among the many campus forces experiencing similar difficulties. The costliness of compartmental management is described, and it is suggested that in times of accountability, a more efficient use of human resources must assume priority over academic tradition. Recommendations are made for integrating personnel functions, including a consciousness-raising process to develop readiness for change within educational associations. Clarification of institutional objectives and priorities is cited as the starting point for developing a comprehensive system. A method of consultation and communication should be established to encourage all members of the campus community, including students, faculty, and staff, to see how their efforts can apply to the common cause. **Descriptors**—Automation, Computer Programs, Cost Indexes, \*Decision Making, \*Educational Administration, Electronic Data Processing, \*Higher Education, Input Output Devices, \*Management Systems, \*Systems Approach, Technological Advancement

The management of change, with implications for a systems approach to administration, is examined in terms of the uses made of technological and methodological devices. Institutions now have machinery that can present data useful in decision making in a variety of formats; which can build models for expenditure, for student and faculty distribution; which can simulate conditions not yet experienced; and which can answer difficult and complex questions. The potential benefits of such computer generated data are acknowledged, but reservations are held regarding the impact on nonmanagement as the result of machine-made decisions. The destructive potential of quantitative analysis is described, along with difficulties in resisting the trend toward mandatory uniformity and centralization. Suggestions are offered for flexibility in university management. (LBH)

In 1968 the Ford Foundation appointed an Advisory Committee on Endowment Management to study the management of college and university endowment funds with an eye toward the accounting and legal principals of more unconventional investing. The Committee concluded that gains from endowments need not be treated as principal of NACUBO sees this doctrine as being erroneous because it arises out an incomplete reading of the conflicting historical legal opinions regarding charitable trusts and faculty interpretations of those opinions. The evidence presented shows that colleges and universities must retain realized endowment gains as principal. The controversy continues into a discussion of whether the college or university holds the funds as absolute owner or as trustee, and the accounting principals that must be applied in each case as well as the implications of each argument. Additionally, the discussion continues to whether or not realized gains from an endowment should be treated as income or capital gains for accounting and tax purposes. NACUBO looks for a conclusive court ruling in some future test case to prove the legitimacy of their arguments. (JMF)

The passing of the 1960s brings the hope that the next phase will be characterized by negotiations between conflict groups, a move toward consensus, and will be followed, finally, by a period of relative order and equilibrium. In terms of the relevancy to college fiscal administrators, five major conditions are discussed: (1) Students will no longer tolerate the secrecy that surrounds the allocation process and will demand a say in budget and allocation decisions; (2) Minority and disadvantaged groups desiring to raise themselves will demand a fuller share of opportunities and a reordering of fiscal priorities and, ultimately, an expanded state and federal support for higher education; (3) With the possible exception of many of the newer community colleges, the 1970s will be a period of low growth rate for colleges and universities that will pose decidedly unfamiliar operating situations for administrators in search of internal efficiency and a closer examination of priorities. (4) The press for greater efficiency and economy is likely to give impetus to the formation of collective bargaining units on the campus. (5) The business officer must meet the challenge of the seventies with new technologies both in the direction of efficiency and economy and of a new pattern of human relationships. (JMF)

**Descriptors**—Administrator Attitudes, \*Collective Bargaining, Employee Attitudes, Employer Employee Relationship, \*Higher Education, \*Industrial Relations, Labor Unions, \*Personnel Management, Strikes, Union Members, \*Unions

Labor-management relations in higher education are undergoing dramatic changes as a result of the rapidly growing unionization of personnel. A comparison of past experiences with unionization both in academe and industry reveals that administrations must determine their human resources policies and objectives before dealing with the unionization question if the question is to be dealt with effectively. There are four basic developmental phases of union-management relations that are explored in some depth: (1) the period before there are any signs of union organizing efforts or union interest among the employees; (2) the period when the rumors of union interest start circulating and handbills or other union literature begin to appear; (3) the period when a union has formally requested recognition as the collective bargaining agent for employees; (4) the period when the administration discusses and negotiates with the union and then lives with the agreements reached. Developments from outside must be recognized as impacting on colleges and universities as when federal pay scales are altered and the impact is felt throughout the labor market. (JMF)

Experiments conducted between 1968 and 1973 studied the various ways that colleges might provide instructional computer access for students at reasonable cost. Ten colleges, representing a variety of computer needs and a diversity of preference in choice of computer vendor, configuration, and mode of operation, participated in an experiment to find if new "minicomputers" might be able to provide instructional computing support that even the smallest colleges could afford. A basic conclusion, expressed unanimously by the ten somewhat varied undergraduate institutions, is that a minicomputer system is the best-buy source of computing power for most instructional activities. The combination of low cost, constant availability control, and the many advantages of an on-campus facility make the minicomputer a preferred choice over known off-campus alternatives. (Author/KE)

This document covers all activities since the inception of the Black Colleges and Community Development Program (BCCDP). The BCCDP was established to develop clear lines of communication between TACTICS' programs; organize Black Colleges Technical Assistance Executive Committee; design, organize, and execute the Black College Consortium; and design and conduct Black Colleges and Community Development Conferences. This document presents an historical perspective, scope and tasks of the original model, assessment of program operation, change strategy approaches, description of the Positive Futures, Inc. (PFI) an institutional and programmatic development team, recommendations, and an appendix containing exhibits of pertinent materials utilized in and generated as a result of activities. BCCDP's initial programming year was under the auspices of TACTICS. PFI subsequently assumed leadership to achieve improved coordination among the developmental and managerial activities of several functional planning units and several levels of governments. This document represents a major effort to formulate a comprehensive approach in facilitating governmental cooperation and community development programmatic balance among black colleges. **Identifiers**—\*USSR

In order to measure the educational achievements of the Soviet Union, it is essential to analyze the educational system in the light of the original intentions and ambitions. The system has three main features, which are a new conception of the relationship between investment and education, an ideological basis and the fact that it is a planned system. The system, subordinated to the needs of the economy, is specialized, and has a diversity of forms—day, evening, and correspondence courses, and a variety of educational institutions. In attempting to formulate a few realistic conclusions, it is important to take into account the constraints that have affected the development of higher education in the USSR. These constraints were largely the result of demographic growth in the USSR, though they were also influenced by the determinism that follows certain political and economic choices. The Soviet Union is now paying the price of the diversity of institutions and networks initially devised. Such a system rapidly becomes cramped once new stimuli no longer reach its central nervous system. (Author/KE)

**Identifiers**—\*Open Learning

Open learning is the act or process of acquiring knowledge or a skill that is accessible and available,

not confined or concealed, and that implies a continuum of access and opportunity. All open schools have one thing in common: they are to a greater or lesser extent efforts to expand the freedoms of learners. The trend towards open forms of learning cannot be separated from the extraordinary efforts in our times to create, if not a new America or a new humanity, at least better situations out of which an improved human condition may evolve. But the open learning trend is also related to a number of other phenomena—social, economic, political, technological, demographic, and educational, which has important implications for standard, conventional education, as well as for independent study. The implications seem to be significant in seven areas: mission; operations; student body; academic, curriculum, instruction, learning and reward system; access; diffusion and communications systems; and institutional support. The open learning trend is the child of independent study. It affects its parents in significant ways. This child, in fact, may win the acceptance so long denied to its parents. (Author/KE)

**Descriptors**—Educational Interest, \*Health Occupations Education, \*Individual Needs, Instructional Aids, Instructional Improvement, \*Instructional Materials, \*Media Selection, \*Post Secondary Education, Student Needs

Despite the wealth of information available about methods of instructional development, the practitioner still faces a major task of adapting these to any local situation. Precisely because instructional development is a "people process," most developers must work through the value systems and priorities set by clients rather than imposing their own. In this process, the clarity and logic of idealized instructional development models often become obscured by local variations in budget, personnel, facilities, and viewpoints. The question for the developers, then, is how to go about finding the best match between the principles they know must be followed and the perceptions and constraints of the people with whom they will be working. A way that looks promising is establishing a faculty ad hoc committee to study and make recommendations for developing and producing specific instructional media, without immediate reference to the more general, total instructional development program. Although attempts are indeed made to sort materials by the degree of their complexity and the assumed expertise of the viewer, the fact is that the same materials may be profitably used in different ways by creative faculty in several situations. The 1974-75 academic year is the first in which student credit hours have been accumulated for the entire University of Maine, utilizing uniform definitions. The purpose of this document is to summarize those data for both semesters. A total of 578,457 student credit hours were generated by all campuses of the University of Maine during the 1974-75 academic year. The largest proportion of these were generated at the Orono campus. Orono and Portland-Gorham together accounted for 73 percent of student credit-hour generation. Tables include listings of student credit hours generated by the University of Maine during 1974-75 by campus and instructional level; the average full-time

equivalent students by instructional level; a head-count of students; distribution by course loads; full-time equivalent student by campus, comparing old and new figures; degree credit enrollment; degree credit enrollment by student origin, county or state. (Author/KE)

Descriptors—\*Academic Achievement, Bibliographies, \*Dental Schools, \*Dentists, \*Health Occupations, Literature Reviews, \*Professional Education

A total of 84 citations is included in this bibliography. In addition, about one third of the articles have been abstracted; the rest are reviewed but not summarized. In general, the abstracted articles are judged to be the most useful in the conduct of this particular study, which evaluates the current position of minority students in dental school. The bibliography is divided into four topic areas: (1) minorities in dentistry; (2) minorities in health professions; (3) sociological studies of dentists and dental students; and (4) predictions of academic performance in dental school. Since the categories overlap somewhat, each entry is placed in accordance with its primary research focus. Within each section, the entries are listed alphabetically by author. (Author)

This study evaluates the current position of minority students in dental school, focusing particularly on the issues of recruitment, financing, separate supportive services, and handling minority affairs. It uses four separate schools to arrive at generalizations about difficulties and capacities in admitting, financing, and policy making in relation to minority students. Tables and supplemental statistical data are included in abundance. (Author)

School Community Relationship, \*State Universities, \*Technology  
Identifiers—\*Public Technology, University of Missouri

Public Technology has been defined as a technology "explicitly responsive to the policy goals and operational requirements of civil governments." The Council of State Governments found in a recent study that "state universities have a major potential to bring applied science to the service of state governments, and that this potential is not being tapped effectively." This document evaluated the progress in Public Technology at the University of Missouri, which consists of four campuses and a nationally known extension system, and assesses the changes needed to improve Public Technology service. Questionnaires were distributed to department chairmen and to University Extension field specialists. Specific concepts for improving public technology service in the University of Missouri include: (1) applied technology projects involving interactions between faculty, students, governmental officials and community leaders; (2) development of the mandate roles in urban affairs and health sciences; (3) a new public works preference in the M.S. programs in Engineering Management and Civil Engineering; (4) continuing application of the resources to solve problems of public safety, municipal revenue, education, health care, mass transportation, local government management, and housing. **The End of Student Activism. Sociological Symposium: Youth and Politics. Number 10.**

Pub Date 73

Note—13p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Activism, Affluent Youth, \*Change Agents, Educational Change, Educational Objectives, Political Issues, \*Postsecondary Education, Social Change, \*Socioeconomic Influences, \*Student Alienation

In order to account for the demise of American student activism, some explanation for its occurrence in the first place seems useful. Such explanations involve reference to family socialization, university conditions, societal-based issues, and to the possibility of social change. Sociological explanations appear to focus on the causation, alternative explanations, and continuities. From such a perspective, the student movement can be seen to arise initially from the peculiar juxtaposition of intense and numerous social issues with a special kind of primary socialization that addresses itself to values affecting these issues and that resulted in an alienated youth culture. In these terms, a renewed interest in activism by students might be anticipated, but not until continued affluence is assured or denied, and not until the possibility of repression either becomes greater than it is or ceases to exist at all. Descriptors—\*Career Ladders, Colleges, Credits, Directories, \*Equivalency Tests, External Degree Programs, Junior Colleges, \*Medical Laboratory Assistants, \*Post Secondary Education, \*Training

Ways now exist for medical laboratory workers to advance up the educational career ladder, gaining credit for prior training and/or experience. A total of 369 Certified Medical Laboratory Assistant Schools, colleges with Associate Degree Medical Laboratory Technicians programs, schools of Medical Technology, and colleges with baccalaureate Medical Technology programs who grant such credit are listed in this directory. Three associate degree programs (two of them external degrees) helpful to laboratory technicians wishing to qualify for MLT (ASCP) certification are also included. With the exception of the simple CLA Schools chart, the other three portions of this directory follow a general format showing credit-granting methods, amounts of credit offered, options for use of that credit,

and eligibility. Credit-granting methods shown in the first few columns of each chart include the CLEP examination, local tests made by each institution, and CASE (the Commission on Accreditation of Service Experience of the American Council on Education) evaluations. Another column in each of the three charts indicated whether a demonstration of actual performance is required of candidates in addition to the other methods indicated. Amounts of credit granted are generally shown in terms of semester hour(s) or quarter hour(s). (Author)

Descriptors—\*Consumer Economics, Economic Change, Employment Patterns, \*Financial Support, \*Income, \*Post Secondary Education, \*Students

This study focuses on the role of student earnings as a source of financial support for post-secondary education and the trends in the various components of total earnings over the past ten years. Also studied is the disposition of these earnings between educational and noneducational use. It was found that the average full-time undergraduate earned \$1,195 in 1970, a 64 percent increase over 1960 (25 percent increase in real terms). A higher proportion of students worked in 1970 compared to 1960, and they worked slightly longer hours. The study also shows that the share of student outlays financed by earnings rose during the 1960's, from 31 percent to 41 percent, for single, full-time undergraduates. Part of this significant increase is due to more students in 1970 choosing less costly educational settings. (Author)

Descriptors—Academic Standards, Budgeting, \*Curriculum Development, Educational Assessment, \*Educational Innovation, \*Educational Objectives, Educational Planning, \*Higher Education, Information Utilization, \*Liberal Arts

While nothing new is expected and anything significant seems too dangerous, it is still necessary to examine critical problems in the field of curriculum and innovation. The problems and prospects of curriculum may be grouped according to management, structure, and purpose. Information together with an institutional willingness to get the greatest educational benefits from its budget can result in major outcomes in educational management. If the basic restructuring of instructional and credit systems is to be effective and maintained, the explicit degree goals and standards must be established along with new assessment procedures for determining the individual attainment of these standards. Just at the time we may perceive the need to instill certain attitudes and values in people, we appear to have no transcendent or common commitments. Liberal education must deal with values in a culture with little consensus, and with all the conditions that facilitate further atomization. (Author/KE)

Descriptors—\*Academic Freedom, \*Accountability, Administrative Policy, \*College Role, Community Attitudes, Evaluation Criteria, Freedom of Speech, \*Higher Education, \*Performance Based Education, Productivity, School Community Cooperation

Identifiers—\*New Zealand

The concern for accountability in New Zealand universities is discussed in terms of policy making. Several questions are addressed: What is the nature of accountability? How does it originate? What is the manner of its growth? What is its effect upon the university's character and functioning? What is meant by academic freedom? Why do academics regard it so highly? It is concluded that academic freedom and university autonomy are indispensable to the well-being of a liberal democratic society. The university, as a part of such a society, must use its freedom and autonomy in a responsible manner. The problem becomes one of mutual understanding and trust. What disturbs academics at the present time is the apparent lack of understanding of academic freedom with a consequent lack of faith and trust in the universities. Such freedom is seen as a necessary condition of the highest efficiency and the proper progress of academic institutions, and encroachments upon their liberty would diminish their efficiency and hinder their development. The Statewide Measures Inventory is essentially a list of items of information, along with concise definitions and other information of interest, relevant to statewide postsecondary education planning and management. It has been designated primarily as a working document for use by state-level postsecondary education planners and decision makers to improve and simplify communication through increased standardization of terminology and usage, to provide assistance to those concerned with developing and designing data bases and information systems, and to suggest ways that statewide planning and decision making might be improved through the identifica-

tion of problems and issues to which the measures in the inventory are relevant. The eight sections of the inventory are General Information About the State, Student Access, Manpower Programs, Enrollments, Finances, Staff, and Facilities. Also included with the inventory (including an index, glossary, and bibliography) is "An Overview and Guide to the Use of the Statewide Measures Inventory," containing information on its origins, general structure, and possible uses. Although its primary target audience is policy makers and analysts in state agencies, it is anticipated that postsecondary education institutions and national organizations also will find it of interest. Descriptors—Affirmative Action, \*Arbitration, \*Collective Bargaining, Employer Employee Relationship, \*Equal Opportunities (Jobs), Federal Government, \*Grievance Procedures, \*Higher Education, Productivity

Identifiers—Title VII

Management and labor are concerned with affirmative action, Title VII, and new roles that they are being forced to play by the federal government. Employers want the employees to be more productive. Unions want the workers to enjoy what they are doing and receive a good wage. The government tells management that employees must be happy, healthy, and safe in their places of employment. These and similar concerns have forced labor and management to consider both new issues at the bargaining table and new approaches to get these demands across to the other party. While many other issues are important at the bargaining table, wages and inflationary effects on wages have top priority. Substituting binding arbitration as the final step of the negotiation process for the traditional weapons of the strike and lockout is also of interest. In higher education, bargaining is perhaps the wrong way to meet the new faculty perceptions, for it does create an employer-employee relationship and thus an adversary process. Perhaps faculty and administrations will jointly agree that the costs of bargaining under the industrial model are too great and that some other scheme is desirable. (Author/KE)

Descriptors—\*Accreditation (Institutions), \*Federal Programs, \*Higher Education, Post Secondary Education, \*Private Agencies, \*Supervision

Identifiers—Basic Opportunity Grants Program, BOGS, GSLP, Guaranteed Student Loan Program, \*Student Financial Aid

The federal government has traditionally relied on a variety of private accrediting bodies and state chartering and licensing authorities for determining eligibility and exercising direct supervision and consumer protection in education. As Federal financial assistance directly to students has expanded (3 million students received \$6.4 million in 1974), the diffuse and uneven system of approval and control of educational institutions, programs, and student financial aid by "voluntary" agencies has become confused and overburdened. As an aid to legislators, the Eligibility Task Force of the Postsecondary Education Convening Authority synthesized numerous recent studies and dialogues in the field of eligibility and accreditation. This was done to define key terms, sort out the interests of the various parties involved, delineate the current issues, offer conceptual models of alternative eligibility systems, and summarize some proposed solutions, including revisions based on the present system, which places heavy reliance for determining institutional eligibility on private accrediting associations. This

also includes plans to separate eligibility judgments from accreditation. Appendices to this summary of the Task Force findings include principal participants in the present eligibility system, a review of statistics pertaining to the Guaranteed Student Loan Program (GSLB) and the Basic Opportunity Grant Program (BOGS), and a list of issues discussed at the U.S. Office of Education National Invitational Conference on Institutional Eligibility. The current treatment of student resources in the College Scholarship Service (CSS) need analysis procedures is reviewed, and suggestions for change in these procedures are offered. There is evidence to indicate that some increase in expected contribution from summer earnings should be made, but the amount of such an increase is difficult to determine. Figures derived are: freshman, \$500; presophomore, \$600; prejunior, \$700; presenior, \$700. Recommendations are made for changes in the current treatment of students' assets in the Parents' Confidential Statement processing system. It is proposed that the current treatment of a student's social security benefits be modified to provide for their inclusion in family income rather than as a student resource. No changes are being proposed in the current treatment for veterans' benefits (i.e., vocational-rehabilitation payments, war-orphan benefits). These are specifically student benefits and are made available to meet the specific costs of postsecondary education, and their inclusion as a part of student resources is believed to be appropriate. Summary information on undergraduate applications for admission to Virginia's state-supported institutions of higher education is presented. The tables contained in this publication report figures by residence and type of institution for the following categories: total applications receiving decision; applications accepted; percent of applications rejected; applicants accepted and enrolled; and percent of applicants accepted who enrolled. One-year changes indicate that the volume of applications for first-time freshman admission increased seven percent, although the total number of in-state first-time freshman applications accepted dropped by one percent. Transfer student applications have also increased significantly, especially into the community college system. (LBH)

For well over a hundred years, the traditional academic disciplines have been coexisting somewhat restlessly with an array of professional schools that not only are relative newcomers to the campus scene but also are concerned with teaching young people how to do things as well as to think and understand. The schools for four of these useful professions—agriculture, engineering, business administration, and forestry—when examined are found to be just as much concerned about how they should relate to the rest of higher education as other disciplines have been about how they should accommodate the "new professions." The rise of interest in vocationalism, which is bringing to the fore tension between useful and liberal in a new way and in a new context, adds urgency to the search for new models in liberal education, and prompts liberal arts institutions to adopt as their own, methods long in use by the new professional schools. The experience of the new professions provides not only a challenge and a model for liberal education, but also provides one of the strongest arguments for its importance. (Author)

**Identifiers—**\*Illinois

The present effectiveness and future direction of monetary award programs administered by the Illinois State Scholarship Commission is examined in three surveys. A random sample of 1,000 was drawn from the total number of scholarship recipients during the 1967-68 and 1970-71 academic years; 2,000 from the 1973-74 survey. It is shown that: (1) scholarship respondents were divided about evenly between men and women, with slightly more men in the grant respondent groups; (2) the grant group includes substantially more commuters (54 percent) than the scholarship group, which is related to the greater per-

centage of grant respondents enrolled in public two-year colleges; (3) both scholarship and grant group distributions are skewed toward the freshman and sophomore levels; and (4) decreasing percentages of grant respondents attend private four-year colleges over the period studied, with a shift from private four-year colleges to public two-year colleges. The distribution is more stable for scholarship respondents. These findings are discussed in terms of the impact of awards on access and choice of college, theory and reality of financing a college education, opinions and attitudes toward financial aid. The findings can also be applied to operational decisions regarding student financial aid administration and policies. (LBH)

A voluntary, pre-matriculation summer session for selected first-year dental students has been evolved to facilitate their development and academic progress. With dental students, practicing dentists, and dental school faculty as staff, the program focuses on basic science foundations, effective study skills, pre-clinical techniques, and professional role models. Students and program have been evaluated formatively and summatively through achievement tests, questionnaires, informal feedback sessions, and performance in the first-year curriculum. Results indicate that this program of cognitive, psychomotor, and affective activities provides enrichment for the participants and useful education experience for the staff. (Author)

The Higher Education Amendment of 1968 provided for support services on college and university campuses to facilitate the progress of disadvantaged young people (from families within the national poverty criteria or the physically handicapped). Three years later an evaluation of the special service programs (typically including specially staffed activities such as counseling, tutoring, remedial study, and ethnic identity activities) was conducted to determine effects of students' progress, satisfaction, and perceptions. Methodology included review of the literature, census of institutions, and collection of questionnaire and interview data from program directors and students. The interview data was obtained from a national sample selected from the 190 projects, involving more than 50,000 students, which were in operation in the 1971-72 school year. Major conclusions are there is no evidence that availability of or participation in support services systematically improves performance and satisfaction with college over that which may be expected from previous academic performance; institutional differences account more for differences in disadvantaged student success and satisfaction than do supporting services; in understanding behavior and attitude, race is more critical than poverty or physical handicaps; and forces to equalize opportunity seem to be working better for poor whites and blacks than for poor Orientals, Mexican Americans, Puerto Ricans, Native Americans, or other ethnic minorities. A questionnaire survey mailed to all U.S. undergraduate institutions in October 1971 was conducted as part of an evaluation of support service programs for disadvantaged students funded through the Higher Education Amendments of 1968. The inventory contained 14 items that sought summary information about the institution's budget, number of students, percentage of student body disadvantaged (from deprived educational, cultural, or economic background or physically handicapped), Special Service or similar programs (e.g. counseling, tutoring, career guidance, placement), number of involved faculty and staff, nature of programmatic activities, and extent and source of financial support. Of the 2,991 institutions contacted, 59 percent responded. Several procedures were employed to

check for biases among respondents. Major findings: About 14 percent of enrolled undergraduates are estimated to be disadvantaged, with considerable variability among percentages in different types of colleges and geographic regions. Half of the institutions reported special support programs, one in three with federal support, one in seven state or local, one in seven institutional, and one in 20 private foundation. Federal funding has been given to those institutions with larger proportions of disadvantaged students. Services provided and their effects depend more on institutional factors than on support program factors. (JT)

Descriptors—Annual Reports, Educational Finance, Equalization Aid, Federal Aid, \*Financial Support, Grants, \*Higher Education, Medical Education, \*Scholarship Loans, School Construction, \*State Aid, State Legislation, Statistical Data, \*Student Loan Programs, Tuition Grants, Vocational Schools

Identifiers—\*Iowa

Program operations from July 1, 1973 to June 30, 1975 are reported that deal with four Federal and four State programs of direct benefit to postsecondary education in Iowa. The current biennium has seen a 45 percent growth in State-funded financial assistance for Iowa postsecondary students. State funds invested in scholarships, grants, and medical loans totaled \$12,760,560. As of the fall of 1974, Iowa ranked tenth in per capita funding among the 39 states that had established comprehensive scholarship and grant programs. Student aid appropriations in these 39 states totaled \$457 million. Statistics are provided on the State scholarship program; Iowa Tuition Grant Program; Iowa Vocational-Technical Tuition Grant Program; Iowa Medical Loan Plan; Construction Grants Program; Equipment Grants Program; Comprehensive Planning Grants Program; undergraduate enrollments; and total enrollments by institution. Provisions of the appropriate State statutes are quoted. (LBH)

Descriptors—\*Arbitration, \*Collective Bargaining, Collective Negotiation, College Administration, Contracts, Department Directors (School), Employer Employee Relationship, Grievance Procedures, \*Higher Education, Negotiation Agreements, \*Presidents, State Colleges, Teacher Militancy, Teacher Salaries, Teaching Load, \*Unions

Identifiers—\*Clarion State College

Some decisions faced by a college president making the transition into the milieu of campus unionization are described. The legal prerequisites of collective bargaining on college campuses is reviewed. Inclusion or exclusion of departmental heads as part of the bargaining unit is cited as a crucial matter, and election and negotiation procedures are discussed. Administration of the labor contract is described with reference to the agreement at Clarion State College, Pennsylvania. Suggestions are offered for biweekly Meet and Discuss sessions between administrators and union leaders, and for grievance procedures. Consideration is given to the possible effect of bargaining on faculty salaries, faculty size, teaching loads, and adversary relationships in general. The importance of labor-management cooperation is emphasized. (LBH)

Identifiers—\*Basic Opportunity Grants

The validity of the basic assumptions underlying student grant programs is examined; namely, whether student aid increases access to postsecondary education for low income groups, whether student aid promotes student choice, and whether financing higher education through students greatly aids private institutions. The major conclusions of the study are that scholarship and grant aid do promote equal educational opportunity, and that with equalization of public-private tuition levels through the aid grants, students will favor private institutions in large numbers. Three major failings of state scholarship programs are identified: (1) lack of consideration of all education-related expenses; (2) unrealistic expectations regarding student contributions to educational costs; and (3) failure to adjust income levels indicating disadvantage. It is concluded that the use of scholarship and grant aid as a mode of financing higher education is on the increase, but that there needs to be more data before the true impact of such programs as the Basic Opportunity Grants can be determined. Further research concerning other types of direct student aid, such as loans, and for longitudinal studies, is advocated. (LBH)

Identifiers—\*Europe

The status of student participation in Council for Cultural Cooperation (CCC) nations is examined, based on questionnaire replies from Austria, Belgium, Cyprus, Denmark, Federal Republic of Germany, Finland, France, Iceland, Italy, Malta, the Netherlands, Norway, Sweden, Turkey, and the United Kingdom. After a brief review of the situation from 1900 to 1945 and from 1945 to 1972, the current outlook is described. Consideration is given to legislation, student participation at different levels, subjects upon which students' representatives should be consulted, mode of election and powers, and the results of student participation. It is concluded that since 1968 a great change has taken place in the power structure of the institutions of higher education in most of the member countries. The goals of the student unrest in the late sixties have not been fully reached, although students have gained more influence than anticipated. The present situation shows that the abolition of the full professors has disappeared in most member countries and that the power structure is based upon a certain balance between different groups. Many of the student leaders of 1968 are now employed by the universities, and their new roles are speculative. Questionnaire samples are included. (LBH)

**Grievance Procedures: A Working Paper.**

American Council on Education, Washington, D.C.

Pub Date Aug 75

Note—37p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**—Administration, \*Arbitration, \*Collective Bargaining, \*Collective Negotiation, Colleges, Committees, Faculty, Faculty Organizations, \*Grievance Procedures, \*Higher Education, Students, Universities

Campus grievance procedures, now mandated for most institutions by the Title IX regulations, ordinarily include informal measures to resolve a grievance, provision for a formal written complaint for the grievant, a grievance committee with a number of roles, a grievance committee for cases involving major policy issues and major sanctions, and a set of policies for the operation and guidance of the grievance system. Grievance procedures have two related functions: to determine whether an injury alleged by the grievant was the result of an error in an institution's policies and procedures or their administration, and if error is established, to determine an equitable redress for the grievant. In the light of the Title IX regulations specifically and of changing social and legal standards more generally, colleges and universities should reexamine their grievance mechanisms with particular attention to the following questions: (1) Is the structure of traditional grievance procedures adequate to today's requirements? (2) Who should participate if the procedures are to operate equitably and promptly? (3) Can informal grievance procedures be strengthened? (Author)

In the early summer of 1972 the Institute for Services to Education formed a small task force group to conduct a limited but systematic inquiry into the status of Black Studies programs at a selected number of American institutions of higher education. The major purposes of the study are: (1) the formulation of a workable definition of Black Studies, (2) the identification and selection of a representative group of programs, and (3) the identification of major issues associated with the development of Black Studies programs along with alternative approaches to these issues. In addition, it was also accepted as a reasonable supposition that the findings of the study and the literature associated with it could be distilled into a useful and practical set of guidelines that would be helpful to persons developing or evaluating Black Studies (Afro-American) programs in higher education. The Task Force formulated the major issues through discussion and interpretation of: (1) structural relationship to the institution; (2) theoretical focus and objectives; (3) financing; (4) staffing; (5) enrollment pattern; and (6) identification of major issues. The questions raised tended to probe rather deeply into the nature of Black Studies, but they also brought into view many other related issues. (Author/KE)

The state agency represents the interface between the statewide education system and the governmental and external bodies that would influence it. About 55 state agency staff members from all over the east coast attended an inservice workshop that attempted to measure some of the new dimensions of postsecondary education and to equip participants with effective means to confront related daily problems. There were six content modules which included formal presentations, illustrations, demonstrations, and discussion: "Information Related Problems in State Planning" by T. Edward Hollander; "Problems and Issues Related to the Data Game" by Robert Huff; "External Interest Group Impingements" by Richard Millard; "Problems Clinic—Where Do We Turn for Help?" (a panel of eight representatives from national resource organizations—American College Testing Programs, Southern Regional Education Board, College Entrance Examination Board, American Association for Higher Education, ERIC Higher Education Clearinghouse, and U.S. Office of Education); "State Agency Relationships" by Patrick McCarthy and John Porter; "Dealing with Dwindling Resources" by S.V. Mortorana; "Problems and Issues Related to Legislative Process—The Federal Dimension" by Robert C. Andringa; "New Assumptions for State-Level Leadership in the Future" by Robert B. Mautz. All workshop presentations are included along with a post-workshop analysis by DeForest Trautman that summarizes activities and outcomes. (JT)

**Identifiers**—\*South Carolina

During the fall of 1974, a questionnaire was administered to a random sample of 700 off-campus students at the main campus of the University of South Carolina who were enrolled in nine or more semester hours of course work (approximately 8 percent of the population). The goal of the study was to describe off-campus students including their perceived needs so that their input could be considered in decision-making processes. The results of the questionnaires were analyzed to examine the students' views on the following issues: (1) the potential use of facilities on campus; (2) the desirability of a service and programming organization for commuters; (3) the relative importance of a variety of programs for commuters; (4) the degree of usage of various means of communication; (5) the amount of time spent on campus by commuters; and (6) the desirability of social functions planned for commuters. **Identifiers**—Basic Grant Program, \*Senate Subcommittee on Education

The purpose of federal support for the general educational goals of higher education is examined in this testimony. Such support for higher education currently amounts to \$3.4 billion, exclusive of research and veterans educational benefits under the GI bill. Two roles are identified for federal support of higher education: (1) the role of increasing access to postsecondary education by concentrating resources on direct financial aid to students on the basis of need; and (2) the role of encouraging a diversity of educational programs that will be responsive to the particular educational needs of citizens. The Administration's view is reaffirmed that the best way to achieve these goals is through student aid rather than general financial support for institutions. It is suggested that the major part of federal budget resources should be devoted to student grants rather than student earnings subsidies and student loans. The Basic Grant program should be the foundation of higher education legislation, which would permit a maximum grant of \$1400 for all classes of students. Suggestions are offered for perfecting the access role of this program. Coordination of federal and state programs is also recommended. (LBH)

Statistical tables are presented on college and vocational school plans of high school seniors by their sex, race, region of residence, metropolitan residence, education and occupation of family head, and family income. The survey taken early in the senior school year indicates intentions for further study. The current sample is spread over 461 areas comprising 923 counties and independent cities with coverage in each of the 50 States and the District of Columbia. Many students appear unsure of their future plans: about 27 percent of the high school seniors said they may enter college and 44 percent said they definitely planned to go to college. Although the proportion of male high school seniors planning for college declined somewhat, there was no corresponding increase among them in plans for vocational-technical school enrollment. Female high school seniors were more certain of their college plans than were the men. There was some evidence that black high school seniors were less likely to make definite plans for entering college. (Author/KE)

**Descriptors**—Educational Economics, \*Educational Finance, Finance Reform, Financial Policy, \*Financial Problems, Financial Support, \*Higher Education, Staff Role, \*State Colleges, \*State Universities, Tenure

This survey and analysis attempt to report on plans, programs, policies, and practices to meet the exigency situation, i.e., a decline in financial support and/or enrollments that require the release of professional staff -- tenured and non-tenured. The survey was made among institutions who were members of the American Association of State Colleges and Universities and/or the National Association of State Universities and Land-Grant Colleges. The report summarizes the questionnaire; raises a series of issues based on the methods, the problems, and some of the results of the plans formed by the institutions responding; includes six exigency plans that illustrate how public institutions of varying sizes and interests have dealt or are currently dealing with the problems of financial exigency. Finally, the policy statements adopted by the Association of American Colleges and the American Association of University Professors are included as materials to enable the institution to look at broad policies as well as analysing specific plans used by other institutions or systems. The intent of the report is to present guidelines and describe various plans that can be modified to suit the needs of a particular institution. (JMF)

The impact of financial aid in helping a student stay in college is examined from data collected in 1972 from students who entered college in 1968. The findings include: (1) Students, especially men, who rely on loans for support during college increase their chances of dropping out. (2) Students who rely on scholarships or grants increase their chances of completing college, but only slightly, while students relying on savings or the G.I. bill increase their chances of dropping out. (3) Participating in work-study programs increases chances of completing college, particularly among students from middle-income families. (4) Students who receive support for college expenses from their parents are more likely to complete their education. (5) Students who are married when they enter college have a good chance of completing their education if their spouses provide major financial support, but dropout chances are substantial if spouses provide no support or only minimal support. (6) Any type of financial aid administered alone is more effective than financial aid packages. (LBH)

**Descriptors**—\*Affirmative Action, Colleges, \*Equal Opportunities (Jobs), \*Government Role, Guidelines, \*Higher Education, \*Performance Specifications, \*Program Administration, Program Development, Universities

The Department of Labor is responsible for the Federal program to insure that contractors and subcontractors provide equal employment opportunity. Labor has delegated to 11 other agencies—including the Department of Health, Education, and Welfare (HEW)—the responsibility for performing compliance reviews of contractors' facilities and enforcing Labor's guidelines. HEW, however, has made minimal progress in making sure that colleges and universities have accepted affirmative action programs and are in compliance with the Executive action programs. HEW has not consistently sent required "show-cause" notices to colleges and universities whose affirmative action programs it has found to be not in compliance, it has not begun sanctions against these institutions, and has not generally performed preaward reviews. HEW negotiates and conciliates with colleges and universities over prolonged periods rather than requiring them to prepare acceptable affirmative action programs within the time specified under Labor guidelines. Neither Labor nor HEW has identified all colleges and universities that have Government contracts and are subject to the program. HEW has not provided a uniform nationwide training program for its compliance officers. Recommendations follow. (Author/KE)

**Identifiers**—Need Analysis, \*Student Financial Aid

The movement toward a uniform methodology of determining parental ability to pay to be used over time by all institutions and agencies awarding financial aid funds is consistent with the goals and objectives of the College Scholarship Service (CSS). This paper describes a proposed system for a uniform methodology for measuring parental ability to pay for postsecondary educational costs for consideration by the membership of the CSS Assembly. In setting forth this proposal, a brief review of the CSS need analysis system is given. This comparative analysis demonstrates the substantial aspects of the CSS need analysis rationale that have been incorporated into the proposal outlined. The proposed methodology brings into being several characteristics long considered desirable by many financial aid administrators and agencies awarding student aid funds -- namely, a more simplified system in which the methodology can be readily understood by the users and in which accuracy of information is retained. This study surveyed graduating seniors of East Carolina University relative to employment status immediately prior to graduation in the spring of 1974. The purpose of the study was to determine the number of graduating seniors who had accepted employment, the location of their work, and whether or not they were satisfied with the employment offer. Other variables investigated were: (1) students who had offers but were still seeking employment; (2) students seeking employment but having no job offers; and (3) students not seeking employment due to further studies, military obligations, etc. These variables were categorized by degree level, sex, race, and marital status in a summary table, and by discipline and degree level in other tables. International university cooperation is the main purpose of the International Association of Universities (IAU). Certain problems arise in the field of international cooperation and particularly in the field of assistance. The helping hand easily becomes a dominating hand while the notion of mutual exchange presupposes the existence and recognition of differences. Consequences of such recognition are reciprocity; an ability to let immediate objectives remain secondary to long-term ones; and the work of the universities. (Author/KE)

**Descriptors—College Instruction, \*Educational Objectives, \*Educational Philosophy, \*Faculty, Faculty Evaluation, \*Higher Education, Individual Development, Instructional Improvement, Job Development, Organizational Development, \*Professional Continuing Education, Program Development, Staff Improvement, Student Interests, Student Needs**

Faculty development programs in colleges and universities must be faulted for not having adequate theory, employing comprehensive approaches, or showing a deep intention. An adequate theory of faculty development will involve a sophisticated understanding of the process of professionalization and an integrating theory of human development. Approaches, in terms of strategies and tactics, must respond to the interests and needs of students, faculty, and society. Deep qualitative objectives defy quantification but remain unquestionably important. The case for faculty development includes the faculty need to be prepared to work with new students in new places, to be made acquainted with alternative modes of teaching and learning, to be more sophisticated in their knowledge of the workings of the institution, and to become more conscious of the end of the learning experience for which teaching is a means. Behind the case for faculty development is the concern for institutional survival and for the needs of the larger society. Clearly we need more than the psychological-developmental approach, which deals mainly with the strengthening of the individual, even as we need more than the administrative-bureaucratic approach, which measures development by institutional criteria. Preparatory to developing a core curriculum with the possibility of instituting a tracking system, the Committee on Undergraduate Medical Education at the University of Connecticut

Health Center appointed a committee that set out to find a systematic way of looking at the curriculum. The committee developed a personal-political approach and research methodology in which an educator involved faculty members in writing and reviewing educational goals and objectives (affective, cognitive, and psychomotor). The performance standards developed by the 24 teaching committees were rated by the teaching faculty (for clarity and importance) and will subsequently be reviewed for relevance by other faculty groups. They will be published and will serve as the basis for the evaluation of student performance. Meanwhile, the day-to-day benefit of this systematic definition of curriculum may be far more important to the institution than the original purpose. (JT)

**Descriptors—Budgeting, \*Cost Effectiveness, Decision Making, Educational Accountability, \*Educational Administration, \*Educational Planning, Enrollment, Evaluation, Guidelines, \*Information Utilization, \*Post Secondary Education, Trend Analysis**

Cost analysis is not solely the concern of the technically proficient analyst. Determining what uses are appropriate for cost information is a broad policy issue in which academic administrators, department chairmen, and faculty have a tangible interest and should have at least a conceptual grasp of this subject. It is particularly important to appreciate what the technical experts can accomplish with cost analysis and what the problems are. Placing cost analysis in its appropriate context has needed to be done for some time. It involves the examination of these concerns: (1) the recent increase on pressures for cost analysis and the motivations behind these pressures; (2) the guidelines for cost analysis that have been established at NCHEMS; (3) the directions that the development of cost analysis procedures should take in the future. Appropriately or not, the growth of cost analysis in postsecondary education over the past decade has taken place largely in the context of accountability, and more recently in an environment of resource acquisition frustrations. Cost information is increasingly important in planning, budgeting, budget control, and evaluation of performance. (Author)

**Descriptors—Bibliographies, College Students, \*Educational Benefits, Educational Development, Elementary Schools, \*Evaluation Criteria, \*Higher Education, Human Development, Moral Development, Personality Development, Secondary Schools, Social Development, \*Social Influences, Student Development, \*Success Factors, Vocational Development**

This document addresses itself to changing social conditions or, more specifically, to the conditions under which nonintellective success is defined by our society. In this document success is viewed as: (1) intellectual development; (2) personality development and adjustment; (3) motivational and aspirational development; (4) social development; (5) aesthetic-cultural development; (6) moral, philosophical, and religious development; and (7) other types of college success, including post-college success, develop-

ment of student power, development in basic educational skills, benefits to society, and miscellaneous criteria. Great care was taken to make this literature coverage as complete as possible. However, this was not the primary purpose of the study. Some studies judged by the authors to be of lower quality than others are not annotated for reasons such as unique approach, stimulating and thought-provoking conclusions, experimentation with specific criteria or predictor measures formerly overlooked, results unlike those of other similar studies, utilization of uncommon statistics, etc. Furthermore, relevant research at the elementary and secondary level was included in the review if it seemed to have definite applicability to college students. **School-College Articulation: Cooperative Programs and Practices Linking Secondary and Post-secondary Curricula. Report No. 5.**

Syracuse Univ., N.Y. Center for Instructional Development.

Pub Date 75

Note—21p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors—\*Articulation (Program), College Preparation, Curriculum Development, \*Curriculum Planning, \*Higher Education, \*High School Students, Post Secondary Education, \*Program Coordination, Program Improvement, Secondary Education**

Past and present forces affecting curriculum articulation between schools and colleges are discussed. There now exist sufficiently pressing conditions, at both secondary and postsecondary school levels, to bring the issue of program continuity to the forefront. Particular attention should be paid to the assumptions underlying new articulation designs, to the recommendations of noted individuals and organizations, and to the increasing interest of government agencies because their effect on both schools and students will be far reaching. The current and future status of the education triad is examined with particular reference to determining eligibility for federal funds. The existing system of postsecondary governance is discussed, followed by a study of the legal constraints on the functions of and interrelationships among the triad elements. The status quo regarding postsecondary educational governance is concluded to be unacceptable. Immediate goals for the triad are shown to be: increased understanding of each element's capabilities; sharper emphasis on each element's strong points; clearer definition of each function; and better division of power among triad elements must be maintained if the triad concept is to succeed in the long run. Educational consumer protection is one of the primary issues whose solution requires an intelligible division of function among triad elements. All three elements of the triad will need to participate in eligibility determinations, with balance of power stimulated through increased attention to the legal considerations. (LBH)

tion, State Universities, Teacher Salaries, Tenure, \*Women Professors, Womens Education, Womens Studies

Identifiers—\*Arizona State University

The status of women was examined by a committee of men and women for an academic year, with consideration given to studies from other major universities and informed witness testimony. Discriminatory practices and means of complying with anti-discriminatory legislation are discussed. Recommendations are offered on: the role of women who can serve only part-time; tenure for part-time faculty women; recruitment, salaries, and promotion of women faculty members; recruitment of women for graduate study; policy of hiring husband and wife; and opportunities for women's studies was not examined due to an apparent trend of universities to move away from such separate curriculums. A body of supportive evidence is included to support the recommendations made. It is further suggested that copies of the report be given to department chairpersons and that an on-going College Commission be appointed. (LBH)

The Instructional Cost Index. A Simplified Approach to Interinstitutional Cost Comparison.

Spons Agency—Association of Independent Colleges and Universities in Massachusetts, Boston.; Canada Council, Ottawa (Ontario).; Massachusetts State Board of Higher Education, Boston.

Pub Date Jul 74

Note—25p.; Paper presented at the Society for College and University Planning (9th, Denver, Colorado, July 1974)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Cost Effectiveness, \*Cost Indexes, \*Higher Education, \*Instructional Programs, Policy Formation, \*Program Costs, Resource Allocations

The paper describes a simple, yet effective method of computing a comparative index of instructional costs. The Instructional Cost Index identifies direct cost differentials among instructional programs. Cost differentials are described in terms of differences among numerical values of variables that reflect fundamental academic and resource allocation policies. The pragmatic management information provided by policy variables and the resultant Instructional Cost Index may be used by decision makers at all levels as an alternative to similar information provided by other, more complex instructional cost methodologies that require substantially more input data. The examples given demonstrate the modest data requirements of the Instructional Cost Index procedures. (Author/KE)

Identifiers—AUTONOTE, \*AUTONOTE2, Personal Information Systems

The trend toward on-line utilization of computers in recent years has included the emergence of computer support systems to fill the information processing needs of individuals engaged in scientific research. In this study, a new approach to document description is applied to the design of a personal information storage and retrieval system, AUTONOTE2. The system enables the user to: (1) define the topical content of each

text items with phrasal descriptions, and (2) specify structural associations among the defined topics. A detailed discussion of both the design and implementation of AUTONOTE2 is provided, together with a case study of system performance during the description of a realistically diverse document collection. The results of the analyses suggest that the referential mechanisms used in the system constitute a viable alternative to keyword indexing in personal information systems. (Author/DGC)

Descriptors—Course Objectives, \*Course Organization, \*Instructional Media, \*Media Specialists, Media Technology, \*Practicums, Preservice Education, \*Teacher Education Curriculum

Several needs were identified at Iowa State University for a second level media course for undergraduate education majors. For students, these needs included more in-depth media training and earlier contact with public schools. For teachers, these needs included on-target teaching materials and instructional development assistance. To meet these needs, a course was developed which consisted of three types of activities: (1) formal university classwork in media skills including training in the Instructional Materials Center concept, literature in media, photography, videotaping, individualized instruction, and computer-assisted instruction; (2) public school work which included a at least two hours per week in the classroom of media-conscious cooperating teacher; and (3) curriculum development activities where a student is helped to identify a curricular problem area and then follows a systematic approach to the development of mediated teaching materials to remedy this problem area. Evaluations indicate the course has been successful. A topic outline, grading procedures, and an evaluation sheet are included. (Author/KKC)

Identifiers—\*Educational Products Information Exchange, Learner Verification and Revision, LVR, National LVR Task Force

Learner Verification and Revision (LVR)

Process of Instructional Materials is an ongoing effort for the improvement of instructional materials based on systematic feedback from learners who have used the materials. This evaluation gives publishers a method of identifying instructional strengths and weaknesses of a product and provides an opportunity to revise that product. LVR identifies trouble spots or the absence of them, since the only people to engage in the selection are those involved in the product. Instructional materials require actual use in the classroom to determine their effectiveness. Reporting and assessing LVR activities are carried out according to a flexible format. The format includes (a) descriptive information on the product, (b) instructional design, (c) intended learner outcomes to be investigated, (d) conditions of use of product, (e) techniques for gathering feedback, (f) description of learners used in LVR process, (g) analysis of findings, (h) specific improvements made, (i) background and future of product. Three appendixes and a review of Task Force reactions are included. (DS)

Identifiers—City University of New York, Columbia University, CUNY, Teachers College

A series of computer programs designed to provide a dynamic simulator of Joyce and Weil's models of interactive teaching are described. Initially developed and tested at the City University of New York (CUNY), the system is capable of supporting retrospective and predictive analysis of selected kinds and patterns of verbal behavior in a variety of classroom settings. Initial data was gathered from 195 observations of 30 teacher trainees enrolled in the Preservice Childhood Education Program at Teachers College of Columbia University in the fall semester of 1971. In addition to the description of the simulator, its application and its supporting data, a review of the literature and earlier research on teaching behavior are also provided. (DGC)

To discover children's knowledge about computer operation and programing characteristics and its effect on children's perceptions of computer expertise, pre- and posttests were administered to 292 children from 5th, 7th and 9th grades. Children were randomly assigned to see a

factual film on computers or to a film on another subject. It was hypothesized that increased knowledge about computers would lower student perception of its expertise. Pretests indicated all children, regardless of age level or previous computer-assisted instruction (CAI) experience, held a high regard for computer expertise; posttest indicated that those who viewed the film changed in a direction supporting the hypothesis of the study. Older students perceived the computer as somewhat more expert than did younger ones, and CAI-experienced students more than non-CAI experienced students. It was concluded that social lessons as well as cognitive outcomes were taught by CAI programs. (SK)

Teaching Statistics with Minitab II.

Pub Date Jun 75

Note—11p.; Paper presented at the Conference on Computers in the Undergraduate Curricula (6th, Fort Worth, Texas, June 16-18, 1975); Related document IR 002 399

Available from—Entire Proceedings; Ted Sjoerd-sma, Treasurer, CCUC, 1248 Lindquist Center for Measurement, Iowa City, Iowa 52242 (\$10.00, Checks payable to the University of Iowa)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—College Instruction, \*Computer Oriented Programs, \*Statistical Analysis, Statistics, Teaching Techniques

Identifiers—Computer Augmented Statistics Instruction, \*Minitab II

Minitab is a statistical computing system which uses simple language, produces clear output, and keeps track of bookkeeping automatically. Error checking with English diagnostics and inclusion of several default options help to facilitate use of the system by students. Minitab II is an improved and expanded version of the original Minitab which was based on the Omnibit System of the National Bureau of Standards. With the new system students can analyze more extensive and realistic data sets and, as a consequence, can devote more time to the concepts of statistics rather than to calculations. Minitab consists of a worksheet (normally 200 rows by 50 columns) and about 130 free format commands which provide a wide variety of capabilities. The system is in current use not only in academic settings but in industrial environments as well. Minitab is written in machine compatible FORTRAN IV and can be implemented on a variety of computers. Examples of a paired t-test, a data analysis, an illustration of the concept of a limit, a simulation, and a polynomial regression with data transformation are provided to show the ease and flex-

ibility of Minitab II. Output exhibits for these examples are appended. (CH)

Descriptors—Administrative Principles, Administrative Problems, Administrator Responsibility, \*Administrator Role, Administrator Selection, \*Leadership Styles, Librarians, \*Library Administration, Management Development, \*Management Systems, Organizational Change, Speeches, Trend Analysis, \*University Libraries  
Identifiers—Participative Management

We are better prepared today to deal with the problems in library administration, because we not only have the basic work of management theorists, but also staffs who are better educated and more interested in participation. During the last 25 years, there have been two strands in library administration. The older, human relations approach allowed individuals to work in productive cooperation. The scientific approach of the fifties and sixties, on the other hand, emphasized rigid measurement, machines, and statistics. However, the latter approach came to libraries at a time when the management field in general was moving back to the humanistic methods of Douglas McGregor and the motivational psychologists. The newer theories make a major contribution to library administration and provide a framework for considering the complexity of forces which are having an impact on administration of all kinds; the thrust toward greater democratization and the historical tendency of Americans to want strong, even authoritarian, managers. The magic of administration comes in reconciling these contradictory trends through a careful analysis of the needs of one's institution and the leadership styles appropriate to meet them. An Analysis of Job Satisfaction Among Public, College or University, and Special Librarians.

Pub Date Aug 75

Note—86p.; Ph.D. Dissertation, North Texas State University

**EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage**

Descriptors—\*Analysis of Variance, College Libraries, Doctoral Theses, Job Analysis, \*Job Satisfaction, \*Librarians, Library Research, Literature Reviews, \*Organization Size (Groups), Public Libraries, Questionnaires, \*Sex Differences, Special Libraries, Tables (Data), University Libraries

Identifiers—\*Job Descriptive Index

Usable data relating to six elements of job satisfaction: work, supervision, people, pay, promotion, and total satisfaction, were collected from 190 of a total sample of 310 librarians chosen by stratified random sampling techniques from library association membership lists. The librarians, both male and female, represented three types of libraries: public, college/university, and special. One purpose of the research was to determine the differences in job satisfaction between the three types of libraries. Additional questions concerned the variations in satisfaction, if any, attributable to sex and/or to size of the library staff and how librarians' scores compared with population norms on two scales of the data collection instrument, the Job Descriptive Index (JDI). JDI scores were tested by means of t-tests and analysis of variance. The conclusions drawn were that: (1) Job satisfaction is partially a function of type of library. (2) Special librarians evidence less job satisfaction due to restricted promotional opportunities and greater work stress. (3) Women are generally happier as librarians than men. (4) Librarians are generally more satisfied than other workers. (5) Staff size has little or no effect on job satisfaction. (Author/SL)

Identifiers—ALA 75

The past decade has given us an encouraging number of well-written and appealing children's books which give an authentic picture of the black people in the United States in dramatic text and brilliant illustrations. Indeed, in this period, a whole new sense of realism has come into children's literature which portrays urgent social issues and attacks racial and sexual stereotypes. It is impossible, however, to gauge the exact extent of these trends, since no complete study of children's book publishing has been conducted since 1965. Despite the efforts of many groups, it may be that this flow of newly published interracial books is slowing down. This is one problem, but a more serious one is the apathy with which teachers and, in some cases, librarians treat this whole issue. Many seem to feel that interracial books are only for black children, and they often display an almost total lack of critical sense in recognizing gross stereotypes. Even those teachers who wish to use these books may face constraints from administrators or the community. The greatest issue in the decade ahead is not getting more interracial books from the publishers—important as that is—but convincing all school staff and parents to bring these books to the children. Identifiers—\*Book Selection Aids

A study was made of the book selection procedures and collections in the area of fourth grade science (astronomy and earth science) in 12 elementary schools in two Southwestern school districts. The six schools in District 2 utilized a local buying list in their acquisitions, those in District 1 did not. The hypothesis to be tested was that as selection procedures for elementary school libraries become less centralized and standardized, that is, not under the control of a local buying list, the quality of the collections improves because school librarians and teachers are more actively involved in selection. Through visits to the schools, data were collected using questionnaires and structured interviews with teachers and librarians, socioeconomic and reading achievement data from school records, a comparison of the school's science collection with a standardized list, and acquisition records for the past five years. Results indicated that teachers were not deeply involved in the selection process. The local buying list and exhibits seemed to create more interest in selection. Despite different selection procedures, the science collections in District 1 and District 2 were not appreciably different. (Author/SL)

Book Storage in Academic Libraries. A Report Submitted to the Council on Library Resources.

Spons Agency—Council on Library Resources, Inc., Washington, D.C.

Pub Date 74

Note—20p.; Not available in hard copy due to marginal reproducibility of original document

EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.

Descriptors—Administrative Problems, Higher Education, Library Administration, \*Library Collections, Library Expenditures, \*Library Facilities, Library Planning, Library Surveys, Policy Formation, \*State of the Art Reviews, \*Storage, \*University Libraries

Identifiers—Weeding

A study was made to determine the present state of book storage in large North American academic libraries. A letter was sent to every academic library in the Association of Research Libraries (ARL) to inquire if they engaged in book storage. From the 35 which answered affirmatively, 15 were selected for visitation: the libraries of the universities: California at Berkeley, Chicago, Connecticut, Cornell, Harvard, Kansas, Michigan, Minnesota, Princeton, Purdue, Rice, Texas, Tulane, Wayne State, and Yale. Results indicated that book storage is viewed with distaste, because it inhibits free access to materials and because the costs of weeding, changing library records, and maintaining a storage facility mask its economic advantages. Two alternatives may be available: the conversion of library materials to a less bulky form or the reduction of individual collections through increased interlibrary cooperation. Although review of the policies and practices of the 15 libraries revealed no firm guidelines for book storage, general suggestions were made for the size, location, and design of a storage facility; record keeping; weeding policies; and retrieval for patrons. Simulation/Gaming in Teacher Education: An Annotated Bibliography of Selected Sources for Use in the Development of Teacher Training Programs.

Indiana Univ., Bloomington. School of Education. Center for Invention and Development.

Note—40p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Annotated Bibliographies, Classroom Materials, \*Educational Games, Higher Education, \*Simulation, \*Teacher Education, Teachers, \*Teaching Experience

Identifiers—Center for Invention and Development

The Center for Invention and Development has compiled an annotated bibliography which identifies sources and sets parameters in the use of games and simulation in the classroom. The introduction attempts to clarify the difference between simulation and gaming and the relative position of each in teacher education. There are 134 items which cover general references, six journals and newsletters, and 23 simulations and

games. Most items have been published or developed since 1960. The source of a large percentage of the references are documents from Resources in Education (RIE) and Current Index to Journals in Education (CIJE). (Author/DS)

Descriptors—Bibliographies, \*Communication Satellites, \*Delivery Systems, Educational Development, Educational Research, \*Educational Technology, Information Dissemination, Media Technology, Research Reviews (Publications), Telecommunication

Research is summarized in a brief final report built around a four-section bibliography. The first section lists periodic progress reports and articles which provide an overview of the program, including articles which pertain primarily to educational rather than technical aspects of satellite utilization. These carried out in the fields of electrical engineering, computer science, economics, and technology and human affairs comprise the second section, while the third part lists chronologically the CDT memoranda released in connection with the grant program. The final section contains technical articles. (SK)

Identifiers—Alaska, Appalachia, ATS 6, Pacific Northwest, Rocky Mountain Region

Continuing professional education for teachers, doctors, lawyers, and engineers is examined in terms of its potential for large-scale electronic technology. For each profession, a profile is provided, and current continuing education programs and use of electronics in each field are described. These include satellite projects, in-house and closed circuit television, telecommunication, and computer networks and data bases for research. The findings indicate that the use of electronic technology in professional continuing education will be continued, and probably expanded. (SK/LS)

\*Facility Planning, Information Systems, Microwave Relay Systems, Networks, Radio Technology, Telecommunication, Telephone Communication Systems  
**Identifiers—\*Plato IV**

Alternative communication networks for the dissemination of PLATO IV computer aided instruction were designed and comparative cost estimates were made for leased telephone lines, satellite communications, UHF TV, and low-power microwave radio. Costs per student contact hour were computed on the basis of student population density in public schools for a given market area. Analysis indicated that radio distribution techniques were cost optimum over a wide range of conditions. (Author/SK)

**Descriptors—Computer Assisted Instruction, \*Computer Programs, Curriculum Design, Program Descriptions, \*Programming Languages**

**Identifiers—CAL Programing Languages, Canada, \*NATAL 74**

NATAL-74 is a programming language designed for Canadian computer aided learning (CAL) programs. The language has two fundamental elements: the UNIT provides the interface between the student and the subject matter, and the PROCEDURE element embodies teaching strategy. Desirable features of several programming languages have been adapted to cope with a wide range of display equipment. A variety of computational capabilities, including a calculator mode, provide flexibility in use and response processing. A major goal of NATAL-74 is to provide an effective means to exchange courseware programs. The implementation phase has initially used the DEC-10 computer, but is working toward a high level of machine independence. Cooperation and continuing dialog between CAL users, vendors and researchers is necessary to achieve a meaningful standard for a CAL Language. (CH)

**Identifiers—\*Revision Processes**

Methods of tryout and revision in development of instructional materials are identified and explained. Both "front-end" and "rear-end" analyses are included. Ways of anticipating potential student failures—identified as test failures, program task failures and learning failures—are discussed, with specific areas of possible breakdown illustrated. Likewise, the characteristics of inadequately designed individual program tasks, transitions between tasks, and cumulative learning experiences are delineated. Tools used in post-development diagnosis are described, and illustrations are given of diagnostic results which can be linked to specific student learning failures and specific program design failures. Revision techniques are listed for each variety of failure, along with priorities for implementation which can make the process efficient as well as effective. (SK)

**Identifiers—\*Behavior Observation Systems**

A self-instructional book covers ten steps toward development of a behavior observation system. Units describe how to interpret graphs, convert information from table to graph form, plot collected data into a table, compute the reliability of observational data, make observations with four recording methods, construct an observational system, choose the proper recording method, develop a complete observational system, make an operational definition of a behavior, and develop a complete observational system including the behavior. The four recording methods of interval, instantaneous time sampling, duration and tally method are explained, with instructions of how to determine when to use each. A reading list is appended, along with a pre- and posttest questionnaire. (SK)

**Identifiers—Ball State University, Center for Radio and Television, \*Indiana Broadcasters Association**

A survey was conducted of 70 Indiana radio and television station managers and 250 college-educated employees of their choosing to assess views on quality of academic programs in radio and television. Questionnaires were distributed and personal visits made to more than 50 stations. Questions and responses were grouped under three headings: Part I covers personal data on respondents, including years and range of experience, beginning salary, college majors and minors, age at which management status was at-

tained and a personal choice of "favorite" position. Part 2 deals with opinions and attitudes about college-educated employees, characteristics of radio-TV staff, how employees are recruited and replaced, and recommendations for curriculum content and for improving graduates of academic programs. Part 3 summarizes questionnaire response, including apparent influence on careers of college education, specific broadcast courses, college placement services, radio-TV departments and professors and college broadcast facilities. Respondents were also asked to rank the emphasis placed on critical areas by their college programs, and to suggest different emphasis based on their experience. (SK)

**Identifiers—\*Design Option Decision Trees**

To assist the human factor psychologist in predicting the human resources requirements based on the introduction of a new technology, a study was conducted to locate and apply an existing method, or to develop a new procedure for quantifying the effects of incoming technology. Five steps were taken: search and critical analysis of recent literature; development of Design Option Decision Trees (DODT) describing two Air Force systems; synthesis of existing techniques to develop a procedure; and evaluation of the procedure's feasibility. A methodological procedure integrating the DODT with a modification of the method of summated ratings was developed as a feasible approach for measuring the effects of advances of technology. (SK)

**Identifiers**—Affective Triad Scale, Elementary Secondary Education Act Title III, ESEA Title III, Individualized Instruction Scale

The effect of individualized instruction programs on academic achievement and selected school related attitudes of elementary school children was studied. It was hypothesized that students in individualized programs would have significantly higher achievement scores, more positive attitudes toward school and self, greater self-direction, and assume greater responsibility than their peers in other programs. The findings were: (1) significant differences were not found in achievement scores that could be attributed to different levels of individualization; (2) students in the individualized groups had significantly higher self-direction scores; (3) students with higher measured IQ scores had more positive attitudes toward school and self; and (4) responsibility for academic achievement for the fourth grade sample seemed to be more a function of intelligence than any other single factor. The Individualized Instruction Scale and Affective Triad Scale is appended. (Author)

**Identifiers**—Program Implementation, \*QUERY

An on-line information system was designed and implemented in an elementary school using a time-sharing DEC-15 computer system to facilitate the management of individualized instruction. The system stores students' background information, test data, and instructional tasks. Teachers and researchers were able to retrieve desired data using either the standardized reports or the flexible QUERY program. The paper emphasizes how the data base structure contributes to retrieval speed and output format flexibility, and how the organization of the system facilitates data base updating and student data utilization for monitoring student programs. **Descriptors**—\*College Faculty, Information Needs, Library Research, Library Surveys, Masters Theses, Professors, Questionnaires, \*Reference Books, Speech, State Universities, Theater Arts, \*University Libraries, \*Use Studies

**Identifiers**—Current Awareness

A questionnaire designed to investigate faculty use and awareness of current reference works was administered to the Department of Speech at Ball State University, Muncie, Indiana. The first part was a checklist of older, established, or on-going reference works in the areas of speech, speech pathology, audiology, and theater. The second part asked the faculty members (1) to indicate their use and knowledge of listed current reference works, and (2) to answer questions about their needs, attitudes, and habits in regard to current reference materials. Results indicated that a considerable portion of reference literature has escaped the attention and use of the faculty members, that the faculty tended to use older, better known materials, and that the reason for low use of recent materials was a lack of knowledge that they existed. The situation could be improved if librarians would make greater efforts to provide faculty with information about new reference books. (LS)

Library Equipment, Library Facilities, Library Materials, Library Services, Library Standards, Microforms, Open Education, Personnel

A study of the learning resources programs of public two year colleges provides a history and overview of the community college itself, followed by discussions of specific aspects of the library or learning resource center. These discussions cover personnel, administrative organization, technical services, materials and equipment, microforms, user services, cooperation and inter-library loans, services to those outside the college, standards and guidelines, and facility planning. There is also a chapter which considers the impact of new developments, such as the library college, open education, and educational techniques using the new media and computers. Several sample organization charts and floor plans are provided. (LS)

Descriptors—Cataloging, \*Catalogs, Computers, Cost Effectiveness, Data Processing, Feasibility Studies, \*Information Storage, Library Automation, Library Technical Processes, \*On Line Systems, University Libraries  
Identifiers—\*Machine Readable Cataloging, MARC II, Minicomputers, Minnesota (Twin Cities), University of Minnesota

A discussion of alternatives and costs for building monographic bibliographic files for an on-line management system using minicomputers at the University of Minnesota Libraries, Twin Cities Campus, considers secondary and primary sources of MARC II records, including BLACKWELL-North America, Information Dynamics Corporation BIBNET and Ohio College Library Center as potential sources of both retrospective and current MARC II records. Methods of partial retrospective conversion and the cost of using other bibliographic files in machine readable form are also examined. In-house conversion costs for an on-line minicomputer system are presented as derived on the system installed in the University's Bio-Medical Library. The findings presented indicate that (1) building and storing at least a partial MARC II file on-line, with the remainder on removable disc packs, would cost less than telecommunication from other sources, and (2) in-house retrospective conversion directly from catalog cards using the on-line minicomputer system would be less costly than using outside sources. **Planning and Producing Audiovisual Materials.**  
Third Edition.

Pub Date 75  
Note—320p.  
Available from—Thomas Y. Crowell, 666 Fifth Avenue, New York, New York 10019 (\$11.50)

Document Not Available from EDRS

Descriptors—Audiovisual Aids, \*Audiovisual Instruction, Curriculum Planning, Educational Planning, \*Educational Technology, Film Production, \*Instructional Design, Instructional Materials, \*Instructional Media, \*Manuals, Material Development, Multimedia Instruction, Phototape Recordings, Production Techniques, Study Guides, Television

A revised edition of this handbook provides illustrated, step-by-step explanations of how to plan and produce audiovisual materials. Included are sections on the fundamental skills—photography, graphics and recording sound—followed by individual sections on photographic print series, slide series, filmstrips, tape recordings, overhead transparencies, motion pictures, television and display materials, and multi image/multi media. An introductory section provides background and theory and summarizes research in audiovisual design. Step-by-step methods of planning and scheduling also are covered. (SK)

To explore the problem of designing an automated system for instruction in programming, and to study the problem-solving behavior of students, computer programs written by 40 college students as part of a CAI course in Algebraic Interpretive Dialogue were analyzed. The self-contained course consisted of 50 tutorial lessons; the analysis covers programs written as solutions to 25 programming problems, including 747 problems containing 7,063 commands. The distribution of data over problems and over students is discussed, along with problem difficulty and diversity of student solutions. (Author/SK)

Descriptors—Academic Achievement, \*Economically Disadvantaged, Educational Assessment, Educational Research, \*Educational Television, \*Evaluation, Parent Child Relationship, \*Parent Influence, Parent Participation, \*Preschool Children, Preschool Education, Preschool Learning, Preschool Programs, Testing

Identifiers—Educational Testing Service, \*Sesame Street

On the basis of a reevaluation of earlier data, doubts are raised about how much economically-disadvantaged children have learned from the educational television series, Sesame Street, and whether the program is widening the gap that separates the academic achievement of disadvantaged pre-schoolers from that of their more affluent counterparts. Included were analyses of the Educational Testing Service research on six-months' viewing of Sesame Street, and studies conducted by Louis Harris, Daniel Yankelovich and others. Indications were that learning increased as a result of viewing when an active encouragement-to-view campaign was conducted, but that gains could not be shown without the campaign; that disadvantaged parents tended to read less to habitual viewers; and that viewing was positively correlated with indices of parental income and education. Acknowledging that the research used was not specifically designed to compare learning gains or possible achievements, the authors recommend that research be commissioned directly to explore those points. Library Services, \*Media Specialists, Multimedia Instruction, \*School Libraries, Speeches, Teaching Methods

A media program should be developed and integrated into the curriculum at the same rate as print material. Because media are a useful educational aid and should be an extension of the curriculum, the instructional specialist of the future will be a media specialist who can coordinate curriculum and media and also design instructional methods tailored to the student. If the school media center is to fulfill its future goal, all forms of media should effectively merge with the curriculum and the instructional system for the benefit of the learner. Future learning centers should be designed for the retrieval of materials rather than storage, and for the convenience of the patron rather than the staff. Provision for student self expression in production of media materials will be a facet of the future media center. (DS)

Identifiers—Japan

This document contains twelve reports which were presented at the Seminar on Training Policies for Computer Manpower and Users held in Paris, May 1973. The seminar was sponsored by the Computer Utilization Group of the new Organization for Economic Co-operation and Development (OECD). Reports were submitted on the following topics: characteristics and general trends in informatics, the quality of future computer specialists' education, responsibility for training in information processing, training for management, philosophy and contents of training for computing, computer science in secondary education, costs and technical facilities for training, career profiles in EDP, recurrent and permanent education and training, impact on social structures of computer science training in education systems and a demand forecast survey of information processing engineers in Japan. A statement of conclusion and recommendation concerning training policies was drafted in early 1974 by experts in the field and is included, in this document. An appendix lists names and addresses of delegates, experts, and observers attending the seminar. (CH)

Identifiers—Aptitude Treatment Interaction, Instructional Variables, Model Learning, Practice, Rule Learning

The final report of this study describes the objectives and plan of attack used for determining how novice students learn to interact with a computer and how instruction can result in meaningful learning. Changes to the original plans and significant outcomes are mentioned. The final report concludes with abstracts of research findings on the effects of models, the effects of practice questions and aptitude effects of program

representations, and effects of computational vs. meaningful practice in programed instruction. A list of papers published and delivered under this study is provided. "Instructional Variables in Meaningful Learning of Computer Programming," a paper from the study, is appended to the final report. Additional appendixes contains the text of the model and rule booklets, typical practice and test questions and a pretest used in the study. (CH)

Descriptors—\*Graduate Students, Higher Education, Information Dissemination, \*Information Needs, \*Library Collections, Library Instruction, Library Materials, Library Programs, \*Library Reference Services, Speeches, \*University Libraries

Identifiers—ALA 75

Because of the emphasis placed upon selection of materials for the undergraduate in the last two decades, the library needs of graduate students have not been given adequate attention. Due to research and specialized methods of teaching, graduate students search for a broad range of material instead of using reading lists and course reserves. In the future, a lack of funds will require that libraries cooperate and seek additional methods to provide the graduate student with information and instruction in the use of the library. Automated information systems, media programs, the publication of library guides, and bibliographic instruction could be added to traditional library services for the benefit of graduate students. Identifiers—Computer Managed Instruction, \*Wisconsin System for Instructional Management, WIS SIM

For the benefit of administrators and instructors, individualized instruction and the role of computers in managing it are outlined. Structural components of individualized instructional programs are identified, and the process of individualized instruction is described. A review of major computer-managed instructional (CMI) systems is provided, with the findings of the systems summarized. The Wisconsin System for Instructional Management (WIS-SIM) Model is then described in detail, including the instructional cycle, the use of individual student records, testing and test scoring, performance profiling, specifying performance expectations, diagnosing and identifying instructional needs, guiding the instructional process, and selecting appropriate educational experiences and settings. Identifiers—\*Pennsylvania State University

The nine-year history of the Computer Assisted Instruction Laboratory, College of Education, Pennsylvania State University, is traced. Some 30 projects in curriculum development in teacher education, public school classes, and adult vocational education are described, along with several advances in computer-assisted instruction (CAI). Interinstitution, intra-college, and intra-university cooperative efforts are defined. The laboratory's resources are detailed in terms of financial support, space, and staff. Some of the major issues facing the laboratory are briefly discussed, including the use of CAI in college instruction, sources of financial support, basic vs. applied research, and hardware systems development. Appendixes contain a chart which summarizes the Laboratory's CAI programs; a list of refereed publications by staff members; bibliographies of laboratory publications, applied research studies, and dissertations; a list of faculty participants; and the vitae of the principal investigators. Impact of Computer-Based Instruction on Attitudes of Students and Instructors: A Review. Final Report.

Air Force Human Resources Lab., Brooks AFB, Texas.

Report No—AFHRL-TR-75-4

Pub Date May 75

Note—33p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—Attitudes, \*Computer Assisted Instruction, \*Computer Oriented Programs, Educational Assessment, Educational Technology, \*Humanization, Instructional Design, \*Literature Reviews, Management Information Systems, Psychological Needs, Student Attitudes, \*Student Teacher Relationship, Teacher Attitudes

To determine whether contact with computer-assisted instruction (CAI) leads to feelings of "depersonalization" and "dehumanization" a review was conducted of investigations to explore attitudes toward various modes of computer-based instruction before, during, or after exposure. Evaluation of pertinent factors which influenced attitudes was made through assessment of relevant literature and personal communication with experts associated with CAI projects. Results of studies are compared in table form and recommendations made for future acceptance and implementation of computer-based systems. It is concluded that computer-based instruction is not a threat to humanization, and that it can provide opportunities for increasing effectiveness and personalization of the instructor-student relationship. Descriptors—\*Administrative Organization, Budgets, Cost Effectiveness, Financial Support, Library Automation, Library Cooperation, \*Library Networks, Library Planning, \*Library Services, Objectives, Program Development, \*Program Proposals, \*Regional Cooperation, Regional Libraries, Telecommunication

Identifiers—MIDLNET, \*Midwest Regional Library Network, Multitype Library Networks

A new organization is proposed that will serve as a regional library network for the midwestern United States: the Midwest Regional Library Network (MIDLNET). MIDLNET must meet four requirements in order to assure its success: it must meet the needs of the major academic research libraries in the area, it should be a limited sponsor network, it must allow administrative and decision-making roles to the states involved, and it must have an organizational structure that will not restrict potential services or ac-

tivities. Conceived as a non-profit corporation run by a board of directors, the organization's five major objectives will be to: (1) reduce per-unit costs of library operations and services, especially through computer applications; (2) provide rapid and efficient delivery to library users; (3) coordinate and improve library planning and research in the Midwest; (4) provide a vehicle for area participation in federal funding for regional network development; and (5) coordinate a materials preservation program. After its initial three years, MIDLNET's funding will come from user fees and federal aid. (Author/SL)

Descriptors—\*Communications, Curriculum Design, \*Curriculum Planning, Developing Nations, Educational Television, Instructional Design, International Organizations, \*Job Training, \*Mass Media, Objectives, State of the Art Reviews, \*Training Objectives, Training Techniques

Identifiers—Learning Activity Packages, Modular Approach, UNESCO

Based on papers and discussions of training experts at the UNESCO Seminar on Instructional Training Techniques for Broadcasters held in Kuala Lumpur, Malaysia in June, 1973, this report surveys in general terms the present situation of communications training, pinpoints deficiencies, and identifies potential trends. This is followed by other reports dealing more specifically with such topics as training methodology, curricula, and surveys of training materials and resources. Emphasis is placed on the modular approach to instruction, in which the course is composed of clearly defined learning modules presented in a standard format of objectives, content, methods, and evaluation. A sample learning module on monochrome television pictures is provided, along with a list of educational television (ETV) training modules. To provide more standardization between nations, an action program is proposed to coordinate the efforts of international, bilateral, and private organizations. (Author/SL)

A Study of the Influences of Outside Interests, Other Mass Media, Grade Level and Sex on Children's Television Viewing and Program Preferences.

Indiana Univ., South Bend.

Pub Date 14 Jul 75

Note—122p.

**EDRS Price MF-\$0.76 HC-\$5.70 Plus Postage**

Descriptors—Age, Broadcast Television, \*Children, Cocurricular Activities, Commercial Television, Elementary School Students, \*Mass Media, Programing (Broadcast), Sex Differences, Statistical Data, Tables (Data),

\*Television, \*Television Research, \*Television Viewing

This study explores the influence that grade level, sex, mass media, and other outside interests have on the television viewing habits of children. Differences in the amount of viewing, program preference, type of program preferred, and typical daily patterns of viewing were items investigated. A questionnaire was used to survey general information, and a program recall list was used to determine the patterns of viewing. The children were grouped by grade level and questioned over a one-week period. The study revealed that children use television as a "time filler" but a majority have a special program in mind that they wish to watch. The average child views approximately 3.7 hours of television per day; boys tend to view television more than girls. Nine statistical tables show viewing categories and favorite programs by grade level. The questionnaire and program recall list and their results categorized by grade level are appended. (Author/DS)

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—\*Consortia, Cost Effectiveness, \*Curriculum Development, Educational Planning, Elementary Secondary Education, \*Individualized Instruction, Instructional Design, Statewide Planning

Identifiers—Learning Activity Packets

Based on the final two years' developmental effort of the Colorado Individualized Instruction Consortium Project (CIICP), a series of recommendations are made dealing with future curriculum development. Three main goals of CIICP are delineated: develop Learning Activity Packets (LAP), design multimedia for each LAP training instructor to use in individualized instruction, and design a performance based flexible curriculum to be used as a master plan by the Colorado State Board. Four questions about individualized instruction also are discussed: Will individualized instruction work? What will be the cost of a statewide system? How much time would be required for development? What would be the best way to implement such a system? The original goals of the project also are defined. Two background papers on the LAP system are appended. (SK)

Piaget, Super 8mm, and Preschool Development.

Pub Date 11 May 75

Note—7p.; Paper presented at the Conference on Visual Literacy (Portland, Oregon, May 7-11, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—Child Development, \*Cognitive Processes, \*Early Childhood, \*Films, Instructional Materials, Instructional Media, Perception, Speeches, Visual Literacy

Identifiers—\*Piaget (Jean)

According to the theory of Piaget, until the age of two the chief developmental factor of a child is the permanence of an object or the ability to retain mental images. Between two and six he begins to use mental images, and as he develops the ability to retain a mental image he begins to imitate things from the past which he has seen or experienced. At this point, the 8mm motion picture film could be used to assist children in moving from sensorimotor reactions to deferred imitation preparatory to the process of learning. Films of themselves would present an image which is abstract, and in order to solve this contradiction children would proceed to a higher level of thinking. Such films may provide a basis for helping children develop language concepts, understand processes, organize experience, classify objects, and improve visual literacy. (Author/DS)

Descriptors—Bibliographies, \*Computer Assisted Instruction, Cost Effectiveness, \*Evaluation, Facility Case Studies, Glossaries, Higher Education, Interviews, Operations Research, Questionnaires, Student Attitudes, Teacher Attitudes, \*University Libraries, Use Studies

A study was conducted for the purpose of clarifying decision alternatives concerning computer-assisted instruction (CAI) in the Merrill Library at Utah State University. The main research questions were: (1) To what extent is the CAI system in use at present? (2) What factors have encouraged or hindered CAI usage? (3) How do people feel about the system? (4) What alternative approaches are available and how feasible are they? To obtain answers to these questions a series of four questionnaires were used to poll students, library staff, faculty users, and prospective users. With the exception of a portion of the library staff, feelings expressed about the CAI system were generally positive. Negative feelings encountered were due to mechanical difficulties. The interview sessions are summarized; the results of a cost-effectiveness study are presented; and recommendations are made for future CAI use at Merrill Library. It is concluded that the CAI system appears to have considerable support from users and is in a position--through anticipated expansion of terminal usage--to demonstrate a level of operation that is more cost-efficient than has previously been the case. A simplified glossary for CAI, a brief bibliography, and the questionnaires used in the study conclude the report. (Author/KKC)

ment, \*Program Evaluation, Program Planning, Question Answer Interviews, Released Time, Resource Centers, State Universities, Teacher Attitudes

Identifiers—Instructional Development, Minigrants, Utah State University

An on-going evaluation is being made of Utah State University's instructional development endeavor; this paper has emerged from a question answer interview with the Director of the program by an external evaluator. The Director describes the Instructional Development Program which is designed to improve the teaching/learning process by developing in professors an interest in learning theory, team teaching, computer-assisted instruction, simulations, seminars, the lecture, and self-paced instruction. The model chosen for implementing the instructional improvement program consists of three stages: (1) awareness level, for which the literature on instructional renewal was surveyed and pertinent information sent to the professor; (2) initiative level, for which minigrants were awarded to professors who wanted to develop a new teaching strategy; and (3) the instructional development level where participating faculty members are released full time for one quarter to work on a project of their own choosing. The Director concludes that the model has enjoyed modest success, that they are in the process of modifying it, and that they are pleased that it is making some contribution toward improving teaching and learning at a small university. Identifiers—Instructional Development, Minigrants, Utah State University

The 1974-75 school year marked the fifth year of operation for the Division of Instructional Development at Utah State University. The model for Instructional Development (ID) consists of four parts: (1) developing faculty awareness; (2) capitalizing on faculty initiative, primarily through small-scale funding under a program of minigrants; (3) conducting faculty support activities where participating faculty members are released full-time for one quarter to work intensively on a project of their own choosing; and (4) working with an entire department to revise particularly important steps in the curriculum for its graduates. Through a series of survey techniques and interviews, this study gathers data about the program as perceived by faculty members. The conclusions are that there is considerable awareness of the ID programs across campus; that ID should not move entirely from individual-centered to department-centered activities; and that the program is generally held in high regard by USU faculty. One-third of the document consists of instruments used in the survey and responses of participants. (Author/KKC)

Prediction of Resource Needs: A Model Budget Formula for Upper Division University Libraries.

Pub Date 75

Note—111p.; Ph.D. Dissertation, Nova University

EDRS Price MF-\$0.76 HC-\$5.70 Plus Postage

Descriptors—\*Budgeting, Budgets, Doctoral Theses, Educational Finance, \*Library Expenditures, Library Research, \*Models, Program Budgeting, Resource Allocations, \*University Libraries, \*Upper Division Colleges

Identifiers—\*Formula Budgeting

A study focused on library formula budgeting practices with a special concern for the typical upper division university functioning in a state system of higher education. The basic objectives of this research project were to develop a model

budget for upper division university libraries and to demonstrate the use of formulas in predicting the anticipated resources necessary to operate and maintain upper division university libraries (UDUL). Existing formulas were examined and evaluated. These, together with the UDUL models, were field tested in application at ten upper division institutions. The UDUL formulas were evaluated by a panel of experts and, finally, conclusions and recommendations were drawn concerning the feasibility and utilization value of a formula designed for upper division university libraries. The scope of the study was limited to formula budgeting. The UDUL formulas developed cover all major budget categories commonly found in academic libraries, i.e., salaries, materials, and expense. A physical facility formula was excluded, since it is not typically part of an annual operating budget. (Author/SL)

Identifiers—AAEC, \*Appalachian Adult Education Center

As part of a series on library services to disadvantaged adults, this pamphlet provides guidelines for the use of community advisory committees in libraries: the duties and capabilities of such committees, their influence on the library, and their relationships with library boards. The size and composition of the committee are considered, as are four alternatives for the selection of members: election by the community, or appointment by the librarian, by organizations, or by public officials. In the final section, steps are outlined for writing policy, training members, and beginning the work of the advisory committee. A brief reading list is appended. (SL)

Identifiers—AAEC, \*Appalachian Adult Education Center

This report for fiscal year 1974-75 covers the second year activities of three demonstrations in Georgia, Ohio, and Tennessee, of the interrelating of public library and basic education services for disadvantaged adults. It also covers the dissemination of these demonstrations through the training-institutes series in those three states and in Kentucky and Mississippi. The body of this report is divided into several parts: (1) a brief chronology of the experiences of the Appalachian Adult Education Center (AAEC) which resulted in the library series of the past three years; (2) a theoretical overview and literature review on the nature of information seeking/finding as it pertains to public library services to disadvantaged adults; (3) an overview of the demonstration projects and the 31 communities participating in the

dissemination-institute series; and (4) the results of the one-year followup evaluation of the 32 1973-74 dissemination institute sites. Appendixes include work statements, end-of-the-year reports, products, and compilations of the participants' evaluations of the two-day planning sessions by site. (Author/SL)

The Radio Mathematics Project was funded by the Agency for International Development to design, implement, and evaluate, in conjunction with personnel of a developing country, a system for teaching primary-grade mathematics by radio. In July 1974, a project in Nicaragua began with a series of radio presentations, each followed by 20 minutes of teacher-directed activities. No textbooks were used; a worksheet was followed during the broadcast and oral and physical responses were given. Songs and games were included in the programs for a change of pace, but unembellished mathematical work also kept the children's attention. Provisions were also made for initial and continuing teacher training, testing and evaluation, and revision of the program. (DS/LS)

**Identifiers—**Computer Assisted Patient Simulation

A set of computer programs and data files have been designed to provide a simulated experience with patient-diagnosis problems for medical students. The programs, called CAPS (Computer Assisted Patient Simulation), aims to provide opportunities for making diagnoses and decisions; develop problem-solving skills; expand knowledge of specific disease entities and hospital resources useful in differentiating between them; teach cost-effective utilization of a pathology laboratory. The design of student interaction and the program and file structure are explained in detail, and a comparison made with the CASE system. In trials with 175 students, it was concluded that the system was a feasible approach to helping students in gathering and analyzing pertinent information, consulting supplementary materials to gain further knowledge, and arriving at a definite diagnosis and treatment plan. Study results and design for an Educational Technology Assessment Model (ETAM) are outlined, and conclusions and recommendations of the study are summarized. An eight-task procedure is provided to guide the assessor of a training innovation through the required data collection and analysis steps leading to a decision to accept, reject, or continue to study the innovation. Step-by-step application of the ETAM procedures also is given. Proposed portions of the ETAM amenable to computerization are identified, and validation results are given. A review of relevant literature is included. (SK)

**Response Requirement and Information About Correct Responses in Programmed Instruction. Linking Studies in Education No. 5.**

Linkoping Univ. (Sweden). Dept. of Education.

Pub Date 75

Note—231p.; Research Department Dissertations No. 5

**EDRS Price MF-\$0.76 HC-\$12.05 Plus Postage**

**Descriptors—**Covert Response, Educational Research, Elementary Education, \*Feedback, Intermode Differences, Language Instruction, \*Learning Processes, Overt Response, Patterned Responses, \*Programed Instruction, \*Response Mode, Scoring, Teaching Methods, \*Testing

**Identifiers—**Linkoping University, Skinner (B F), Skinnerian Programed Instruction, \*Sweden

To test some aspects of Skinnerian programed instruction, a 241-frame program on Swedish grammar was presented to students 10 to 12 years old. Skinnerian insistence on student-constructed overt responses and on presenting the "key answer" after each frame were contrasted with covert responses and key answer frequencies less than 100 percent. The effects of combinations of overt or covert response requirements and 100, 50 or 0 percent key answers were also studied. It was concluded that in programs of less than 100 frames, response requirement and key answer frequency have very little influence on learning; that in programs over 200 frames, overt response without key answers or covert response leads to better learning. Overt response is most

effective when the program demands learning unfamiliar response terms. Covert response leads to considerably shorter working time and greater learning efficiency. The Skinnerian model is held not superior to other alternatives studied. (SK)

**Descriptors**—\*Decision Making, \*Educational Accountability, Educational Administration, Educational Planning, \*Educational Policy, Evaluation, Library Planning, Policy Formation, \*Political Issues, Political Power, \*School Libraries

**Identifiers**—ALA 75

Politics of evaluation and accountability are not practiced solely by evaluators and accountants; everyone does it. This is because evaluation and accountability are fraught with decision situations which embody the potential to become political. Among sources of conflict in evaluation and accountability are questions of goals and priorities, economic matters, perceptions of evaluation and accountability by outsiders. Evaluation is also threatening to many school administrators and teachers; thus external evaluators have been employed by many groups wishing to evaluate school programs. The implications for the school media center focus on resources and policy-making, with an informal evaluation of the school library every time a budget is allocated. Librarians must become knowledgeable in the techniques of evaluation in order to provide policymakers with needed information, but must also learn how to apply these techniques in politically sensitive environments. **Descriptors**—\*Algorithms, Computer Oriented Programs, \*Library Automation, Library Research, Library Technical Processes, Program Descriptions, \*Serials

**Identifiers**—\*Serials Claiming

Heretofore, methods of claiming missing issues of serials publications have been ad hoc. The study describes four methods of claiming and analyzes the performance of three of the methods on 16 arrival patterns of serials. The arrival patterns, selected as workable examples from a random sample of the Kardex files at the University

of Utah, were graphed against a statistically-based claiming algorithm and two algorithms based on the arrival frequency plus a lag factor. The statistically-based algorithm produced more false claims and usually claimed issues sooner than the algorithm based on the lag factor. The statistically-based algorithm worked best with the medium frequency (monthly, quarterly, etc.) serials and the lag factor algorithm appeared to work best with the long- and short-frequency (annuals, weekly, etc.) serials. A library user's handbook for college students and teachers provides an annotated bibliography of reference works. Introductory chapters provide information about the library, the structure of the book, library catalogs, classification systems, and writing research papers. There are chapters containing annotated bibliographies of encyclopedias, dictionaries, periodicals, periodical and general indexes, bibliographies and booklists, along with general descriptions of the kinds of information to be found in each type of reference work. Subsequent chapters describe and list special reference books in the arts, geography, archeology, history, social sciences, literature, science, mythology, religion, and philosophy. There is also a chapter describing non-book and media materials available in the library. Lists of research handbooks, bibliographic manuals, indexes to theses and dissertations, specialized subject bibliographies, and books and articles about reference books are appended. (LS)

**Descriptors**—Guides, Higher Education, \*Independent Study, Indexes (Locators), Librarians, \*Library Education, \*Library Instruction, Library Materials, Library Reference Services, Library Research, Library Schools, \*Library Science, Teaching Methods

In a study conducted to compare the results of two methods of instruction for the use of periodical, book, and newspaper indexes, the traditional lecture approach and self-study guide were investigated. Two library science classes were divided into two groups, and then divided further according to sex and class status. A self-study guide was formulated, for one group while the other group received the traditional lectures. A posttest was administered to both groups twelve days after formal instruction began, and the results were measured by a statistical analysis of variance test. The results verified the null hypothesis that no difference existed between the two groups; therefore, the lecture and self-study methods could be interchanged for instruction in the use of indexes. A table of estimated means and an analysis of variance table are included. The self-study guide for the project is appended. (Author/DS)

The September 1975 issue of Illinois Libraries focuses on the needs of the developmentally disabled, physically handicapped, and emotionally disturbed. Articles on library services to the blind and physically handicapped cover standards, services of local public libraries, Library of Congress programs, braille books and sound recordings, multistate and regional centers and networks, radio newspaper reading, and the history of such services. Discussions on services to the deaf and older adults with impaired hearing include the use of sign language by librarians, sign language story hours and television programs, special materials, and teletype reference service. For services to the mentally ill, descriptions are provided of outreach programs (using both print and media formats) to those in homes and institutions, operation of institutional libraries, public library services to the institutionalized, and bibliotherapy. Library services in resident facilities for the mentally retarded are also discussed, along with library services in county jails and the role of special services consultants. (DS/LS)

In December 1973, the Council on Library Development set up a task force to carry out an integrated study of library manpower and education needs in Wisconsin, and of the resources available to meet those needs. The study was concerned with personnel at all levels, in all types of libraries, media centers, information centers, and similar organizations. Three formal data-gathering processes were developed: a questionnaire to librarians on employment statistics and trends and attitudes toward preservice and continuing library education; a questionnaire for public library board members on their background and perceived education needs; and an interview schedule to use in on-site visits to library/media education programs. Factual data were gathered from a variety of sources for use in developing recommendations and forecasting trends in enrollment in library schools and in employment opportunities for librarians in the state. The task force made 16 recommendations on credentials, library school curriculum and program articulation, continuing education, and the training of library board members. Appendixes to this report provide lists of courses offered in the state's library schools and state legislation of certification requirements. (Author/SL)

**Computers and Education in the Soviet Union.**

Educational Technology Publications, Englewood Cliffs, N.J.

Pub Date 75

Note—145p.; Adapted from "The Application of the Computer in Soviet Education," Edited by A. I. Berg

Available from—Educational Technology Publications, 140 Sylvan Avenue, Englewood Cliffs, New Jersey (\$12.95)

**Document Not Available from EDRS**

**Descriptors**—\*Computer Assisted Instruction, \*Computer Oriented Programs, \*Computers, Conference Reports, Cybernetics, State of the Art Reviews, Teaching Machines

**Identifiers**—\*USSR

Recent decades in the Soviet Union have witnessed a prolific growth of technology. The school system has been under pressure to become more systematic and to supply more qualified candidates to meet the demand of industry. Computer technology has been introduced in order to facilitate more detailed attention to educational objectives. Individualized Programed instruction has been developed, and the system is designed to provide constant and immediate feedback to the student. The recent emphases of the development program have been: (1) the use of electronic computers for controlling the instructional process; (2) analysis of methods and algorithms for optimal instruction; (3) means of input and output for the computer during instruction; (4) construction of an adaptive training system; and (5) the use of computers to administer and organize the functioning of all levels of education. The next includes a collection of reports delivered at a conference held in the Soviet Union in 1968. (EMH)

**Library Service to Industry at USC: The Industrial Associates of the School of Engineering.**

University of Southern California, Los Angeles. School of Library Science.

Pub Date 27 May 75

Note—83p.

**EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage**

**Descriptors**—Industry, Interlibrary Loans, Librarians, Library Cooperation, \*Library Programs, Library Research, \*Library Services, \*Library Surveys, Questionnaires, School Industry Relationship, \*Special Libraries, Statistical Data, Tables (Data), \*University Libraries, Use Studies

**Identifiers**—California, Industrial Libraries, \*University of Southern California

Special libraries in Southern California and the San Francisco Bay Area who were members of the University of Southern California (USC) School of Engineering Industrial Associate program were surveyed on their use of the USC program and other similar programs. The questionnaire was designed to discover the attitudes and needs of the Industrial Associate members in California toward USC's library service. It was found that proximity to the parent university and the size of its collection were the prime determinants of special library use. A further analysis by size of special library staff showed that larger libraries tended to use USC's Industrial Associate Programs more than smaller libraries and also to be more aware of specialized information resources within their area. As a result of the survey recommendations were made concerning fee structures, financial support of the library, photoduplication, and communications among the Industrial Associates users, the Industrial Associates office, and the library. Appendixes include the questionnaire, tabulation of responses, USC Library Guidelines, a 41-item bibliography, and a copy of the Industrial Association Brochure. (Author/DS)

**Computer-Augmented Teacher Training.**

Pub Date Dec 74

Note—14p.; Paper presented at the Annual Meeting of the Association for Educational Data Systems (Virginia Beach, Virginia, April 29-May 2, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*College Curriculum, Computer Assisted Instruction, \*Computer Science Education, Mathematics Instruction, Program Descriptions, Programing, Student Teachers, \*Teacher Education, Teacher Education Curriculum, \*Teaching Methods, Teaching Techniques

**Identifiers**—\*Computer Augmented Teacher Training

Computer programing should not be confused with programed instruction (PI) or computer-assisted instruction (CAI). PI and CAI are processes that demand that the student assume a passive and docile role, whereas, programing is an active, dynamic process in which the student is required to instruct the computer how to perform certain basic operations. If the student is to give usable information to the computer, his deci-

sions, planning, and thinking must be perfectly organized; thus, computer programming provides an excellent opportunity for the teacher trainee to acquire cognitive competencies in mathematics, to develop confidence with teacher methods, and to become aware of the benefits and limitations of computer technology. In order to acquaint future teachers with programming as a pedagogical tool, the University of Massachusetts has introduced a course entitled, "Computer-augmented Teacher Training." Among the expected goals of the course are to give the prospective teacher: (1) a knowledge of computers; (2) knowledge of algorithms and processes; (3) a knowledge of the applications of computer technology; and (4) experience in computer usage. **Children's Access to Information in Print: An Analysis of the Vocabulary (Reading) Levels of the Subject Headings and Their Application to Children's Books.**

Pub Date Jan 75

Note—163p.; Ph.D. Dissertation, Rutgers University

EDRS Price MF-\$0.76 HC-\$8.24 Plus Postage

Descriptors—Cataloging, \*Childrens Literature, Comparative Analysis, Doctoral Theses, Elementary Secondary Education, Library Skills, \*Readability, \*Reading Level, \*Subject Index Terms

Identifiers—Library of Congress, MARC, Sears List of Subject Headings

Critical to the youthful user of the library is his comprehension of subject headings. This study undertook an investigation of two aspects of the subject headings for juvenile literature: first, an analysis of the vocabulary levels employed in the four systems of subject headings currently in use; second, a specific analysis of the Machine Readable Cataloging (MARC) system and a comparison of how its subject headings for 437 children's books compare with the readability levels for those texts. The four systems were found to be only slightly different. The Library of Congress system rated at grade level 7.7, the Sears system at 6.9, the MARC system at 6.4, and the Library of Congress-Juvenile system 6.0. The comparison between the MARC system subject headings and the readability level of the corresponding text revealed no relationship between the two. Combining these findings with data concerning the nationwide reading level, it was found that for children reading above the national norm, the subject catalog can provide access to 70 percent of juvenile reading material. Using nationwide comprehension scores, it was estimated that only 29 percent of children's reading material is accessible through the subject catalog. (EMH)

**Providing the Public with Online Access to Large Bibliographic Data Bases.**

Spons Agency—National Science Foundation, Washington, D.C. Office of Science Information Services.

Pub Date Aug 75

Note—8p.; Paper presented at USA-Japan Computer Conference (2nd)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Computer Programs, \*Cost Effectiveness, Data Bases, Information Centers, \*Information Retrieval, \*Library Reference Services, On Line Systems, \*Programming Languages, \*Public Libraries, Search Strategies, Speeches, Use Studies

Identifiers—DIALIB, DIALOG

DIALOG, an interactive, computer-based information retrieval language, consists of a series of computer programs designed to make use of direct access memory devices in order to provide the user with a rapid means of identifying records within a specific memory bank. Using the system, a library user can be provided access to sixteen distinct and extensive data banks. Examining four San Francisco Bay Area public libraries, a study, DIALIB, was conducted in an effort to answer the following question: Will the computerized search be wholly adopted by the public library, will there arise a private search service, or will a system of limited public access develop? The first year of the study shows that the library's capacity to do in-depth research in diverse fields has been expanded, especially in libraries that do not have a large reference collection. The computer search has also shown to be more cost effective than the manual search. The first year of the study has shown that the public is interested; the second year will attempt to discern whether the public is willing to pay for those services. (EMH)

Although an increasingly large proportion of Americans are living to be 65, evidence indicates that little is being done to alleviate the problems of declining health diminishing income, limited mobility and social interaction, and the disproportionately severe effects of inflation upon the elderly. Despite the fact that this age group is becoming increasingly more educated and more politically involved, the libraries have done little to meet their specific needs. The library should not be exclusively guided by the pragmatic principle of selecting books with only broad intellectual appeal; rather, it should recognize that we live in a plural society and that literature should be provided to meet the needs of each sub-culture within the society. This document includes a bibliography relevant to senior citizens which incorporates these topics: aging; filmographies; and senior power. (EMH)

Descriptors—\*Chemical Analysis, \*Chemical Reactions, Chemistry, \*Chemistry Instruction, \*Computer Assisted Instruction, \*Computer Based Laboratories, Computer Graphics, Computer Programs, Conference Reports, Curriculum Development, Data Bases, Information Retrieval, Information Systems, Networks, On Line Systems, Programming Languages, State of the Art Reviews

Identifiers—APL, A Programming Language

Computers have effected a comprehensive transformation of chemistry. Computers have greatly enhanced the chemist's ability to do model building, simulations, data refinement and reduction, analysis of data in terms of models, on-line data logging, automated control of experiments, quantum chemistry and statistical and mechanical calculations, and information storage including retrieval and the capacity for dynamic visual display. A recent conference addressed itself to the following aims: (1) provide a national forum for the impact of computers on chemistry; (2) encourage more investigation on computers;

(3) make known the present status and the potential of computer-assisted instruction (CAI) in chemistry; and (4) inspire further examination of the chemistry curriculum in light of recent advances in computer technology. The conference report is a collection of 80 papers divided into the following categories: data fitting; curve fitting and band analysis of spectra; structure determination; CAI; computer technology in theoretical chemistry; chemistry curriculum development; communications in the field of chemistry; computer control of experiments; the use of A Programming Language (APL) in the undergraduate curriculum; and information systems. Descriptors—\*Government Libraries, Library Collections, Library Planning, \*Library Surveys, Military Organizations, \*National Libraries, Special Libraries, \*Statistical Data, Tables (Data)

The fourth study of federal libraries provided the first nearly complete statistical survey of all federal libraries in the continental United States and overseas. It was anticipated that the results of the study could serve as a landmark for future federal planning and as a guide for the library community in responding to related activities on the state and local levels. The survey identified 2,313 federal libraries. Data were collected on 2,145. Expenditures for reporting libraries totaled \$191,825,822. The report includes summary statistics for all libraries, separate treatment of the national libraries, detailed findings for 1,386 libraries providing individual responses, and aggregate data for other reporting libraries. In the appendixes are given complete listings of the individual libraries queried, details of the survey methodology, and copies of the survey instruments. (Author/PF)

Identifiers—\*Work Order Processing System

After reviewing the current movement toward job enrichment, a system was designed for the technical services department of the Mercer County Community College Library. The Library Work Order Processing System, as tried between January and March, 1974, was designed to permit each worker more variety of jobs. The technical services department was divided into three levels: a librarian, a technical assistant, and three clerk typists. Under the new system, all jobs in the department were divided into small units so that a library assistant could finish a unit in a few hours or a day. Each unit carried a written work order with a detailed job instruction issued by the librarian, and each unit was to be finished by one person. The workers responsibility and a sense of the importance of the assigned work because they knew that their evaluation or promotion would be based on these work records. The three month experiment with the system was evaluated in three aspects: production statistics; absenteeism; and workers' job attitudes as measured in personal interviews. The results were considered outstanding on all three measures, and permanent implementation of the system was recommended. (Author/SL)

Identifiers—\*ACRL Standards for College Libraries 1975

This study forecasts the probable percentage scores and letter grades that will be received by various types of academic libraries if the collection and staff formulas of the 1975 Association of College and Research Libraries (ACRL) Standards for College Libraries are used. The projected scores and grades are established through the use of information received from a nationwide random sample of libraries that come within the scope of the new standards. These collection and staff figures are accompanied by specific confidence and tolerance levels. An evaluation of the products of these formulas tends to substantiate the study hypotheses which states that the new standards are apt to move libraries toward a common level of mediocrity. Modifications needed to make the current formulas effective and suggestions for further standards' research are presented in the form of conclusions and recommendations. The study is based on survey data, as well as primary and secondary sources. Sixteen tables, a bibliography, and appendixes on the ACRL standards and the survey forms and techniques are included. A study was conducted at Purdue University to gather operational and budgetary planning data for the Libraries and Audiovisual Center. The objectives were: (1) to complete a current inventory of equipment including year of purchase, costs, and salvage value; (2) to determine useful life data for general classes of equipment; and (3) to determine book value, depreciation, replacement schedule, and annual replacement costs for the current inventory. Essential data on each piece of equipment were key punched and a computer program written to produce the following data for each group of equipment: (1) annual purchases in units and dollars, (2) annual depreciation, (3) current book value, and (4) annual scrap units or units to be replaced. Statistical tables were developed on useful life by class of equipment, annual depreciation of current equipment, book value and depreciation write off of audiovisual equipment. Annual summaries of purchases and depreciation for all equipment types and history of purchase of each class of equipment are included. (Author/DS)

**Circulation of Materials from Purdue University Libraries.** RDU-75-06.

Purdue Univ., Lafayette, Ind. Libraries.

Report No.—RDU-75-06

Pub Date Sep 75

Note—31p.

Available from—Research and Development Unit, Purdue University Libraries, West Lafayette, Indiana 47907

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors—**Cost Effectiveness, Higher Education, \*Library Circulation, Library Collections, Library Expenditures, Library Materials, Library Research, \*Library Surveys, \*Resource Allocations, Statistical Data, Tables (Data), University Libraries, \*Use Studies

**Identifiers—**\*Purdue University

A study of the Purdue University Libraries was conducted to help allocate costs by user group and academic department. A circulation survey was taken to determine user identification. The sampling included reserve material used in the library, materials borrowed overnight or longer, and use of photocopy service. Copies of transaction cards were made and sent to data processing to be categorized by level, department, and library location. Results of the study were compiled in six statistical tables which indicate the number of loans by location, level of user, and school and department. (Author/DS)

**Developing Self-Instructional Materials for NTIS Users.**

Wisconsin Univ. - Stout, Menomonie. Instructional Technology Services.

Pub Date 5 Nov 75

Note—82p.

**EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage**

**Descriptors—**Adult Education, \*Autoinstructional Aids, Government Publications, Indexes (Locators), Indexing, Industrial Education, Information Centers, \*Information Retrieval, Information Seeking, Information Sources, Instructional Design, Resource Guides, \*Search Strategies, Technical Education, \*Vocational Education Teachers

**Identifiers—**Government Reports Announcements, Government Reports Index, \*National Technical Information Service, NTIS

A package of information was developed to inform vocational, technical, and adult education teachers how to find information relevant to their occupational interests. Instructions were provided for the use of three indexes: Government Reports Announcements (GRA), Government Reports Index (GRI), and National Technical Information Service (NTIS). GRA and GRI combine to afford the user access to government documents covering 22 subject fields. Documents are indexed by corporate author, subject, and personal author, contract number, accession report number. NTIS employs the same indexing system for documents concerning vocational, technical, and adult education, but as yet, the system has been sparsely used. Included is the script from a slide/tape presentation intended to increase interest in NTIS. (EMH)

**Document Availability and Use Patterns at the University of California, Berkeley Library: A Comparison with California State University, Sacramento.**

California Univ., Berkeley. Inst. of Library Research.

Report No.—ILR-75-004

Pub Date Jul 75

Note—43p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors—**College Libraries, Higher Education, \*Interlibrary Loans, \*Library Circulation, Library Collections, Library Cooperation, Library Materials, Library Research, Library Services, Statistical Data, Tables (Data), \*University Libraries, \*Use Studies

**Identifiers—**California, California State University Sacramento, \*University of California Berkeley

A study was conducted of three key availability characteristics of material at the University of California (UC), Berkeley library system: (1) status of materials, (2) time required to obtain them, and (3) their location. These characteristics were examined in light of interlibrary loan criteria set forth in a major report on library cooperation by the Audits Division of the California Department of Finance. Circulation data gathered from the libraries of UC, Berkeley and California State University, Sacramento formed the basis for the examination. Using a classification algorithm developed by the Audits Division, it was ascertained that 82 percent of the books in the sample were high-use, while only 13 percent of the sampled books would have been available or eligible for interlibrary loan. It was determined that the highly dedicated delivery system recommended in the auditor's report could not be justified without a substantial revision of the resource sharing criteria. Statistical tables include status and location of materials, and use patterns. (Author/DS)

The Institute of Library Research (ILR) is a statewide organized research unit of the University of California (UC) whose activities have been directed toward the objectives of education, research and public service. During this reporting period the Institute underwent some significant changes, including a further separation of the University-wide Library Automation Program from ILR and a redefinition of the Institute's research scope toward long-range scholarly studies rather than focused studies of immediate interest to UC. This report summarizes the projects and activity of ILR for the period July 1974 through June 1975, including aid to university instructional programs, extension programs, sponsorship of seminars, and research programs on various aspects of computer applications to library processes. Other data in this report include ILR expenditures, funding, staff, publications, and five-year plan. (Author/SL)

**Art Historians of the Past, Rare Book Collections as Depositories of Primary Sources.**

Pub Date 2 Jul 75

Note—10p.; Paper presented at the American Library Association Annual Meeting (94th, San Francisco, California, June 29-July 5, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors—**Ancient History, \*Art, Authors, Books, \*History, Information Sources, Medieval History, Research, Speeches

**Identifiers—**ALA 75, Rare Books

Art historians of the present deal with the description, chronology, topography, and evaluation of works of architecture, sculpture, painting, and the minor arts. They connect works of art with sources and documents referring to their origin, their artists, and their techniques, and are interested in biographies and the reconstruction of the original environment of a work of art. Art historians of the past, on the other hand, did not call themselves by that name. They were poets, mimists, historians and chroniclers, architects, painters, naturalists, travelers, biographers, statesmen, members of the clergy, or private collectors, who in their writings touched one or another aspect of our present complex method of writing art history. By combining bits of information offered by authors from Homer to the 19th century, present historians can collect descriptive and historical information about ancient art works. Rare books are primary sources for such information. (Author/LS)

**Identifiers—**\*Project CASE

As a followup to a 1969 study, called Project CASE, a survey was initiated to determine to what extent computers are used in secondary public schools, and to discern to what extent computers affect the quality of education. Some 5,580 randomly selected schools were questioned about their use of computers; commercial computer manufacturers were queried about the availability of computer technology suitable for use in the secondary schools; the specific exemplary programs using computers were identified. For the period 1970-75, some major findings were: (1) the use of computers is expanding; (2) schools tend to use computers for both instruction and administration; (3) computer-assisted instruction is being used more but it continues to be employed predominantly in the instruction of computer science and mathematics; (4) with regard to administration, the computer is most frequently used for student accounting and resource management; and (5) BASIC has become the predominant language. The characteristics of schools using computers, the levels of their spending, and the sources of their funding are discussed. (EMH)

**Identifiers—**Childrens Television Workshop, Institute Mathematical Studies Social Sciences, Sesame Street

A comparative analysis was made of two vastly different educational innovations: the children's television program "Sesame Street," and the computer-assisted instruction (CAI) programs of the Institute for Mathematical Studies in the Social Sciences. The study was complicated by their distinct objectives and by their widely different means of delivery. The Children's Television Workshop, creators of "Sesame Street," concentrated on an inter-city target audience but achieved a much broader appeal. The numbers of viewers have increased and there have been measurable gains in the viewers cognitive development. Conclusive results about CAI are not yet available because of its limited deployment and the constantly changing state of the technology. With the recent introduction of more reliable terminal hardware and more sophisticated instructional programs, computers are expected to become more effective and less expensive. (EMH)

**Descriptors**—Childrens Books, \*Childrens Literature, Elective Reading, Elementary Education, Library Circulation, Library Materials, Masters Theses, \*Reading Interests, \*Reading Research, Recreational Reading, \*School Libraries

A study was made to determine which books children borrowed, how many of these were quality literature, and what interests were revealed. This was accomplished by noting all books checked out during a two-month period in one elementary school library, and by designating as quality literature those books listed in the "Children's Catalog." Analysis of the data indicated that quality literature was chosen 33 percent of the time, that children tended to pursue certain favorite authors and characters, and that they also had a great interest in the Disney books, perhaps because children are familiar with Disney characters and products. A panel discussion on bibliographic instruction was presented by three librarians at a meeting of the New England Chapter of the Association of College and Research Libraries in November 1974. Defining bibliographic instruction as instruction in the use of library materials rather than library orientation, the panelists talked about the development of library instruction programs in academic libraries, from setting goals and objectives to evaluating the programs. The modes of instruction discussed included regular courses, course-integrated instruction, seminars and minicourses, and print and nonprint instructional units. (LS)

The New England Library Board presents the oral and written testimony given to the National Commission on Libraries and Information Science (NCLIS) at a hearing in Boston, Massachusetts, October 3, 1973. Witnesses include college, university, state, public, special, regional, and school librarians, as well as library trustees; educators; a mayor; researchers; a newspaper editor; and officials of information networks, state education offices, consortia, state library commissions, and commercial information services. Testimony centers around the topics of networking, priorities for service, national and regional resource centers, service in rural areas, new technology, interlibrary cooperation, the Library of Congress as a national library, federal legislation, and the role of state and federal governments. Witnesses represent the states of New Hampshire, Massachusetts, Maine, Rhode Island, Vermont, and Connecticut. A draft of the NCLIS national program of library and information service, dated October 1973, is appended. (LS)

**Identifiers**—Algebraic Interpretive Dialogue, BASIC Instructional Program, Optimization of Learning

Four research projects were conducted on the improvement of individualized instruction. Two methods of teaching foreign language were examined. In the first, the computer stored a profile of the student's previous performance in German vocabulary, and it developed a strategy to teach the student additional German words. The second project tested the effectiveness of a special keyword association method to maximize the retention of Spanish and Russian vocabulary. The second two projects were computer-assisted courses in computer programming: Algebraic Interpretive Dialogue (AID), and BASIC Instructional Program (BIP). In both, the computer combines the student's history and the structure of the curriculum to construct the optimal teaching strategy. (EMH)

Bases, \*Delivery Systems, \*Information Dis-  
semination, Information Retrieval, Information  
Sources, \*Library Services, \*Microfiche, Pro-  
gram Evaluation, \*University Libraries, Use  
Studies

Identifiers—\*National Technical Information Ser-  
vice, NTIS, Selective Dissemination of Informa-  
tion

A selective dissemination service (SRIM) of  
the National Technical Information Service (N-  
TIS) features semimonthly dissemination of  
microfiche copies of documents newly added to  
the NTIS collection, on the basis of interest  
profiles. The service was used to test a university  
subsystem wherein a number of individual  
profiles were combined and submitted to NTIS as  
a composite. Microfiche documents received  
were duplicated in sufficient copies to meet local  
distribution requirements, including one copy for  
library purposes. The study indicates the effect of  
local agency in stimulating and mediating the use  
of an SDI system, and the relative economy of  
local copying and redistribution of microfiche  
over direct ordering at current NTIS prices. SRIM  
is evaluated from the viewpoint of middleman  
and of users engaged in science, technology,  
and higher education. The categori-  
cal structure in which the service is implemented  
is found wanting in the kind of precision, detail,  
definition, and stability needed to serve users in  
this sector. (Author/EMH)

Watson, Rollin J.

Letters from Jessup: Notes on a Prison College  
Program.

Pub Date [75]  
Note—10p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
Descriptors—Community Colleges, \*Correctional  
Education, \*Correctional Rehabilitation, Coun-  
selling, Financial Support, \*Junior Colleges,  
Library Services, Outreach Programs,  
\*Prisoners, \*Social Adjustment, Tuition

Identifiers—Essex Community College, Maryland  
(Jessup)

The Essex Community College (Maryland) full-  
time college program for maximum security in-  
mates at the House of Correction at Jessup  
evolved as a natural outlet for numbers of the  
high school graduates which the prison secondary  
school was producing. Students proved to be well  
prepared, highly motivated, and well received by  
other inmates and the security guards. Students  
were paid the same remuneration they would  
earn in state use industries. This money, supple-  
mented by federal grants, veterans benefits, and  
scholarship funds, helped to pay tuition costs.  
Despite the fact that the college and prison are  
located in different counties, inmates were per-  
mitted the in-county tuition rate, on a contract  
basis. A full range of library services was afforded  
to the inmate students by providing a computer  
print-out of college library resources and by sup-  
plying ordered materials by means of a regular  
van delivery service. While there was no budget  
available for a full-time college counselor, a  
select group of counselors were organized into a  
"pool" system. The program seemed to accom-  
plish two things: it engendered a feeling of self  
worth and pride in the inmate-students; it af-  
forded the students a new, positive perspective on  
traditional values and the institutions of society.

Handelman, Chester

Opinions of Selected Faculty Members on Cur-  
riculum and Instruction at Five South Florida  
Community Colleges.

Pub Date 75

Note—248p.; Ed.D. Dissertation, Nova University

**EDRS Price MF-\$0.76 HC-\$12.05 Plus Postage**

Descriptors—Academic Achievement, \*Academic  
Standards, Administrative Policy, Basic Skills,  
College Curriculum, Community Colleges,  
Conventional Instruction, Educationally Disad-  
vantaged, Grades (Scholastic), \*Instructional  
Innovation, \*Junior Colleges, Questionnaires,  
\*Teacher Attitudes, \*Teaching Methods

The need for two-year colleges to accom-  
modate heterogeneous student bodies, including  
many underprepared and disadvantaged students,  
has resulted in the implementation of innovative  
teaching-learning approaches. In order to ascer-  
tain faculty attitudes toward innovative curricu-  
lum and instruction, 74 social science and En-  
glish/foreign language instructors at five Florida  
community colleges were interviewed and asked  
to complete a questionnaire, one section of which  
required objective responses, and the other sub-  
jective, open-ended answers. About 75 percent of  
the respondents, in varying degrees, indicated  
that the rate of innovation in community college  
curricula should be reduced, at least for the im-  
mediate future. Many of the respondents pointed  
out that many innovative teaching formats have  
resulted in such phenomena as academic grade  
inflation, erosion of academic standards (includ-  
ing reduced student ability to write and, thus, to  
succeed in formal subjective or written examina-  
tions), and too little emphasis on cognitive learn-  
ing. Respondents were not opposed to innova-  
tions per se, but felt that new formats should be  
required to prove themselves before their  
wholesale adoption. More uniform faculty and  
administrative policies are called for in order to  
prevent further erosion of academic standards.

ment, Program Evaluation, \*Program Planning,  
Program Proposals, Simulation, Student Enroll-  
ment, Systems Approach, \*Vocational Educa-  
tion

Part I of this document describes a model for  
occupational program planning in two-year col-  
leges. The planning process begins with an esti-  
mation decision, i.e., whether the program idea is  
worth investigating. This decision can be divided  
into seven sub-questions or systems: (1) Identity--  
what should be the general content of the pro-  
gram? (2) Articulation--does the program fit col-  
lege, local, regional, and state plans? (3)  
Resources--does the college have the resources to  
conduct the program? (4) Students--how many  
and what kinds of students will the program at-  
tract? (5) Employment--will graduates be able to  
obtain jobs commensurate with their training? (6)  
Support--will the program be supported within  
the college and community? (7) Evaluation--how  
will the program be evaluated? The second stage  
of the planning process is the precision phase,  
when the decision whether to implement the pro-  
gram is made. This phase requires a more  
rigorous investigation of the proposed program  
and involves four steps: strategy, detailed in-  
vestigation of the seven subsystems, assessment  
and decision, and, when necessary, the prepara-  
tion of a final program proposal. Part II of this  
document outlines the historical and theoretical  
context of the system, and Part III presents a  
simulation of the system at work. (NHM)

Conference Reports, Educational Needs, \*In-  
service Teacher Education, Instructional Im-  
provement, \*Instructional Staff, \*Junior Col-  
leges, \*Models, Problem Solving, Program  
Development, Resource Allocations, \*Staff Im-  
provement

One hundred twenty-seven participants at a  
June 1975 symposium in Squaw Valley, Califor-  
nia, made use of a prescribed problem-solving  
process in order to originate a number of parts of  
a total staff development effort for a simulated  
community college. The developmental stages in  
the process included brainstorming, needs assess-  
ment, resource specification, strategy develop-  
ment, evaluation, and redesign. The instructional  
strategy involved an interactive setting in which  
each of several small groups simulated a college  
committee confronting a sample staff develop-  
ment problem. Twenty-three problem situations  
are presented in this manual with selected tenta-  
tive solutions developed by the symposium study  
groups. Five position papers written by workshop  
consultants are included, which served as the  
theoretical and informational background for the  
symposium. These papers cover: (1) the need for  
staff development; (2) incentives for participation  
in staff development programs; (3) instructional  
development as a major ingredient of staff  
development; (4) specifying objectives, develop-  
ing strategies and evaluation; (5) instructional

design as a team process. Working forms and guidelines are included, and bibliographies and reference materials are appended. The workshop design is conceived as a prototype for organizing similar workshops on two-year college campuses. (Author/NHM)

Wiesenfeld, Laura Adina

A Study of a Functional Approach to Defining Instructional Competencies and Measuring Faculty Performance in Medical Laboratory Technology.

Pub Date 75

Note—146p.; Ed.D. Dissertation, Nova University  
EDRS Price MF-\$0.76 HC-\$6.97 Plus Postage

Descriptors—Cognitive Processes, Evaluation Criteria, \*Faculty Evaluation, Humanism, Inservice Teacher Education, Instructional Improvement, \*Junior Colleges, \*Learning Modalities, Medical Technologists, Student Opinion, Task Analysis, \*Teaching Quality, \*Teaching Styles

Identifiers—Classification of Instructional Competencies, Cognitive Mapping, Teaching Styles Inventory

In order to develop a humanistic approach to evaluating faculty, a pilot study was conducted of 27 students and 14 instructors in an associate degree program for medical laboratory technicians. Selected personal dimensions of the sample population were examined to chart each individual's personality, theoretical learning preferences, modalities of inference, and intellectual disposition. Faculty were additionally administered a Teaching Styles Inventory. The findings were utilized in an inservice training program which contrasted student and faculty learning styles with faculty teaching styles; as a result, faculty were committed to a more creative concept of quality and efficiency in teaching. Two strategies were employed in assessing the effectiveness of this commitment: first, students ranked instructors on a number of instructional practices; second, grade point averages were compared at entry and exit levels, revealing a significant rise. On the basis of information gained in the study, a Classification of Instructional Competencies was devised which categorized professional behaviors (technical, therapeutic, cognitive) in six areas (curriculum, instruction, evaluation, college service, professional activities, continuing education) into a series of detailed goal statements. A survey of the literature, bibliography, and cognitive mapping instruments are appended. (NHM)

Unit Cost Analysis in the Public Community Colleges of Illinois: 1973-74 (FY 1974). Volume III, Number 5.

Illinois Community Coll. Board, Springfield.

Pub Date Mar 75

Note—112p.; Not available in hard copy due to marginal legibility of original document

EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.

Descriptors—Community Colleges, Cost Effectiveness, Educational Accountability, \*Educational Finance, Expenditure Per Student, Instructional Programs, \*Junior Colleges, \*Operating Expenses, \*Program Costs, School Accounting, \*Unit Costs

Identifiers—Illinois

The Unit Cost Study is an annual project involving the direct participation of all public community colleges in Illinois. Each college provides basic data on course offerings, enrollments, and costs in each instructional area to the Illinois Community College Board, which checks the data for consistency with apportionment claims and financial audits, then compiles the reports via a computer program. The effective implementation of the Uniform Accounting Manual by the colleges establishes reasonable continuity between classifications. The community colleges furnish data on midterm enrollments, course credits in semester hours, direct costs for instruction, and other departmental costs. Indirect costs are reported in total dollar amounts which are allocated to each instructional area on the basis of the proportion of course credit hours generated in the given area to the total credit hours generated by the college. The bulk of this report is made up of reorganizations of the data to show various interrelationships. The study is designed to provide information necessary to planning,

evaluation, and management. In addition, the study is an accountability report to the citizens of Illinois and to the citizens of each community college district. (Author/NHM)

Menard, Joseph W.

Developing an Instrument for Evaluating Faculty by Students, Colleagues, and Administrators at Rhode Island Junior College.

Pub Date 5 May 75

Note—55p.; Ed.D. Practicum, Nova University  
EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—\*Evaluation Criteria, Evaluation Methods, \*Faculty Evaluation, \*Junior Colleges, Questionnaires, \*Rating Scales, Teacher Improvement

Identifiers—\*Rhode Island Junior College

This study was undertaken to devise a standardized faculty evaluation instrument which could be used by all departments at Rhode Island Junior College and which could be easily filled out by students, colleagues, and the department chairpersons of the instructor being evaluated. In order to ascertain the preferences of the college community regarding items which should be incorporated into such an instrument, two attitudinal questionnaires were designed and administered to 70 faculty members and a random sample of 200 students. One of the questionnaires related to preferred instrument format; the other to the characteristics essential to effective faculty performance. Among five alternative formats for the evaluation instrument, those polled preferred a multiple choice format. The selected characteristics of effective instructors closely paralleled the characteristics cited in the literature of the field. The developed instrument (which contains 50 items, with separate sections for students, advisees, faculty, and division chairpersons) is presented, as are both preliminary questionnaires and tables displaying questionnaire results. Pilot testing, revision, and college-wide implementation of the instrument are recommended. (RL)

White, John Franklin

Foreign Study and the Community College.

Pub Date [75]

Note—23p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Advisory Committees, College Cooperation, Community Colleges, Followup Studies, \*Junior Colleges, Post Secondary Education, Program Length, \*School Surveys, \*Study Abroad, Transfer Policy, \*Travel

In order to examine the status of foreign study in American junior and community colleges, a questionnaire was developed and distributed to 225 institutions in the North Central Association of Colleges and Secondary Schools, eliciting an 80 percent level of response. Duplicate questionnaires were sent to Academic Affairs and Student Affairs offices in each of the community colleges polled. Results indicated that more than 50 two-year institutions in the survey region are in some measure involved in foreign study activity. Unfortunately, few community colleges engage in follow-up studies on students who take part in such programs, which hinders further programmatic development. Community colleges, unlike many senior institutions, tend to provide short-term programs abroad (under eight weeks). Most community colleges stated that foreign programs were "organized and administered by the institution in cooperation with private travel agencies." This plan seems to explain the decided travel rather than foreign study character of many community college programs, which tends to cause credit transferral problems with receiving senior institutions. The development of college-wide advisory committees and more interinstitutional cooperation between community colleges are recommended. (NHM)

\*Teaching Methods, \*Team Teaching, Vocational Education

Identifiers—Alvin Junior College

The high percentage of students failing State Board Examinations for licensure as registered nurses led to provisional accreditation being placed on the nursing program at Alvin Junior College (Texas). Teaching methodology was investigated as a possible contributor to these failures. A review of the related literature indicated that individualized, systematic teaching methods best facilitate the learning of medical-surgical nursing. A team-teaching method of instruction, supplemented with audio-taped lectures, was used in medical-surgical nursing classes in 1974 (77 students). Compared to classes the year before (73 students), when the traditional one-teacher lecture method was used, the experimental, team-teaching group scored significantly higher on the National League for Nursing tests for Medical-Surgical Nursing II. In addition, the proportion of students passing the State Board Examinations was significantly higher for the experimental group (94 percent) than for the control group (77 percent). As a residual finding, when a questionnaire was sent to all the graduates who had been in the experimental group, 83 percent of the respondents stated that they preferred the team-teaching approach. (NHM)

Improving Junior and Community College Instruction.

Pub Date [75]

Note—6p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*College Faculty, Community Colleges, \*Inservice Teacher Education, \*Institutes (Training Programs), Interaction Process Analysis, \*Junior Colleges, Questioning Techniques, Rating Scales, Student Teacher Relationship, Teacher Improvement, \*Teaching Skills, Teaching Techniques

Identifiers—Flanders Interaction Analysis

Twenty-five instructors from 11 different community colleges and 13 different disciplines participated in a six week institute at Texas A&M University, geared to improving teaching in junior and community colleges. The participants had an average of 5.08 years of experience in college level teaching, and all had at least a master's degree. Each participant received 15 contact hours of skill training in Flanders Interaction Analysis, a 10 category observation system which classifies any verbal statement made in a classroom by an instructor or student, thus facilitating study of teacher/student verbal interaction. The participants also engaged in microteaching experiences, concentrating on skills of fluency in asking questions, reinforcement, probing questions, and various higher order questions. This procedure allowed participants to focus on individual technical teaching skills. Other activities included audio-tutorial programs, multiple-choice test construction and test-item analysis, independent listening, assigned readings, behavioral objectives, small group discussions, and simulation. Evaluations collected throughout the program indicate that the training received by the participants contributed to changes in their attitudes, opinions, and behavior related to teaching effectiveness. An Evaluation of the 1973-74 Instructional Development Grant Program.

Los Angeles Community Coll. District, Calif. Div. of Educational Planning and Development.

Pub Date Jul 75

Note—70p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—\*College Teachers, \*Curriculum Development, \*Incentive Grants, \*Instructional Innovation, Instructional Staff, \*Junior Colleges, Program Evaluation, Teacher Developed Materials, Teaching Methods

In order to encourage the professional instructional staff to develop innovative teaching strategies and techniques, the Los Angeles Community College District established an Instructional Development Grant Program (IDG) in 1973. This evaluation is based upon a variety of data sources: campus visits, surveys, telephone interviews, and data provided by IDG, including project proposals, final reports, lists of grants, and

interviews. Descriptions of individual projects, along with evaluations by the grantees, an analysis by college and amount of funds, and an analysis by objective are presented. The funding strategy for the IDG program was based on the assumption that a small amount of money (\$3,500 per grant) would be sufficient to stimulate faculty experimentation and, at the same time, allow a larger number of faculty projects. Recommendations include: an improved evaluation system for individual projects; a change in project emphasis from instructional resources; an increase in project visibility from one campus to another; steps to assure comprehensive, rather than individual, faculty development. Appended is the Instructional Development Grant Program Guide for 1975-76, which outlines IDG procedures. (NHM)

 Descriptors—Broadcast Television, Delivery Systems, \*Educational Television, \*Enrollment Trends, \*Grades (Scholastic), Home Study, \*Junior Colleges

Educational television is one part of a coordinated instructional system which also utilizes faculty Course Advisors, texts, syllabi, and the instructional support services of the Los Angeles Community Colleges. Educational television extends access to students who are not enrolled in on-campus programs and provides an alternative mode of instruction for students who are attending classes on campus. Data for campus and television enrollments from 1970-74 are presented for five courses: Art 1, Astronomy 1, Geography 1, Health 10, and Psychology 1. The data reveal no significant decrease in enrollments on campus which could be caused by the television courses. The data also reveal that the distribution of grades earned by students enrolled in television courses does not vary significantly from the distribution of grades in on-campus sections of the courses. Graphic depictions of the data, which make up over half of this document, cover enrollments and grade distribution. Appended are tabular formulations of the same data. (Author/NHM)

 Descriptors—Cost Effectiveness, Course Evaluation, \*Delivery Systems, Educational Needs, \*Junior Colleges, Marketing, Models, \*Outreach Programs, \*Program Planning, \*Telephone Instruction

The outreach development process described in this document is designed to provide a model for planning and implementing a program to extend access to educational opportunity for members of the community served by the Los Angeles Community College District. There are four steps required to initiate such a program: (1) Identification—each college must identify the general types of organizational entities and population segments (private industry, residential areas, government agencies) within its area with a high potential need for general or specialized educational programs; (2) Qualification—a detailed examination of identified potential customers in order to select those best suited for analytical investigation; (3) Subdivision—a determination of the most accessible and desirable segment of the customer's educational needs in order to specify objectives and time frames and to forecast costs; (4) Implementation—the selection of a delivery system that best meets the needs of the target population. An educational telephone network is described as representative of a media-oriented delivery system which may be utilized in place of traditional classroom instruction. Appended are a summary of an evaluation of an educational telephone network course and a cost-effectiveness study. (Author/NHM)

 Descriptors—\*Junior Colleges, Junior College Students, Organizational Change, \*Program Evaluation, \*Student College Relationship, \*Student Government, Student Needs, Student Participation

Identifiers—El Camino College  
 A 10-month study by a select committee of students, faculty, and staff in 1973 resulted in a new form of student government at El Camino College (California). The new governmental format features five to seven member student councils in each of the 12 academic divisions of the College. Each of these 12 councils sends two representatives to an all-student Senate which attends to the interests and needs of the total student body. The Senate selects a president who is assisted by three vice presidents, relating to the areas of instruction, student personnel, and finance. This report summarizes some of the activities of the 12 divisional student councils and the Student Senate during the 1974-75 college year and identifies participants in the student government program. An evaluation of the program reveals that most of the recommendations of the select committee have been fully, or to some extent, implemented during the 1974-75 college year. In addition, former criticisms of student government have been relieved, while the objectives of the new government are being achieved. The new system provides increased opportunity for student input into the life of the college community, and its strength lies in the relationship which is developing between student government and the instructional program.  Descriptors—Continuous Learning, \*Followup Studies, Graduate Surveys, \*Health Occupations Education, Institutional Research, \*Junior Colleges, \*Nurses, \*Participant Satisfaction, Professional Continuing Education, Questionnaires, Vocational Education

A group of 41 registered nursing graduates of the 1974 class at Bakersfield College was surveyed in the summer of 1974 as part of a nursing education follow-up study. In the summer of 1975, the same group was surveyed again in order to compare the perceptions and aspirations reported by the graduates one year after graduation with those reported immediately after graduation. The 1974 survey had a 73.9 percent response rate, while the 1975 follow-up had a 60 percent response rate. The graduates had encountered no difficulty in finding employment. All but one were working in Kern County, and most of them expected to remain in Kern County. Acute hospital nursing was the present and anticipated future type of employment. All had encountered on-the-job orientation in their hospital jobs, and most felt it to be effective. The enthusiasm that the graduates exhibited toward the nursing program in 1974 had not diminished a year later. However, 57.1 percent did rate their total nursing program only adequate as it pertained to the real world. Most desired continuing education courses, particularly in coronary care. Most nurses were enthusiastic about their jobs. In view of the nursing shortage, an expansion of the nursing program is recommended. A sample of the questionnaire and cover letter is appended. Identifiers—Fresno City College  
 The degree to which Fresno City College (California) is meeting the curricular needs of its students is examined in this study of 234 students and 26 faculty. An analysis of student preferences toward 20 selected learning modes is compared to the amount of time which faculty devote to each. High correlation between preference and practice exists in the use of demonstrations, slides, discussion, small groups, tutorials, and programmed materials, while wide discrepancies occur in the areas of laboratory time, lecture method, homework, flexible course length, attendance options, and the availability of a modular calendar. Whereas faculty report that homework and lectures are the prime methods of instruction, students ranked these 15th and 20th, respectively. In addition, the student survey revealed a strong desire for greater flexibility both in the time spent in class and the length of the calendar; however, faculty rated these areas quite low. It is recommended that faculty be made aware of these discrepancies and be provided with incentives to modify their approaches to learning. A review of the literature dealing with faculty resistance to innovation is undertaken and survey instruments are included. (LO)

 This catalog is intended to be issued periodically as a means of extending and updating teaching materials which have been previously published through ERIC by these authors. The materials include the Alpha and Gamma levels of the "Greenbook System," pre-professional and entry in-service professional levels of an integrated sequence of five training programs for higher education professionals; an operational manual for the Open Classroom, an autoinstructional learning laboratory at Skagit Valley College (Washington); and several self-contained, programmed courses in philosophy and mathematics developed for this Open Classroom. The present issue of the catalog contains two sample task analyses for addition to the "Greenbook System" (ED 103 083 and 084), and two pages to be inserted in the Coach's Manual section of "Basic Open Classroom Documentation" (ED 103 086). A sample of work required for an optional "A" project is supplied for "Philosophic Heuristic Instruction I" (ED 103 087). "Oleanna Math Program Materials" (ED 103 088) is substantially updated in the areas of pre-algebra, intermediate algebra, and analytic geometry. A number of additional short units and quick reviews are supplied for "Oleanna Math Program Smorgasbord" (ED 103 089). Subsequent issues of the catalog will provide revisions and additions to these and further courses available through ERIC (see JC 750 523, 524, and 525). (BB)

Identifiers—\*Skagit Valley College  
 This publication contains a course outline and syllabus, self-study units, and testing materials finished and tested in the Open Classroom, an auto-tutorial learning laboratory at Skagit Valley

College (Washington). This self-contained course in informal logic is organized around problem-solving strategy and a collection of modules for extensive studies of informal logic and psychosynthesis. The course outline is designed to be used in conjunction with Vincent Ryan Ruggerio's "Beyond Feelings: A Guide to Critical Thinking" (1975). In this course, the student is expected to enhance his respect for rational problem-solving and develop discursive abilities. Suggested prerequisites for the course include: 11th grade reading level, fundamental compositional skill, dictionary usage proficiency, and ability to manage time and academic work without supervision. The first three units are subdivided into 31 constituent lessons, each of which takes about two hours to complete. At the end of unit III, there is an open-book, multiple-choice test. A fourth special project unit, additional optional project modules, and independent study modules in problem-solving and critical thinking complete the course materials. Student worksheets, answers to reading assignments, and test answers are furnished throughout. (NHM)

Descriptors—\*Autoinstructional Aids, \*Course Content, Courses, Curriculum Guides, \*Junior Colleges, \*Logic, Philosophy, \*Programmed Materials, Programed Units, Self Directed Classrooms

Identifiers—\*Skagit Valley College, Symbolic Logic

This publication contains a course outline, syllabus, and self-study units finished and partly tested in the Open Classroom, an auto-tutorial learning laboratory at Skagit Valley College (Washington). This self-contained course in elementary formal logic is designed for use in conjunction with Kalish and Montague's "Logic—Techniques of Formal Reasoning" (1964). Upon completion of this course, the student is expected to: (1) translate between ordinary literal English and formulations of symbolic logic, using Kalish-Montague notation; (2) construct valid derivations in the sentential and first-order predicate calculi; (3) lay a foundation for subsequent studies in mathematics as a systematic study of the properties of numbers; (4) learn how to study logic and mathematics independently. Although there are no formal prerequisites, it is recommended that the student complete a course in informal logic, read with considerable skill, and be able to interpret terse, non-redundant, literal English. The basic course is divided into four units, with a fifth optional unit available to students who wish to work for an "A" grade. All testing is done as the student proceeds from one unit to the next. For each unit of study, the student must perform one translation from English to logic and one derivation selected from the text. The basic course is expected to require about 165 hours. (NHM)

Tiger Learning Skills.

Note—65p.

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

Descriptors—\*Autoinstructional Aids, \*Basic Skills, \*Course Content, Courses, Curriculum Guides, \*Junior Colleges, Learning Laboratories, Listening Skills, Programed Materials, Programed Units, Self Directed Classrooms, \*Study Skills

Identifiers—\*Skagit Valley College

This learning skills program was developed for the Open Classroom, an auto-tutorial learning laboratory at Skagit Valley College (Washington). The four-unit course is designed to develop basic academic skills other than reading, including: (I) following instructions; (II) listening; (III) taking notes; and (IV) self-direction. The core course begins in a conventional small group format, meeting three days per week. After the completion of Unit III, the meeting schedule is reduced to once per week. Units I-III are scheduled to be completed early in the term, and are pursued outside the class meetings as homework. Unit IV begins at the first or second meeting without a fixed schedule of completion. Additional work, to be completed to achieve higher grades, is organized into the Tiger Learn-

ing Project File. The masters for the file are supplied in this document on 8 1/2" by 11" stock, but copies may be cut to 5" by 8" card stock. The project file is designed to enable the student to apply his newly acquired learning skills to his ongoing course work. Thus, units are provided to correspond with the whole range of academic disciplines. Parts of the course syllabus are designed to be used in conjunction with two different textbooks and various recorded materials. (NHM)

A Plan for: A Consumer Conference for Older Adults.

Palomar Coll., San Marcos, Calif.

Pub Date 8 Oct 75

Note—29p.; Not available in hard copy due to marginal legibility of original document

**EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.**

Descriptors—\*Conferences, \*Consumer Education, \*Junior Colleges, \*Older Adults, Program Evaluation, \*Program Planning, Senior Citizens, Workshops

Identifiers—Palomar Community College

This document provides a step-by-step description of the planning and implementation of a two day consumer concerns conference for older adults held at Palomar Community College (California). The bulk of the document is made up of practical discussions of such planning phases as facility selection and decoration, conference publicity, snack and luncheon serving, and speaker selection. In addition to the keynote speaker, Josephine Smith, more than 30 speakers conducted workshops, including: consumer fraud, mobile home park problems, nutrition, home security, drug buying, tax information, legal counseling, wills, estate planning, blood pressure, medicine, and medical quackery. Of about 250 conference participants, 76 were interviewed for conference evaluation purposes by a group of volunteers in conjunction with the class "Psychology of Aging." All of the workshop topics were well received, and 75 percent of the respondents indicated that they would attend another conference. Seventy-two percent said the conference met their expectations, and 42 percent said they would like several conferences at Palomar College. In response to questions dealing with curriculum planning, the respondents indicated more interest in enrichment courses than in those of academic value. (NHM)

Groves, Cecil L. Kennedy, Edward A., Jr.

Career Counselor-Technician: A Progress Report.

Southern Regional Education Board, Atlanta, Ga.

Inst. for Higher Educational Opportunity.

Spons Agency—Carnegie Corp. of New York, N.Y.

Pub Date Mar 74

Note—83p.

**EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage**

Descriptors—Career Planning, \*Counselor Training, Course Descriptions, Curriculum Development, \*Curriculum Guides, \*Human Services, Junior Colleges, Occupational Guidance, \*Sub-professionals, \*Vocational Counseling

This document describes the development of a model career counselor-technician curriculum at the junior college level. The initial steps taken included the organization of an advisory committee, the selection of Delgado Junior College as a sponsoring institution, the selection of a project director, and the proposal of a project budget. After establishing the need for a career counselor-technician, analyzing the availability and characteristics of potential students and faculty, selecting a curriculum model, and determining curriculum content, a prototype curriculum was developed. The prototype is designed to allow flexibility at any point in order to accommodate the needs of different locales. In order to avoid over-specializing the student and limiting his horizontal mobility, an occupational cluster or job-family approach is employed. However, the curriculum is sufficiently specialized to meet the demands of the employer as to job entry skills. Curriculum outlines and course descriptions for four specific human service programs now offered at other community colleges are presented as representative of current curriculum design in this field, along with course descriptions for the prototype career counselor-technician program.

A survey of the literature is included, as well as the proceedings of a 1973 seminar on career counseling. (NHM)

Degrees and Certificates Awarded, Community

Colleges: July 1, 1974-June 30, 1975.

Hawaii Univ., Honolulu. Community Coll.

System.

Report No—CC-IRP-80

Pub Date Jul 75

Note—6p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Associate Degrees, \*College Majors, \*Community Colleges, Degrees (Titles), Educational Certificates, Enrollment Trends, \*Junior Colleges, Liberal Arts Majors, Vocational Education

Identifiers—\*Hawaii

Data gathered throughout Hawaii's six-campus community college system shows that the number of diplomas awarded during 1974-75 totaled 1,782, an increase of 18 percent over the previous year. Growth was evident in all diploma categories: Associate in Arts degrees increased 15 percent; Associate in Science degrees increased 22 percent; and Certificates increased 7 percent. Vocational degrees represented 69 percent of the total granted, although vocational majors comprised only 38 percent of fall enrollment; the Associate in Arts degree accounted for another 29 percent, although liberal arts majors comprised 49 percent of fall enrollment. The graduates were evenly distributed by sex. Included are two tables showing the number of diplomas awarded by each campus since 1970-71 and the number and types of degrees conferred during 1974-75. It is suggested that the study might be helpful in assessing the effectiveness of various programs since student persistence to completion shows wide divergence particularly when vocational and liberal arts programs are compared. A General Departmental Outline for Career Guidance and a Specific Outline for a Basic Career Planning Course at Pasadena City College.

Pub Date Jun 75

Note—32p.; Ed.D. Practicum, Nova University.

Not available in hard copy due to marginal legibility of the original document

**EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.**

Descriptors—\*Career Planning, College Students, Curriculum Evaluation, \*General Education, Incidental Learning, \*Job Skills, \*Junior Colleges, Occupational Aspiration, Questionnaires, Student Opinion, Vocational Counseling, Vocational Interests

Identifiers—\*Pasadena City College, Student Occupational Plan Outline

A questionnaire designed to assess the degree to which general education courses at Pasadena City College (California) impart vocational skills was administered to 200 cooperative education students who had had courses in English, Social Science, Mathematics, and Life Science. Results showed that in none of the areas studied did students feel their vocational skills were significantly enhanced. Consequently, two occupational plan outlines were developed. The General Departmental Plan Outline is a checklist of occupationally related skills designed for use by individual instructors and is intended to aid them in recognizing the vocational aspects of their subject matter. The Student Occupational Plan Outline includes the names of tests, films, readings, and projects which the student can employ when attempting to define or achieve a vocational goal. The survey instrument and data are appended, as is a copy of the Pasadena City College student background information form. (LO)

Handbook on Faculty Governance and Responsibilities, 1975-1976.

Montgomery Coll., Rockville, Md.

Pub Date [75]

Note—264p.

**EDRS Price MF-\$0.76 HC-\$13.32 Plus Postage**

Descriptors—Administrative Organization, \*Administrative Policy, \*College Faculty, Contracts, Faculty Organizations, Fringe Benefits, Governance, \*Junior Colleges, \*Manuals, \*Personnel Policy, Teacher Responsibility, Tenure

Identifiers—\*Maryland, \*Montgomery College

The content of this manual was recommended to the president of Montgomery College (Maryland) by the chairman of the Faculty Senate. Chapter I answers frequently asked questions of a personal or professional nature, e.g., contracts, student health, exams and emergency closing of the college. The other five chapters are extracted directly from the college's "Policies and Procedures Manual." Chapter II describes the basic structure of the Montgomery College faculty. The roles of the board of trustees, college president, faculty, and students are described, along with the composition, functions, and procedures of the Faculty Senate and all-college committees. Chapter III deals with personnel administration of the professional staff. Among the topics covered in this section are hiring practices, faculty tenure, salary scale, faculty responsibilities and teaching load, faculty evaluations, fringe benefits, and leave policies. The fourth chapter deals with the educational program, e.g., curriculum and program development. After a short chapter describing business and administrative operations concerning travel allowances and the procurement of supplies, the handbook deals with academic regulations, e.g., matriculation, graduation, course registration, and attendance. Appended are curriculum proposal procedures, organizational charts, and sample contracts. (NHM)

**Part-Time Faculty Handbook, 1975-76.**  
 Montgomery Coll., Rockville, Md.

Pub Date [75]  
 Note—60p.  
**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**  
 Descriptors—Administrative Policy, \*Junior Colleges, \*Manuals, \*Part Time Teachers, \*Teacher Orientation, Teacher Responsibility  
 Identifiers—Maryland, \*Montgomery College

Since most of the part-time faculty at Montgomery College (Maryland) teach in the evening, communication with administrators, division chairmen, and department chairmen is often difficult. This handbook was compiled to summarize information useful to part-time faculty members. After a general introduction to the philosophy, objectives, and academic standing of the college, the manual describes the responsibilities and benefits of part-time faculty status. Descriptions of college procedures cover emergencies and academic administration, such as registration, examinations, grading, and counseling. A section on academic regulations covers admission requirements, the awarding of credits, transfers, graduation requirements, the grading system, program requirements, academic programs, class attendance, cheating and plagiarism, and petition and appeal. A format for proposing changes in academic regulations is appended. The final general information section covers absences, college facilities and special equipment, and college services. Appended are a week-by-week guide to faculty responsibilities and organizational flow charts. (NHM)

**The Part-Time Student: Harrisburg Area Community College.**

Pub Date 11 Jul 75  
 Note—53p.; Ed.D. Practicum, Nova University; Not available in hard copy due to marginal legibility of original document

**EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.**

Descriptors—Adult Students, Age Groups, Day Students, \*Enrollment Trends, Evening Students, Females, \*Junior Colleges, Males, \*Part Time Students, \*Student Characteristics, \*Student Needs

Identifiers—Harrisburg Area Community College

In order to study part-time student data, every part-time student officially enrolled for the spring term, 1975, at Harrisburg Area Community College (HACC) in Pennsylvania was identified through college computerized records. Meanwhile, a comparison of enrollment trends was made from officially audited enrollment statistics covering the period 1970-75. This comparison depicted total enrollments, full-time and part-time equated students, and full-time and part-time enrollments. In addition, a hand count of the first 50 percent alphabetical sample of individual part-time student registrations was made to determine the ratios of daytime to nighttime students, and male to female daytime part-timers. The Nominal Group Process was applied to an

evening Education 101 class of part-time students to determine what problems such students experience at HACC. The part-time student enrollment at HACC has increased from 33 percent to 50 percent during the past five years. A survey of the related literature indicates that this trend is nationwide. Although the literature stereotypes the part-time student as an evening adult student, a large number of young daytime students are enrolled part-time at HACC. The author recommends that programs be developed to accommodate contemporary part-time student needs. (NHM)

**A Study of Community Influence and Leadership.**  
 College of the Mainland, Texas City, Tex.  
 Pub Date Aug 75  
 Note—32p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**  
 Descriptors—Community Characteristics, \*Community Leaders, \*Community Study, \*Field Experience Programs, \*Field Interviews, \*Junior Colleges, Power Structure, Student Projects  
 Identifiers—College of the Mainland, Texas (Texas City)

As a field learning experience, 14 students at College of the Mainland (Texas) examined the structure and components of community leadership in Texas City, Texas. The students were divided into two groups, under the direction of a humanities staff member. The first group, using the reputational study technique, asked community residents to identify the leaders in the community. The second group, using the decision analysis technique, approached leaders in public health, planning, zoning, education, and business. Each leader was asked what the most important decision made in the last five years in his particular area had been, and who had made that decision. After obtaining a list of 24 influentials, the two groups combined to interview the identified leaders. After discussing interviewing procedures, and role-playing both interviewer and interviewee, each student was assigned an interview. After the first round of interviews, the list of community leaders was narrowed to 13. Final interviews were conducted with nine of these leaders. The leadership emerged as loose, informal, and somewhat jurisdictional. It is hoped that the study findings will be of some use to the college leadership in planning community services. Copies of the project proposal and its "statement of use" are appended, as are copies of survey instruments. (NHM)

Descriptors—Comparative Analysis, \*Dropout Prevention, Educationally Disadvantaged, Grades (Scholastic), Individual Instruction, \*Junior Colleges, Longitudinal Studies, \*Low Ability Students, \*Remedial Mathematics, School Holding Power, Student Attitudes, \*Tutoring

Identifiers—Santa Barbara City College

Low ability freshmen enrolled in a 1972 fall semester remedial mathematics course at Santa Barbara City College (California) were randomly divided into three groups: (1) a control group comprised of 62 students meeting for one hour per week in small subgroups to study programmed materials; (2) a classroom tutoring group comprised of 67 students meeting weekly in small subgroups, with class time divided between programmed materials and tutoring by trained, experienced tutors; and (3) a total tutoring group comprised of 61 students enrolled in weekly small group sessions like those for group two, but with all students receiving from one to five additional weekly hours of tutoring at other times. At the end of the semester, each student was interviewed using a structured interview technique. Neither course grades nor GPAs differed significantly among the three groups. However, significantly fewer students in the tutored groups withdrew from the course. In addition, the structured interviews showed that student attitudes in the tutored groups were significantly more positive toward both mathematics and all other courses. The pattern of increased per-

sistence and positive attitude of the tutored group continued during the two years following tutoring. Data are organized into charts and tables, and a bibliography is appended. (NHM)

 Identifiers—San Mateo Community College District

The cooperative education programs provided by the three community colleges which comprise the San Mateo Community College District (California) offer three alternative plans: (1) Alternate Semester—two students hold one full-time job during the year, each spending one semester on campus and one off campus; (2) Parallel—current part-time work experience and on-campus classwork; (3) New Careers—a career development plan for evening students who hold full-time jobs. The New Horizons in Cooperative Education project was designed to research and develop a number of innovations in cooperative education, including measurable learning objectives on the job, comprehensive liberal arts/vocational programs, improved methods of sharing results, and trends of the future. This report evaluates the effectiveness of the project in terms of 18 factors (student retention, academic success, cost effectiveness, etc.). As a means of providing information about various innovations occurring within this project, a sampling of information is provided throughout the remainder of the report in the form of 11 Progress Indicators. These brief sections provide a closer look at selected New Horizons activities. (NHM)

**Identifiers**—Illinois

To investigate differences in academic success due to age (younger or older than age 23), marital status, and nursing experience, a three-way analysis of variance was performed on the grade point averages of 1,435 female nursing students enrolled in 22 Associate Degree Nursing (ADN) programs in Illinois. The sample, representing over 90 percent of the students enrolled in ADN programs, were generally from middle and lower-middle socioeconomic backgrounds, but students from all areas of Illinois and the full range of ethnic groups were included. Students in the older age range achieved GPAs approximately one grade point higher than the younger subjects. Similarly, married women achieved GPAs one grade point higher than their single counterparts. However, the GPAs of those with previous nursing experience as compared to those without experience were almost identical. On the second order interaction, older married women without experience had significantly higher GPAs than older married women with experience. The author associates the results of this study with the need for nursing students to make a definite commitment to their field of study. Data are organized into three tables and charts. (Author/NHM)

**Identifiers**—\*Pensacola Junior College

This report recommends three general categories of involvement in the development of educational programs for the aging and aged at Pensacola Junior College (Florida). (1) Pre-retirement Education: courses should include the psychology of aging, family structures, estate planning, federal laws that affect the elderly, employment opportunities, and leisure time activities. Pre-retirement counseling programs should be developed. (2) Continuing Education: a comprehensive campus-based education program for the aged should involve free transportation, convenient locations, and flexible hours; similar courses should be offered at nursing homes, senior citizens centers, and community schools. Enrollment should be increased in vocational education programs which could lead to rewarding second careers or part-time jobs. (3) Para-professional Gerontology Programs: existing nursing courses should place greater emphasis on dealing with older people, special seminars on dealing with the aged should be offered, and an in-service training program should be developed in nursing homes. A two-year associate degree and certificated programs in geriatric care should be established. The report concludes with a discussion of possible federal, state, local, private, and public funding sources. (NHM)

**Community College Inmate Student Assessment Personality and Educational Activity Project Report.**

Pub Date 75

Note—32p.; Prepared for Joint University of Florida/Florida State University Off-Campus Graduate Degree Program

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**—Aspiration, \*Correctional Education, \*Curriculum Development, Educational Interest, \*Junior Colleges, Personality Studies, \*Prisoners, \*Psychological Testing, Questionnaires

**Identifiers**—California Psychological Inventory, Florida, Lake City Community College

The California Psychological Inventory was administered to 175 Union Correctional Institution inmates enrolled in the college level program offered by Lake City Community College (Florida). Useable data pertaining to personality characteristics, self-image, values, and general expectations were obtained from 151 inmates who were eligible for the program. In addition, a questionnaire was designed and administered to obtain data pertaining to the inmates' personal, educational, and incarceration histories and their personal goals. The psychological profile indicates a need to enhance the inmates' concepts and understanding in the areas of responsibility, tolerance, socialization, self-concept, and personal well-being. Curriculum development in these areas is recommended. Interest in courses as indicated by the inmates suggests curriculum expansions in English, drama, speech, and human relations. An exceptionally high level of interest in the business area suggests a need for increased course offerings in this field as well. A review of the literature is included, the questionnaire is appended, and data is organized into table form. (Author/NHM)

**Identifiers**—\*Needs Assessment, Texas (Waco)

In order to assess the felt needs and interests of the local population and business community relative to education and training, a survey was designed and implemented in the four-county area surrounding Waco, Texas. This volume, part one of a three part series documents the work done in developing and conducting the community needs assessment survey; and provides a data base to be used by adult education planners. Primary sampling units of approximately equal population size were developed based on census tract data. Respondents were limited to persons 15 years of age or older, present in the residence, and agreeing to participate in the survey. In order to realize a total of 145 potential clients among the respondents, 750 interviews were planned. Interviewers were trained using the manual appended to this report, and participated in a two-day training workshop. The 89 survey questions generated responses concerning the extent of knowledge about the availability, cost, and entrance requirements of adult education programs, obstacles and inducements to enrollment, interest in specific program types, attitudes toward instruction and classroom practices, effective advertising methods, and attitudes toward adult education and vocational education. The survey instrument is appended, along with tabulated responses by demographic sub-groups. (NHM)

This paper reports the results of an 11 item questionnaire designed to ascertain the personal characteristics and backgrounds of newly-hired faculty in the 19 state North Central region. Useable responses were obtained from 406 full-time community college faculty who were hired for the 1973-74 school year. Ninety-six percent were white, 57 percent were male, and the vast majority (76 percent) were under 40 years of age. More than half were teaching in allied-health, vocational-technical, or business-data processing areas. Seven percent held earned doctorates, while another 53 percent had completed work on a master's degree; the remaining 40 percent had less formal education, including 34 individuals who did not have a bachelor's degree. Prior contact with community colleges was limited, although 42 percent held community college teaching certificates. Nearly half of the respondents indicated that they learned of the position through the grapevine, and many others were contacted directly by the college; formal placement offices and programs were rarely cited as having played a role in obtaining the positions. Most individuals felt that previous work experience was the most influential factor in securing their job. A copy of the questionnaire is attached. (LO)

**Descriptors**—\*Affective Behavior, Compensatory Education, Conference Reports, Individualized Instruction, \*Junior Colleges, \*Learning Laboratories, Learning Processes, Reading Level, \*Remedial Instruction, \*Remedial Reading, Study Habits, Writing Skills

The intent of this annual conference is to provide a medium of exchange for practitioners in the field, with each person acting as a resource person for the others. To provide topical focuses, two presentations were made: Dr. Joan Roloff discussed "The Place of the Learning Center in Remedial/Compensatory Education in Community Colleges," and Dr. Henry Fea discussed "The Affective Component of Study." Dr. Roloff typifies the new wave of remedial instruction, per-

sonalization of teaching. The concept of incorporation of the classroom setting with individualized instruction in the learning center, utilizing the discipline instructor, as well as the specialist, widens the impact of educational aid available to the student. Dr. Fea examines six affective elements of study which yield evidence that the affective component may be more potent than the cognitive component. His categorizations include: the unfinished task, busy work, remembering and forgetting, time planning, rationalization, and personalization of material. The majority of the conference was planned as group discussion with four designated topics: reading, mathematics/science, English, and developmental centers. Two papers are included on reading. The first discusses content areas and informal diagnosis of level of reading attainment, and the second provides a confluent reading/writing fundamentals curriculum. (NHM)

**The Myth of Rational Evaluation.**  
Pub Date 14 Apr 75

Note—12p.; Paper presented at the Annual Meeting of the American Association of Community and Junior Colleges (Seattle, Washington, April 13-16, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
Descriptors—Accountability, \*Administrator Evaluation, \*Bias, \*Evaluation Methods, \*Junior Colleges, \*Management by Objectives, Organizational Climate, Peer Relationship, Performance Criteria, Personality

A management by objectives approach to evaluation develops performance objectives as a means of minimizing the bias related to individual judgment. This paper focuses on three variables which contribute to the presence of subjectivity in performance evaluation. The first of these is psychological and includes such factors as judgment, power relationships, and the influence of rumor. If "getting along with others," a category which can only be judged subjectively, is omitted as a performance objective, assessment is neglected on the criterion most often at the heart of dismissal. Judgment also enters the evaluation process when performance objectives are being set, and when assessing how well the administrator has achieved his objectives. The second variable which contributes to subjectivity is the atmosphere of the college. Socioeconomic and political variables must provide adequate time for the long and demanding evaluation process, and the atmosphere of the college must favor those who participate. Third, factors external to the college, e.g., laws which mandate achievement of balance in ethnic or sex categories, and supply and demand of administrators play a subtle, but significant, role in reducing objectivity. **Community Intervention in the Community College.**

Pub Date Jun 75  
Note—21p.; Based on paper presented at the Annual Meeting of the American Association of Community and Junior Colleges (Seattle, Washington, April 13-16, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
Descriptors—\*Community Control, \*Community Influence, \*Community Involvement, Decision Making, Educational Planning, Financial Support, \*Junior Colleges, Pilot Projects, \*School Community Relationship

Previous and present relationships between colleges and their communities are examined to determine the various forms of intervention, both social and economic, that will shape this relationship in the future. Four forms of community intervention are identified. (1) By its participation in college programs and services, the community is the primary determinant of institutional success. (2) Two-year colleges must rely on local and state support for their operating revenues. (3) College development can be influenced through community support on key financial issues. (4) College resources, staffing, and facilities depend on community-initiated legislation. These identifications lead to a series of recommendations that will need to be implemented if the challenge of community-based education is to be met successfully. (1) There must be an expansion of community involvement in the institutional decision making process. (2) Research and

planning techniques must be applied to the assessment of community need for nontraditional programs. (3) Community-based pilot programs should be started in carefully selected off-campus locations. (4) Participative systems of management should be implemented in community learning centers. (5) Authority for control over decision making and policy making in the learning centers should be vested in the community. (NHM)

**Honors in North Central Association Community Colleges.**

Pub Date Apr 75

Note—8p.; Paper presented at the Annual Meeting of the American Association of Community and Junior Colleges (Seattle, Washington, April 13-16, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
Descriptors—Administrative Organization, Financial Support, \*High Achievers, \*Honors Classes, \*Honors Curriculum, Independent Study, \*Junior Colleges, Rural Schools, \*Superior Students

In order to examine current institutional programming for the high achievement student, questionnaires were sent to 225 community colleges accredited by the North Central Association of Colleges and Secondary Schools. The survey considered the basic concerns of honors programming—organization, operations, staffing, student selection, financial support, and evaluation. Seventy-eight percent of the institutions responded, revealing that about 10 percent (25 institutions) have operationally-defined honors programs, and that nearly 50 percent (82 institutions) have some sort of provision for superior students. Honors programs occur most frequently in rural community colleges, and least frequently in newer, nontraditional suburban colleges. The administration of honors programs is usually through the academic affairs rather than the student affairs sector of the college. Although institutions reporting honors activity indicate a yearly average of four honors class sections, many institutions report "independent study" as an honors option. Honors enrollments are generally tallied by instructional departments, with a yearly mean enrollment of 45. (NHM)

Identifiers—\*California (Orange County)

A random sample of 3,847 residents of Orange County (California) were contacted during fall 1974 for the purposes of assessing the county's public television (PBS) viewing habits and the general awareness of and interest in televised courses for credit. This survey, conducted in the interest of KOCE, a public UHF station owned and operated by the Coast Community College District, follows a similar survey conducted in the fall of 1973 (see ED 091 015). The broad areas covered in the survey are: (1) demographic characteristics of Orange County residents; (2) public TV viewing habits; (3) quality of UHF reception; (4) number of TV sets in the household; (5) the extent of subscription to cable TV; (6) hours of daily TV set operation; (7) personal characteristics of the KOCE viewing audience; (8) the names of PBS programs actually mentioned; (9) reactions to television courses; (10) suggestions for additional television courses; and (11) the responses of the Spanish-speaking audience. Appendices include 42 tables of data, the questionnaire, and the summary and questionnaire from the 1973 survey. (LO)

Descriptors—Associate Degrees, \*Employer Attitudes, Employment Qualifications, \*Followup Studies, Job Skills, \*Junior Colleges, Questionnaires, Technical Education, \*Vocational Education, \*Vocational Followup

As part of a student follow-up system, a survey was conducted of employers of 1973-74 career program graduates of Montgomery College (MC). The survey was divided into three major areas: the value of an associate degree in the working world, an evaluation of the job preparation given to MC graduates, and suggestions for improvements in individual curricula. Although there were 280 graduates of career curricula, only 96 of them (34 percent) gave permission for their employers to be contacted. The 77 responses represent an 80 percent return rate. Graduates were working to a great degree either for private firms or local government agencies, primarily in Montgomery County. While most of the employers employ other two-year college graduates, the majority of them indicated they did not give preference to associate degree holders. On the other hand, earning an associate degree while on the job increases promotion chances and upgrades one's position in terms of job tasks and responsibilities. Job preparation and performance were viewed as adequate to more than adequate overall. Respondents indicated that they would hire other MC graduates in the same skill area. The findings of this study were seen as virtually identical to those of a similar employer survey conducted in 1973. Data are tabulated, and the survey instrument is appended. (NHM)

Descriptors—Annual Reports, Behavioral Objectives, \*Community Service Programs, Group Activities, Individualized Programs, Junior Colleges, \*Program Evaluation, \*Senior Citizens, \*Social Services, \*State Programs

Identifiers—Hawaii

The Hawaii State Senior Center, which is sponsored by Honolulu Community College, provides health services, counseling, adult education, community services, and recreation and leisure activities. Enrolled membership is 2,080. The sixth fiscal year marked the first year that the Center was wholly supported by State General Funds. The status of the project is discussed in relation to its individualized services component and group activities component. Statistics are presented to assess the attainment of four project objectives: the establishment of the concept of a central meeting place; the increase of opportunities for older persons; the provision of opportunities for agencies to deliver integrated and coordinated services; and the opportunity to individualize services to older persons. The six appendices present a competency-based taxonomy of objectives for individualized services, group activities, and community development domains; discuss the objectives and accomplishments of Center social groups; present the proceedings of a leadership workshop; evaluate instruction in group activities; present the findings of a Center evaluation study; and discuss needs assessment and accountability. Descriptors—Clearinghouses, \*Community Colleges, Curriculum Design, \*Females, Financial

Support, \*Junior Colleges, Publicize, Questionnaires, Resource Centers, School Community Relationship, Special Programs, \*Womens Education, \*Womens Studies

In order to discover what kinds of programs and services were being provided for female students and community members, a survey was designed and mailed to the deans of students of all public community colleges in the United States during the fall of 1974. The data presented here represent responses from 577 institutions (88 percent). The survey instrument consists of nine questions designed to elicit responses in the areas of special curriculum and program design, funding, the availability of a women's resource center, community-school interrelationships, publicity, the degree of concern for women, and the need for a national clearinghouse on women's programs at community colleges. Over half of the responding institutions offer special programs for women which currently take two major forms: specialized credit courses in academic areas and non-credit offerings. Most of these programs are financed directly by the colleges or by student tuition. Respondents reported that various methods are employed to inform women about programs and campus activities. Only 73 institutions (12.7 percent) have women's resource centers in operation. While there is considerable concern for women students in the colleges, one-fifth of the deans still perceived "little concern." Almost half of the respondents believe that a national clearinghouse would be helpful. (NHM)

Note—31p.; Papers presented at Annual Convention of the American Association of Community and Junior Colleges (Seattle, Washington, April 15, 1975)

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**  
Descriptors—\*American Culture, College Role, \*Community Services, \*Futures (of Society), Social Problems, Social Structure, Social Values, \*Sociocultural Patterns, \*Technological Advancement

This document compiles three Forum 40 addresses. Dr. Hakanson, a community college president, believes that unless we can successfully introduce the human dimension into our technologically based and production oriented culture, we will continue to see increasing disaffection among larger and larger segments of the population. He postulates a "creative society" in which social units will be structured so that people can and will identify with them, and with each other. If schools are to take a leadership role in structuring such a society, they must expand many of the activities going on today under the banner of community services. Schools and community colleges will become distribution centers for social and health services. Carl Hough, a Boeing Company administrator, focuses his remarks on the technological forces which may influence change, including lasers, computers, and satellites. Miner H. Baker, a working economist, stresses human elements rather than technological forces. He sees a movement toward an older, more stable population, living in a social structure without racial or sex discrimination. He sees an end to environmental and energy problems, but a continued inflationary thrust in the economy at a level well above the historic average. (NHM)

**A Community College President--What's That?**  
Forum 45.

Pub Date 16 Apr 75

Note—25p.; Papers presented at Annual Convention of the American Association of Community and Junior Colleges (Seattle, Washington, April 16, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
Descriptors—\*Administrator Role, College Administration, \*Junior Colleges, \*Leadership Responsibility, Political Influences, \*Presidents, School Community Relationship

This document compiles the Forum 45 major address and the responses of three reactors. Dr. Cosand's paper seeks to define what constitutes a top quality community college president. There are many styles of presidential leadership; however, the possibility of a president's providing strong and enlightened leadership depends on his

effectiveness in listening, planning and research, delegating responsibility, and on his personal integrity and consistency. The president, by nature of the office, has the never-ending responsibility of coping with both internal and external problems, including problems on the board, with other administrators, with the faculty, and with students. In addition, there are continuous problems of differing complexities to work out with the community, with local and state politicians, with business, industry, labor, the professions, and the media. The first reactor, the president of a small rural college, amplifies upon Dr. Cosand's remarks, especially with respect to the relationship between the college and the state and federal governments. The second reactor defines the setting as the dictator of the extent to which certain skills are requisite for effective leadership. The third reactor provides his own definition of a community college president, based on Dr. Cosand's model. (NHM)

Descriptors—Curriculum Development, \*Curriculum Planning, Experimental Programs, \*Integrated Curriculum, \*Junior Colleges, \*Liberal Arts, Rural Schools, Thematic Approach, \*Unified Studies Programs

Identifiers—\*Change in Liberal Education Project, Delphi Technique

Mendocino College (California) is participating in the national Change in Liberal Education Project, which attempts to design comprehensive liberal arts curricula around a single unifying topic. The program at Mendocino focuses on the World Food Crisis, an area of study which is well-suited to the agricultural character of the local community. In order to achieve consensus on the curriculum goals of the program, the planning team participated in a modified Delphi study. Three goal categories—Knowledge, Skills and Abilities, Attitudes and Values—were considered separately, and formed a basis for further development of specific instructional objectives in each of the related disciplines of the project. An explanation of the Delphi technique employed and the results obtained in one of the goal categories, Knowledge, are included in the document. The author closes with a brief statement of the intended outcomes of the college's 36 credit hour program, which includes courses in the humanities, social sciences, and natural sciences. (LO)

**A Profile of First-Time Students at Virginia Community Colleges, 1973-74.**

Virginia State Dept. of Community Colleges, Richmond.

Pub Date May 75

Note—33p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—Age, \*Aspiration, Career Choice, College Choice, Educational Objectives, Females, High School Curriculum, \*Junior Colleges, Males, Marital Status, Parental Background, Race, \*Socioeconomic Background, \*Student Characteristics, Student Transportation

During 1973-74, information was collected from nearly 30,000 first-time students at Virginia's 23 community colleges, using the student data form which is appended. The findings were processed by computer, and are organized into five parts: (1) demographic characteristics, including sex, race, age, marital status, home area, and distance from home to college; (2) academic characteristics, in terms of high school curriculum and class standing; (3) socioeconomic background, including parents' education, occupation, and income, and students' income; (4) educational and occupational goals; (5) means of transportation to college. The population included higher percentages of older students, married students, veterans, and military personnel than in national norm group populations. Most

new students had been in a general or college preparatory curriculum during high school. Although high school class standing did not prove a reliable indicator of general program choice, many students' career and academic choices and goals seemed to reflect their parents' socioeconomic background. The narrative is accompanied by frequent tabulations, and a more detailed breakdown of the data by sex, race, program area, and full or part-time status is appended. (NHM)

Identifiers—\*North Carolina

The North Carolina Department of Community Colleges offers a variety of services which are intended to enable institutions within that state to identify, develop, and deliver their services in an efficient and effective manner. This document provides the local institution with a suggested model which might be used in the preparation of long and short-range plans that are consistent with statewide planning efforts while remaining sensitive to the needs of the students and labor markets within the communities served. A major planning service that is discussed in detail is the use of enrollment projections by major program area at the regional and institutional level, and occupational and training requirements projections at the regional level, in the preparation of the local institution's long range assessment of facility and staff needs. A manpower requirements model for an 11 county area is used to illustrate the type of data which is available. In addition, the approaches used by one institution to disaggregate such data for local use are included. (Author/LO)

Descriptors—\*Adult Education Programs, Community Services, Consortia, Cooperative Planning, Financial Support, \*Junior Colleges, \*Older Adults, \*Pilot Projects, Program Planning, \*Senior Citizens

The American Association of Community and Junior Colleges organized a consortium of five observation and demonstration colleges to implement pilot programs aimed at older adults. Site selection was made on the bases of geographic dispersion, community variation, economic characteristics, and the proportion of older adults in the population. This publication consists of five papers, written by practitioners in the field, describing activities of the colleges involved in the project: Tri-County Technical College (South Carolina), Clackamas Community College (Oregon), Community College of Allegheny County (Pennsylvania), Flathead Valley Community College (Montana), and Southeast Community College (Nebraska). The activities described represent customized responses to local conditions, but offer practical advice on what can be done to improve the quality of life of older adults and how to get started. The colleges show a high degree of responsiveness to community needs, and a leadership capability through work with not only senior groups and individuals, but also agen-

cies and organizations. In each case the participating college was able to identify local resources to pool together with external funds to launch a comprehensive array of new services. (NHM)

Descriptors—Evaluation Methods, \*Faculty Evaluation, \*Junior Colleges, Nursing, Questionnaires, \*Student Participation, \*Team Teaching

A "student evaluation of instruction" survey instrument applicable to team teaching was designed and administered to a pilot group of 27 students enrolled in Alvin Junior College (Texas) nursing courses during the 1974-75 academic year. Statements on the survey form were divided into three segments: those dealing with team preparation for teaching; those dealing with implementation of teaching or what the teaching did for the student; and those for student comments dealing with what was done well in the course and what should be done to improve the course. Responses were analyzed by number and percentage in each of five rating columns: outstanding, superior, competent, fair, and less than fair. Results indicated that the form was applicable to the teaching approach, and that the data generated could be useful in facilitating learning and teaching in other nursing courses using team teaching. A survey of the literature is included, and data is organized into tables and graphs. (NHM)
